Ontario Institution for the Blind.

Parliament Buildings.

November, 10. 1904.

Sir,—I beg to transmit herewith the Thirty-third Annual Report upon the Institution for the Instruction and Education of the Blind, at Brantford, for the year ending 30th September, 1904.

I have the honor to be, Sir,
Your obedient servant,

R. W. Bruce Smith,
Inspector.

The Honorable J. R. Stratton, M.P.P.,
The Provincial Secretary,
Toronto.

Parliament Buildings,
Toronto, November, 1904.

To His Honor The Honorable Wm. Mortimer Clark, *etc., etc., etc., Lieutenant-Governor of the Province of Ontario.*

May It Please Your Honor:

I have the honor to submit herewith the Thirty-third Annual Report upon the Institution for the Education of the Blind, at Brantford, for the year ending 30th September, 1904.

I have the honor to be,
Your Honor's obedient servant,

J. R. Stratton,
Provincial Secretary.

THE INSTITUTION FOR THE EDUCATION OF THE BLIND.

In submitting the thirty-third annual report of the Ontario Institution for the Education of the Blind, at Brantford, I beg to solicit a perusal of the reports of the Principal and examiners for full particulars in regard to the management and progress made by this institution during the past year.

The number in attendance varies but slightly from that of last year. The new year of the institution opened September 28th, 1904, with an attendance of 104 pupils. During the vacation considerable attention was given to provide for some much needed repairs and renovations in the buildings, so that when the pupils assembled at the commencement of the fall term the buildings were in a satisfactory condition. In this as in all other public institutions it is best economy to watch carefully for the various structural defects as they appear, and have repairs promptly made. To secure this a liberal appropriation for repairs and alterations is very desirable. It is now more than thirty-two years since the institution was completed, and in this country the life of a building in use that long shows the marks of age unless there is constant and vigilant attention to repairs as soon as needed. The roads, walks and lawns have been much improved during the year so that when the session opened in September many improvements were noticeable.

The institution was regularly inspected by my predecessor, and since my promotion to the inspectorate, I have had an opportunity of making one visit and becoming acquainted with the manner in which the institution is conducted, and the praiseworthy efforts which are being made by the Principal and his staff to ameliorate the condition of the afflicted committed to their care.

The St. Louis Exposition this year has afforded the world an illustration of the advancement made in providing educational facilities for the blind. In addition to exhibits exemplifying methods of teaching the Blind, there was a large and highly interesting display of the products of pupils in different institutions throughout the world. Principal Gardiner was present at the meeting of the American Association of Instructors of the Blind at St. Louis in July, and presented a paper, which he has incorporated in his annual report, as well as furnishing a summary of the proceedings of the association. From the report of the meeting it will be seen, where trade industries are encouraged in training the blind, that broom-making is the favorite employment in American institutions. Heads of New York and Massachusetts institutions have largely been inclined to refuse to teach the trades altogether, claiming that the state should merely provide a general education coupled with manual training. There seems a marked tendency at present in that direction.

There is cheering evidence that blindness, so often the result of lack of attention in early childhood, is gradually becoming less frequent in Ontario. In these days when medical investigation has done so much to seek out and demonstrate the nature of first causes, and when so much has been accomplished to familiarize us with causative relations, we can reasonably anticipate that efforts for the prevention of blindness will not go unrewarded. The care that is now taken to provide asepsis, or in plain terms the diligent attention to secure as far as possible absolute cleanliness, is certainly becoming an important factor in the prevention of the loss of sight. That blindness is often due to lack of attention to the eyes in the early days of childhood is now admitted.

If we could arouse full knowledge by everyone of the importance of having the eyes of infants and children faithfully looked after and diligently

treated whenever there is the slightest appearance of secretion or other indication of inflammatory action, much more would be accomplished. The time for this much needed attention is from the moment of birth until the age of childhood is passed. But it is particularly to infantile ophthalmia that attention needs to be directed. If the people generally became aware of how blindness in a large measure might be prevented one of the best blessings of this new century might be along this line to prevent a most distressing affliction. I have thought the Provincial Board of Health might with great advantage to the general public take this matter up and in some way assist in bringing directly home to the people a knowledge of the importance of strict attention to the care and treatment of the eyes in infancy and childhood.

Not many years ago smallpox was known to be a cause of blindness, and the history of many epidemics of that loathsome disease records many instances where loss of sight was a distressing sequela. Since vaccination has become imperative the number of cases of smallpox is not only greatly lessened, but where the disease does occur in spite of vaccination the symptoms are so much modified that the instances of blindness following the disease are becoming much less frequent.

We have therefore reason to hope that along the lines of prevention much will yet be accomplished. In nearly every instance where blindness in childhood is traceable to inflammatory conditions the neglect is in the home, and the mistake there made is in regarding as a slight and trifling ailment a condition which if allowed to go unchecked may result in depriving an innocent child of one of the greatest gifts to humanity. If parents and teachers will recognize that blindness may often be prevented, and that no affection of the eye or its membranes in early childhood can with safety be neglected, we shall do much to lessen the frequency of the affliction. We have reason for encouragement with the progress that has been made, for there are certainly fewer blind children in Ontario to-day than there were twenty years ago. Much however remains to be accomplished in appreciating the utmost importance of early attention to even the mildest forms of eye affections in early childhood.

I am pleased to note that the expenditures for maintenance at Brantford Institution for the Blind contrast so favorably with similar institutions in other countries, and it is very satisfactory to know that the general management during the past year, as may be learned from a perusal of the pages of this report, has been so satisfactory.

My visit of inspection impressed me with the conviction that as the work of the institution is so largely educational it might be of great advantage to have at least a greater part of the inspection come under the Education Department. I therefore beg to submit this suggestion for consideration.

PRINCIPAL'S REPORT.

R. W. Bruce Smith, Esq., M.D., Inspector:

Sir,—I have the honor to submit my Report for the year ending September 30, 1904.

Referring to the Report which I prepared for the Inspector's consideration a year ago, you will observe that the provision of suitable, remunerative employment for the Blind was a prominent topic. That question has not been solved, and its urgency is my excuse for reverting to it at considerable length in this Report.

The St. Louis Convention.

Pursuant to instructions, I attended the Seventeenth Biennial Convention of the American Association of Instructors of the Blind, held in the Hall of Congresses, Louisiana Purchase Exposition, St. Louis, Mo., July 20-22, 1904. The place of meeting was a portion of the new buildings of the Washington University, temporarily used for Exposition purposes. I went to St. Louis a couple of days in advance of the opening of the convention, and utilized the time in a general study of the exhibits, with particular attention to the Education building, a corner of which was set apart for the exemplification of methods of teaching the Blind, and for the display of the products of Schools for the Blind.

The Missouri School, which is located at 1827 Morgan street, St. Louis, showed pipe and reed organs, a piano and specimens of music written in the American Braille system; mattresses stuffed with cotton; broom corn and an inexpensive machine for the manufacture of brooms; sewing machines, Kindergarten tables and chairs, a brass relief map of the Fair grounds, spelling papers, specimens of Braille writing, Kindergarten products, specimens of sewing and knitting, embroidered underclothing, brooms and whisks.

The Portugal Schools, located at Lisbon and Oporto, contributed a collection of very neat small baskets made of willow and cane; a stenographical method for the Blind and a dotted alphabet following the general outlines of the Roman alphabet, to be read with the eyes or fingers.

The Kentucky Institution, situated at Louisville, showed the products of the American Printing House for the Blind in New York Point; maps of the continents; brooms, whisks, fancy baskets, Kindergarten products, bead work, fans, small mattresses, baby clothes, cane chair work, and a considerable quantity of carpenter work.

The Ohio Institution, Columbus, showed some good specimens of types writing.

The Illinois Institution, Jacksonville, showed a bench, vise and other appliances for carpenter work, with towel rollers, shelves and other products; also clay and raffia from the Kindergarten; mats, sewing, knitted and crochet work.

The Massachusetts School and Perkins Institution, South Boston, showed photographs of the buildings and classes, outline maps, wood work, knitted and crochet products.

The New York Institution showed small baskets, netted goods, etc.

The Pennsylvania Institution, Overbrook, showed photographs of the new buildings.

A Chicago manufacturing firm had a display of globes, desks and chairs.

These exhibits were not very attractively arranged, nor were they as extensive as might have been expected with the wide area to draw from. But the general educational exhibits from the several States, and from many of the countries of Europe, would require weeks to examine and many pages to describe.

The programme of the Convention was as follows:

Wednesday, July 20, 9.30 a. m.—Addresses of welcome. Hon. D. R. Francis, President of the Louisiana Purchase Exposition; Judge J. H. Hawthorne, of the Missouri State Commission; Hon. W. T. Carrington, State Superintendent of Public Schools of Missouri; Dr. H. M. Post, of the Board of Managers of the Missouri School for the Blind.

Addresses, by John E. Ray, President of the Association, and others.

Transaction of Business. Report of Special Committee on Exhibits at the Louisiana Purchase Exposition, S. M. Green, Chairman.

Report of Executive Committee, Wm. B. Wait, Chairman.

Paper. "Discipline; Should it be for Restraint or for Development?" Rev. G. L. Smead, Ohio. General Discussion.

Thursday, July 21, 9.30 a. m.—Transaction of Business. Report of the Treasurer, W. L. Walker, South Carolina. Report of the Special Committee on Congressional Legislation Relating to the Higher Education of the Blind. J. T. Rucker, Chairman.

Paper. "What Occupations will Provide a livelihood for the Young Men and Young Women who Outgrow the School?" "How Can the Physique of those who are Naturally Indisposed to take Adequate Exercise Best be Improved?" H. F. Gardiner, Brantford. Discussion.

Friday, July 22, 9.30 a. m.—Transaction of Business.

Paper, "Free Education for the Blind; its Dangers: the Remedy." H. L. Piner, Texas. Discussion.

Paper. "The Course of Study; the Articulation of the Literary, Musical and Industrial Departments." Lapier Williams, Kansas. Discussion.

Election of Officers.

Adjournment.

The distinguished gentlemen who were on the programme for addresses of welcome were conspicuous by their absence, but their work was satisfactorily performed by a substitute in the person of a St. Louis teacher, and President Ray replied appropriately. Rev. Mr. Smead's paper on Discipline was carefully prepared and well delivered, but as the meeting had opened long after the advertised hour, and the time for adjournment had long passed, there was no discussion upon it.

At Thursday's session the Report of the Committee upon Higher Education contained a draft of a Bill to provide that qualified students between the ages of 21 and 25 should be provided with scholarships, at the expense of the nation, to enable them to pursue their studies. There was no dissent from the principle of the Bill, but different opinions were presented with regard to the proper ages for the beginning and end of the course, some urging that the scholarship might be granted to youths under 21, and others declaring that men of 35 or 40 should not be shut out. Finally it was decided to leave discretionary power as to verbal changes in the hands of the Committee.

Before reading my Paper, to which the Chairman of the Executive Committee had appended such a formidable title, I made a few introductory remarks, expressing my regret that it had been decided on the previous day not to have the proceedings reported by shorthand, and my disappointment that there had been no discussion upon Rev. Mr. Smead's Paper. One topic referred to in that Paper was the behavior of blind pupils at table, and I would have liked to know whether the practice in the democratic United States was for the teachers to eat at the same tables as the pupils, thus affording opportunity for instruction in table manners. My own Paper, I said, was inquisitive rather than instructive, and it would hardly be profitable to read it unless it provoked discussion and elicited information from men with more knowledge and experience than I possessed. As Lord Randolph Churchill said about Mr. Gladstone, I was "Old Man in a Hurry," and I wanted to learn all about the management of the Blind in the shortest possible time. I then read as follows:

"Employment for the Blind—Improved Physique.

"By H. F. Gardiner, Brantford, Ontario.

"Appended to the notice of this convention, sent me by the Chairman of the Executive Committee, was a request that I should mention any topic I would like to have considered. I replied that I was anxious to learn about employments that would provide a livelihood for the young men and young women who pass through the school for the Blind; also I wanted to find the best way to improve the physique of the boys and girls who are indisposed to take proper exercise. The Chairman thereupon asked me to prepare a few lines which would introduce these subjects for discussion.

"I was aware, from reading the reports of previous Conventions, that these topics were by no means new. They had been quite fully discussed, on more than one occasion, by gentlemen whose experience qualified them to give valuable information; yet it was not to be assumed that the last word had been spoken. I could not glean from any of the reports on the shelves of the Ontario Institution for the Blind that the problem of profitable employment for the Blind had been solved; nor that a sure method had been found to give rosy cheeks and an erect carriage to a lazy, listless or anemic youth.

"In the Institution at Brantford, Ontario, the boys are taught, in addition to the usual literary subjects, music, piano-tuning, willow basket-making, cane chair-seating, hammock-netting and the making of horse-nets. The girls are taught music, knitting, crocheting, hand and machine sewing, netting and bead-work; and there is a small class in domestic science.

"There are a few ex-pupils of the Institution who have made, and are making, a decent living at the basket trade, but the general impression seems to be that there is little or no profit in it, on account of the competition of veneer baskets made by machinery, chip baskets made by the Indians and willow baskets made by sighted labor in factories. For cane-seating there is little demand in the way of repairs, old chairs being provided with perforated wooden seats at smaller cost than that of cane.

"These circumstances have tended to popularize piano-tuning to such an extent that, if the pupils of the O. I. B. were allowed absolute choice of their occupations, the willow and cane shop would be deserted, and we would be compelled to provide a dozen more pianos for tuning instruction and practice, which in turn would necessitate a considerable addition to our already overcrowded buildings. Pupils are so persistent in their applications for instruction in tuning that I fear some who are not qualified by nature to succeed in that trade are wasting their time at it, to the neglect of things that might be of real use to them. They get through with the literary curriculum in a few years, and as the limitation of the number of pianos makes it impracticable for any one pupil to work at either piano practice or piano tuning more than three hours per day, there is too much loafing about the premises, to the detriment of mind and body. A boy with his sight spends five years in learning a trade, and works in a shop nine or ten hours each day. How many years should it require for a blind boy to learn the same or a similar trade, when he works at it only two or three hours per day? The average boy at school or college is in a hurry to get through, so that he can begin to earn money. Possibly the boy in the Blind Institution reasons that he will not be able to make a much better living after he acquires his trade than he is getting in the school, free of cost to himself or his relatives; therefore why should he be anxious to graduate?

"Then there is to be considered the danger of overcrowding the market for tuners. In Canada we have had several years of great prosperity, and the piano factories have been working full time, but in the years of depression, which experience teaches us to expect, there will naturally be a curtailment in this industry, and many piano-tuners will be thrown out of employment. Happy will be the man who has another string to his bow.

"In my brief experience of a single session as Principal of the Ontario Institution for the Blind, I have observed that the hope of immediate personal profit is the greatest incentive to industry. It is the custom with us to permit the pupils to sell hammocks, horse-nets, knitted goods and beadwork, they paying for the materials, and thus many of them obtain their pocket-money. Some of the young men wished to tune pianos in the city for pay, but that I would not permit, for the reason that the pupils, boarded and lodged at Government expense, should not be allowed to take work and wages away from tax-paying residents of the city who have themselves and their families to support. The products of work in the basket shop and sewing room are the property of the Institution. Our boys therefore prefer hammock-making to basket-making and our girls like the knitting room better than the sewing room.

"From the reports of several Institutions in the United States I gather that broom-making is a favorite occupation. In Ontario we would have to import the broom-corn (free of duty), and to compete against factories employing sighted labor as well as against prison-made brooms. Nevertheless, one man, who has very little sight, reports to me that he makes a plain living for himself and his wife by the manufacture of brooms in his own house, most of which are sold in his immediate neighborhood. I would be glad to learn how much an industrious man can earn at this trade.

"Mr. W. Martin, Manager of the Royal Blind Asylum, Edinburgh, in his Paper on 'Industrial Employment for the Blind,' (1902), recommends the manufacture of bedding—mattresses, pillows etc., of hair, wool, cotton, grass, fibre, feathers—; basket-making, cane-seating, rope and twine spinning, net-making, brush-making, mat-making, cork fenders and cushions, weaving of rough carpets and bed-covers, sewing of sacks, straw bottle-covers, wood-cutting, knitting and sewing. Some of the trades which are fairly remunerative in Britain might not be suitable for this continent, and I have referred to the above list with the hope of getting the results of American experience regarding the several items.

"Coming to the second branch of my subject, the improvement of the physique and carriage of the pupils, I have been much interested in the references to dancing and military drill which I found in reports of former Conventions, and I would be grateful for further information on these lines. We have at Brantford a fairly well furnished gymnasium on the boys' side of the building, which is used at stated periods by the girls. But this of itself is not sufficient. Pupils huddle about the steam-coils in winter when the temperature in the building is 65 to 70 degrees, preferring an excess of artificial heat to stirring their blood by action. Then the drooping head and groping walk require a remedy. What shall it be? From the depth of my inexperience I respectfully present these inquiries."

Discussion on the Paper.

James T. Rucker, Principal of the West Virginia School for the Deaf and Blind, opened the discussion, referring to the advantages of life in the open air and mentioning a book which described the Japanese system of physical training.

Lapier Williams, Superintendent of the Kansas Institution for the Blind, suggested that the construction and location of the buildings could be made to solve the exercise problem. At the Kansas Institution the pupils had to walk a considerable distance from the living house to the school house, in all weathers, and thus both motion and fresh air were obtained. He was not sure that it was the proper duty of an educational institution to teach trades, but of all other trades for the Blind he preferred broom-making.

George S. Wilson, Superintendent of the Indiana Institution for the Blind, thought that a great object of our institutions should be to make the Blind fit to mingle with the world at large. He allowed great liberty of individual action, such as pupils going alone upon the streets, as a means of developing courage to confront all classes of people. He regarded the ability to sell brooms and other things as more valuable than the ability to make them.

A delegate from Mississippi spoke on the teaching of tuning, holding that only selected pupils should be permitted to learn that trade.

C. R. Showalter, Superintendent of the Wisconsin School for the Blind, Janesville, told of a workshop for the adult blind that had been established in Milwaukee, where basket-making is the chief industry. The workers are not boarded. Their wages are paid weekly. The Superintendent does the buying and selling. A market has been found and more goods could be sold than can be produced. The men earn $5 to $6 per week. Mr. Showalter said that after a course in manual training it was easy to learn a trade. He tried to keep his pupils in health by "field-work," foot-racing, jumping, throwing the discus, and a species of football. The girls who had some sight played basket-ball and croquet. The social side of life should be developed. He recommended carpet-weaving as a proper industry for boys and girls—using the hand-loom. They had made nice rugs from old ingrain and rag carpets.

M. Anagnos, Director of the Massachusetts School and Perkins Institution for the Blind, South Boston, made a feeling reference to the late Mr. Dymond, whom he had met at many conventions, and paid a neat compliment to Mr. Dymond's successor. The first Blind Institutions in America, Mr. Anagnos said, at Boston, New York, and Philadelphia, were industrial. Experienced teachers were brought from Scotland, and a long list of trades was tried. Basket-making was thoroughly tried in New York in the forties and was found unprofitable and abandoned. The experience of Massachusetts and Pennsylvania was similar. It was revived in 1878 in the Ontario school, the Trades Instrutor there having adopted models for the baskets, the willow being grown cheaply on the Institution farm and the protective tariff then adopted ensuring a good price. But the Convention had heard to-day that the basket trade in Canada was going through the same experience which it had previously encountered in the States he had named. Nor is broom-making a trade at which a large percentage of the workers can support themselves. The west has some advantage over the east in the purchase of the corn, having fewer commissions to pay. Boston cannot make profit in this manufacture, and generally there is more to be made in selling brooms than in making them. Very few of the blind in Europe are self-supporting. Three-fourths of them are paupers, some earn a part of their living, and two-thirds are supplied by alms. In Germany and Italy the making of baskets is profitable, but not in Canada or the United States. Baskets are used for many purposes in the European countries, where the people are far less wasteful than on this side of the Atlantic. He (Mr. Anagnos) had visited nearly all the Blind Institutions in Europe and he had collected a library of 2,000 volumes in 19 languages relating to the Blind, so he spoke with

knowledge when he said that no country could compare with America, including Canada (cheers), in its methods of dealing with the Blind. Yet 30 per cent. of those who went through the Massachusetts school were incapable of earning a living. He agreed with the idea that only selected candidates should be permitted to study tuning in schools for the Blind, men of good morals, intelligence, address, deportment and mechanical skill. A fellow with bad habits, such as chewing tobacco, would disgust patrons and harm the prospects of deserving blind tuners. The 250 pianos owned by the city of Boston were tuned by the graduates of the School for the Blind. Mr. Anagnos closed a most interesting address by a description of manual training and its benefits.

On motion of Mr. Wait the discussion was closed and the Report on Congressional Legislation was taken up.

Should Trades be Taught?

On Friday, in the discussion of Mr. Lapier Williams' Paper on "The Course of Study; the Articulation of the Literary, Musical and Industrial Departments," Mr. Wait, of the New York City Institution, was the principal speaker. He took very strong ground against teaching trades in Blind Schools, affirming that the blind youth should be given the same kind of education as their seeing brothers and sisters, and then left to find their vocations. In the New York Institution, he said, manual training was given, but trades were not taught. When the idea of educating the Blind was taken up in America, about the year 1833, the present system of free education for all the people had not been introduced. There was an educated class, but the prevailing notion was that the poor should work, not read. Thence came the workshop plan, which had not been very successful anywhere, and which he had managed to get rid of in his school. The seeing boy is not expected to learn a trade while pursuing his literary course. Why should more be required of the blind than of those who can see? Mr. Wait criticized the mercenary spirit developed by permitting pupils to earn money for themselves, and did not believe that the incentive of immediate personal profit should be relied upon to any extent to make pupils industrious.

I ventured to suggest that the obligation of each generation to earn its own living was as binding in 1904 as it was in 1833. Take two boys, one with sight, and the other without. They have equally good school training, and at the age of eighteen they both leave school. One can find a place and pay in a factory as an apprentice, in a store where he can learn the mercantile business, or on a farm. The other, if applying for such situations, will told that he would be in the way: that there were always plenty of boys to be had who could see. Must that boy become a peddler or a beggar? If he did not learn a trade in his school, how and where could he learn it at all?

Mr. Wait replied that the underlying fallacy in the illustration consisted in the fact that blind boys were debarred by nature from success in any of the occupations mentioned.

I was indebted to Mr. and Mrs. S. M. Green, of the Missouri School the Blind, for many courtesies, and to other ladies and gentlemen for their cordial welcome to a new member of the Association.

The schools in the following States sent to the Convention from one to half a dozen representatives each: Alabama, Arkansas, California, Colorado, Connecticut, Florida, Illinois, Indiana, Kentucky, Louisiana, Maryland, Massachusetts, Minnesota, Missouri, Nebraska, New York City, New York State, North Carolina, Ohio, Pennsylvania, South Dakota, Virginia, Western Pennsylvania, West Virginia, Wisconsin, Kansas, Tennessee, Texas,

Utah, and the Province of Ontario. Invitations had been sent to the European schools, and courteous replies were received from many of them, but none were represented except one school in France, from which a pupil and teacher gave an illustration of a new method of teaching Geography, Mr. Anagnos acting as interpreter.

Previous Discussions.

It was not to be expected that the discussions at St. Louis could be as exhaustive as some of us desired to have them, the attractions of the Exposition tending to shorten the sessions. I may therefore profitably append some extracts which I had copied from the reports of previous conventions, and from other works relating to the Blind, before going to St. Louis. Besides the questions of employment and physical culture, the establishment of industrial "homes" for the adult blind will be alluded to—a subject upon which the Inspector made a recommendation one year ago. Said Mr. Edward E. Allen, of the Pennsylvania Institution, Philadelphia:

"Nothing begets pity like blindness, and as the parents of a blind child often blame themselves for its condition, they often outdo themselves in endeavors to make up to it what they consider it to have lost. More often than not, therefore, such a child is petted, coddled, humored in everything, and spoiled. If there are other children, these are taught to give up even their own rights to the supposed rights of the blind member of the family. Such a child usually acquires ugly and disagreeable habits of body and equally unpleasing habits of mind. But more than all else harmful in its effects is the habit of sloth and inaction which this very care fosters. A child with this habit firmly fixed upon him is doomed to a life of unhappiness and failure; his existence is a curse to himself and his friends. Body and mind react upon each other; and if a child knows nothing of the activities of childhood which develop thought and invention, foster energy, perseverance and emulation, how can he be expected to grow up like other children and become their social equal? Wise parents can do much to waken and direct the natural energies and activities of their blind child. But just as physicians commonly prefer not to practice in their own families but to call in other physicians, so it is proper for the parents of a defective child to realize that to have special training from outside for it is generally the better plan. Obviously the care and labor of training and educating such a child is enormously greater than is that of training and educating a child who sees. It must be shown and taught the thousand little things that the seeing child picks up of itself through observation, imitation and constant practice. In a school where everything is adapted to the conditions of blindness, and where discipline, system, habits or order and of hygiene are insisted upon, but above all where the blind child is among his equals—where he is freed from the depressing and degrading feeling of dependence and inferiority—there at last he is given a chance to do something and be something. The average blind child, who at home is smothered with well-meant but pernicious kindness, grows up ignorant of what the world really is, and when chance throws him upon it the revelation of the truth comes to him as a dreadful shock, much as it came to blind Bertha in 'The Cricket on the Hearth,' and the parent lives to moan as Caleb Plummer did, 'Have I deceived her from her cradle but to break her heart at last.'

"Blind children cannot be under training too early. A kindergarten full of them is one of the most delightful places imaginable; delightful because these little plants, that come to it dwarfed and crooked, soon grow and straighten in the tonic atmosphere of self-revelation and of natural activi-

ties released, guided and directed. The kindergarten puts the child in touch with nature and adjusts it to all its surroundings.

"Many of the pupils, especially the girls, go home to become helpful in the family, and these live on there as centres of light and culture, and so what was once deemed a calamity may become to the family a blessing in disguise. It is not because an institution like this simply relieves human suffering, but more truly because it reveals the blind to themselves, develops their capabilities and so puts them on their feet again, that it takes its place among human agencies for restoring in some measure to usefulness and service lives visited with affliction through human wrong or neglect.

"In ancient times the blind were so commonly forced to beggary that the term 'blind beggar' became proverbial. In those days of no education and no philanthropy what else could most of them do but beg? And there were such numbers of them that they fought for standing places by church doors, and competed with one another for novel and attractive ways in which to make their blindness lucrative.

"In the remote past there were sporadic cases of celebrated blind men who were self-taught. We hear nothing about the great mass of the blind. But it is known that before attention was directed to their condition and attempts made to relieve it through education and training, the great mass of them lived, or rather existed as best they could, earning a precarious living as beggars, minstrels or mountebanks. Nowadays so many of the blind go out into the world and succeed quietly in it that we still hear little of the great mass of them; yet they are in the world and form an integral, useful part of it. Taking into consideration what proportion of our seeing population really support themselves, and what proportion of young men with sight who enter upon a business career fail in it, we are forced to acknowledge that the blind of the nineteenth century have done well—very well.

"Under elevating surroundings and the stimulus of education there have been blind people successful and even eminent in almost every profession and occupation that could be mentioned. They have been eminent in the ministry, in the law, in medicine and in science; they have been noted as travellers, boat builders, crystal cutters, sculptors and road builders.

"In a democratic community a common school training is considered the right of every child, both for the joy it brings to him and because education is known to be for the best interest of society. In our special schools for the blind, the pupils are given much more than a common school education; first and foremost, they are given a home and careful home training for nine months of the year, and in addition that special instruction which will fit them when they leave the institution to be self-supporting, if they have it in them to support themselves.

"Every year many a blind boy and girl leaves one or another of our Institutions. 'With self-respect, with proper views of the dignity of labor, with habits of industry, with good moral character, the young blind person goes out into the world with some chance, at least, of success, and if he have friends to give him a helping hand at the outset, he may finally walk alone,' and so fill his niche in life and make the world better for his having lived in it.

The Social Side.

"At the old Institution in Philadelphia the social life of the pupils was restricted by the lack of accommodations. Here, however, the social life is wholly different. Occasionally one cottage group is 'at home' to another. Teachers and officers are formally invited in. On one occasion table games are played. On another, after a short reception, the guests are conducted to

the gymnasium, which has now come to be the centre of the social life of the Institution. There such games are played as hunting for peanuts, ravelling the spider's web, sack race and blindman's buff; often there is some intellectual guessing game, but always the party ends with dancing and generally with refreshments. When the pupils get up the party they make all arrangements, providing both music and refreshments. Three or four times a year the officers and teachers of each school arrange a party in the gymnasium, but dancing has become an established feature of each one. From my experience with the blind in three large Institutions, especially those at the Royal Normal College in London, I am not easily surprised at what blind children can do, but I have not yet ceased to marvel at the readiness with which our pupils have taken up dancing. All praise is due to teachers and officers who have voluntarily taught them and danced with them. At such a party as is mentioned above each person present is handed a card bearing the order of dances, written either in ink or Braille. Below is given the order of dances of the dancing party held by our girls on the evening of February 15th, 1901. It was the first of many such parties, and as the first is worthy of record.

Order of Dances.

1. Waltz.
2. Two-step.
3. Schottische.
4. Plain Quadrille.
5. Waltz.
6. Polka.
7. Two-step.

4. Plain Quadrille.
5. Schottische.
6. Two-step.
7. Waltz.

"A good thing must not be overdone or it ceases to be a good thing. We have begun this term by allowing the boys to dance regularly only one evening a week, after study hour, and the girls one evening, likewise. These dances are informal and are but fairly well attended; but the formal dancing parties are enthusiastically attended. Once in a while a few visitors are brought in to assist. If anyone, not knowing himself to be in a school for the blind, could come into the gymnasium while one of our dances was in full swing, he would not realize for some time that many of the dancers were blind people. It is said that dancing is magnificent physical exercise; and when it is carefully restricted and properly encouraged it is surely a grand thing for our pupils, who not only benefit by the exercise it gives but also by the easy carriage and grace of movement it fosters."

Physical Culture.

A paper read at the 1890 convention, by Mr. Simpson, of the North Carolina Institution, contained the following: "A blind student, if he is to gain an honorable place among scholars, must be exceptionally strong in body as well as in mind. A good gymnasium would seem to be a very important, not to say indispensable, part of the equipment of an Institution for the blind. Hardly second in importance to the gymnasium stand calisthenics and military drill. But no prescribed form of exercise should be allowed to take the place of the natural, spontaneous play of childhood. Blind children should be encouraged to take part, whenever possible, in the games of their seeing companions, and should play similar games among themselves. The joyous excitement of children at play is a sort of moral sunshine that cleanses and sweetens the whole nature. It is a sacred birthright, the loss of which can never be made good in this life. All tendency to moping, and self-pity, should of course be promptly checked. Our pupils should be taught early the proper care and carriage of the body. The lessons intended to effect this, that

is, to establish habits of neatness and to correct awkward and unsightly movements, should be given with the gentleness of a mother and the strictness of a drill-master. Military drill and discipline for the boys, and calisthenics (and why not dancing?) for the girls, would seem to be excellent means to this end. The blind especially should make the maintenance of health a religious duty.

"Let us endeavor to instill into the minds of our pupils a passion for physical perfection—to secure to them the blessings of sound health, perfect physical purity, complete development, and all possible grace of carriage and address. Let us teach them the old Greek love of physical excellence, and, better still, true Christian reverence for the body as a sacred temple, the dwelling place of Him who 'created man in His own image.'"

Mr. Hinchee, of the Arkansas School, said: "A teacher should point with equal pride to a splendid specimen of health and development, as to one who spends the entire time in the study and class-room, and at the expense of the body, gaining first place in the class. How much easier it is to correct deformities when they are young than at any other time, for the muscular system is then susceptible to exercise, and the form can be made shapely with much less effort than if we wait until they have attained their full growth. If the chest is weak and flat, or pigeon-breasted, now is the time to remove the defect. Build up the arms to be strong and comely now; accustom the chest and shoulders to their proper place, whatever their owner is at; cover the back with full and shapely muscles; get the feet used to the work which comes so easy and natural to them, once trained aright; and the same boy who would have grown up half-built, ungraceful, and far from strong, will now ripen into a manly, vigorous, well-knit man, with sound mind and body, familiar with the possibilities of that body, with what is the right use and what is the abuse of it, and knowing well how to keep it in that condition which shall enable him to accomplish the best day's mental labor. And he will be far fitter to face the privations, anxieties and troubles of life in the most successful way.

"As part of the work which can be done outside of the gymnasium, we most heartily recommend military drill as being one of the best exercises which can be engaged in. This exercise is not liable to be overdone, and does not bring into play any very vigorous action of the muscles. This is also an exercise which addresses itself to the mind, and while it does to a certain extent render the muscles more supple and active, it does not create any more muscle, but prepares the way for exercise that will have a tendency to develop the muscular system. One of the characteristics of the blind is a shambling gait and groping attitude which this work does much to correct, and in this particular respect it is very beneficial, rendering them much more confident in their step, and enabling them to find their way about with much more ease than before.

"We must graduate our young men and women with sound, healthy bodies, as well as bright minds, so that they may be able to retain their brightness after entering upon the duties of everyday life.

"When the education of the body is made an important part of the work during the school year; when gymnasiums for the development of these young men and women are built and managed on scientific principles—then we may expect to see the blind, who have always had to battle with life under great disadvantages, come forth from school, with strength renewed, ready for the conflict which is before them; then will we see them filling acceptable positions of trust and responsibility in the places where their lot may fall, and instead of being a burden to their friends and parents, become

independent and self-supporting. When all this is done, and good results seen, all will wonder why so simple, so sensible, so effective a course, conducive to present happiness and health, and future well-being, had not been thought of and carried out long ago."

Mr. Battles said: "We have paid considerable attention to the military drill, and have always regarded it very highly, not only as a means of exercise, but as a very important element in the administration of discipline. The result is a straightening of the form and greater accuracy of movement, as shown by one that has had any drill of this character. The drill furnishes an esprit de corps that is not found in the individual gymnastic work."

Principal Dymond: "My own mind has long been made up as to the absolute necessity for systematic physical training for our blind pupils. I regard physical training as the first necessity. My idea is, no matter what it costs in the shortening of hours in other branches, that a certain portion of the day during the eight or nine months out of the twelve that the pupils are in session ought to be devoted to regular, systematic physical exercise; and I do not think it should be discontinued when they grow old enough to pass into the workshop."

Mr. Tannahill: "We regard dancing once a month, in the Iowa Institution, as a good thing. While some of those who have prejudices against dancing have some misgivings, yet I have never seen any real harm come from it, but in many cases good."

Mr. Wait: "The military drill is of importance to certain of our young men, but it would be undesirable to put girls into military training. The chief objection to it is that it is not far-reaching enough."

Mr. Jacobs: "I think we ought to teach our pupils how to breathe and how to use their lungs. We all know that many pupils come to us with round shoulders, contracted chests, feeble voices and nasal articulation. It seems to me that our chief aim should be to teach our pupils how to stand erect, how to walk, how to expand their chests, how to breathe and how to speak."

Workshops for Adults.

Thomas F. McCune, Iowa College for the Blind: "There is almost nothing that the blind may not learn to do and do well. They may be taught to cook, to do laundry work, to keep house. They can dance gracefully and can perform military evolutions with the precision of disciplined soldiers. They may become expert typewriters and telegraphers; they may become most skilful turners in wood and workers in metal: but except as educational forces or mere personal convenience such knowledge is of little avail. It is probable that in the future technical instruction in the schools will be confined to few and simple trades.

"And just in proportion to the attention given intellectual training over mere handicraft is the field of employment for the blind enlarging. The vigorous, healthy, positive and talented, suitable candidates for the higher education mentioned above, may become high grade canvassers and agents in various callings. They may become teachers and lecturers, professors of music and of abstract sciences. They may compete in all the intellectual pursuits, in which many of them are to-day serving with distinction.

"For those who have learned some trade in the schools, but who lack ability to manage, and for all that numerous class who lack home and kin, industrial establishments should be provided. These working homes have been much criticized but nothing better has been yet found. They are becoming distorted from their original design, and are taking on more and more asy-

lum features; but these defects time will perhaps correct. The proper way to care for this class of the blind is a problem that no one has been able to solve. The trustees of such institutions should have wide discretionary powers to the end that they may take advantage of any experience or theory in their judgment worthy of attention."

From the Iowa College report: "A workshop is established in Paris for the benefit of blind men. The workmen have the privilege of taking material to their homes and performing the necessary labor there, or of working in the establishment. Neither board nor lodging is furnished. This institution is not self-supporting, but is sustained by a charitable society. There is a similar shop in Marseilles.

"The industrial departments for the twenty-eight schools for the blind in Germany are made more prominent than in American schools, the German theory favoring a practical ability to make a living rather than a practically useless scholarship. Indeed, many of these departments are veritable workshops, where the adult blind are employed, but not boarded nor lodged. A German institution maintains paternal relations with its ex-pupils. Each student on his departure is furnished with tools and material. His school sells him material at cost and buys from him his products at good prices, and in case of sickness or distress, renders him all assistance in its power. The Institution at Duren pays out annually at least $1,000 for such purposes.

"In Vienna there are three workshops for adults, and one for adult Jews at Hohe Warte.

"In Russia four workshops have been established, two of them in St. Petersburg, in which the blind workman can earn from $50.00 to $80.00 per annum. Six asylums for the aged and decrepit blind are in existence wherein about 100 men and 300 women find comfortable homes.

"The thirty schools in the United States are all similar in general organization, each one comprising a literary, musical and an industrial department, and aiming to give its pupils, in the first place, a good education, and in the second place, technical instruction by which a living may be secured.

"In 1873, Mr. M. H. Hall, a blind man, established in Philadelphia an industrial home for blind men. This was the first institution of its class in the world, and to-day remains at the head of that class. In 1890 the number of workmen was one hundred and fifty-nine, the sales for the year were $55,027, while the net earnings of the men amounted to $22,393. Ohio has a home in successful operation at Iberia, and California has founded one at Oakland. Iowa expected to open one at Knoxville in the fall of 1901.

"While general education in schools for the Blind has been expanding during the last twenty-five years, technical or professional training has been contracting in a corresponding degree. This is in consequence of man's selfishness. If he must work he demands the easiest and most convenient way of doing that work, and that his co-workers make no drafts on him for services little or big. If he must manage a business, he demands help that will require of him the least care and oversight. This is perhaps but justice to himself. It prevents, however, and always will forbid, the possibility of the blind and sighted working promiscuously together save under exceptional circumstances."

Industrial Limitations.

H. F. Bliss, Wisconsin school for the Blind: "Deprived of all sentiment, the institution is practically a monument of charity, established and maintained by the generous philanthropy of a Christian commonwealth. The inmates belong to the defective classes and are universally recognized as such.

It is possible to make them happy, and in many cases to store their minds with useful knowledge, and to equip their hands and brains with a reasonable amount of skill, so that occasionally, in spite of their infirmity, they are enabled to take up the struggle of life and successfully compete with their seeing brothers and sisters. To a large majority, however, in this state and every other, the element of sympathy in liberal measure will always be necessary to ordinary success, and not infrequently to existence. I am prompted to this plain statement of fact by the sentimental nonsense that sometimes finds expression concerning the state school for the blind, and with no desire to depreciate in any way the benefits of practical education.

"The industrial work of the institution is fully up to the standard of other States, and that is not saying much for this department. The trades taught are broom-making, chair-caning, mattress and hammock-making, and carpet-weaving. It is possible for an active, intelligent boy with a combination of these simple trades to largely support himself, yet no seeing boy with the same equipment would succeed. I have looked thus far in vain for something more practical for our blind boys, and will welcome gratefully at any time, from any source, any suggestion along this line. Many of our boys are ambitious, ready to take hold of anything that presents itself, but the possibilities seem so limited that we invariably turn back to the time-honored ruts. I am satisfied that if the concentrated efforts of a dozen or twenty of our young men could be utilized in the manufacture of brooms, or any other one thing that they might make expertly by practice, the product could be sold successfully, and the labor receive fair remuneration. But this can be done only through the industrial home.

"Piano tuning is an industry that is successfully taught to a limited number of our young men. If a boy possesses musical talent and a reasonable amount of mechanical genius, and some business ability, it is possible for him to make a living after graduating from this course. Two young men left us at the close of last year, and have established themselves in what promises to be a successful business as piano tuners.

"Our girls are taught to knit and sew, and many of them are thus enabled to contribute something practical to the home life. The cooking classes introduced three years ago have been reasonably successful, and a source of satisfaction and enjoyment to the participants. They have demonstrated that a blind girl can be taught to cook, and the mother's work is frequently lightened by the aid of the daughter who formerly occupied the chimney corner.

"Light handicraft that is at all practicable for girls is extremely difficult to find, and this avenue will ever be open to experiment and improvement.

"Many people are possessed of the notion that blindness is a great aid to the development of musical talent. Observation suggests that blindness is not a blessing, and in no sense an aid to the development of any talent. The blind boy or girl who becomes a good musician by years of constant study would be a star of the first magnitude on the musical horizon, if blessed with sight."

Music as a Breadwinner.

At the convention of Blind Instructors in 1890, Mr. Jacobs said: "Permit me to say that I fully appreciate the value of a good literary education as well as the importance of high moral culture. Indeed, the intellectual and moral faculties of a human being are so intricately mingled that you cannot develop the one without, in some degree, developing the other. I believe in giving our pupils the highest possible culture—intellectual, moral and physical—that their circumstances and condition will permit them to receive. And

in this connection I wish to state that I attach due importance to the instruction given in the musical department of our schools. I do not wish to be understood as saying anything in a general way against the teaching of music. I regard it as an important and essential part of our system of educating the blind; but I am forced to repeat what has already been said, that many pupils with no special aptitude for music have been led, through misrepresentation, to give an undue amount of time to it, with the hope of making use of their acquirements to earn a living. They were anxious to prepare themselves to earn an independent livelihood, but as a matter of fact, after a brief experience in the business world, they have found that what they had spent much time in trying to acquire has been of little or no practical benefit to them in their efforts to earn a living. I claim that we should endeavor to teach our pupils such things as will be of the most practical benefit to them when they go out into the world to care for themselves.

"We all know that a knowledge of music is of great benefit to blind people. It assists to bring them into social contact with seeing people, and casts many bright lines along the dark path in which they are forced to move. Hence, we should give all our pupils as much training in music as we can without interfering with more important instruction, and we should give special attention and training to those who possess special and superior talent for the art. But in every department of our schools and in all our instruction, our chief purpose should be to lift our pupils out of the dependent condition in which we find so many of them, and fit them for self-support and a state of independence."

Mr. H. L. Hall: "After all, the great question is the bread and butter question—nothing more, nothing less. Eighty per cent. of the blind must earn their own living at some kind of labor—must in some way learn to take care of themselves, and their education should not be confined to the literary branches, but should be an all-round education."

Home Training.

G. L. Smead, Ohio Institution: "The age at which it is best for the children to enter the Institution depends very much upon the circumstances of the families to which they belong. If they can be under good influence at home, can have the care of mothers and sisters, can take exercise in the open air, can be taught the use of words, can learn to count, and commence learning to read, it is unquestionably better for them to remain at home until they are eight years old; but if they cannot receive proper care and be taught some of these things, they should come at the age of six or seven years.

"The following are some of the things which may be taught at their homes:

1. Polite behavior.
2. To count and number, and to add, subtract, multiply and divide.
3. The multiplication table.
4. To spell common words, beginning with monosyllables.
5. The meaning of common words.
6. The letters in raised and point print.
7. Items of general information. Every blind child of six or seven years old should know the points of the compass, the name of the town, county and state in which he or she lives, etc.
8. Hymns, verses of scripture, and select passages of prose and poetry, which they can understand, should be committed to memory.
9. Singing common tunes.

"The blind are, for the most part, to spend their lives among those who

have sight. It should be the aim of all who have the oversight of them to render them as much like the seeing as possible.

"They should be carefully guarded against forming any habits which will be disagreeable to others. The blind are always noticed by strangers, and their manners and habits observed more particularly than those of other persons; hence it is a very great kindness to them to prevent them from acquiring unsightly habits, or to correct them if such had been formed.

"It has been customary to encourage our workmen to locate in the neighborhood in which they are acquainted, rather than to look to the Institution for employment. The wisdom of this plan is proved by the experience of every year.

"For the blind touch and hearing must take the place of sight, and we might add what may be called muscular tact, which is closely allied to touch, or might be said to be a development or enlargement of touch.

"For the training of touch we have raised print reading and writing, the use of tangible apparatus in geography and other sciences, objects like models of animals, plants, the work and play of the kindergarten, bead work, sewing, knitting and household work. To these we might add those trades that are taught to blind men, as cane seating, broom making, carpet weaving, upholstering, etc. All these have their value not only for earning a livelihood, but also for the training of muscular tact in the use of tools and machinery.

"The accurate use of hearing is of great importance to those without sight. It is for them *the* educational sense, upon which depends much of the profit and enjoyment of the life of the blind. The means used in a school for the blind for the training of this sense are oral instruction, listening to conversation, distinguishing of tones, inflections and emphasis of the human voice, giving attention to reading, addresses and sermons. Music in all its departments is for the blind a valuable training for the sense of hearing. Indeed, from piano tuning to the highest attainment in music there must be the most accurate training of the faculty of perceiving the distinction of sounds.

"But the training of the bodily senses does not end in the mere external sense; it has its main purpose in the mental aptitude resulting from the proper use of the physical sense. Each muscular act has in it the putting forth of nerve power, and nerve power works together with mental activity. The exercise of the hands, arms and feet corresponds with certain operations of the mind. For instance, the power of attention is called into exercise with every voluntary muscular act, and the power of attention is the will putting forth the activity of the mind.

"The boy at work sorting corn in the broom shop must give attention to the quality of the corn, measure lengths and keep himself at work by his judgment actuated by the will. The girl who makes a piece of bead work gives her mind to the use of her fingers and develops the power of judgment and comparison in shaping work to the proper form. The kindergarten games and employments arouse the thinking powers of the child and direct them into wholesome activity.

"I am sure that it would be well for the blind as for the seeing to teach some things in the way of manipulation and the use of tools that do not directly aim at a money compensation or getting a living, but which have for the chief immediate object the training of the mind through the hand. Blind boys and girls can be taught the use of tools to shape and form objects of wood. Not all would succeed perhaps, but we always have some pupils of decided aptitude for mechanical work.

Persevering Industry.

"Our girls could be instructed in some things pertaining to domestic science, how to care for a house in all that pertains to thrift and neatness, how to cook all kinds of food and prepare it for the table, how to arrange a table in a becoming manner. Many of our girls will live in their homes with their parents and brothers and sisters, and their usefulness and happiness and best discipline will be promoted by their knowledge and skill in the common domestic employments.

"Then too the training of skill in one direction will lead to thought and aptitude in other directions so that our blind men and women will seek out employment that we cannot teach in an Institution. Given the development of muscle and nerve and thought and along with this training the disposition to set to work upon what may be at hand, and a blind person may engage in some employment which may be adapted to him and to the locality in which he resides. It may be some agency, the buying and selling of something that people need and upon which with energy and push he may make a fair profit.

"Some have succeeded in selling newspapers, some as music dealers, some in selling brooms as well as making them. Indeed, success in the broom trade depends upon business tact and push in selling them. Business principles are the same for all, and the blind no more than the seeing can succeed without them. There must be industry, faithfulness, honesty, integrity and energy put into every business, or there will be a failure.

"In the training and development of mind through the senses in their application to material things there is cultivated the disposition to set oneself at work, a disposition that tends to overcome the tendency to indolence and half-hearted exertion so common to human nature, from which the blind are in no wise exempt. Indeed, this indisposition to persevering exertion is the cause of many failures in the work of life, of the blind as well as the seeing.

"Any system of training that will give the blind industry and perseverance, the ability and will to lay hold of work and keep hold of it, will be especially valuable.

Reasonable Expectation.

"Notwithstanding the evident intention of this Institution many people persist in calling it an asylum, and in supposing that it is a hospital, or infirmary for the indefinite care of the blind, whether they are fit persons to receive instruction or not. The presence in the Institution of persons who are incapable of receiving instruction interferes with the legitimate work of the school, and degrades the standard of work that the intelligent pupils ought to be doing."—Note : Strange that this error should persist in the case of an Institution 65 years old.

"What shall our students do when they go out from the fostering care of our Institution? is a question that has been pressing ever since schools for the Blind were established, and it comes up with the more force as the number of educated blind increases, and the competition in the trades and professions becomes more sharp.

What are schools for the blind reasonably expected to do for those who receive instruction and go forth from them? Surely they cannot accomplish impossibilities. They cannot make finished scholars of all. Schools for the seeing cannot do that. They can make accomplished musicians of comparatively few. The tuning department can make competent tuners of those

only who are able to acquire the requisite skill of ear and hand. All possible trades cannot be taught in one establishment. Yet it is the aim of all schools for the blind, so far as possible, to fit their students to be self-supporting. In the first place our students ought to be prepared to be reputable and useful members of society. A blind man who is filthy in his person and speech, ill mannered and uncouth, dishonest and tricky, will fail of acquiring the confidence of decent people, and so far will be hampered in anything he undertakes to do. The world may pity him, but it will not tolerate him. On the other hand good manners, neatness, honesty and integrity will insure the favor of a community for a blind man as well as for any other man, and will give him a vantage ground for asking the patronage of his neighbors in whatever employment or profession he may engage. And, if to all the excellent qualities of character he adds energy and push, he is far on the road to success."

Homes for Blind Adults.

Mr. Anagnos, in 1894: "Our present system of educating the blind is not a system which will prepare men and women to take their places in the activities of life by their own ability and competency. Now, I hear quite frequently that the best remedy for this state of things is to establish homes for the blind and train the inmates in industries and give them the opportunity to learn trades. Then furnish them opportunities to practice their trades and to earn money and be independent themselves, and thus save the State considerable expense. All very good theories, but let us look at the facts. So far as homes are concerned, let me tell you it is not the best thing we can do for these men and women, to build homes for them all over this broad land. It is the worst thing that could happen to our work, this multiplicity of homes. The Institution for the blind at Vienna is one of the best in all Europe. The board of managers of that institution established a home for the blind on the opposite side of the street from where the institution is located. Now do you know that the pupils in the educational institution were in a hurry to get out of their institution and enter the one on the opposite side of the street? It seemed more pleasant over there; they had beer on the table twice a day. This home on the other side of the street was very unfortunately placed, being such a short distance from the educational institution. It certainly had the effect of making the students slight their work: they knew they had something to depend on when they got through with their studies; therefore, they did not care whether they studied or not. Although I do not undertake to say that every graduate of that institution would have been an independent man or woman and have supported himself or herself, yet I do say that a large part of them failed to succeed in life simply because of the institution on the other side of the street, which threw out such alluring promises of ease and enjoyment. That is the effect of that home there, and that will be the effect of a multiplication of homes here. They are Blind Asylums. If you aid in effecting the establishment of blind asylums in this country, you are not doing your duty to the blind of America. They will be like the institution on the other side of the street, and notwithstanding the expense attached to them, they will accomplish very little. Therefore, we need something that will strengthen the character of the blind man and woman: something that will make them able to stand on their own merits and earn their own living, and to take their places in society. There are instances where an industrial home may be of service, but I found very few instances of that kind. They are not the arrangements which should be encouraged by those who have in

charge the personal happiness, prosperity and future welfare of the blind."

Mr. Wait: "Our work is and should be confined strictly to education. I well remember my visit to the two Vienna establishments. There the path to self-dependence was made hard, while a short and open way was provided from the school house to the alms house. Our standard is that of education, by which we hope to enable our pupils to make a success in life. But some will fail notwithstanding all that may be done for them, because they do not have the make-up. They will divide, as young people in all classes are dividing every day; some will go up on high places, some will struggle along with small returns, but very respectably, and others will wander gradually downward until they become the objects of charity. It is a most complex problem, and I know of nothing like it."

Dr. Sibley, Missouri: "If a person, male or female, blind or seeing, can be brought to a proper understanding of the fact that they must provide for himself or herself, half the battle is won; but if people at school live in the belief that they will always be cared for, they will not accomplish much. And just here I want to mention the harmful effects of some homes for the blind. I do not wish to be understood as condemning such institutions, for, who familiar with the excellent establishment of Mr. Hall will not say that he is doing a noble work, and yet, in a degree, this splendid institution has its bad effects. If the whole truth were told it would be found, no doubt, that some of those who, as inmates, are sources of trial and worry, are fully capable of doing for themselves, and had they not had the doors opened to them and asked to enter, would, by application of their business tact, have accumulated ample means for a competency, instead of merely making a living and being able to save little or nothing. And I suspect that some are paid just a little more for their work than they really earn, and to this extent they are beneficiaries of charity. Homes for the blind that receive people who are able to provide for themselves are harmful, but when their object is to care for those who are not able to do so, for reasons other than that of being blind, they are worthy institutions, and should receive encouragement. As a friend of the blind and an active worker in their behalf for many years, I will say for them—and I know they will bear me out in the assertion—that they would resent the insinuation that many are successful in life simply on account of favors received through sympathy for their affliction. Too many of them have demonstrated that, in spite of an unwarrantable prejudice existing against them among seeing people, they have received attention simply because they have merited it in their work, and I believe further, that they will second me in the statement, that if a blind person is competent to care for himself and will not make an effort, he ought to travel the same road seeing people travel under similar circumstances and wind up where lazy, trifling seeing people usually do.

BLIND GIRLS.

"Homes for blind girls are open to the same objections. Some of the graduates of our school and some whose grade in school was among the best have gone almost directly from the school to the Home. Some of these I know were able to do for themselves, but there was the Home with its doors open to receive them, and rather than make the fight they surrendered at the start. I do not wish to reflect upon the intelligence or integrity of purpose of these girls, for they are among my best friends, and I have always been ready to do my might for them, and they know it; but I know them as well as anybody, have had some of them under my personal supervision in class work, and I know that deep down in their hearts—as there must be in the heart of every true woman under the same circumstances—there is that indefinable something that will not down, that must be heard, and which

says that while the possessor is to all appearances happy, something is wanting, and that something is independence—the independence that is essential to true happiness. To every intelligent being independence is the very foundation of happiness, and a happy dependent person is a combination of words without meaning. If independence is necessary to true happiness, our girls cannot be happy in homes that treat them as dependents, for no matter by what names you call them, no matter how big the gilt letters over the door announcing that the institution is an *industrial* home, if the inmates do not feel that they are in fact making enough to support themselves, there is wanting that feeling of independence conducive to genuine content. The solution of the problem does not lie in the establishment of homes for 'Our Girls.'

"I often regret that we are so situated that we cannot teach 'Our Girls' all kinds of housework, and I look forward to the day when the removal to the suburbs and the establishment of the cottage system will enable us to do so. I consider the education of every seeing girl sadly neglected if she has not been taught to cook and keep house, and while the extent to which we can educate 'Our Girls' in this direction—for they can never successfully do some housework—is limited, compared to the extent to which seeing girls can be taught, yet there is a great deal in this line that a blind girl can do. What a grand thing it would be if we could make musicians and elocutionists of all 'Our Girls' and find them positions in which they could earn a living in those pleasant lines: but this is out of the question. Some blind girls have little or no talent in these directions, and, as in all professional work, the demand is hardly equal to the supply. Let us teach all 'Our Girls' to be useful about the house. Teach them to adorn the parlor if we can. Having done this, teach them to adorn the dining room and kitchen. It is our duty, I think, to make 'Our Girls' as useful as possible indoors, for they can never fight the battle of life on the outside as well as the boys, no matter what their qualifications. The same unjust world that makes a seeing woman do more work for less pay than a man will not suspend the rules, even in the case of blind girls. Above all things teach 'Our Girls' to be industrious. Teach them to understand that there can be no genuine success in life without assiduous application. Teach them that action is the golden key that unlocks the storehouse of bounty: the wand of the magician, at whose touch a way is opened to fortune and happiness. Teach them that all work is ennobling and idleness demoralizing."

Mr. H. L. Hall: "As I understand blind girls they are as strong as boys, and there is no reason why they should not be. As to what we shall do with our blind girls, it is very well to talk about what they are to do in their homes, but some have no home. There is no reason why they should not be taught to weave carpets. It is a very healthy employment and a very remunerative one. They could learn needle work, basket work, knitting work. In the work of your schools industry is just as much of an education as literature. The blind must learn to be industrious. I now hold without the shadow of a doubt in my mind, in the light of my experience, that many of us will live to see the day when every State in this Union will have not only a school for the blind, but an industrial home for girls, and a working home for blind men."

Mr. Wait: "In regard to cooking, we have given it a trial with this result, that there is nothing that has ever been brought within reach of the girls to which they have turned with more pleasure and interest. The work includes not only the common work of the kitchen, but the subject of diet is made a study. There is a large amount of both manual and intellectual

training. In this way the girls take the bread-earning power home, and it stays there as long as the girl stays there. It is the very thing that leads them out of their surroundings. It will enable them to be contented and happy in their homes. Shall we not inspire our girls to go into their homes in this spirit? A working home for blind girls, or rather women, is the alternative when there is no parental home, no home that is secure when one cannot stand independently. Are there such? Unquestionably there will always be those in the world who are weak, whether blind or not, to whom we should extend a helping hand, and I trust that the day will come, as Mr. Hall says, when there may be such establishments open for such as these in every part of the land. If a man cannot do it all, let him earn a part. If without fault of his own he cannot earn anything, then it becomes us to see to it, whether man or woman, that he shall be made comfortable. No man or woman should be the ward of the State or of any society, except as a very last resort."

F. R. Place: New York State, as well as some other States, should have a home for indigent blind, because the blind who are now supported by the State could, if placed in a colony or home, support themselves. There are already too many persons living in idleness. Too many eating without work. Work is a pleasure; laziness is sin. The indiscriminate use of charity is a source of great evil. The greatest help that can be given to a man is to give him sympathy and teach him to respect and to help himself. Most men dislike to part with their manliness. A blind man realizes that he is a responsible being, endowed with all the innate powers of glowing thought and pathetic feeling. It seems that the adult blind have been almost forgotten. It is now in the power of the State to make this class more independent and comfortable. Their misfortune can be mitigated to a large extent by industrious occupation. The blind need not be burdensome either to themselves, their friends or the state. Blindness with proper training can mean independence; but let the blind be untrained as well as poor, and pauperism is the inevitable result.

"Let us first give to this class according to their needs; then exact from them according to their ability. There are kinds of work, even on a farm, which the blind can do as satisfactorily as the seeing can. I would not have the work accomplished at such an institution confined alone to chair-caning, mattress-making, willow-work and the manufacture of brooms. I would vary the employment, and make of it ultimately an industrial colony and home.

"There is no doubt but that the males of such an institution could be furnished with full employment, but what can the women do? It may be of some interest to the ladies present to know the answer to this question. During the past year our blind girls have made and completed 257 bead articles, 157 fancy articles, 119 sheets, 175 pillow cases, 178 napkins, 157 towels, 17 tablecloths, 19 shop aprons for men, several ironing sheets, 16 bedspreads, 24 pupils' night gowns, 25 pillows, and a few other less important articles. Besides these articles, our blind girls have made lace, capes, skirts, wristlets, ties, tidies, hoods, pin-cushions, mats, fancy bags, vests, toilet mats, gloves, mittens, hammocks, rococo work, laundry bags, slippers, harness lines, bibs, photo cases, fascinators, needle cases, hair-pin cases, slumber robes, headrests, lamp mats, crepe tissue, key racks and boxes, stationery boxes decorated with morning glories and Easter lilies, teapot holders, handkerchiefs, etc. Besides making these articles, blind women can cook and bake, wash, iron, sweep, cut out garments, wash dishes, wait on the sick, and perform nearly all, if not all, the labors of a household.

"How to employ the blind so that they may earn a livelihood has been for many years a problem unsolved. Discussion of the subject should be had with the distinct understanding that the State shall be the guardian rather than that each individual should direct his own efforts. An executive ability greater than he possesses is necessary. Most blind have energy, courage and good sense. By employment, their now inactive minds, undergoing mental starvation, will be supplied with mental food. Let us substitute sociability and intelligence for social and intellectual famine."

Attendance.

The total registration of pupils in the session of 1903-04 was 121, as against 122 in the session of 1902-03; at the opening on September 16th, 1903, there were 103 pupils as compared with 107 at the opening of the preceding session; at the close 109 as compared with 117. Of the twelve pupils who were present during a part of the session, but did not remain until the end, two (males) became homesick, two (males) were dismissed for misconduct, two (males) went home ill, one (male) went home to recuperate after an operation in the hospital for appendicitis, one (male) was called home just before the close of the session by the death of his father, two (females) went home at Christmas and did not return on account of poor health, and two (females) went home in May quite ill.

Of the 109 pupils who were present at the end of the session, there were fifty-one males and fifty-eight females.

The number of pupils in attendance at the opening on September 28th, 1904, was 104, as compared with 103 at the corresponding date in 1903, and 109 at the closing of the school term in June last. Of those in attendance at the end of the last term, 88 have returned; four former pupils, who were not here at the close of last term, have come back, and twelve new pupils have been enrolled. The absence of the twenty-one who have not returned is thus explained:

Graduated.	Male.	Female.	Total.
In piano-tuning	3	..	3
In music (Artists' Diploma, A.T.C.M.)	..	1	1
In industrial class	1	..	1
Other Causes.			
To secure employment	6	..	6
To attend other schools	1	1	2
Domestic requirements	1	2	3
Temporary detention	3	2	5
	15	6	21

Of those classified as temporarily detained, two returned to their classes a day or two after the date of this report, and the other three are expected to return at an early day, thus making the attendance equal to what it was at the close of the last session.

The ages of the new pupils are as follows:

Males.		Females.	
Twenty-eight years	1	Twenty-five years	1
Twenty-six years	2	Sixteen years	1
Sixteen years	1	Fourteen years	1
Thirteen years	1		3
Ten years	1		
Nine years	2		
Five years	1		
	9		12

Examinations.

The examination of the literary classes was conducted by Thomas W. Standing, B. A., Inspector of Brant County Schools, whose detailed Report is appended. The pupils had not been permitted to forget the principle set forth in last year's Report—that the first and great requirement was a good English education, to be supplemented, if possible, by accomplishments and manual training; but that the latter should never be regarded as a substitute for the former. Pupils were not excused from arithmetic or geography classes to cram for examinations in other departments, however anxious some of them were with regard to their favorite subjects. Mr. Standing did not look for perfection, and he did not find it, but his Report is gratifying to teachers, pupils and parents.

Musical Instruction.

Mr. Fairclough, of the Toronto College of Music, was again the examiner of the pupils studying music, and the reader is referred to his Report for details. The following is the record of pupils from the Ontario Institution for the Blind at the Toronto College of Music examinations, 1904:

Piano Diploma—Almeda Hart.
Third Piano—Mary Williams, first class honors.
First Piano—Thomas Kennedy, first class honors.
First Piano—Herbert Treneer, first class honors.
First Piano—Eva Johnston, second class honors.
First Piano—Grace Kay, second class honors.
First Piano—John Gray, pass.
Second Counterpoint—Hester Ponting, first class honors.
Second Written Harmony—Hester Ponting, first class honors.
First Written Harmony—Grace Kay, first class honors.
First Written Harmony—Mary Williams, first class honors.
First Written Harmony—Mary Macdonald, first class honors.
First Written Harmony—Grace Kight, first class honors.
First Written Harmony—Catharine Curry, first class honors.
Second Practical Harmony—Hester Ponting, first class honors.
First Practical Harmony—Mary Williams, first class honors.
First Practical Harmony—Grace Kay, second class honors.
First Practical Harmony—Catharine Curry, second class honors.
First Practical Harmony—Grace Kight, second class honors.
Second History—Hester Ponting, pass.
First History—Catharine Curry, first class honors.
First History—Mary Williams, first class honors.
First History—Grace Kay, second class honors.
First History—Grace Kight, second class honors.
First History—Mary Macdonald, pass.

Two performances at Toronto, by pupils of this Institution, were reported in the Toronto papers. Miss Maud Young passed her final examinations in music in June, 1903, but on account of the death of the late Principal there was no closing concert in the Institution: she had therefore no opportunity to play in concert with orchestral accompaniment until this year at Massey Hall. The Globe in its report of the event said:

"The next number was the first movement of Hiller's concerto, op. 69, contributed by Maud Young of the Ontario Institution for the Blind, and a pupil of Ernest A. Humphries. Miss Young of course had to play her music from memory, and she surprised the audience by the accuracy of her

performance, the certainty with which she attacked the solos after the orchestral tutti, and the general musical style of her interpretation. The feat was remarkable for a blind student."

Of the young lady who graduated this year the Mail and Empire of May 31st said:

"Miss Almeda Hart, of the Ontario Institution for the Blind, at Brantford, played an exacting programme of piano music at the Toronto College of Music yesterday afternoon. Her programme was as follows: Beethoven, "Sonata" Op. 31, No. 3 (first movement); Chaminade, "Ritornelle"; Greig, "Papillons"; Raff, "La Fileuse"; Schumann, "Evening" Phantasiestucke, op. 12; Schumann, "Soaring"; Liszt, "Cantique d'Amour." In these difficult selections Miss Hart displayed much technical facility, and a genuine grasp of the musical meaning of the works which she attempted. Great credit must be attached to her performance, and also to her teacher, Mr. Ernest A. Humphries, musical director of the Institute for the Blind. Miss Marion Grey added variety to the programme by singing two songs in very charming manner.

Entertainments.

On October 31st the pupils gave a Hallowe'en Concert, with an impromptu programme consisting of songs and recitations, and instrumental offerings on the organ, piano, flute and mouth organ. All the teachers and pupils, and a few invited guests, enjoyed the entertainment. One of the older pupils acted as chairman, and a vote of thanks was given to the performers.

On December 5th, just at noon, about seventy ladies and gentlemen from Detroit visited the school, accompanied by many Brantford friends. The Detroit gentlemen belonged to Palestine Lodge, A. F. & A. M., and were guests of Doric Lodge, of Brantford. The day being Saturday, the pupils were given an early dinner and then classes in sewing, knitting, geography, reading, writing, kindergarten, etc., were organized for the entertainment of the visitors, after which a short vocal and instrumental concert was given in the music hall. The Principal explained the design and work of the Institution and a vote of thanks, moved by Mr. Spence of Brantford and seconded by Mr. Pitts of Detroit, was tendered.

The Christmas Concert was held on December 22nd, about five hundred invitations being issued, as the capacity of the Music Hall is limited. According to the Expositor report, there was a large and appreciative audience. The hall had been tastefully decorated with evergreens, mottoes and a profusion of Canadian flags; and many were the compliments showered upon Mr. George Lambden and his skilful assistants for the beautiful effect their labors had produced. The opening speech by the Principal was a model of brevity, Mr. Gardiner merely welcoming the friends from the city and requesting that there should be no calls for encores. A long and varied programme was splendidly carried out, every number being enthusiastically applauded.

The opening number was a grand processional March, for the organ, by Whitney, which was played by Miss Mary Macdonald with no little dash and swing. Three piano numbers of splendid quality also appeared in the programme, and in the execution of pieces the performers evidenced a very marked certainty of touch and technique, which betokened very hard and earnest study and displayed a most creditable grasp of the selections. These numbers were Chopin "Polonaise" Op. 26, No. 1, by Miss Almeda Hart; Schutt "Valse Lente" and "Etude Mignonne" by Miss Mary Williams, and Moszkowski "Arabesque" and Leschetizky "Two Larks" by Mr. Ernest Burke.

Of concerted pieces there were three, "Bouton de Rose" by Delacour,

played by four boys, Charles Carruthers, Allan Eccleston, David Little and Gordon Bell; Kirchner's "Danse Ukraine" was given by four young ladies, Misses Gertrude Coll, Louise Deschenes, Matilda Sauve, and Eva Johnston; and the final number, Gounod's "Marche Cortege" from the "Queen of Sheba," was rendered by Misses Almeda Hart, Eva Bullock, Mary Williams and Hester Ponting at the pianos and Mr. Ernest Burke at the organ.

The singing of the choral class was marked by precision, clearness of tone and enunciation, and splendid attention to light and shade. Perhaps the most pleasing of these selections was the double number sung by the girls of the class, Clough-Leiter's "My Lady Chlo' " and Neidlinger's "Rock-a-Bye."

Not less popular than the musical selections were the comic dialogue, "Aunt Peabody's Christmas Visit," in which Misses Grace Kight, Hester Ponting, Grace Kay and Catharine Curry took part, and the recitations by two little maids belonging to the kindergarten class. Vashti Baldwin, a sweet little blonde of six years, recited "The Little Sunbeam," and Mary Cuneo, a pretty brunette of equal age, told the story of "The Brave Little Maid," quite winning the heart of every listener.

At the conclusion of the programme Mr. Joseph Bowes claimed the floor and moved a vote of thanks to the pupils and teachers for the pleasant evening, giving special praise to Misses Baldwin and Cuneo. Rev. G. K. B. Adams seconded the motion, indicating his preference for Miss Curry's representation of the aunt from the country. Then Rev. Father Lennon took a hand in the discussion, declaring that the evening's entertainment would compare well with any that he had attended in the same place in past years, and he had also a kind word to say for his old Hamilton friend, the new Principal. Mr. Gardiner acknowledged the vote of thanks, and said the credit was principally due to Mr. Humphries and Misses Moore, Harrington, Walsh and Lee, who had so carefully trained their respective pupils. He hoped all the friends from town would go home so well satisfied that they would be glad to come again. The proceedings closed with singing "God Save the King."

Many of the pupils went home for Christmas, but those who remained at the Institution had a pleasant time, one of the city papers reporting that "the pupils at the O. I. B. held their Christmas tree on Christmas evening—not eve—and a pretty tree it was, laden with gaudy gifts. Nobody was forgotten and some of the lucky ones got two or three helpings from the tree. An impromptu programme of recitations, vocal and instrumental music, was given, in which Misses Beatrice McCannan, Hattie Hepburn, Vashti Baldwin and Annie Mulligan; Messrs. Orville Frayne, John J. McDonald, Alex. Forbes and John Nicolson took part."

On March 1st the pupils were given their annual treat in celebration of the completion of the willow peeling. At supper time the tables were provided with an abundance of oysters, which all seemed to appreciate. At 7.30 the pupils and several friends from the city assembled in the Music Hall, where a good concert programme was given. Mr. Gardiner occupied the chair and explained that the entertainment had been engineered by Mr. Truss, the trades instructor. Ernest Burke played a piano solo, "Song Without Words, No. 20"; Mary Williams gave a song, "Dream of Paradise"; Miss Marguerite Walsh a recitation, "How Rubenstein Played"; Miss Adelia Carson a song, "Fairie Lullaby"; Mr. Kenyon an organ solo, "Choral Fantasie from Bach's Passion Music" and "Festival Hymn by Aitken"; John Nicolson, a song, "The Promise of Life"; Miss Hester Ponting, a recitation, "How Larry Sang the Agnus Dei"; Mr. Kenyon an organ solo, "Jerusalem the Golden with variations"; Miss Bertha Truss, a vocal solo; Miss Catharine

Curry, a recitation, "Seed Corn and Turkeys"; Mr. Whittaker, a solo, "Shoulder to Shoulder"; Miss Mary Williams, a piano solo, "Valse Chromatique" by Godard; Miss Grace Kight, a recitation, "How the Old Man Coasted"; Miss Hester Ponting, a piano solo, "Spring Awakening Serenade"; Miss A. Carson, a song, "Thy Will be Done"; Charles Duff, a Tin Whistle solo; Miss Bertha Truss, a solo, "Is the Way so Dark"; Mr. Kenyon, an organ solo, "Prelude and Fugue in E Flat" by Guilmant. The Expositor of next day reported that "the recitations were amusing and the singing and playing of the highest order. A vote of thanks to those who had taken part in the programme and assisted in other ways to make the concert a success was moved by Mr. John Gray and seconded by Mr. Roddy Malcolm. Mr. Truss acknowledged the compliment and told a humorous story from the stores of experience gathered during his long connection with the Institution. "God Save the King" was sung at 10 o'clock.

On May 17th a concert was given in the Music Hall by the Beethoven Club, which is composed of fourteen of the young lady pupils. The Expositor said in its report that "these students have of their own accord formed this most helpful little society for the purpose of improving themselves in the general study of musical subjects, and their good showing last night reflected great credit upon them.

"The programme was composed of ten numbers, including organ, piano, and vocal numbers, both solo and combined, a very amusing dialogue, and a most interesting paper on 'The Growth and Development of Opera,' the latter being by Miss Catharine Curry. All of the performers were warmly applauded and a hearty vote of thanks for the charming concert came from the boys' side of the school.

"The girls who form the club are Hester Ponting, May Macdonald, Eva Bullock, Matilda Sauve, Catharine Curry, Grace Knight, Anna Thomson, Grace Kay, Mary Williams, Gertrude Coll, Louise Deschenes, Mary Hicks, Eva Johnston and Alice Stickley."

The Closing Concert.

(*Brantford Expositor*, June 10th.)

Standing room only and not enough of that was "the condition not the theory" in the Music Hall of the O. I. B. last night, the large audience having been attracted by the merits of the programme and by the additional inducement of seeing and hearing Hon. J. R. Stratton, the Provincial Secretary, who, with Mrs. Stratton, arrived on the 7.14 train, and enjoyed the hospitality of Mr. and Mrs. T. H. Preston. The opening remarks of Principal Gardiner were brief and to the point, and the conduct of the programme was handed over to Mr. Ernest A. Humphries, the musical director.

The programme, which consisted of fifteen numbers, and was very attentively listened to by the tightly packed audience, opened with an organ solo by Miss Mary Macdonald. To speak of the different selections would require much space, but it is sufficient to say that every performer carried off his or her part with delightful skill and all earned the warmest applause of the audience. The singing of the Choral Class was fully up to their well known reputation for dash and spirit as well as attention to details of light and shade, this being especially noticeable in the "Song of Thanksgiving" by Rickman, in which the class had an organ accompaniment.

Concerted pieces, which are always a feature at the O. I. B. concerts, were much in evidence last evening, three delightful ones having been ren-

dered. These were Schubert's "Marche Heroique," for two pianos and organ, played by four young men (David Little and George Hopper, Charles Carruthers and Allan Eccleston) and a young lady organist (Miss Mary Macdonald); Suppe's "Overture to Poet and Peasant," played by four young ladies (Misses Gertrude Coll and Alice Stickley, Louise Deschenes and Mary Hicks), and the well known overture to "William Tell," in which the players were four young lady pianists (Misses Mary Williams and Victoria Thomson, Hester Ponting and Eva Bullock) and Ernest Burke as organist.

Especial mention must be made of Miss Almeda Hart's playing of Mendelssohn's "Concerto in G Minor," which had the accompaniment of the orchestra, conducted by Dr. Torrington. This very difficult number was the crowning point in Miss Hart's musical course, and by its successful accomplishment she became an Associate of the Toronto College of Music, a highly coveted honor among music students. At the conclusion of the piece, Hon. Mr. Stratton presented the young lady with a beautiful bouquet on behalf of her friends from St. Thomas, and Dr. Torrington warmly commended both her and her teacher, Mr. Humphries.

The recitations, of which there were four, commanded the most absolutely quiet attention of the audience, and were very delightful, the wee girls, Marie Sprengel and Gertrude James, doing particularly well. The longer pieces by Miss Grace Knight and Miss Catharine Curry showed also splendid training and clearness of enunciation.

At a convenient interval in the proceedings, Dr. F. H. Torrington, Director of the Toronto College of Music, was called upon to present the piano diploma to Miss Almeda Hart, the graduate of the year, and the certificates of the Toronto College of Music to those pupils who had been successful in the examinations. He performed his task very gracefully, and added a complimentary word for all the pupils who had taken part in the concert.

Mr. Leitch, a member of Elgin County Council, and one of a deputation of seven who had come from St. Thomas to witness the graduation of Miss Hart, also spoke eulogistically of the good work done by the Institution.

When Hon. Mr. Stratton was introduced to the audience, he was heartily cheered and his words caused general satisfaction. He said he did not pose as a model of parsimony. His aim, as official head of the Public Institutions, had been to improve them, and the members of the Ontario Legislature, Conservative as well as Liberal, were satisfied so long as honest value was obtained for the public money expended. If anything was needed to put the O. I. B. into better shape he was here to see the situation and to act upon the evidence.

After the singing of "God Save the King," many ladies and gentlemen from the audience and several of the pupils were presented to the Provincial Secretary and Mrs. Stratton.

The Industries.

In the paper I read at the St. Louis convention, which is printed on a preceding page, the position of the Institution with regard to industries for the Blind is indicated. We have given the boys what we could find for them to do—basket making, a little cane-seating, considerable hammock-netting—and several of them took a turn at bead-work. This fall an experiment will be made to test their ability at cutting the year's crop of willow, instead of hiring outsiders to harvest it. I cannot yet see my way clear to recommend the purchase of broom-making machinery, although, as I have mentioned that is the favorite employment in United States Institutions for the Blind. To provide each retiring pupil with an outfit for

"Sardarghar," Principal's Residence.

Geography Lesson.

Sewing Class.

Kindergarten.

the broom trade would be expensive, and not many of them could make such an investment for themselves; besides, one would want to be pretty sure that a machine so donated would be fully utilized by the recipient. I am still of the opinion that some pupils are studying piano tuning who might better turn their attention in other directions, for reasons suggested in the discussions reported in preceding pages, but the puzzle is to find the proper outlet for a blind man's energies. The heads of the New York City and Boston Institutions have got to the point where they refuse to teach trades at all, holding that their whole duty is done when they bestow a general education and give manual training. This idea, I found in conversation among the delegates to the convention, is entertained by not a few teachers connected with Institutions which still attempt to teach trades. I am open to conviction, but not yet convinced that it is wise to send out graduates who have not been taught to do some one thing and to do it well.

The girls have been busily employed during the past year with their knitting and sewing, and a few of them have made hammocks. A large class of little girls studied bead-work under the instruction of a pupil-teacher. Several of the female pupils hope to earn a living as music teachers, and others will be able to earn their clothing and pocket money by knitting and bead-work.

Libraries.

The following books have been procured for the Teachers' Library:
Books Which Have Influenced Me, a Symposium.
Carlyle, Rev. Dr. Alexander, life of.
Civilizations, the four, H. Wikoff.
English Prose Writers, 3 vols., George Burnett.
Goethe and Mendelssohn, M. E. von Glehn.
Harmony, E. F. Richter's Manual, J. P. Morgan.
Harmony, Six Lectures on, G. A. Macfarren.
Jubilee Singers, J. B. T. Marsh.
Ladies at Work, Lady Jeune.
Literature, its Obligations to Mothers, C. A. Halsted.
Literature of Europe, 4 vols., Henry Hallam.
Literature, Report on Dramatic.
Musical Composers and their Works, Sarah Tytler.
Musical Memories, A. M. Diehl.
Music in Public Worship, the Organ Question in Presbyterian Synod.
Music Land, Emma L. Shedlock.
Music of the Bible, John Stainer.
Music, the Power of, Anecdotes.
Music, the Story of, F. J. Crowest.
Operas, Tales of the, G. F. Pardon.
Passion Play, H. Blackburn.
Pianoforte, History of the, E. Brinsmead.
Poetry, Essay on English, Thomas Campbell.
Singing Lessons, M. Marchesi.
Travelling Recreations, 2 vols., John Howison.
Venice, History of, 8 vols., P. Daru.
Waterloo Campaign of 1815, William Siborne.
Women, Biographies of Good, 2 vols., C. M. Yonge.
The following, in point print, have been ordered for the Pupils' Library:
Story of Plants, Grant Allen.
Story of Earth, H. G. Seeley.
As You Like It, Rolfe's Notes.

Cuore, 3 vols.
Stories of Famous Operas.
History of Pianoforte Music.
Hiawatha.
Stories of Industry.
Applied Physiology, 2 vols.
Letters from Great Musicians.
Purity in Music.
Bar Sinister.
Paola and Francesca.
Fisherman's Luck.
Treasure Island.

Correspondence.

The typewriter and the point-print slate and stylus will continue to be largely used for pupils' correspondence, the writing with these utensils being more legible than the pencil-writing on the groove-card. But a test by correspondence with nearly all the pupils during the summer vacation shows the need of more practice in pencil-writing than has been customary in the past, particularly as few, if any, of the pupils will have typewriters at their homes after leaving school.

Farm, Grounds and Buildings.

The much-needed extension of the lavatory on the girls' side of the main building was constructed during the summer vacation. It is a two-story structure, well built and properly equipped, with ventilation upon approved principles. Although the boys' side of the building is larger than the girls' side, there are more female than male pupils. An extension of the girls' side, that would provide recreation room, extra room for piano practice, a room for the consolidation and proper classification of the teachers', pupils', and circulating libraries, and a "suspect" room for the sick, would be a great convenience. If at the same time a separate gymnasium for the girls could be provided, the boon would be much appreciated.

Attention has been called in former reports to the defects of the heating system—high pressure steam—by which one part of the building is too hot while another part is too cold, not to mention the annoyance of the crackling noise when steam is turned into the pipes. I am informed that the system could be converted to low pressure with gravity return at a moderate outlay and with a saving of four or five hundred dollars per year in cost of fuel.

A determined effort was made during the vacation to cleanse and renovate the whole building, a somewhat larger sum than usual having been voted for repairs and alterations. Loose and missing bricks were replaced, holes in the plaster mended, the walls were kalsomined or alabastined, the woodwork was painted, the desks varnished and the floors oiled. The Engineer's residence was also improved by a moderate expenditure for wall paper and paint.

A cement silo, 11 feet in diameter and 30 feet high, has been erected near the cow stables and is filled with corn fodder. The piggery has been refloored with cement and the brick walls repaired and strengthened.

Three thousand square feet of cement sidewalk, with curb and drain, were constructed as a beginning of the change from plank walks, no longer economical on account of the high price of lumber.

378 loads of gravel from the pit near the river bank, on the Institution

grounds, were hauled for road-building, with excellent results. The cinder roads have not yet been repaired, but that can be done without extra outlay. A job of fencing, which will make the working of the farm more convenient and profitable, has been begun, but not yet completed.

It will be advisable to set out a considerable number of shade and ornamental trees next spring, to fill vacant spaces. Thirty winter apple trees, set out last spring, are doing well. The waste land now covered with overgrown willow will be gradually cleared off, and an attempt will be made to save the river bank by planting willow there.

The crops of roots and vegetables are fairly good this year, and apples are abundant, particularly the summer varieties. Enough corn was grown to fill the silo, one field was devoted to oats, and there was an average hay crop. Trespassers are gradually ascertaining that the garden and orchard of the Institution are not maintained pro bono publico, hence there has been less stealing of fruit and vegetables this year than last year.

Visitors.

There have been many visitors to the Institution during the past twelve months, and little, if any, adverse criticism, while many have expressed their gratification with the appearance of the place and the quality of the work done. Parents are again invited to come and see their children, and all who are interested in the education of the blind will be welcomed during class hours. As was intimated in the last report we cannot undertake to provide meals and lodging for ex-pupils or the relatives of present pupils, and it would spare some embarrassment if our friends from a distance would assume that this rule is of general application.

Thanks are cordially tendered to the city ministers who so kindly, and in many cases at personal inconvenience, conducted the Sunday afternoon services in the Institution.

I have the honor to be, Sir,
Your obedient servant,

H. F. GARDINER,
Principal.

Brantford, October, 1904.

PHYSICIAN'S REPORT.

T. F. Chamberlain, Esq., M.D.,
Inspector of Public Institutions.

Sir,—I have the honor to present my annual Report as Physician to the Ontario Institution for the Blind.

Notwithstanding the severe winter of the past session, there were few serious illnesses among officers, pupils or employees.

In October and the early part of November there were six cases of Diphtheria, five female pupils and one male. The first four cases and also the sixth were sent to the City Isolation Hospital. The fifth patient to develop the disease, owing to the City Hospital being full, was accommodated in a well adapted room over the work-shop in the Institution grounds, with a trained nurse in charge. All the patients made satisfactory recoveries.

On January 23rd, 1904, a male pupil developed appendicitis; he was removed to the City Hospital for operation, and made an uneventful recovery.

During the time when influenza was prevalent, the pupils suffered

their full share. It was very noticeable that this trouble as well as the Diphtheria spread much more among the female pupils, chiefly due no doubt to the lack of a suspect room.

During the summer vacation the bathing and sanitary arrangements generally have been much improved in the girls' side of the building.

I have the honor to be, Sir,

Your obedient servant,

J. A. MARQUIS,

Brantford, Sept. 2nd, 1904.

OCULIST'S REPORT.

To T. F. Chamberlain, Esq., M.D.,

Inspector of Public Institutions of Ontario.

Sir,—As oculist to the Ontario Institution for the Blind, I have the honor to report:

My usual examination was made on April 7th, completing details on later dates, examining in all 49 pupils, 16 new ones, (26 last year), and 33 examined on previous occasions. There was no question as to the eligibility of any of the 9 males and 7 females. The usual high proportion of loss of sight from injuries is again evident—about 33 per cent.

A noticeable feature was the more advanced age of the majority of those entering, 10 of the 16 being over 15 years old, some of these having been blind since infancy; of such I must say that their parents make a great mistake, not only from an educational point of view, but also for the sake of their children's eyes, by not sending them earlier in life, because there is no doubt that Institution life is the best possible condition for the welfare of their eyes, as is easily demonstrated by the marked improvement in sight noted in many cases.

The general prevalence of ear troubles during the severe winter was also evident in the Institution to some extent, but with no severe or permanent bad results. Otherwise the condition of the pupils was very satisfactory.

Respectfully submitted,

B. C. BELL.

Brantford, Aug. 29th, 1904.

LITERARY EXAMINER'S REPORT.

T. F. Chamberlain, Esq., M.D.,

Inspector of Public Institutions, Ontario.

Sir,—I have the honor to report on the result of my examination of the Literary classes in the Institution for the Blind at Brantford for the year ending June, 1904. Altogether I spent five days in the Institution, four in actual examination of the classes, and one, a week or two earlier, in observing the methods of teaching and in getting acquainted with the condition of the pupils in the various classes as to age, advancement, etc. The examination proper occupied the four days beginning Tuesday, May 30th, and ending June 2nd.

It is not easy for a comparative stranger to the Institution to make, in that time, a satisfactory estimate of the precise standing of each of the one hundred or more pupils taking part in the Literary classes. But although it may be somewhat difficult to express the results in percentages, one still can form a very fair judgment of the relative merits of individual pupils; and still more one can appreciate the character of the

instruction given by the teachers, as well as their earnest, unselfish devotion to all that concerns the welfare of their classes. While on this subject I may say that, although they may differ in their methods of teaching and in many other respects, the teachers all impressed me as possessing an ardent interest in the welfare of the pupils under their care. This interest, combined with good teaching ability, produces the excellent educational results noted in this report.

In the detailed estimate of the work of the various classes given in the record book accompanying this Report, while I have endeavored to express the standing of each pupil wherever possible as a percentage of a perfect mark, according to a proper standard for that class, it will be found that although the marks may serve to denote relative proficiency among members of the same class, they cannot be made a safe basis for comparing one class with another.

Mr. Wickens' Classes.

Arithmetic.—Simple problems in fractions. The class varied in ability and probably in earlier arithmetical training, but nearly all showed that they were getting a good grasp of the principles of a subject that must present exceptional difficulties to those who cannot use the ordinary notation and symbols. The marks given ranged from 35 to 90 per cent. and averaged 62 per cent.

Geography.—The Continent of Africa. This is the senior class in Geography. The pupils showed that they possess a thorough knowledge of the natural features and resources of the "dark continent," as well as an acquaintance with the various European colonies and the territories occupied by other powers there. The pupils have attained great skill in using the dissected wooden maps with which they are provided. They recognize countries by their shape even independently of their relation to the rest of the Continent. Average marks 67 per cent.

Reading.—In this class the practice is altogether in reading the "point print," partly from Readers prepared for such pupils, but also partly from standard English poems selected for study. This year "The Deserted Village" was studied, and I found that pupils could read this fluently and expressively. To show that they were not reciting from memory, they readily started to read from any place at which I placed the pupil's finger. The marks ranged from 40 to 85 and averaged 69 per cent.

Writing.—This work was also in "point print." Most of the pupils wrote readily and pretty accurately the passage dictated. Their marks averaged 76 per cent. In this connection the work done in type-writing should be mentioned. More than fifty type-written sheets by as many pupils have been placed in my hands. Some are almost perfectly done, and all are good

Scripture.—History of the Kingdoms of Judah and Israel. The class was examined on that period of Bible History extending from the division of the Kingdom to the downfall of Israel and Judah. The answers showed careful study and also gave evidence of a thoughtful interest in the subject. Average marks 68 per cent.

Spelling.—From Part II. of Blaisdell's Speller. Having to learn altogether by ear aided by the action of the vocal organs in saying over the letters of a word, the proficiency attained by the blind in this subject is especially creditable to them. This class averaged 90 per cent. on the work assigned.

Miss Walsh's Classes.

Arithmetic.—Limits—Juniors, simple measurements; Seniors, Mensuration, Insurance, Partnership, Simple Interest, Commission, Stocks, Discount, Exchange, etc. Some of the senior pupils of this classs have acquired a remarkable facility in solving problems involving long calculations. They were tested on the work indicated above with problems exactly similar to those given for written work in the High School Arithmetic. The Senior class averaged 86 per cent. Some of the Juniors were equally good in their limit of work, but others had been only a short time under training and did not do so well. Average for Juniors 62 per cent.

Grammar.—This class was examined on the analysis and parsing of simple sentences, definitions and inflections, especially the moods and tenses of the verb. Seventeen in the class. Average 63 per cent.

Geography.—This is a large class (23 at present), mostly of young children. They study geographical definitions and the geography of Ontario in particular. The class as a whole astonishes a visitor by the ready recognition of any county handed out from the dissected map. The county is named, its situation given, and the towns are located and named with remarkable accuracy. Average marks for whole class 71; for seniors alone 88 per cent.

Reading.—Eleven in class. The Second, Fourth and Sixth Readers are used. Great attention is paid to distinctness of articulation and to careful expression of the meaning of what is read. All but two or three received high marks. Average 79 per cent.

Writing.—This is also a class consisting mostly of young pupils. They write on paper specially marked with grooves just wide enough for the small letter space. The formation of letters is necessarily somewhat angular, but the writing is quite legible. Average marks 72.

Object Lessons.—Fourteen in the class. This class studies the Natural History of animals and birds, more particularly those of our own part of the world. Stuffed specimens are brought from the museum of the Institution, handled by the pupils and described. The course also includes a study of some common articles of food and materials for clothing, such as tea, sugar, coffee, rice, flax and wool. The marks given averaged 70 per cent.

Scripture.—Limits—the first twenty chapters of the Acts; parables and miracles from the Gospels of St. Mark and St. Luke. The class showed careful training both in the historical portions and in such passages as the parable of the Good Shepherd, the account of the Resurrection, etc. Average marks given for answers 77 per cent.

Spelling.—Limit—Blaisdell's Speller. Number in class 12. Average marks obtained 91 per cent. About half the class were marked perfect on the test given.

Miss Gillin's Classes.

Arithmetic.—Thirteen in class. Limit—simple rules, including multiplication table to 20 times 20; definitions, weights and measures, and simple problems. The tables were well memorized and the examples and problems given satisfactorily solved. I found less variation from the average in this class than in some others. Average 76 per cent.

Grammar.—Eight in class. Limit—History of the English language, Review of Etymology and Syntax, Analysis and Parsing. This course has been well covered during the year and most of the pupils showed an excellent comprehension of grammatical principles as well as a knowledge

of the essential facts of sentence structure and the classification and inflections of words. Average marks 67 per cent.

Geography.—Nine in the class. Limit—United States and South America in detail with outline study of Central America, Mexico and the West Indies. The class showed a thorough knowledge of the part of the work examined on, not merely of names and places, but of products, industries and commercial relations. Average marks 70 per cent.

Writing.—Small words and sentences written in grooved spaces in ordinary script. Eight in the class, two of whom are quite young. Average marks 64 per cent.

English History.—From Charles II. to end of George II. An excellent class of sixteen senior pupils. Good consecutive answers were given, showing a satisfactory knowledge of the history of the period studied. One pupil obtained a perfect mark and several others 90 per cent. The average was 81 per cent.

Canadian History.—From the treaty of Paris to the present time. The same class as in English History. Only one was marked below 50 per cent., the average being 69 per cent.

English Literature.—Eighteen in the class. Limit—History of English Literature from Caedmon to Pope, Biographies of Canadian authors and special study of Shakspeare's Julius Caesar. It was a real pleasure to discuss with this class the play set for their study this year. The pupils were so familiar with it as to be able to analyse the various characters represented and enforce their opinions by appropriate quotations or references to the action of the play. They had also at command a fund of striking or beautiful passages committed to memory. In the history of literature, too, their work for the year had been well done. The average marks, 79 per cent., give only a moderate estimate of the really excellent work done by this class.

Bible Geography and History.—The kingdoms of Judah and Israel to the captivity. This is a class of eighteen girls, corresponding to the boys' class conducted by Mr. Wickens. Three or four in the class received comparatively low marks, but in most cases the answers were entirely satisfactory. The work done in these Bible classes seems especially valuable in view of the fact that the Bible is far more difficult of access to the blind as a book to read than to others. Marks given averaged 69 per cent.

Spelling.—Nineteen in the class. Limit—Part III. of Blaisdell's Speller. In a pretty severe test on the prescribed work nine obtained a perfect mark, while the whole class averaged 87 per cent.

Mr. Roney's Classes.

Arithmetic.—This is a class of juniors, most of whom have to be taught individually because they enter with such varied previous training. The work extends through the simple rules to multiplication, with simple problems, and Roman notation. The marks given varied from 40 to 90 per cent., the average being 63.

Grammar.—Parts of speech, definitions, analysis of simple sentences, parsing. A class of nineteen, including some pupils who are quite young. Good, practical work is done in this class. In the clear analysis of simple sentences and recognition of the parts of speech a good basis is laid for future work. Marks average 57 per cent.

Geography.—Nine in the class. Study of Ontario and the Dominion in general. This class is getting a good knowledge of the products, industries and commercial relations of the various sections of Ontario and the Dominion, in addition to their accurate acquaintance with locations on the

maps. The Institution in all its classes seems to me to have succeeded particularly well in making the study of geography interesting. Average of class 68 per cent.

Reading.—A class of thirteen using the First, Second and Third Readers with spelling of words from lessons. Here again the teaching is not so much class as individual teaching, on account of the unequal advancement of the pupils. Some read and spell very well, while others for various reasons cannot do so well. Average marks 65 per cent.

Writing.—This, the Senior class in script writing, handed in some well written exercises. Average marks 70 per cent.

Physical Culture.—This is taken up by Mr. Roney in five classes, three of the girls and two of the boys. The gymnasium is a very important feature of this Institution, and Mr. Roney is to be complimented for his success in making the various exercises attractive to the pupils and helpful to them physically. I was pleased to find the girls doing so well in the gymnasium and taking such evident interest in the exercises. In club-swinging, wand exercises and fancy marching, all of which were practised in time with the piano, a high degree of precision and grace of movement were shown. This practice must tend to develop well formed, healthy bodies as well as grace of movement. The boys do excellent work in dumb bell exercises, club-swinging, vaulting, and general gymnastic exercises on the horizontal bar and the parallel bars.

Miss Lee's Classes.

Miss Lee's work is mainly that of a Kindergartner, but she also assists with elementary work in Arithmetic, Reading, Spelling and Bible study, and takes classes in Domestic Science. I examined and marked her classes in all these subjects except the last, with the following average results: Arithmetic 65 per cent., Reading 65, Bible 70, Spelling 73. I was much pleased with the Kindergarten work proper. It would be difficult to overestimate the good influence on the little blind children of the singing and the manual occupations practised here. The latter include sewing, weaving, folding, modeling, raffia work, cutting and pasting, bead-stringing, lacing, etc. The results of my observations cannot well be expressed by marks, but the manifest interest of the little ones and the skill acquired in spite of physical disability were very gratifying.

I had also the pleasure of inspecting two classes conducted by Miss Haycock, one a Scripture class studying St. Luke's Gospel and the other a spelling class using Gage's Practical Speller. For the former the average marks were 70 per cent., and for the latter 80.

Miss Haycock's special work, however, is plain and fancy knitting, crochet work, etc., and I may be permitted to mention here that in her room were to be seen many beautiful specimens of these household arts, the work of her pupils. These articles are made by the pupils chiefly for themselves or their friends. It is found that on this account much greater interest and pride are taken in the work.

The department of sewing, bead-work, and netting, under the supervision of Miss Loveys, assisted by Misses Cronk, Burke and Hepburn, hardly comes within the scope of this report, but may be noted in passing. It furnishes excellent opportunities for the young ladies of the Institution to acquire that skill in needlework so essential to their comfort and usefulness in after life.

The workshop presided over by Mr. Truss supplies means of practical manual training for the boys, and to some extent puts them in the way of

doing work that will have a commercial value. Good, useful baskets of various patterns and sizes are made, hammocks are netted and cane-chair work in different forms is practised. The main object of the shop seems to be to give instruction and practice in work that will be of industrial value to the blind.

In conclusion, I must acknowledge the kindness of the Principal, Mr. Gardiner, in lending me all possible assistance in performing my duties as examiner. I am indebted, also, in no small degree to the teacher, Mr. Wickens, who was unwearied in his efforts to perfect all the details of the arrangements for the examination, and who took pains to show me all the work done by the Institution that was in any way connected with my duties. Every courtesy, indeed, was shown me by all the teachers, and I carry away also kindly feelings towards many of the pupils, although our acquaintance has been brief.

Respectfully submitted,
T. W. Standing.

Brantford, July 4th, 1904.

REPORT ON MUSICAL INSTRUCTION.

T. F. Chamberlain, M. D., Inspector of Public Institutions.

Sir,—I beg to submit my report on the musical instruction given at the Ontario Institution for the Blind, Brantford.

The examination was held on June 7th, 1904, and was conducted under the following heads: Theory of Music (including Harmony, counterpoint and Musical History), Piano, Organ and Choral class. The work of the class in Piano-Tuning was also examined.

The number of pupils studying Music is fifty-five, and each student (except those who were ill at the time of the examination) was heard separately. All of the pupils study the piano, six the organ, and fourteen Musical Theory.

In piano-playing the work of the pupils is, on the whole, very satisfactory, comparing it with that of the two previous years, the high standard set is well maintained, and promises to continue so. The piano classes are divided into five grades, each with three subdivisions. Of the eight pupils in Grade I., (the lowest), class A., two are very bright and promise well; four, less gifted, are doing fairly well, and the other two are slower. The four pupils in class B are all doing well, and two of them were found to be endowed with a remarkably quick musical ear. Of the six pupils in class C three are doing very well, two fairly well, and the remaining one, a man, though he possesses no technique, shows considerable musical feeling. In grade II., class A, are four pupils. Two of these are making fair progress. Of the other two one showed the possession of an extraordinarily quick ear; the other was too nervous to be properly heard. Of the two pupils in class B, one gives much promise, the other was ill. In class C are nine pupils. Two play very nicely, five do fair work, and two succeeded in passing the first examination of the Toronto College of Music, one of them with first-class honors. In grade III., class A, are five pupils; three of these passed the first examination of the Toronto College of Music; the other two are making fair progress. In class B there are eight pupils, of whom one passed the second year examination of the College of Music. Five of the others play very well, and two fairly well. One was ill and could not be examined. Of the two pupils in class C, one is doing excellent work, and the other plays very fairly. In grade IV. there are four pupils, two in

class A and two in class C. The two former are playing quite well, the other two fairly so. Three pupils in the next, or highest grade, are already accomplished players; one of them has won the Artists' Diploma of the Toronto College of Music, and another has passed with first-class honors the third examination of the same Institution. The third is in many respects a remarkable musician; he gave a strikingly good performance of the Wagner-Liszt Tannhauser March.

In the Organ class there are six pupils, showing from six months to two years' study of this instrument. All of them are making satisfactory progress.

The fourteen pupils in Musical Theory are divided into two classes, A (junior) and B (senior). In class B, consisting of eight pupils, one passed the second and five the first examination in Theory of the Toronto College of Music. The remaining two wrote on papers in Harmony and Musical History, obtaining an average of 77 and 46 respectively. The six pupils in class A obtained an average of 61 and 49 per cent. on the two subjects. These percentages are not as high as one could wish, and the History papers were weak; but in Harmony two of the pupils obtained over 80 per cent., and two over 70 per cent., and the pupils who took the College of Music examination in this subject all obtained over 75 per cent. of the marks.

The Choral class numbers 35 members. Four choruses in different styles were sung with the necessary attention given to light and shade. This is always a delightful feature of the music department of the O. I. B.

Mr. Hayter's work with his piano-tuning class maintains its high standard. The tunings of several pupils were found to be perfectly satisfactory.

The singing of the hymns during the morning religious exercises were, as usual, bright and hearty, the pupils evidently much enjoying this part of their service. One of the Organ students accompanied the singing with much ability.

The examination of the Musical department of the Ontario Institution for the Blind shows that this important part of the Institution's work is being carried on in a very satisfactory manner, which reflects much credit upon the musical director, Mr. Humphries, and his two assistants, Miss Moore and Miss Harrington; and the students themselves evidently enjoy a study which in future years is bound to afford them a source both of profit and pleasure.

I have the honor to be,

Sir,

Your obedient servant,

W. E. Fairclough.

THIRTY-FOURTH ANNUAL REPORT

UPON THE

ONTARIO INSTITUTION

FOR THE

Education of the Deaf and Dumb

BEING FOR THE YEAR ENDING 30TH SEPTEMBER

1904

PRINTED BY ORDER OF
THE LEGISLATIVE ASSEMBLY OF ONTARIO.

TORONTO :
Printed and Published by L. K. CAMERON, Printer to the King's Most Excellent Majesty.
1905.

WARWICK BRO'S & RUTTER, Limited, Printers,
TORONTO.

Convention of Graduates, held at Hamilton, June, 1904.

PARLIAMENT BUILDINGS,
TORONTO, December 1st, 1904.

SIR,—I beg to transmit the Thirty-fourth Annual Report upon the Institution for the Education of the Deaf and Dumb, at Belleville, for the year ending September 30th, 1904.

I have the honor to be, sir,

Your obedient servant,

R. W. BRUCE SMITH,
Inspector.

The Honorable G. P. Graham, M.P.P.,

Provincial Secretary.

PARLIAMENT BUILDINGS,
TORONTO, December 1st, 1904.

To the HONORABLE WM. MORTIMER CLARK, *etc., etc., etc., and Lieutenant Governor of the Province of Ontario:*

MAY IT PLEASE YOUR HONOR:

I have the honor to submit herewith the Thirty-fourth Annual Report upon the Institution for the Education of the Deaf and Dumb, at Belleville, for the year ending September 30th, 1904.

GEO. P. GRAHAM,
Provincial Secretary.

ONTARIO INSTITUTION FOR THE DEAF AND DUMB.

In presenting the Thirty-fourth Annual Report upon the operation of this Institution it is pleasing to note that such satisfactory progress is being made in the methods of imparting knowledge to the deaf and dumb and that the history of another year is further evidence of the success that has attended the efforts made in our Province to provide educational facilities for this class of our afflicted.

A perusal of the report of the Principal and Superintendent, Mr. Mathison, gives a concise resume of the work done during the year and also furnishes valuable information in regard to the methods of imparting instruction to the deaf who avail themselves of the privileges afforded by the institution.

All deaf mutes between the ages of seven and twenty, not being deficient in intellect and free from contagious diseases, who are bona fide residents of the Province, are admitted as pupils. The regulations of the Department has hitherto prescribed seven years as the period of the school course at this Institution, but in many instances it has been advisable to extend this period. In his report this year Principal Mathison refers to this matter and his recommendations may be safely followed. Bearing in mind that some children require twice as long as others to accomplish the same results I would strongly urge that no limit be placed on the number of years that a pupil may attend and receive instruction at the Institution.

The methods of instruction are fully described by the Principal and Superintendent in his report and are well worthy of perusal. It is gratifying to know that at the Ontario Institution the methods of imparting knowledge have the endorsation of those chiefly interested and most capable of judging. The World's Congress of the Deaf at St. Louis in August last was the largest assemblage of the educated deaf ever held on this continent or abroad. Every country was represented and the gathering was strikingly illustrative of the progress made in providing facilities for educating and training the deaf.

The discussion on Methods concluded by an expression in this resolution: Resolved, "That we, the members of the World's Congress of the deaf in convention assembled in the City of St. Louis, Mo., recognize and appreciate to the full extent all methods of educating the deaf, but deplore and condemn the narrow and destructive spirit that endeavors to educate all pupils by a single method. We are firmly and unalterably in favor of the Combined System which adapts the method to the pupil and not the pupil to the method." The opinion thus expressed must be satisfactory to Principal Mathison who has therein an endorsation of the course he has advocated and followed in the education of the deaf at the Ontario Institution.

Notes of Inspection.

In the last official visit of inspection I found 224 pupils in residence—111 boys and 113 girls. After the opening of the Institution in September all pupils who could not show good marks of vaccination had the operation performed and at the date of my visit there were 15 pupils excused from the school exercises on account of sore arms. Otherwise the pupils are enjoying good health.

Accompanied by the Superintendent, Mr. Mathison, I made a brief visit of each of the school rooms and was very much pleased with the manner in which I found the work being carried on. The pupils impressed me as applying themselves to their studies. The teachers appeared to me to be working faithfully and assiduously in the discharge of their duties.

I was much interested in the manner in which Domestic Science is taught to girls and in fact in the different departments where Manual Training is carried on I found a remarkable condition of zeal and proficiency manifested. I visited all the industries and found the pupils were employed in a satisfactory manner and in every department there was pleasing evidence of that cheerful harmony so necessary a feature in such an institution.

I inspected all the books used in the institution and found they were correct and accurate in every respect. I was specially pleased with the condition in which I found the stores kept. Here I found a system of book-keeping that is admirable in the manner in which all details are recorded. I found that all requisitions are not only carefully recorded but the requisitions are neatly fyled away, so that without a moment's delay any article appearing on the Stores' Books can be traced from its reception at the store to its consumption. This system is such that all errors either accidental or wilful could be at once detected and corrected.

I found the food supply good and the dining room service satisfactory. The beds and bedding were found in good condition. The sewing room is carefully looked after and the pupils therein seemed to take great interest in doing their work neatly and well. I found all the halls, corridors and rooms clean and properly looked after by the matron in charge.

I had an interview with the attending physician, Dr. Goldsmith, and had an opportunity of visiting and inspecting the hospital building which I found in a satisfactory condition. The trained nurse in charge keeps a daily record so that from a glance I was able to learn all particulars in regard to the manner in which any who are sick are looked after and cared for. I found she was doing her work faithfully and well, and it must be a satisfaction to the parents of the pupils sent to the institution to know that in the event of sickness there is such excellent provision made for their care.

The lawns and play grounds are well kept and the location of the Institution is excellent in every respect.

The Superintendent arranged for me to meet each member of his staff of teachers and officers and at the close of the school I had an opportunity of seeing all the pupils and staff assembled in the hall for the closing exercises of the day.

In my visit I endeavored to enquire into and inspect every department and was pleased to find everything so satisfactory and to carry away with me a firm impression that the Institution is doing excellent work in caring for and supplying educational advantages to those committed to its care.

An earnest effort is made to assist the pupils while at the Institution to become God-fearing and valuable citizens and the records of the past thirty-three years are very encouraging.

The work of the Institution being conducted so largely along educational lines it has been wisely suggested that in future the Department of Education should exercise control and management of this Institution. This course has been found to work very satisfactorily in several of the United States. The whole aim and object is to educate and prepare for life's duties. It has now been fully and completely proven in our Province that under judicious modes of instruction, though with great and unceasing labor the deaf mute is hardly less susceptible to mental, moral, religious and industrial development than his more fortunate companion who has been blessed with the priceless and inestimable sense of hearing from his birth. Deaf mutes are no longer looked upon as pests and nuisances to society and incapable of exercising and enjoying the rights of citizenship, for so many of them, though deprived of the sense of hearing, have been so carefully taught as to be able to communicate by signs and written language. not only among themselves but with their more fortunate fellow beings, favored with the sense of hearing, on all subjects of material interest. They have been partially emancipated from the fetters imposed upon them by their deafness and although they have not been made to hear their pathway through life has been made bright by the rays of light that have come to them because of opportunities that have made life more endurable. There have been many and great achievements in educational progress, but none greater than that accomplished in the education of the deaf and dumb. It is pleasant to note that in this sphere of the world's progress Ontario has had such a satisfactory share. The results that have been accomplished are certainly complimentary to the men and women who have taken an active and zealous part in this great and noble work for humanity.

REPORT OF THE SUPERINTENDENT AND PRINCIPAL.

Belleville, Ontario,
1st October, 1904.

Dr. R. W. Bruce Smith,
Inspector of Public Institutions,
Toronto.

Sir:—I have the honor to present the Thirty-fourth Annual Report of this Institution, for the year ending 30th September, 1904.

The Time Limit.

The regulations of the Department prescribe seven years as the length of the school course for pupils at this Institution; but, in practice for the last quarter of a century such pupils as could be benefitted by a longer term have always been allowed, with the consent and approval of the Minister of the Government in charge, and the Inspector, to remain eight, nine or ten years, or as long as was necessary for the completion of the prescribed course of instruction and training. I do not think it was ever intended that every pupil should be strictly limited to the seven year term, which is much too short a time for a large proportion of them. That this is only what might be expected will be obvious to anyone who gives the matter careful consideration. The principle on which the educational policy of Ontario is founded is that every child in the Province shall have the opportunity of securing as thorough an education as can be obtained in our Public Schools; and as the children are of varying degrees of ability—some requiring twice as long as others to accomplish the same results—no limit, practically, is placed on the number of years a pupil may attend school. At present all deaf mutes between the ages of seven and twenty, not being deficient in intellect, and free from contagious diseases, who are *bona fide* residents of the Province, are admitted as pupils. As before stated the term allowed is seven years, with a vacation of three months during the summer in each year. In the public schools pupils are admitted from the age of five to that of twenty-one years, thus allowing sixteen years for tuition. It really seems as though, when our Institution was started, the founders supposed that deaf and dumb children would be able to obtain all the knowledge of the various elementary branches of an English education in less than one-half the time required by children in the full possession of all their normal senses and faculties, to obtain the same amount of education. Now the deaf are certainly entitled to— and I presume that it was intended that they should receive—at least as good an education as hearing childern can obtain in the public schools. I might go even further and fairly claim that, since the deaf must compete with hearing people in the various fields of labor and industry, and since they are greatly handicapped by their inability to hear and speak, they should receive even a better education and training than hearing children, so as to offset to some extent the very considerable disadvantage under which they must always labor. By waiving this claim for extra educational opportunities, and assuming that they should have only equal privileges with hearing children, even then the school limit should be from ten to twelve, or fourteen years, instead of seven, as is the case in many of the schools for the deaf in the United States. To arrive at a just and satisfactory judgment relative to this matter we must consider all the circumstances and compare the vastly different conditions and mental equipment with which the hearing and the deaf child respectively enters upon his school career. At seven, or even at five years of age, the hearing child has already acquired an extensive vocabulary. He is acquainted with the names, attributes and chief characteristics of all objects with which he has come into contact, is familiar with most of common idioms of the language, and can give expression to his thoughts and desires with a reasonable degree of fluency and accuracy. It may be safely said that the average person acquires more language during the first five or six years of life than in all his subsequent existence. When, therefore, the hearing child enters school he has already gathered a large part of the raw materials needed for his education, and all the teacher has to do is to reduce this heterogenous mass of facts and ideas to order and symmetry, and to utilize the very considerable amount of language that has already been acquired as the basis of instruction in the

various subjects prescribed. Now the chief and most difficult task that confronts the teacher of the deaf is to aid his pupils to obtain the knowledge of and facility in the use of language that every hearing child has acquired without conscious effort on its part, and chiefly before its school course has begun When a deaf child enters school he does not as a rule know a solitary word of our language. He must begin where the hearing babe begins—but without the babe's aural advantages—and learn his first word. Then by laborious effort he adds other words from day to day, and later on begins the task of building these up into sentences, and of mastering the idioms and untangling the intricacies of our singularly illogical language. Most of this is work that the teacher of the hearing child does not have to touch at all. The average deaf child will in the first year learn perhaps three or four hundred words and be able to unite two or three score sentences in a more or less mechanical and stilted form; and it will take him four or five years to gain sufficient language to be able to express ordinary ideas with tolerable accuracy—very few ever gain anything like the comprehensions of and facility in the use of language which nearly every hearing child has even without instruction. In other words the hearing child, before it enters school, has acquired a greater command of language than the deaf child has obtained after several years of laborious effort in the class room. Our common language is full of colloquial and inconsistent forms of expression exceedingly difficult to master, and endless repetition is the only secret of facility in its use for both the hearing and the deaf. The hearing child is a ceaseless babbler all day long, while the deaf child uses only so much language as it can write in a few hours daily in the class-room; and it may safely be averred that the average hearing child hears and uses more language in a day than the deaf child writes or sees written in month. Now, the majority of hearing children require at least seven years to satisfactorily master the public school curriculum; and I respectfully submit that if the hearing child, with all its senses intact, and beginning school with an extensive vocabulary, and great facility in the use of language, requires seven years or more to complete its course, how can it be expected that the deaf child, commencing with absolutely no language, and deprived of hearing and speech—the two mediums for the acquisition of knowledge—can accomplish as much in the same length of time? And it must further be considered that many of the deaf are taught trades at the Institution, hence all the greater necessity that they should be allowed to remain here for longer than seven years, if they are to be fitted to complete with hearing people on anything like equal terms. Besides, in addition to intellectual training, there is instilled into the minds of pupils a knowledge of morals and religion, good habits and manners, industry and thrift—in fact, all that contributes to make an upright, efficient and cultivated citizen. When pupils have completed the studies laid down, with two or three years added to the time, I am of the opinion that the people of the Province may feel a solid satisfaction with the products, springing from the munificent provision made by the Legislature from time to time, as exhibited in the gained intelligence, character and conduct of the deaf mute population.

Our Method of Instruction.

In previous reports I have described as clearly as I could the various methods used throughout the world in the education of the deaf, the most prominent of which are what are known as the Pure Oral and the Combined Systems. There are five methods defined as follows:
the chief means used in the instruction of the pupils, and the principal objects

1. *The Manual Method.* Signs, the manual alphabet, and writing are

The chief means used in the instruction of the pupils and the principal objects aimed at are mental development and facility in the comprehension and use of written language. The degree of relative importance given to these three means varies in different schools; but it is a difference only in degree, and the end aimed at is the same in all.

II. *The Manual Alphabet Method.* The manual alphabet and writing are the chief means used in the instruction of the pupils, and the principal objects aimed at are mental development and facility in the comprehension and use of written language. Speech and speech-reading are taught to all of the pupils in one of the schools recorded as following this method.

III. *The Oral Methods.* Speech and speech-reading, together with writing, are made the chief means of instruction, and facility in speech and speech-reading, as well as mental development and written language, is aimed at. There is a difference in different schools in the extent to which the use of natural signs is allowed in the early part of the course, and also in the prominence given to writing as an auxiliary to speech and speech-reading in the course of instruction; but they are differences only in degree, and the end aimed at is the same in all.

IV. *The Auricular Method.* The hearing of semi-deaf pupils is utilized and developed to the greatest possible extent, and, with or without the aid of artificial appliances, their education is carried on chiefly through the use of speech and hearing, together with writing. The aim of the method is to graduate its pupils as hard-of-hearing speaking people instead of deaf mutes.

V. *The Combined System.* Speech and speech-making are regarded as very important, but mental development and the acquisition of language are regarded as still more important. It is believed that in many cases mental development and the acquisition of language can be best promoted by the Manual or the Manual Alphabet method, and Signs, and, so far as circumstances permit, such method is chosen for each pupil as seems best adapted for his individual case. Speech and speech-reading are taught where the measure of success seems likely to justify the labor expended, and in most of the schools some of the pupils are taught wholly or chiefly by the Oral Method or by the Auricular Method.

I have heretofore indicated why the latter method has been adopted at this Institution. The pure-oralists would abolish signs and manual spelling entirely and teach all pupils by means of articulation and lip-reading exclusively. This would be an excellent plan if it were capable of realization in all cases, or even in a large majority. As a matter of fact, as established by experience, this method can only be successful with a small proportion of the deaf, it being absolutely impossible for most of them to ever learn to speak sufficiently well to be easily understood, or to learn to read the lips of others with any practical degree of efficiency. In my opinion—which agrees with that of nine-tenths of the educators of the deaf on this continent—a great and irreparable injury and injustice is being done to a large number of deaf pupils educated in pure oral schools. The pure-oral method is not now making any headway on this continent; the system has always been looked upon with disfavor by a very large majority of the educators of the deaf, while the deaf themselves have been nearly unanimous in their condemnation of it. A few years ago the agitation in favor of pure-oralism aroused a considerable amount of interest and some popularity owing to the essential attractiveness of the idea of teaching all the deaf to speak. It is not to be wondered at that the public generally, and parents of deaf children in particular, were greatly impressed by the glowing prospects held out to them of the complete restoration of all the deaf to society. The results have fallen short of the promises made.

All the methods of educating the deaf have been thoroughly tested under the best possible conditions and it has been demonstrated that the pupils educated in combined method schools are superior generally in knowledge and intelligence over those taught under the pure-oral system. The sentiments of the educated deaf relative to this matter—and they after all, are the ones chiefly interested and most capable of judging— were forcibly and plainly expressed at the World's Congress of the Deaf, at St. Louis, in August last. The Congress was the largest assemblage of the adult and educated deaf ever held either on this continent or abroad, and represented all that was highest, best and most progressive in matters pertaining to the interests of this class. The United States, Canada, France, Germany, Austria, and Switzerland were represented by delegates in attendance, and thoughtful papers were read from prominent persons, unable to be present, engaged in the work, in Great Britain, Italy, Sweden and Norway. At this discussion the question of methods was fully discussed and the feelings of those assembled were embodied in a series of resolutions, which were unanimously concurred in, the one following, being, to my mind, the all important one:—*Resolved*, "That we, the members of the World's Congress of the Deaf in convention assembled in the City of St. Louis, Mo., recognize and appreciate the narrow and destructive educating the deaf, but deplore and condemn the narrow and destructive spirit that endeavors to educate all pupils by any single method. We are firmly and unalterably in favor of the Combined System, which adapts the method to the pupil and not the pupil to the method."

Convention of Graduates.

The Ninth Biennial Convention of the Ontario Deaf Mute Association was held in Hamilton from June 18th to 21st, (see illustration), and was in every way a most gratifying success. The attendance was considerably larger than usual, and in some respects this surpassed all previous Conventions. This was especially the case with regard to the Sunday services, which were of great interest and helpfulness. During the various sessions a number of very suggestive and interesting addresses were given by members of the Association; but the tendency, which becomes more marked at every succeeding Convention, is to have as little formal programme of papers and addresses as possible, and, except for the religious services, to make social intercourse the chief, as it certainly is the most attractive and helpful feature of the meetings. It speaks well for the perseverance, enthusiasm and laudable *esperit decorps* of the deaf of this Province that these biennial gatherings not only maintain their high standard of excellence, but seem to become increasingly popular and beneficial; and it is, of course, very gratifying to all connected with the Institution, as it no doubt is to yourself also, to see the deaf manifesting this spirit of progressiveness, and the desire to excel in all their undertakings. The idea of having a free entertainment, which originated in London two years ago, was repeated in Hamilton with marked success. These pleasant and interesting entertainments, conducted in signs and pantomine, are not only helpful and enjoyable to the deaf, but possess also the incidental, but very real, advantage of impressing large members of hearing people with the fact that the deaf are as intelligent and self dependent as any other class, and have at their command a medium of communication which is as forceful and expressive, and almost as comprehensive as spoken and written language. The impression made on those present at the public entertainment, was forcibly expressed by a prominent clergyman, who was thus reported in the press:

Rev. Canon Fornerét, who was present, was called upon for a few remarks, and in response expressed his great delight with the entertainment, which was a great revelation to himself and all present. He had seen pantomines in the past, and Delsarte evolutions, but he had never before seen such gracefulness and charm of manner and motion as was shown by the ladies who had appeared before them. He was surprised and pleased at the very marked vivacity and intelligence which seemed to characterize all the deaf present, and the clearness and forcefulness with which they could express themselves. He was sorry the hall was not filled, as it no doubt would have been had the weather been favorable and the meeting better advertised; and if they would return to Hamilton and give a similar entertainment he could promise them that the hall would be crowded to the doors. He suggested that in future conventions, arrangements be made by which as many as possible of the public school teachers and pupils should be present at one session. It would be an excellent lesson to them."

As further showing the impression the Convention made upon outsiders, I quote the following paragraph from a very appreciative article in the *Hamilton Herald*. After pointing out some of the disabilities the deaf labored under, before the Institution was established, the writer continues: "But what a beneficient change has been wrought by the system of special education carried on at the Belleville Institution. Some of the fruits of it can be seen at the Convention. Here are a couple of hundred persons of both sexes, most of whom cannot remember a time when they could hear, and whose vocal organs are useless for purposes of speech; and yet it would be hard to get together in this city an equal number of normal persons of greater average intelligence, self respect, personal independence and general capability. They are cheerful confident and alert; they manage the business of the Convention as capably, and discuss as intelligently the various questions that come up for discussion, as will the delegates to any other convention that may meet here this summer. And it might be added that they have more self respect than have the delegates to some conventions, lay and clerical, that could be mentioned, for they refuse to be billeted, each one paying his or her own way."

This is warm commendation indeed, coming unsought from an outside and disinterested observer; and is rendered all the more impressive by the fact that the comparison is with other conventions of "delegates"—men selected because conspicuous for their ability and respectability; while this Convention was not composed of delegates, but of the deaf just as they came, and thus represented only the average quality of this class. I might further add that I personally conveyed to the Convention the invitation so kindly and cordially given by the Honorable J. R. Stratton, Provincial Secretary of the Association to hold the next Convention at the Institution as the guests of the Province, which invitation was accepted with enthusiasm and unanimous expressions of gratitude and delight.

Unusual Amount of Sickness last Session

For many years past thanks to an All-wise Providence and the skill and watchful care of our physicians, nurses, other officials and attendants, the pupils of the Institution have enjoyed a remarkable immunity from illness, and the mortality has been very low indeed. For eight years prior to last session, only one death occurred in our large household of over three hundred persons. Such rare, good fortune, however, could not be expected to continue always, and I regret to have to report that the last session was marked by a very unusual amount of sickness, various epidemics attacking us one after the other and prevailing with greater or less virulence throughout four or five months

of the session. The most serious of these was diphtheria, which was brought to the Institution at the opening by a little girl who had never been here before and who succumbed to the disease. As she made no complaint at the inception of the attack, the disease had made considerable headway before it was discovered and despite every possible precaution and repeated disinfection and isolation, the malady spread among a considerable number of the pupils. Every means known to medical science—including the liberal use of antitoxin, and the services of extra physicians and nurses—was used to stay its ravages and lessen its virulence. Most of the cases were light and only two deaths resulted, the one noted above and another girl, who had diphtheria and pneumonia concurrently, and who died from the after effects of the disease, when nearly convalescent. Towards the end of the term a third occurred, this time a senior boy who was undoubtedly the cleverest pupil in the Institution. His death was due to Meningitis, resulting from the same trouble from which he lost his hearing in infancy. His demise, though deeply regretted, was not unexpected to his parents, as their family physician, and specialists who had been consulted from time to time, had advised them that he would not likely live to maturity and that his death would probably occur in just the way it did. The other epidemics, which broke out, including scarlet fever, mumps and whooping cough—were easily kept under control and no serious results followed. Altogether, it was a most serious and trying session and we have great cause for gratitude that so few deaths occurred. Our isolated hospital, fitted out for just such emergencies, saved us from more serious consequences. I cannot refrain from expressing my satisfaction at the faithfulness and devotion to duty of the staff. Despite the serious nature of the diseases and the risk of infection, and although several of the female attendants and nurses did contract diphtheria, yet every officer, teacher, nurse and attendants remained faithful to the last, not a single one deserted his or her post, or shirking any duty; each one willingly and cheerfully doing not only the work that originally fell to his or her lot, but also the very large amount of extra labor, necessitated by the unusual conditions in which we were placed. The outlook for the present session is bright, the pupils look healthy; several of those who were here last term have remained away owing to the fact that during the summer months they were exposed to contagious and infectious diseases in their homes. It was exceedingly gratifying to know that even at the worst stages of our trouble we had the unbounded confidence and sympathy of the parents whose children were in our charge.

Twenty-five Years' Service.

On the 13th of September I completed twenty-five years of service as Superintendent and Principal of this Institution, and this long incumbency in one position may excuse a passing reference. The responsibilities devolving upon anyone in charge of such an Institution as this are great and the duties arduous, yet my work has ever been a labor of love. I have devoted every faculty and energy I possess in ensuring the success of the work of the institution and in promoting what I conceived to be the best interests of the deaf children of this Province. It has always been my good fortune to enjoy the confidence and hearty good-will and support of those in authority over me; and also, to have the assistance of an able and devoted staff of officers and teachers, on whose loyal co-operation I could implicitly rely. The fixed purpose that everyone has kept in view is that each year's work should be at least a little better than that of any previous one; hence, our ideals have been continually elevated, our zeal quickened, and our efforts stimulated to strive for improved methods and better results from year to

year. We think our work has been fairly successful, judging by the results obtained; but, the wiser a man grows the more vividly he realizes how vast is the realm of unacquired knowledge, so the farther we advance in methods and results the more we recognize how far short we yet come of the highest possible attainments. Our endeavor in the future will be, as in the past, to make at least a little progress each year and to increase our efforts to promote to the best of our ability the intellectual, moral and spiritual welfare of the deaf children of Ontario.

Industrial Departments.

The work in the industrial departments has gone on as usual. An improvement has been noticeable in the pupils who have been instructed in the various departments. We have to complain, however, that a few of the lads who ought to have returned to complete their trades have remained away, much to their own detriment.

Manual Training. Twelve boys have been under instruction in the manual training during the past session. Of this number, 5 have done 1st year work, 2 2nd year work, 4 3rd year work, and 1 has put in a 4th year doing more advanced work. On the whole, pupils have taken an interest and made satisfactory progress. The work has been of a practical kind comprising articles such as hammer-handles, rollers, mallets, dove-tailed boxes, mortised mirror-frames, book shelves, etc. As formerly, it has been our object to obtain a high quality, rather than quantity, and a high standard has been kept up. The boys take pleasure in their work and their conduct was all that could be desired.

Domestic Science. During the session 30 girls received instruction in the various branches of household science. These were divided into four classes. Classes 1 and 2, having completed the first year's work, were prepared, after the necessary review, to proceed with the second year's work. This consisted of the thorough study of meats and the cooking of the same; the study of cooking fish, soup making, bread-making, making of flour mixtures, (as griddle cakes, muffins, corn bread) salad making, plain pastry, frying, the making of a few frozen dishes, the planning and serving of meals, as well as the cooking of seasonable dishes. The care of the various rooms was taught, as well as laundry work. As much as possible, foods were studied; also, the value of them to the body. Each of these classes received instruction three times a week. All manifested great interest in their work, giving extra time to it, if necessary. Class 3. Ten girls completed the first year's work. The following is an outline of the work done by them: The study of housekeeping duties; the study of the kitchen fire; the study of water, milk, starch and eggs and the cooking of the same; the cooking of fresh and dried fruits, cereals and vegetables and the service of the same were also taught. All were much interested in the work. Class 4 of 6 girls, who had very littl elanguage, improved very much. They were taught to cook and serve a simple breakfast and dinner, and their housekeeping duties were well performed. Every lesson in all the classes was made one of language and all instruction was written on the blackboard; this was copied by the pupils in an exercise-book and then rewritten in ink.

Boys' Sewing Class. In this class there were 16 boys during the year. The work generally was satisfactory and much interest was taken in it. Some made rapid progress and others did not do so well. Various stitch forms were taught and the use of each. Habits of cleanliness, order and neatness were always encouraged. The majority of the lads took great pride in keeping their clothes neat and well-mended.

The boys in the shoe shop, printing office, bakery, carpenter shop and barber shop, all made satisfactory improvement. Those who lagged behind were dropped for a time and will be given another chance this year. The class in tailoring, dress-making, plain and fancy sewing and fancy-work also made commendable progress.

Miscellaneous.

The Institution opened for this session on Wednesday, the 21st of September, and all the pupils who were to come back at that time and the new ones reported promptly. We have not as many pupils as we had at this date last year from the facts that a number were written off at the end of the term in June last and the number of new applications has been the lowest for many years past. I infer from the latter circumstance that we have nearly all the deaf children of school age in the Province now in the Institution, as the age of those at present in residence is quite low. As work is plentiful in the various parts of the country and laborers are scare, a number of the large boys that were expected to return have been kept at home to engage in mechanical or agricultural pursuits. A few of the parents have left the Province for Manitoba and the Territories, and others have been retained in their homes in consequence of illness in the families. Several old pupils could not be admitted, as infectious or contagious diseases were in their homes during the late summer months, and I thought it advisable that they be kept out of school, for a time at least, as we are not anxious to have a repetition of last year's seige of illness.

There were a number of cases of smallpox in and about the City of Belleville during the last few months, and it has been thought advisable that every pupil in the institution should be vaccinated who cannot show a good mark of vaccination and who have not submitted to the operation within the last four or five years. Vaccine matter of the purest kind has been obtained and in a few days all will be attended to in that direction.

Owing to the large number of cases of illness during the latter part of 1903 and the fore part of this year, 1904, our per capita cost of pupils is larger than any other year since the Institution was opened. We had extra expenditure for medical attendance and extra trained nurses, with the added outlay for medicines and delicacies for the sick; besides, the cost of necessaries, as you are well aware, has gone up within the last year or two. The utmost economy has been practised, but we have not pretended to scrimp our children or people here in regard to food supply; the quantity has been ample and the quality always good. We think it better to feed our children well than to dose them with medicine and have them on our hands, semi-invalids part of the time. We are not attempting to bring our expenditure down on a par with the jails and poor-houses of the country. Our children ought to have a good supply of nourishing food on all occasions, and they have it.

We are indebted, as usual, to the clergymen living in Belleville for visits during the year. The pupils enjoy the ministrations of the various clergymen who come to visit us about once a month. We are indebted for courtesies to: Rev. Canon Burke; Right Rev. Monseignor Farrelly, V. G.; G. W. Beamish (English Church); Rev. A. H. Drumm, Rev. R. S. Laidlaw, B. A. (Presbyterian); Rev. J. P. Wilson, Rev. R. H. Leitch, Rev. Geo. Brown (Methodist); Rev. O. C. Elliott (Baptist); Rev. Father Hanley.

We receive a great many newspapers from publishers in the various parts of Canada and exchanges from the institutions in the United States for our reading room, for which we are thankful.

The yield from our farm and garden this year has been quite satisfactory. In this vicinity potatoes have been an apparent failure, but on our farm we have good quality and the yield has been more than we expected and we shall have sufficient for our needs. The hay and root crops were excellent and the grounds in front of the Institution have been well kept and are "a thing of beauty and a joy forever" to visitors and others who come here.

We all regret the resignation of Dr. Chamberlain who has been Inspector for a number of years past. He was always ready to aid and help us in every way possible and present our claims to the Minister in charge, the Honorable Provincial Secretary, who received and acted upon them for our benefit and good.

We all trust that your tenure of office will be long and that we will see you often at the Institution.

Every officer, teacher and employee during the past year has given entire satisfaction in the various departments and all have done so well that it would be invidious to particularize. If we have had any success, and I think we have, it is owing to the good work and loyal co-operation of all concerned. The report of the Government Examiner, who spent eight or ten days with us in June last, and which I presume will be incorporated along with your own in the report to the Legislature, gives in detail the work of the classes and of the industrial departments. That the Examiner expresses himself as pleased and gratified with the progress of the pupils under our charge is particularly pleasing to us all. Our efforts will be in the future, as in the past, to do as good work as possible. We are not satisfied with the results obtained in the past, but look forward to more extended and higher ideals in the time to come. We do not forget that anyone who thinks that he or she is doing all that can be done is on the downward path as regards school work.

The encouragement given by the late Inspector and the Honorable Provincial Secretary has been very helpful to us throughout the year.

I have the honor to be, Sir,

.....

Your obedient servant,

R. Mathison,
Superintendent and Principal.

PHYSICIAN'S REPORT.

Dr. R. W. Bruce Smith,
Inspector of Public Charities,
Toronto, Ont.

Dear Sir,—Very soon after the opening of the session in September of 1903, an epidemic of diphtheria and scarlet fever broke out, and forty cases of diphtheria and twelve cases of scarlet fever resulted. Many of these cases were severe and some of them prolonged. Maud Sheckleton, the first case, died in thirty hours after she came under observation. Second death was M. C. Cole from the after effects of diphtheria having been intubated one week before.

Later in the session whooping cough and mumps became quite prevalent and, many cases followed. All made good recoveries.

In March 2nd of 1904, Allen Walton died of acute meningitis. He had a discharging ear.

With the above exceptions the school year was uneventful.

I have the honor to be, Sir,

Your obedient servant,

(Sgd.) P. D. GOLDSMITH, M.D., M.R.C.P.

Belleville, Nov. 7, 1904.

Total Number of Pupils in attendance for the Session of 1903-04:

Males	137
Females	134
Total	271
Number of Boys admitted since the opening of the Institution	736
Number of Girls admitted since the opening of the Institution	580
Total	1,316

WORK

under the

ONTARIO

Children's Protection Act

During the Year

1904

Including reports on Industrial Schools, Juvenile Immigration and the closing of the Penetang Reformatory

Submitted by J. J. KELSO, Parliament Buildings, Toronto

TORONTO:

1905.

WARWICK BRO'S & RUTTER, Limited, Printers,
TORONTO.

To the Honorable Wm. Mortimer Clark, K. C.,

Lieutenant-Governor of Ontario.

May it Please Your Honor:

The undersigned has the honor to transmit herewith the Twelfth Annual Report of the Department of Neglected and Dependent Children of Ontario for the year ending December 31, 1904.

Respectfully submitted,

W. J. HANNA,

Provincial Secretary.

Parliament Buildings,

Toronto, February 15th, 1905.

The place for Neglected Boys.

OFFICE OF THE

SUPERINTENDENT OF NEGLECTED AND DEPENDENT CHILDREN OF ONTARIO.

The Honorable W. J. HANNA,

Provincial Secretary.

SIR,—I beg to submit herewith the Twelfth Annual Report of the work of this office, under the Children's Protection Act of Ontario, being for the year ending December 31, 1904; also reports on the closing of the Ontario Reformatory, the Industrial Schools of the Province, and Juvenile Immigration.

I have the honor to be, Sir,

Your obedient servant,

J. J. KELSO,

Superintendent.

PARLIAMENT BUILDINGS,
TORONTO.

TWELFTH REPORT.

Toronto, January 15, 1905.

The main feature in this the Twelfth Report on Neglected and Dependent Children of Ontario must necessarily be a detailed account of how the entire population of the Ontario Reformatory at Penetanguishene was placed out on parole and that institution converted to other uses. This unique movement and the undoubted success that attended it is worthy of the careful consideration of officials and philanthropists. It is simply a further demonstration of the fact that large and expensive institutions are not indispensable in dealing with homeless or delinquent youth. By proper organization and a helpful and sympathetic attitude on the part of good people, it is possible to re-adjust these unfortunate children to society in such a manner as to avoid long institutional confinement while at the same time ensuring for the children happier and better environment.

During the past year there has been a steady advance all along the line, both in the number of children protected from ill-treatment and neglect and in the number of destitute children received under guardianship of the Children's Act, and placed in foster-homes. To change existing customs is a slow and tedious process, and in the light of history even slight gains and acknowledgment of the better way must be hailed with satisfaction.

In the central office there has been no relaxation of effort in seeking to bring about improved methods, and to interest all classes in the care and protection of the young. The power of love and sympathy to save and reclaim has been steadily proclaimed and to these divine attributes must be attributed any real or permanent success.

Along educational lines a good deal has been done by the sending out of reports and general literature. A special pamphlet giving in convenient form the various laws of the country dealing with children has been issued and distributed gratuitously. Letters in constantly-increasing numbers

have been received from judges, municipal officers and philanthropic workers, and these have been promptly answered. Not the least important work done has been the giving of information of all kinds affecting children: to perplexed foster-parents, to parents in distress over erring children, and to parties seeking in some particular way to benefit a young life. Assistance has been cheerfully given on all occasions, with good results. The importance of having a special branch of the public service devoted entirely to work for young people has been demonstrated almost daily, and it is gratifying to know that the example of Ontario in this respect has been helpful in advancing the children's cause in the United States and other countries.

In one way or another over four thousand children have been under the supervision of this office during the year, from the deserted infant to the delinquent youth of fifteen or sixteen and the young people in foster-homes now reaching maturity and undertaking the responsibiliities of life for themselves. Helpful assistance has been given wherever possible and this as a rule has been received with gratitude and appreciation.

Wherever this movement is best understood, there the public endorsation is unanimous and funds are liberally supplied to carry on local work. In such centres as London, Ottawa, Peterborough and Owen Sound the Societies are making headway because the value of the work has been clearly demonstrated. New societies have been organized in St. Catharines and Sault Ste. Marie, the friends at Rat Portage are talking of organizing a branch, and doubtless new committees will be formed during the approaching year in the larger towns not already represented The number of societies now in existence is thirty-six and it can readily be seen that the work of these branches means in the aggregate an immense amount of good accomplished.

It was intended when the law was passed that the Children's Aid Society should be the legally authorized body to receive the guardianship of the neglected and dependent children of the province and to supervise all work for their care and protection. This plan if carried out in its entirety would ensure both efficiency and economy, but the society's status has not yet been fully recognized by the courts, municipal officials or philanthropic workers. When there is more general co-operation in this respect much greater success may be looked for than is possible at the present time.

Owing to the difficulty of paying agents in the different parts of the country to devote all their time to Children's Aid work a great many cases are allowed to go by default. Investigations, prosecutions, home-finding, require time and thought, and few are willing, or indeed able, to do much without being adequately remunerated. This thought is brought

prominently to mind by a letter just received from an agent splendidly adapted for the work who in spare moments snatched from his own business has helped the children's cause. Referring to a family of neglected children for whom nothing was being done, he stated that the case could not be brought into court through lack of evidence, although the evidence could easily be secured if there was anyone to devote the time to it. For this reason he intended resigning in the hope that someone with more leisure would take his place. "It is a great pity," he said in conclusion, "that the future of such hopeful young lives should be sacrificed."

Another secretary writes as follows: "We find it almost impossible to get many of our people to take a personal interest in this work and it is also hard to get hold of enough money to meet disbursements. We should have a paid agent to push matters when necessary, as, while we may all be very much interested, when proceedings are instituted by us it makes it almost a personal matter and often causes enmities and other annoyances." Where there is a properly paid agent the work is much more efficiently done, as a general committee of volunteer-workers cannot be expected to take it up with any degree of thoroughness. If funds could be provided in some way to help pay the salaries of a few agents it would be money well expended, and after two or three years the work would be sufficiently strong to be self-supporting.

Magistrates Reluctant to Act.

There is still a great deal of reluctance on the part of magistrates to commit children to the guardianship of the Children's Aid Society, even when the child's circumstances clearly indicate that there is no hope of its receiving proper care and moral training. A case occurred recently where a magistrate declined to commit a boy to the Society's care and yet when a month later the lad committed a slight criminal offence the same magistrate had no hesitation in sentencing him for a number of years to a reform school. At the rate of $3 per week the training of a boy in this way would amount to at least $500 and often at the end of that time the boy goes back to the same old environment and temptation. If placed under the care of the Children's Aid Society he would after a short stay in the Shelter amid kindly influences be placed in a foster-home at a total expense of about $25 and in the end be much better off. Owing to the change of home and companionship and the healthier atmosphere the number of those sent to homes in the country who afterwards go astray is not more than about two or three per cent. If the Children's Aid Society were more generally used for the saving of delinquents better results would certainly be accomplished than under the present system of police court, gaol and reform school. The Act provides all the requisite machinery if only the provisions of the law were properly enforced.

Too Young to go to a Home.

A frequent remark made by ladies connected with the management of juvenile institutions is that they "would like to get so and so a home but she is not old enough yet," but the fact is that when she is old enough she is too old. A case in point is that of a girl of ten who is homeless in the worst sense of the word, because she comes from a degraded and criminal family to whom she could not with safety be returned. She is being kept in the institution until twelve or thirteen when it is proposed to apprentice her out at service. In the meantime she is unsettled and without proper ties of affection and at twelve or thirteen she will not be so pliable or so likely to win the regard and affection of those around her as if she were placed out at nine or ten. During the past year one of the hardest girls to satisfactorily adjust in good home surroundings was one who at fifteen had been for six years an inmate of an orphan asylum. She was sullen and bad-tempered and had lost the faculty for making friends which is so important an element in the happiness of life. The old idea that children of nine or ten will be overworked and abused is hard to down, notwithstanding the constant experience and testimony of those whose duty it is to officially inspect foster-children that the younger children receive better treatment than those taken older, and they are more fully taken into the family life.

Family Complications.

The curious complications that sometimes arise in connection with neglected children are fairly illustrated in the following instance: A man and woman married and had two children. After a time they separated, the husband consorting with another woman and the wife with another man. Both children were placed in public institutions. Now when they are grown up and likely to be of some use both parents make separate application to get possession of them, although neither of them is leading a moral life nor is at all fit to have the custody.

The hardest work of the year has been to stand between worthless parents and their ill-fated children. If left alone the children become bright citizens, but remaining with their miserable progenitors they would soon like them be useless drones upon society. One's sympathies naturally lean toward weeping parents, and yet almost every day a fresh case comes to light in which the parent has been the child's worst enemy. Many children have been allowed to remain with parents because of the dislike to bring about separation, so that if there has been any error it has been upon the side of mercy. The world punishes the children that have been mistrained and perverted, but in the sight of the Great Judge of all, the blame will be placed where it rightly belongs.

Rights of Parents.

One reason why neglected children are not placed more readily under the care of a Children's Aid Society and sent to homes away from their former environment is because the "rights of parents" might be interfered with. But we should consider also the "rights of children" and the rights of the community. After being arrested for various offences, four different times, without any material benefit, a boy was placed in charge of one of the societies and sent away to a good home, the difficulty being that his parents neither controlled him nor set him an example that would keep him out of trouble—and yet when the boy's address was not instantly furnished to the negligent parents a prominent judge wrote an indignant letter, practically claiming that the parents had supreme rights that no law could disregard. Arguments and sentiments of this kind have consigned many children to prisons and lifelong careers of crime and wretchedness. An item published in the newspapers this week states that a boy of twelve caught in the act of robbing a store already had one brother in the Industrial School and another in the gaol for housebreaking. Who can doubt that the home influences had been bad, and that the only salvation for such a child would be complete separation from the degraded home that caused three bright lads to drift into prison? Almost every day instances of this kind are brought to my attention and in nearly every case where boys have fallen back into crime after going through the Industrial School it has been caused by their return to the debasing surroundings from which they were for a time removed. Undoubtedly the only hope for many children and the only proper course to pursue in the public interest would be to absolutely separate children from those who have clearly proven their unfitness, and provide them with new homes in the health-giving and inspiring atmosphere of the country districts.

Desertion of Families.

The desertion of families by the father, which has been frequently referred to in these reports as a prevalent cause of child-dependency, is constantly engaging the attention of philanthropic workers. A committee appointed by the New York State Conference of Charities to specially consider the subject recently made a report in which they recommended the following legislation as likely in some measure to abate the evil:

Abandonment of children. A parent or other person charged with the care or custody for nurture or education of a child under the age of sixteen years, who abandons the child in destitute circumstances and wilfully omits to furnish necessary and proper food, clothing or shelter for such child is guilty of felony, punishable by imprisonment for not more than two years, or by a fine not to exceed one thousand dollars, or by either or both.

In case a fine is imposed the same may be applied in the discretion of the court to the support of such child. Proof of the abandonment of such child in destitute circumstances and omission to furnish necessary and proper food, clothing or shelter

is *prima facie* evidence that such omission is wilful. The provisions of the code prohibiting the disclosure of confidential communications between husband and wife shall not apply to prosecutions for the offense here defined. A previous conviction or convictions of felony or misdemeanor shall not prevent the court from suspending sentence upon a conviction under this section, or from arbitrarily fixing the limit of imprisonment or fine, in case the imprisonment or fine is imposed upon conviction herein.

Possibly some legislation of this kind adopted in Canada and vigorously enforced might bring about an abatement of the evil complained of.

Homes Instead of Institutions.

The year's work has been full of surprising and gratifying instances of the power of kindness and sympathetic understanding to reform and rehabilitate young people who had gone astray. Outside of the work done for Reformatory boys there were enough delinquent children taken over and provided with foster-homes to have filled a fair-sized institution under the old method of handling them. These children have done well and the saving in public funds by placing them in private families instead of maintaining them for long periods in public institutions would easily be thirty thousand dollars. The following are some typical cases, dealt with through this office, and many similar cases have been handled by the various societies:

Girls Successfully Dealt With.

Girl of fifteen—Lived in small town, poor home surroundings, father said to be a drunkard. This girl was arrested, charged with housebreaking and larceny. Tried before a local magistrate and remanded to the general sessions. After she had been in gaol for some time was brought before the county judge, who had the case remanded and wrote Provincial Superintendent for advice. Instead of committing her to the reformatory she was placed under Superintendent's care, brought to Toronto, and after a short time provided with a suitable home. She has been doing well for six months, is earning her own living and is helping to meet the pressing demand for domestic servants. Is not likely to get into any further trouble.

Girl between fourteen and fifteen—Was arrested in a western town charged with stealing a number of articles from her mistress. Magistrate had the case remanded and wrote to Provincial Superintendent for advice. Was requested to forward the girl to Toronto instead of committing her to the reformatory. Found that the mother, unmarried, was a hard working woman who had never been able to properly look after the girl. The girl herself was sorry for what she had done and although several months have elapsed she has not occasioned the slightest anxiety, has not been in any institution since her unfortunate experience in the local gaol, and is now a fine, respectable young member of society.

Girl of sixteen—An orphan, who, getting into the company of a number of loose girls, soon became uncontrollable. Was arrested on several occasions for stealing, being out late at night, and otherwise offending. Was sent from a distant city to Provincial Superintendent in the hope that a change of environment and stricter guardianship would bring about an improvement. Sought to win the girl's confidence by kindness and after a period of probation decided to try her in a private family. She ran away from two homes but has now settled down, is giving excellent satisfaction and is not likely to cause any further trouble.

Girl of fifteen—Was brought to Toronto by chief constable to be placed in reform school. Met her on arrival and as she expressed a strong desire to do better took charge of her and communicated with the magistrate and others interested. Replies received were to the effect that the only object sought was the girl's reformation and by all means to give her another chance. Although a considerable time has elapsed the girl has proved amenable in every way, gives valuable assistance in household work, and highly appreciates the fact that she has not been placed in a reformatory.

A number of younger girls who were about to be sent to various institutions were received in the same way and placed in private family homes instead. In nearly every case they have done well and the expense of long maintenance has been avoided.

Sample Cases of Boys.

Boy of fifteen—Received a letter from a northern town asking the best way to get a boy down to the reform school. Wrote for further particulars and found that the lad was in gaol, having been duly tried, convicted and sentenced for larceny. Asked that the boy be given a half ticket and sent down alone and promised that he would be met on arrival. Found him to a particularly fine, intelligent youth who had simply wandered away from home and got into trouble. Instead of sending him to an institution he was apprenticed to learn the printing business and has been doing well.

Boy of eight—A bright little fellow with poor home surroundings. Was committed to reform school because magistrate in rural district did not know of any other procedure. Was, however, taken in charge by Provincial Superintendent and after two or three weeks' trial was placed in a farm home. Has now been there since the early spring and is doing well, attending school, etc.

Boy of twelve—A homeless youth. Ran away from the place in which he lived and wandered about the country. On arrival at a certain town was arrested and placed in gaol as a vagrant. Was taken over by Provincial

Superintendent and after a short probation was sent to an excellent farm home. He ran away from there but could give no reason for doing so. Was recovered a day or two later and expressed his regret for having acted so foolishly and has since been doing well. The people and neighbors speak highly of him and his advent brought in applications from four others for a lad of the same description.

Boy of thirteen—Was about to be sent to the reformatory but as that institution was closing he was transferred to the guardianship of Provincial Superintendent instead. Brought him to Toronto and the second day he ran away. Found him again a little later on, a wild and mischievous youth but good-hearted and affectionate. After a short probation sent him to a farm home and have since received several letters and visitor's reports testifying to his usefulness and apparent happiness.

Boy of thirteen—This lad was under sentence to the reformatory but at the solicitation of a number of philanthropic persons Provincial Superintendent agreed to take the supervision. Kept him for a short time on probation, then sent him to a carefully selected farm home. Hear from him frequently and the people with whom he lives writes that they think a great deal of him and that he pleases them in every way.

Boy of twelve—Arrested for stealing. Was convicted and magistrates were about to send him to a reform school but on suggestion of Crown Attorney communicated with Provincial Superintendent and arranged for him to be placed under observation and if possible transferred to a respectable home. The cause of his offence was lack of proper guardianship—parents dead and aunt unable to control him. A bright, amenable youth, for whom a good home was easily procurable.

Boy of eleven—This little fellow, bright-eyed, round cheeked and boistrous, was convicted in a rural district of being a pilferer and a general nuisance. Neighbors gave him a very hard name but the difficulty was that he had never known a decent home. Provincial Superintendent, upon being communicated with, offered to take the guardianship, and like all the other boys dealt with it was soon found that all he needed was a good home and a little kindness.

Number in Orphanages Not Increasing.

The preventive work carried on by the Children's Branch of the service is nowhere more clearly shown than in the statistics for the orphanages of the Province. Notwithstanding the natural growth of the country and the tendency of charitable institutions to expand there has been a falling off both

in the number of children cared for in these institutions and in the expense, as the following figures will show:

In 1894 the number of children cared for in the Orphanages was 4,406, while in 1904, the number was 4,116, a reduction of 290.

In 1894 the total Government grant to the Orphanages of the Province was $14,771.80, while in 1904 the grant was only $14,689.05, or $88.75 less than ten years ago.

Old Customs Hard to Alter.

To many it will come as a surprise that there should still be so large a number of dependent children in juvenile institutions, especially in view of the fact that the Children's Aid Societies are not able to fill one-half the applications received from respectable people who offer to provide for a homeless child without expense to the country, and in view of the further fact that the number of orphan children brought to Ontario from England is now about two thousand a year. But it has to be remembered that an old established custom is hard to alter. The prevalent idea for the past two hundred years has been that orphans should be brought up in public institutions, and those connected with these institutions dislike to do anything that will empty the beds and deplete the ranks of charity children. Many bequests are still made for the maintenance of institutions, while the Children's Aid Society rarely receives any legacy looking toward the endowment of the good work of home-finding and keeping orphaned and neglected children in normal home surroundings. However, those who believe in this more modern, more rational and more Christian method of providing for destitute children, must continue to advocate in a fair and reasonable manner the right of every child to a free and unrestrained home-life, instead of consignment to the coldness and artificiality of the public orphanage.

Boys Should be Taught a Trade.

In looking over the large number of young men in the Central Prison and trying to study the circumstances which led to their being there, I was struck with the fact that the majority of them as growing boys had never been put to learn any trade or regular calling by which they could earn a living. Many of these young fellows from eighteen to twenty-five, of strong and vigorous constitution, had just drifted along at odd jobs, and having no special ability other than their strength, were naturally thrown out of work in dull times and driven by their lack of means and general idleness to stealing for a livelihood. This thought recurred to me in looking at the men who were employed by the city to remove the snow from the streets. In a gang of twenty there were at least eight who were not yet twenty years

of age, and while this class of work seemed well enough adapted for middle-aged or elderly men without other resources, it seemed altogether unsuited to young fellows who were practically at the beginning of life.

There is a general tendency throughout the country among the poorer class of parents to let their boys drift along without learning any trade or business and the old system of apprenticeship seems to have completely died out. It is a question, however, if in the best interests of the community it will not be necessary to revive the apprenticeship plan or at least insist that at fourteen years of age every boy should be required to properly enter upon the study of some industry by which he can later on adequately support himself and add to the industrial wealth of the community. Such compulsory trade-learning would greatly lessen the number who now in the winter gravitate toward the gaols and refuges for shelter and food.

Work of the Future.

Looking to the future of child-saving work in this Province and considering what advance is possible and desirable, it seems to me that co-operation among Children's Aid Societies is needed so that three or four enthusiastic and efficient agents may be appointed in the various sections to take hold of the practical work and carry into action the views of the many good people who are deeply interested in this movement. We have many branch societies and committees but even the best of people have their own private affairs to attend to and cannot afford to incur any enmity or ill-feeling by vigorously prosecuting negligent parents. Someone is needed whose business it is to put the law in motion in these various centres and to attend to the numberless details in connection with an important work of this kind. Considering the vast sums of money that are expended on the maintenance of prisons, courts, police, etc., it is surely reasonable that at least a small sum should be expended in properly-directed preventive work, now recognized to be at the basis of all true philanthropy. It is my hope that through the liberality of the Government some progress will be made in this direction during the next year. Two or three special agents, if once properly started in this work, would so commend themselves to the liberality of the Christian people of the community that before long this work would be supported, as I believe it ought to be, almost entirely by private benevolence.

HOME-FINDING WORK.

During the past year there was a considerable increase in the number of new names added to the roll of those in foster-homes, the total number being 346, as compared with 239 in 1903. This large addition is due in part to the placing out of the Reformatory boys but there was also an increase of thirty younger children placed in homes over the previous year. There is now a total of 2,376 wards of Children's Aid Societies entered on the books for regular visitation and as there are in addition a large number of children annually visited for various institutions the total number coming under supervision in various ways would be close upon four thousand.

The children sent to homes were of all ages from one year up to sixteen and homes and situations were also found for former wards, some of whom were from eighteen to twenty-two years of age.

Changing to Other Homes.

Replacements have been more numerous during the past year and this branch of the work will always increase with the added number of children sent to homes. It has been necessary to receive back and provide again for about 175 children and some of the more troublesome ones have been replaced as many as five or six times. This now constitutes by far the most troublesome and perplexing part of the work. It is comparatively easy to

find a home for a bright attractive child but when a boy or girl comes back repeatedly, owing to some physical weakness or mental inertness, it is often a puzzle to know just how to adjust them to society again with the least possible delay. This is really the best class of work, and it is very gratifying to be able to look back upon scores of rather undesirable children now growing up in free homes who with less thoroughness and zeal in home-finding would have become chronic burdens upon society. Thousands of dollars have been saved and the position of the children made infinitely pleasanter by this determination to find free adoptive homes for even the most hopeless of these unfortunate children.

Of the Societies placing children, while all have done their share, it is but natural that the larger number placed in homes should be by the Societies in the more thickly populated cities. The chief Societies placing the children would therefore come in the order named: Toronto, London, Ottawa, Hamilton, Peterborough. Owen Sound, Lindsay, St. Thomas, Sarnia and Chatham. The amount of work done, however, cannot be judged by the number of children sent to homes, as a very important work is often done without a single child being actually sent to a foster-home.

Marriages Becoming Frequent.

Children placed in homes in former years continue to make good progress and are gradually becoming self-supporting. Quite a number of marriages have taken place during the past year, which is a continual reminder that the work is no longer in the initial stage. Last week notice was received of the marriage of a young woman who as a small child was taken by the writer from an Infants' Home and sent to a foster-home where she continued to reside until the day of her marriage. Many pleasing instances might be mentioned of the progress of these young people but this subject has been dealt with at considerable length in previous reports.

Visiting the Children.

In addition to the general supervision both of this department and the local Children's Aid Societies, the children are regularly visited at least once each year by Mrs. Harvie and Mr. William O'Connor, the latter specially looking after the Catholic children. These visits have proved very valuable indeed and in reading over the reports that are submitted to me during the year it is pleasant to note the generally satisfactory conditions that prevail and the evident good treatment and careful training the children are receiving. There has been some complaint that one visit each year is hardly sufficient and it would certainly be better if some of the children could be more frequently visited, especially those between the ages of eight and fourteen, as that is the time when there is more danger of overwork and neglect of school attendance. It was the intention, however, that these

children should also be visited by representatives of the Societies specially interested and that the visits from the central office should be supplementary. As far as possible efforts are made to have the visiting more frequently and carefully done and the Societies are constantly being urged to send their secretary or other representative, particularly those who are acquainted with the children, to see how they are getting along and to encourage the foster-parents. Where the conditions were not all that could be desired correspondence was immediately entered into, and in a number of cases children were removed and placed in other homes.

Some Adoption Cases.

Many of those who make application for children for adoption have sad stories to tell of the bereavement and loneliness through which they were led to think of the homeless child. Sorrow and adversity seem to be sent as purifying and enobling agencies, leading to unselfishness of life and a consideration for others. These feelings often manifest themselves in compassion for homeless children and as a consequence many of these little ones receive a love and affection and a carefulness of training that they would not have received in their natural homes.

Recently a nurse called to make application on behalf of a worthy couple for a little girl. Their only child, a lad of eighteen, had recently died and shortly before his death he made his parents promise that they would at once adopt a child so that their thoughts would be occupied and they would not grieve quite so much for his loss. They both agreed and had asked the nurse to apply on their behalf. Within a fortnight a suitable child was found and they have now given her a daughter's place in their home.

In another instance a woman asking for a child had passed through the great tribulation of having her entire family of five children carried off by black diphtheria. She gladly took an unattractive child of three, and seeks by an outpouring of love to assuage her grief over the loss of her own little one.

Not long ago a man and his wife called who had just buried their last child, a young man of twenty, two others having been taken off by death a few years before. With the loneliness of advancing years approaching they wished to have young life around them and were delighted when given the care and training of a child of six.

Instances of this kind might be multiplied indefinitely and if it is true, as so often charged and occasionally realized, that growing boys and girls are asked solely for their work, instead of from motives of unselfish interest, it is also true that in the majority of these adoption cases there is a great and beneficent work going on worthy of support and commendation from every standpoint.

SUPERVISION OF FOSTER HOMES.

Review of the Year's Visiting by Mrs. Harvie—Children Well Treated as a Rule.

The following are some notes on the year's visiting by Mrs. Harvie:

There is little that is new in the work of visitation this year. About the same area as in past years has been covered, and all the counties where the Department and Societies have wards, have been visited. In two of the counties only a limited number of the children were called upon; however, these will be fully taken up the first in order in 1905. Eight hundred and eighty-one visits were made during the year, which occupied about twenty-eight weeks of time, and necessitated the travelling of ten thousand miles, including driving. In addition to the wards of the Department, a number of children placed out by various Homes, also several lads who had been inmates of the Victoria Industrial School and the Boys' Reformatory and subsequently placed in families, were called upon.

It is scarcely necessary to say that this service is in some respects an arduous one, requiring a considerable amount of health, vigor, patient endurance, and adaptation to conditions, and surroundings. At any moment when on a round of visits, unfavorable circumstances for which no previous preparation can possibly be made, are liable to arise, demanding unexpected effort, or rapid mental conclusions. On the other hand nothing can be more delightful and encouraging than to watch the steady development of probably a very ordinary child, or one that had been sadly neglected and undeveloped in the nobler characteristics of mind and heart, into a well educated well behaved, obedient, and truthful boy or girl. The following incidents, may illustrate one form of difficulty which occasionally confronts the visitor. On arriving at a village in North Ontario late one evening, found that a company of hunters had engaged all livery conveyances on hand, for the coming day, consequently a delay of twenty-four hours must be made or some other means of transportation found. As time pressed, visitor concluded to walk the eight miles between the village and foster-homes, and did so without much inconvenience. Again it was stated that a certain foster-home was within easy walking distance of the railway station. On inquiring, after leaving the train, ascertained that it was six miles away. The place was only a small hamlet, and no other train would pass until evening, therefore nothing could be done, but to walk the distance and on arriving visitor and hospitable, and the child happy and contented—an ample return for the energy expended.

It sometime happens that after having taken a long drive, through wind and storm it may be, to reach a home, the family are all away. In these circumstances all that can be done is observe the surroundings outside as closely as possible, and in some cases make inquiries regarding the welfare of child and family among people in the vicinity, which is usually a delicate task, demanding watchfulness, some tact, and the traditional "grain of salt."

Again, children are frequently away at school, which may be anywhere from one to three miles. Of course, it is satisfactory to find the children at school, and unless there is a necessity for such action, visitor avoids calling at the school-house. The reasons are apparent to any thoughtful mind. Such a call serves to remind not only our child, but all the others that this particular little one is under supervision or in other words is a "Home child," and no more decided mark of opprobrium can be found in their estimation. As a result, sensitive nervous natures are subjected to curious questioning, and frequently a certain amount of teasing and ridicule which is hard for the little ones to bear. If, however, there is the slightest doubt about the regular attendance of children at school, the teachers are seen, and the registers examined, or if this is inconvenient, the teachers' addresses are taken, in order that correspondence re the matter may be opened with them.

In only one or two instances has there been even an apparent want of heartiness, in the welcome afforded visitor. In these cases an earnest effort has been made to conciliate, to keep officialism in the back ground, and to overcome this feeling of coldness or suspicion with regard to visit; it is gratifying to note that these efforts have invariably been successful One of the most difficult parts of the work is to make suggestions, or to correct faults in training, or in child pleasantly and helpfully. However, if it is possible to make all the parties understand that these suggestions and corrections are made in a spirit of true friendship and interest in the welfare of all, appreciation is not withheld.

It is impossible to describe in words, the kindness, courtesy, and hospitality of foster-parents. Frequently the first words spoken, on visitor's entering the house are:—"We have been looking for you for more than a month now;" or "we thought you were never coming;" or "you are very late this year." One one occasion a little boy said to his foster-mother: "I guess our Auntie must be sick or dead, as she doesn't come any more." Another little girl said: "She guessed her Grandma was forgetting all about her." These little kindnesses, are a great help and encouragement.

The value of these visits cannot be overestimated. Probably not many children would really be cruelly treated, even were the supervision not as close as it is: but without it many in time would be completely lost sight of, by moving of parents, or transference to other homes without notifying the Society, and others would be deprived of many privileges they now enjoy.

In some homes visitation is almost unnecessary, save for the satisfaction the reports afford to guardians; in others it is very important, even though in many respects the homes may be considered fairly good. One young girl about thirteen years old stated she was sent to school most of the autumn even though there was much work to do at home, because a visit was expected any day. This was an important thing as she would soon reach the school age limit, and very little attention had been given to her education in her earlier years.

In some instances children had been transferred by foster-parents to other homes unknown to societies whose wards the children were. These transfers were made on account of changes in circumstances of former parents, death of one or other parent, etc. In one case visitor called at three different homes before the little boy aged about six years, was located.

The service rendered to the state by the kind foster-parents is probably not always appreciated as it should be. The affection bestowed, the training given and the watchfulness exercised even towards very ordinary children is really remarkable. Frequently people say that the motive prompting the taking of a neglected child is purely a selfish one, namely, the desire

to secure the assistance of children in house, or on farm, free of charge. This it can be said truthfully is not generally the case. A number of the children, are more or less below normal, the result of inherited tendencies, or neglect, and it is simply astonishing to observe the patience, forbearance and unvarying kindness of their foster-parents.

The work such children can perform, especially if they attend school is very inconsiderable. At the same time after young people leave school, arrangements should be made whereby a certain amount besides their board and clothing should be placed to their credit annually.

It is very pleasing to find children remaining in their homes, five, six, eight, and even ten years happy and comfortable in their surroundings; or to see tiny ones, who have in the short space of a year or two, so grown into the affections of foster-parents, that nothing but death will separate them.

The removals, or recommendations for removal this year have been very few. Probably one reason is, that Societies are more careful in placing than in the earlier years of the work. Another reason is, that, our Canadian children are eagerly sought after, and where applications are as numerous as they are, especially for girls, guardians are in a position to exercise the privilege of choice. Again our homes are prosperous, school and church privileges are increasing with the passing years, and all children in the rural districts have better advantages than formerly.

Experience continues to prove that this home-finding work is one of the best movements for the up-building of character, and consequently for the welfare of the nation, in which any government or citizen could engage.

CATHOLIC CHILDREN.

The number of Catholic wards of Children's Aid Societies placed during the year was 32. The Societies placing these children were: Ottawa, 17, St. Vincent de Paul, 7; Brantford, 1; Owen Sound, 1; Provincial Inspector, 6.

Divided according to sex the children were: Boys, 15; girls, 17.

Parentage: Father living, 7; mother living, 4; both parents living, 15; both parents dead, 4; illegitimate, 2.

Their ages were: Under 6 years, 11; 6 to 10 years, 9; 10 to 15 years, 9; above 15 years, 3.

The total number of Catholic children placed out by Societies is now 275. Of these there were returned by foster-parents during year 9; removed by Children's Aid Societies, 5; left foster-homes, 6; discharged from care of Societies, 5.

Of the number returned and removed 12 have been placed in other homes and two were returned to their own homes.

These children have been visited and their interests looked after by Mr. William O'Connor, and he has also visited and reported upon the treatment of 267 wards of Catholic orphanages. During the year he travelled about eight thousand miles and reported concerning the progress of about 400 children.

PROTECTION OF INFANT LIFE.

The following is the report of Dr. Harley Smith to the City Board of Health, on the baby and maternity homes of Toronto. This work is regulated by Ontario statute:

Toronto, January 14th, 1905.

Sixth Annual Report of the Inspector of Maternity and Baby Homes —for the year 1904.

The fact that there was only one death among thirty-three children in our Baby Homes during the month of January—the month that showed the largest death rate for one month in the history of the city is an evidence of the good care these children receive in our licensed Homes. What a contrast to the records presented in the years before our present system was inaugurated! During the year, twenty-four homes for the boarding of babies were licensed, and in these there have been cared for 106 children (or 590 in the past six years). These were disposed of as follows: 4 went to the Haven; 3 to the House of Providence; 1 to the Salvation Army Rescue Home; 2 to the Sick Children's Hospital, 2 to the Protestant Orphans' Home; 1 to the Infants' Home: 1 to the Ottawa Home for Children: 25 went with mother or father; 13 were adopted through the Children's Aid Society (making 62 thus adopted in six years). Twenty-four died:—January 1, February 2, March 0, April 0, May 0, June 1, July 2, August 10, September 1. October 4, November 1, December 2. Of course the hot months always bring

a high death rate among bottle-fed children; but it is noticeable that in July there were only two deaths, although the death rate in the city among children in that month was very high. There are at present thirty-one children in nineteen Baby Homes.

In our seven licensed Maternity Homes there have been boarded during the year 129 patients (a total of 718 in six years, with 614 confinements). Of the 129 patients, 110 were confined, 11 went to the Hospital or other places to be confined, and 8 are awaiting confinement. Two patients died during the year. The first had uraemic convulsions; she did not enter the

Home until after labor had set in and thus gave little or no opportunity to the two physicians in charge to save her life. In the other case the patient was also attended by two physicians but, in spite of their best efforts, she succumbered to peritonitis. The infants born in these Homes have been thus disposed of: 2 went to the Infants' Home; 3 to the House of Providence; 2 to an Ottawa institution; 22 to our licensed Baby Homes; 7 were still born; 6 others died within a few days after birth; the rest were taken by their mothers. Twelve new Baby Home licenses were issued and twelve were renewed; twelve new Maternity Home licenses were issued and five were renewed. Sixty-five investigations of complaints and examina-

tions of premises were made. In the month of August there was an unusually large number of complaints against women for keeping unlicensed Homes; these were all investigated. Some of the complaints were found to be without cause. One woman, Mrs. S. was fined $5 and costs or six months. Five patients in Maternity Homes were married to the fathers of their children either before or after confinement and retained the children. The largest number of patients and babies in the Homes was in the month of May when there were 51 babies, and 26 patients under the care of the Department.

The great City of Philadelphia is only now struggling with the problem that was solved in Toronto six years ago. The press of that city has been urging the adoption of some system similar to ours in order to check the dreadful mortality among illegitimate children and unfortunate mothers. Toronto is to be congratulated on the fact that no time was lost in putting into force the legislation enacted by our Provincial Legislature some seven years ago. The fruit of that action is seen in the greatly lessened number of child murders and desertions and the diminished maternal mortality during the years that have since elapsed.

WHIPPING CHILDREN.

One occasionally hears the view expressed that whipping should be revived and that the presence of so many bad children is an evidence of the folly of sparing the rod. My experience has been that it is not whipping that is needed so much as love of the right sort, discernment of child-character, individual attention, patience and self-control.

During the past seventeen years I have had to do directly and indirectly with large numbers of poor children many of them destitute and friendless, some of them bad and even depraved, and yet the policy that I have always advocated and followed in dealing with them has invariably been one of kindness and comradeship. Buffeted about and half-starved, these children learned all too soon the hardships and cruelties of life, and to try to beat them into goodness would only be to follow out the course their former treatment led them to expect and to harden instead of mollify their dispositions. Most children commit crimes because they know no better; that has been their training, if not positively at least by the prevailing examples in their old home and neighborhood. To whip them implies distrust and vengeance, and excites hatred and the spirit of revenge. No reform can possibly be expected under such conditions. Return good for evil is a safe rule to follow, and if kindness can soften the hardest heart how much more likely is it to influence young people whose hearts are still plastic and whose affections have never been satisfied by the sordid conditions of their existence? No, whipping may be better than the gaol as a punshment (and I have advocated it as the lesser of the two evils) but it is not the best nor the true remedy, nor can it ever be effective in training to goodness the wayward or delinquent child.

What, then, is the fitting remedy for youthful wrong-doing? Removal of the causes or the removal of the child from the causes. Drunkenness in the home, the absence of a true mother, the lack of elevated affection, are some of the evils that drive children to the streets. Probation officers or friendly visitors under the direction of a central Children's Aid or Charity Organization Society could often bring about an improvement in the home life, and failing that the law could be invoked for the protection of the child.

Where a boy has been guilty of repeated thefts or other offences it is desirable that he should be removed entirely from his old neighborhood and companions—not to a reform school to associate with other bad boys—but to the bracing moral and physical atmosphere of the country. Most boys like farm life when once they become acquainted with it, and work in the

open air, with evidences all around him of industry, thrift and right living, will usually prove an excellent corrective and tonic to a lad.

As a matter of sound public policy it is desirable that children with hurtful associations and tendencies, as well as those who are actually homeless, should be placed back upon the land. They are made welcome there, and because of their services are given social advantages they could never hope to enjoy in a crowded city. Hundreds of cases could be cited where this plan has worked well in the past.

So far from being unfair to the farming community, the placing out of such children would be a positive advantage. These children are not inherently vicious. Many of the boys who steal and get into police courts are simply working off an excess of energy and have naturally good dispositions. By the exercise of kindness and friendliness and with continuous supervision, at least ninety per cent. will make good men and women, and among the failures must be classed the mentally deficient who often cannot respond even when they would.

The congregating of children in public institutions is bad from every standpoint, while the individual treatment, inspired by a spirit of loving helpfulness, seldom fails of success as a remedy for wrong-doing.

A SKETCH OF ONE NEGLECTED FAMILY.

The young man whose picture is given was recently killed at London, Ontario, while resisting arrest, and he had a long record of crime against him. He belonged to a large family of children that were brought up in Toronto in the midst of drunkenness and debauchery. About sixteen years ago the writer was well acquainted with these children, as they were frequent guests at the Fresh Air excursions and it was the legal inability to rescue them from their evil surroundings that led to an agitation for the passage of a Children's Protection Law in this Province. Nearly all the family have been engaged in crime or have been public charges in some way or other since that time, and if it could be computed, the cost they have been to this country would probably aggregate thousands of dollars. Without going into details the following items taken from the daily papers will give some idea of the trouble and expense these neglected children have since put the country to:

Toronto *World*, August 11, 1903. Stephen D. is one of a family who have police records as long as the worst criminals the police have ever had to deal with. His two brothers are at present spending lengthy terms in Kingston Penitentiary for hold-ups and house burglary. Larry, one of his brothers, was arrested in Parry Sound for theft. While waiting to be taken to the Central, where the magistrate had sent him for twenty-three months, he gained admittance to the private room occupied by the magistrate. Hurriedly changing his clothes for those of the magistrate, he wandered slowly out, mixing with the crowd, and not till a month after was he located. He was then in Toronto and was arrested by Detective Forrest.

His family and himself are well-known to the Toronto police. A number of years ago they used to live in what was then called "Murderers' Lane", more properly known as Lavin's Lane, a thoroughfare now closed, but which ran off Jarvis Street, above King. There it was that the boys got their early training in the art of criminology, and have since showed signs of learning it well. Stephen D. is 23 years of age, five feet in height, stout build, round face, medium complexion, blue eyes and is rather good-looking. It is thought by the detective department that they have the man who has been doing a number of daring robberies in Ontario. They have his measurements and are waiting to search past enquiries, with a view to connecting him with several. He had a big 38-calibre revolver when arrested yesterday, and, upon examination, it bore signs of being recently discharged. The diamond ring that was found on him is placed in a heavy band of gold, and is what is known as a gypsy setting. It is thought from information received from Hamilton that this is the property of a wealthy citizen of that city, whose house was recently ransacked. The arrest is thought by the police department to be a most important one, and likely to clear up a lot of mystery in connection with house robberies throughout Ontario.

Toronto *News*, April 17, 1905. London, Ont., Police Magistrate Love this morning sentenced John D., the burglar who was caught two weeks ago by the police, to a term of seven years in the Kingston Penitentiary. He was sentenced on two charges of house-breaking and also for carrying a loaded revolver, which he drew upon P. C. Down at the time the arrest was made. The magistrate said that from what he had learned he believed this young fellow to be as desperate a character as his brother, the late Steve D., who was killed in an attempt to rescue his companions from the police. Of the last eighteen years John D. has spent twelve years in jail.

A sister of these lads, after being arrested several times for vagrancy and improper living, went to an American city and is an inmate of one of the worst resorts there.

Hundreds of children have been rescued from just such surroundings and possible careers since the Children's Protection Act was passed.

Neglected Children.

What the Children's Aid Societies Are Doing For Their Protection.

Some idea of the work carried on by the thirty-six Children's Aid Societies of Ontario may be gained from the following reports :—

Toronto.

The Children's Aid Society of Toronto had a prosperous year in 1904 as regards the work done, though there is still a rather large overdraft at the bank which the Board of Management would like to see reduced. The Board suffered loss by death, Mr. James Massie, so well known in charity and philanthropic circles, having passed away.

The Shelter continues to be an indispensable adjunct to the Society's work. In addition to the children awaiting homes, many boys were sent from the Children's Court on remand (who would have been detained in jail previous to the establishment of the Shelter), these often overtaxed the accommodation available for such cases. A number of children were brought by the truant officers or their parents for short terms of discipline, and several girls, who might have gone far astray if such a place had not been available, were trained and sent to situations.

There were 835 cases during the year involving 1,519 children.

The 336 complaints were disposed of as follows :—by assuming custody of children, 40; by mediation and advice, 155; by prosecution, 3; by reference to police, 8; by warning, 37; by discipline at Shelter, 21; found untrue, 3; reported to Provincial Superintendent, 3; to Shelter as lost, 1; temporarily for want of evidence, 20; through co-operation of various societies, 45.

The 499 children's court cases were classified as follows :—arson, 4; assault, 15; aggravated assault, 4; breach of city by-laws, 44; breach of railway act, 11; cruelty to animals, 2; disorderly conduct, 198; drukenness, 1; false pretences, 1; housebreaking, 13; incorrigible and truant, 4; malicious injury to property, 21; shopbreaking, 5; theft, 114; till tapping, 1; trespass, 27; vagrancy, 34.

The disposals were :—Alexandra Indutsrial School, 6; discharged 5; dismissed, 41; escaped,1; fined, 117; Industrial Refuge for Girls, 3; Reformatory for Boys, 1; suspended sentence, 267; transferred to St. Vincent de Paul Children's Aid Society, 15; Victoria Industrial School, 27; went to United States, 1; withdrawn, 15.

Foster homes were found for 47 children and situations for 3.

Since the Society was inaugurated in 1891, 11,094 cases have come under its care involving 14,955 children, and 412 children sent to foster homes have not been returned to the Society.

The receipts were $6,484.88 and expenditures $6,447.61 with $1,000 overdraft at the close of the year.

Building Fund.—The indebtedness on this account stood at $10,913.00.

Officers.

The officers of the Society are as follows : —

President : J. K. Macdonald.

Vice-Presidents : W. Harley Smith, M.D., R. S. Baird, T. Millman, M.D.

Treasurer : A. M. Campbell.

Executive Committee : Rev. James Murray, C. J. Copp, M.D., E. G. Parker, C. P. Smith, Rev. Robert Hall, Rev. E. T. Fox, Ambrose Kent, G. F. Marter, W. H. Shaw, Ald. Sheppard, Mrs. Wm. Oldwright, Mrs. J. J. Follett, Mrs. C. C. VanNorman, Mrs. James Ryrie, Miss Wardrop, Mrs. John Lillie, Mrs. O. B. Sheppard, Mrs. Percy Leadley, Mrs. Ambrose Kent, Mrs. J. C. Fisher, Mrs. A. F. Rutter, Mrs. F. C. Jarvis.

Secretary : J. Stuart Coleman.

Hon. Solicitor : W. B. Raymond.

Inspector and Superintendent of Shelter : Lee Williams.

St. Vincent de Paul Society.

Following is a report of the work carried on by the St. Vincent de Paul Society.

During the year ending 30th September, 1904, there were 350 cases of neglected, dependent and delinquent children brought to notice of this Society, affecting welfare of 450 children.

Of these cases 179 were from the Children's Court, and 172 were private cases reported to office.

The Police Magistrate disposed of the court cases as follows :

Committed to St. John's Industrial School	18
Committed to St. Mary's Industrial School	5
Committed to Penetanguishene Reformatory	1
Made wards of this Society	6
Remanded to Shelter "Blantyre"	28
Remanded to Shelter, Good Sheperds	5
Remanded to "Sacred Heart" Shelter	4
Remanded till called on	28
Fined	22
Cases withdrawn	5
Discharged on suspended sentence after short time in Shelter	29
Total	179

Private Cases : These cases were fully investigated by the agent and the necessary assistance given. Temporary homes were found for many, counsel and advice for all; as to their future conduct— and, only when parents persisted in neglect of their children they were brought before the court and their children made wards of this Society.

There were 103 children made wards of the Society, 90 of whom have been given out for adoption in good homes and, of whom we have received through Inspector William O'Connor, full and most satisfactory reports.

As regards helpful suggestions I might say that although the "Children's Aid Act" as it now stands is excellent to a degree, still, I am decidedly of opinion that the powers conferred on agents by the Act might be so modified as to restrict their methods to the side of leniency by the employment of charitable counsel and advise and, only when these methods fail to have recourse to the extreme measures of the law.

Financial : During the term our expenditure of $1,241.25, has exceeded our receipts of $1,104.25, by $137.00. Notwithstanding that we utilize our benevolent institutions at nominal rates and have but one paid officer at very small salary.

Board of Management :

Patron—His Grace the Most Reverend Denis O'Connor, D.D., Archbishop of Toronto.

President—Mathew O'Connor.

Vice-Presidents—Eugene O'Keefe, Thomas Long, M. J. Haney, J. J. Murphy.

Secretary—W. T. Kernahan.

Treasurer—Daniel Miller, Manager Merchants Bank, Toronto.

Physicians—Drs. Wallace, McKeown, McKenna.

Hon. Solicitor—H. T. Kelly.

Barrister—Foy & Kelly.

Hon. Auditor—W. T. Kernahan.

Committee—J. W. Mallon, A. W. Anglin, J. A. Gorman, William Dineen, R. Bigley, L. J. Cosgrove, L. V. McBrady, Thos. Winterbury, V. P. Fayle, J. R. Rogers, Mrs. R. Elmsley, Mrs. P. Hynes, Mrs. Trowman, Mrs. Justice Falconbridge, Mrs. H. T. Kelly, Mrs. J. French, Miss Foy, Miss Miller, Miss Walsh, Miss Macdonell.

Advisary Board—M. O'Connor, President ; Rev. L. J. Hand, Hugh T. Kelly, R. Elmsley and James Pope.

Assistant Secretary and Agent—P. Hynes, office 25 Shuter street, residence 181 Wilton avenue.

Peterboro.

The annual meeting of the Children's Aid Society was held in the Council Chamber on December 17th, 1904. Mr. J. J. McBain presided, and among those present were : Rev. Dr. Torrance, Rev. Father McColl, Rev. F. J. Scott, Rev. E. A. Langfeldt, J. H. Burnham, G. Edmison, P. Campbell, K. Eardley-Wilmot, George Cochrane, R. R. Dennistoun, Mesdames Birdsall, Eardley-Wilmot, Campbell, Montgomery, Best, O'Sullivan, Ward, Harding, and Misses Barlee and Boucher.

The report of the Secretary, Mr. R. M. Dennistoun, shows that the work of the Society has been widely appreciated, many private contributions having been received during the year. Thirty-seven children have passed through the Society's hands since the last report was presented.

Some of these were taken care of only temporarily during the illness of parents, etc., others were taken away from parents on account of neglect and were placed in good foster-homes, an incorrigible boy who had been given many opportunities to do right was sent to the Industrial School, boy accused of stealing released from custody on undertaking of Society to look after him, etc., etc. The death occurred of one of the wards of the Society who was placed out in a foster-home, where she had been very kindly treated. The report also states that the Society has received the co-operation and assistance of the Town and County Magistrates and also of the police officials.

Mr. George Cochrane, the Agent of the Society, spoke in his report of the very satisfactory manner in which the Shelter has been managed and of the good work done by the sewing society in providing warm clothing for the children. He traveled during the year 1,200 miles and made 89 visits to investigate complaints. The persons making these complaints need have no fear that their confidence will be abused. He had visited 145 children during the year, and distributed 14 baskets of good cheer at Christmas time. Eighteen bundles of clothing were given to applicants and 32 children who were not inmates of the Shelter were fitted out during the winter. Of the 37 children admitted to the Shelter only four now remain there, the rest having all been well provided for outside.

The Treasurer, Mr. Peter Campbell, read the following report, which was adopted : Receipts.

Balance on hand	$171 16
Cash received through the year	773 09
Expenditure	$857 73
Cash on hand	86 52

Mr. Kelso's Address.

After the formal business the Provincial Superintendent, Mr. J. J. Kelso, was called upon for an address. He complimented the Society on its good showing and said he had always had high regard for the work and the officers in Peterborough. It was very important to get good officers. In some places the work had suffered because of the difficulty of getting the right kind of people interested.

The Children's Aid Act was passed in 1893. At that time a great many people were doubtful as to the advisability of passing such a measure. They said that it would destroy the authority of the parent over the child, and was unwarranted interference with the liberty of a subject. Before that there was no law by which the Society could step in between the parent and child. The work has gone on in a satisfactory manner, and between 10,000 and 15,000 children have come under the care of the Society.

It was impossible to over-estimate the good results of the work. The method employed was to try to keep the children in their homes and see that they were being properly brought up, and if they were homeless to have them placed in comfortable homes.

Most of the children had been placed in country homes, where experience has shown that they got along very well. Some people appear to think they were worked too hard. Of course they had to assist in the work, which was but right. Children brought up in idleness eventually drifted into the prisons and reformatories. The children placed in country homes were very healthy; this was shown by the fact that only a very

small percentage of them die. The children were robust and ruddy, and had none of the ails and aches so common amongst city children. They lived to be industrious and respectable citizens. It was a fundamental principle of the Society to look after the children until they are eighteen, nineteen or twenty years of age.

Credit Where Due.

Mr. Kelso said the country people who adopted the children from the Society didn't get as much credit as they deserved. An interesting fact

in connection with this was that over 800 children under 6 years of age were adopted into country homes, which precluded the idea that they were being taken for the work they might do. The people in the country were doing splendid work and should be encouraged.

In the work of the Society the principle of punishment was supplemented if not supplanted by that of kindness. The Societies were now taking a great many children who formerly used to be sent off to the gaols

and reformatories and getting them into good country homes where they did well in nearly every case. It was almost impossible to reform children in the reformatories because they become contaminated by contact with eacn other. There was a great deal in getting so-called bad boys away from bad surroundings.

Mr. Kelso closed by urging the officers to continue advocating the claims of children to a clean and happy life. It was a beautiful work with many opportunities for helping unfortunate boys and girls.

Officers Elected.

The election of officers resulted as follows :—
Hon. President : Hon. J. R. Stratton.
President : J. J. McBain.
Vice-President : Mrs. Birsdall and J. H. Burnham.
Secretary and Solicitor : R. M. Dennistoun.
Treasurer : P. Campbell.
Agent : G. Cochrane.
Representative on Charity Board : G. Cochrane.
Executive Committee : Mesdames Best, Peck, Davis, Ward, O'Sullivan, Montgomery, Potter, Dr. Jessie Birnie, Mrs. Gow, Mrs. Eardley-Wilmot, Miss Dickson, Miss Boucher, Rev. Father McColl, Rev. Dr. Torrance, Rev. Mr. Potter, Rev. Mr. Langfeldt, Rev. Mr. Davidson, Rev. Dr. Crothers, Rev. Mr. Jolliffe, Rev, Mr. Major, Rev. Mr. Scott, Rev. Mr. Brace. Mr. K. Eardley-Wilmot and the Mayor-elect.

Children's Committees.

Peterborough, West—Hon. J. R. Stratton, Mr. and Mrs. Robert Duff, Smith, Lakefield, P.O.; Mrs. W. B. Kelly, Bridgenorth, P.O.; Mr. and Mrs. Robert Shaw, Harvey, Lakehurst P.O.; Mrs. Nathan Crowe, Harvey, Bobcaygeon P.O.; Mr. and Mrs. William Harper, Lakefield P.O.: Mr. and Mrs. Thomas Johnston, Monaghan, Peterborough P.O.; Mr. and Mrs. R. Max Dennistoun, Peterborough P.O.

Peterborough East—Wm. Anderson, Esq., M.P.P., Otonabee, Peterborough P.O.; Mr. and Mrs. John Quinn, Douro, Peterborough P.O.; Dr. and Mrs. J. M. Shaw, Keene P.O.; Mr. and Mrs. Jacob White, Dummer, Warsaw P.O.: Mrs. W. B. Ritchie, Havelock P.O: Mrs. F. Hague, Havelock P.O.; Mr. Edward Fennell, Havelock P.O; Mrs. Justin Alley, Belmont, Rush Point P.O.

London.

The eleventh annual meeting of the Children's Aid Society of London, held on the afternoon of Dec. 19, 1904, in the City Hall, was well attended and much interest manifested in the growing work. The presiden, Sheriff Cameron, occupied the chair, and Inspector Sanders acted as secretary.

After the meeting had been opened with prayer by Rev. D. S. Hamilton, the chairman stated that it gave him much pleasure to present the annual report of the Board of Management to the Society's subscribers and contributors.

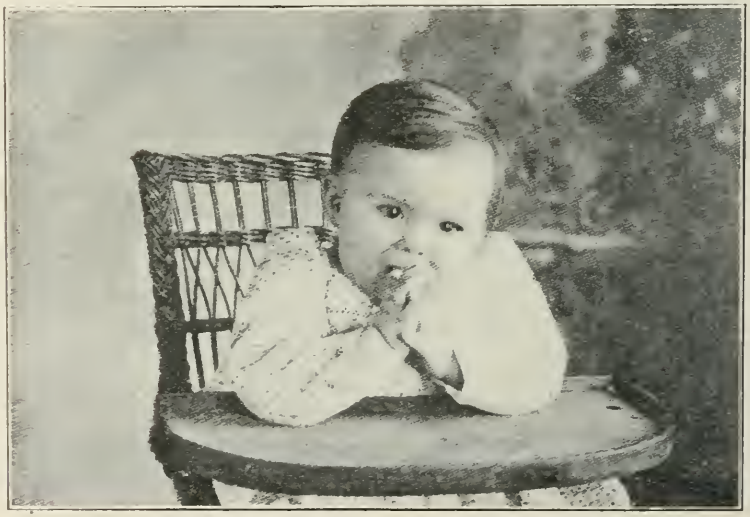
The report stated that the funds of the Society, never greater than its needs, have, with strict economy in all its details, met its requirements, and in this respect, its position is as good as last year.

The Board's endowment fund, to which the $200 bequest from the Turville estate was the first contribution, was increased during the year by a bequest of $200 from Mrs. MacDonald. Both of these sums have been invested in loan society debentures. Another bequest of $1,000, which will shortly fall due, will, if the proposition meets with approval, be similarly invested.

In conclusion, the report says :—"The Board desires to recognize the self-denying efforts of its inspector, Mr. Sanders. Much of the success of the Society in its eleven years' earnest work is due to the unbounded public confidence which he possesses.

"Miss Tufts has performed her duties as office assistant to Mr. Sanders with assiduity and painstaking care, and the Board has much pleasure in recognizing the fact."

This report having been adopted on motion of Mr. Chas. Hall, seconded by Mrs. Yarker, the inspector then submitted his report of the work ac-



complished during the past year. The report stated that the number of children who passed through the Society's hands during the year was 96. The children were disposed of as follows : Placed in foster homes for first time, 37 : replaced in foster homes, 11; transferred from one foster home to another without being returned to Shelter, 8; returned to relatives, 16; returned to Provincial Superintendent, 1; committed to institutions, 3; sent to sick children's hospital, Toronto, 1; died, 1; ran away, 1; in care of Sisters of Mount St. Joseph, 2; in Shelter Home on 31st October, 1904, 15. Total, 96.

There were placed in foster homes during the year—boys, 16; girls, 21—total 37. The Society has now in foster homes—boys, 153; girls, 165 —total, 318.

There were in all 86 children cared for in the Shelter Home, 109 Wharncliffe Road, London South, in the year from 1st November, 1903, to 31st October, 1904.

There were summoned before police magistrate during the year 3 girls and 201 boys, a total of 204 juveniles.

In concluding his report, Inspector Sanders says: —

"I beg respectfully to submit to the members of the Board and of the Society my unalterable conviction that the application of the strap—call it corporal punishment, if you will—is a method of dealing wtih cases of ujvenile delinquency that should be recognized by law."

The adoption of the inspector's report was moved by Mr. J. S. Pearce, seconded by Rev. D. S. Hamilton, and carried unanimously.

The treasurer, Mr. J. I. A. Hunt, in submitting his report of the Society's finances, remarked that, whereas, at the beginning of the year the Society had a balance against it of over $46, it was able to start the new year with a balance on hand of over $100. The statements, which were as follows, were adopted, and the treasurer congratulated on his successful financing of the Society's funds.

The treasurer's report showed that the total receipts during the year were $1,877.88, and that the receipts for the Shelter debt fund were $1,222.17. The Shelter House furnishing funds amounts to $51.

Miss Graydon, treasurer of the Poster Show, handed Mr. Hunt a check for $876.36, the proceeds of the show, and the treasurer was instructed to place the amount to the credit of the Shelter House furnishing fund.

Executive and Officers.

Lady Patronesses: Mrs. Coffee, Mrs. Adam Beck.

President: Sheriff Cameron.

Vice-Presidents: Rev. D. S. Hamilton, W. H. Workman, Mrs. Leonard, Mrs. Yarker.

Treasurer: J. I. A. Hunt.

Secretary and Inspector: Joseph Sanders.

Assistant Secretary: Helen Tufts.

Honorary Solicitors: Messrs. McKillop and Murphy.

Board of Management: Mrs. W. C. Allen, Mrs. Geo. Brown, Miss Bullen, Mrs. (Dr.) Drake, Mrs. G. H. Dreaney, Mrs. Thos. C. Duncan, Mrs. H. E. Gates, Mrs. G. B. Gerrard, Miss Graydon, Mrs. F. R. Hardie, Mrs. F. Harper, Miss Hungerford, Mrs. John I. A. Hunt, Mrs. J. W. Jones, Mrs. T. Macbeth, Mrs. G. McLean, Miss Macklin, Mrs. B. A. Mitchell, Mrs. P. Mulkern, Mrs. Mary Patten, Mrs. A. Purdy, Mrs. Frank Reid, Mrs. Regan, Mrs. E. B. Smith, Mrs. Jos. Smith, Mrs. John Weld, Mrs. Jas. Wilson, Miss Shaw Wood, Dr. A. V. Becher, V. Cronyn, Dr. F. R. Eccles, T. B. Escott, H. E. Gates, Rev. Dyson Hague, Chas. Hall, F. Love, P.M., O. Labelle, J. S. Pearce, S. Screaton, A. Talbot, J. R. Shuttleworth.

Auditors: Geo. F. Jewell and Andrew Dale.

Owen Sound.

The tenth annual meeting of the Children's Aid Society for Owen Sound and Grey County was held at Owen Sound on November 25, 1904. The President, Mr. John Armstrong, in an effective opening address called attention to the record of the Society's work in the ten years of its existence. It had, he said, fully justified its existence, and not only brought relief to scores of children, taking them from evil or cruel surroundings and started them on a better course with better chances for success, but had lived long enough to see some of them grow into useful and honorable young people.

Besides this it had been an educative work of a high character and its best results were seen in improved homes and conditions and in an increased respect for the laws so that the agent had less often to go to extreme measures, and the removal of children from their parents was becoming much less frequent. Over four hundred children had been dealt with by the agent in the ten years of the society's operations and in one way and another their conditions improved.

Rev. James Lediard then presented his annual report from which the following was learned of the good work done. The Society was formed in 1894, the same officers serving throughout the whole preiod, Mr. D. Shouldice, however, then on the police force, being its town agent and a very effective worker. In March, 1895, the present agent was appointed. The first child to be made a ward of the Society was committed by the late Judge Creasor and from being a wretched child is now an attractive and self-respecting young woman. Since then no less than seventy-eight children have been made wards of the Society by the action of the courts, while nearly four hundred neglected children have found a friend in the Society which has secured their rights and improved their conditions. Three hundred children have found a temporary home in the Shelter and one hundred and fifty have been placed in foster homes and are still being watched over and visited. During the year just closed the agent has interfered in behalf of no less than eighty-three children, twenty-one of them in the Shelter for longer or shorter periods. Ten new homes have been found and the agent has visited about one hundred children in their foster homes. Hospital treatment has been given to two children with great benefit. In addition the agent has given a number of public addresses and conducted a heavy correspondence, in all making a busy year.

The report was followed by an interesting address by Mrs. Harvie, the Government visitor of neglected children in foster homes. The Society, she said, stands for better homes, for an advanced public sentiment, and for higher moral tone, for the suppression of crimes against children, for the better care of the feeble-minded—especially girls, for the helping of incorrigible boys, for school privileges and for fair and considerate private trial in the courts or young people.

Judge Morrison followed in a brief speech. He spoke of the deterrent effect of the Society's work on juvenile crime and on the treatment accorded children by criminal parents, of the great saving in the expenses of criminal justice to the country and to the Province at large, and expressed his conviction that municpalities should take a deeper interest and give much larger grants to this kind of preventive work. He spoke very highly of the patience, good judgment and tact shown by Mr. Lediard in performing very trying and often unpleasant duties.

Mayor Godfrey, of Meaford, spoke briefly of his pleasure at being present. He was the bearer of a generous contribution from friends of the work in Meaford, amounting to nearly fifty dollars, secured through the efforts of Mrs. James Cleland and Mrs. Godfrey. A generous gift was also received from friends in Hanover by the kind efforts of H. H. Miller, M. P., and as both of these are annual gifts, and the persons mentioned unfailing friends of the Society, the Board feel grateful.

Rev. W. H. Cline spoke briefly and encouragingly of the work, while Principal Douglas gave a bright and forceful speech on the evils of truancy and the difficulty of dealing effectively with it. "Operate on the truant and co-operate with the parent" said Mr. Douglas. In this connection he spoke of one of the causes of truancy as the delivery rig nuisance, and he would be glad if business men would instruct their boy-drivers not to pick

up school boys and drive them round town when they had been sent to school.

After ten years of service some changes were made in the Board of Management, Mr. John Armstrong, the president, retiring, and Mr. R. B. Miller was elected to fill his place; Mr. James Trout as secretary retiring in favor of Mr. James Shaw, principal of Hill street school; Mayor Godfrey was added to the vice-presidents and Mr. Armstrong and Mr. Trout were placed on the executive. Mr. J. W. Frost remains honorary solicitor, Sheriff Moore treasurer, and Rev. James Lediard agent.

The newly appointed president occupied the chair and spoke briefly.

Officers.

President : Mr. R. B. Miller.
Vice-Presidents : Messrs. Burgess and Campbell and Mayor Godfrey of Meaford.
Secretary : Mr. James Shaw.
Treasurer : D. Sheriff Moore.
Agent : Rev. James Lediard.
Honorary Solicitor : Mr. J. W. Frost.

Hamilton.

The Children's Aid Society of Hamilton report that their monthly meetings have been held regularly during the year and always a good attendance of the executive present. The inquiries into cases of negelected and dependent childrn during the last twelve months have been greater in number than in previous years and have all been thoroughly investigated and dealt with. Two boys and one girl were transferred to the Society. Five children were taken away from parents on account of neglect and placed in good homes. Six boys were sent to the Industrial School. In addition to the above there were several cases where the children were removed temporarily from their homes, for one reason or another, but were returned.

The annual meeting of the Society held in June was one of the best in its history, not only because of the large attendance, but because of the support it received from many prominent citizens who took part in the deliberations.

Mr. Adam Brown, who presided on that occasion, presented the report of the directors. After giving particulars of children placed in homes it stated that the committee dealt with only two cases of children begging during the year, and in these cases the parents were warned what to expect if they sent their children out to beg again.

Attention was drawn to the dreadful practice of besotted parents sending their children to saloons for liquor, in some instances little things not over five years old. As stated last year, the Society is powerless to stop this practice through any operation of the law. The sellers of the liquor claim that if they have an order no matter how far back it may be dated that such is sufficient for them. This law should be amended.

There were thirteen complants during the year of children being neglected. In every instance action was taken by the Society. Several instances were given of this cruelty, the cause of prosecutions followed. In all thirteen which was usually traced to drink, instances were brought to the notice of the Society, and each case was dealt upon in this report.

The directors were unable to deal with a great many cases on account of having no proper Shelter for incorrigible boys and girls. One family of four children were placed in one of the homes, two of the boys ran away and have not been heard of, and another boy placed in the Boys' Home ran away several times. There are a number of incorrigible boys and girls with whom the Society can do nothing without a Shelter. In short the Society cannot do its work thoroughly until there is a Shelter where refractory boys and girls can be securely kept until they are dealt with. The Act is clear that the municipality must provide such a Shelter. The president has had interviews with his Worship, the Mayor, on the subject

who realizes the situation. Other directors felt assured that very soon such arrangements for a Shelter would be made as will be satisfactory to the Society.

Officers for 1904-5.

President : Adam Brown.

Vice-Presidents : Lieut.-Col. Moore, W. H. Wardrope, K.C., and P. D. Crearer.

Treasurer : J. M. Burns.

Secretary and Agent : William Hunter.

Executive Committee : Lieut.-Col. J. S. Hendrie, Hon. J. M. Gibson, Mesdames Evans, Urquhart, Beasley, Gibson, Zimmerman, Barker, Kilgour, Pratt, Malloch, Wingate, Lawson, Duff, and Henderson.

Visiting Committee are as follows : Mesdames Urquart, Evans, Beasley, Malloch.

The following is a list of those who have consented to become members of the County Committee : —

Mr. Amos Burkholder, Hamilton; Mr. George F. Lewis, Winona; Mrs. Francis Ecker, North Glanford; Mrs. Norman Smith, Stony Creek; Dr. McGregor, Waterdown; Mr. Robert McQueen, Kirkwall; Mr. James L. Robertson, Freelton; Mrs. John Nicholson, Flamboro' Centre.

St. Thomas.

The annual meeting of the Children's Aid Society of Elgin County was held in the City Hall, St. Thomas, on November 29th, with Mr. F. W. Wright presiding. There was a good attendance and lively interest in the child saving work was manifested. The statement prepared by the secretary stated that several complaints of parents allowing their children to grow up without salutary parental control had been dealt with and warning given which, in most cases, produced a good effect. Whatever may be the facts in such cases parents and guardians do not like to be openly charged with neglect of their children so a warning will often cause them to wake up to their responsibilities.

A number of cases of alleged immoral conduct on the part of parents and guardians were investigated and in two such cases the parents left the city to avoid exposure taking their children with them.

A family of four young children were removed from their home by the Society's officers. The mother being dead, the father and grandfather of the children kept a resort for immoral characters where vice and drunkenness were the daily routine and the children, the eldest of whom was a girl of ten years were in daily contact with the frequenters of the place. The facts were brought out in an investigation in the police court and the Police Magistrate made an order for the delivery of the children to the Society.

Another case which was taken before the Police Magistrate and which caused the Society a very unpleasant experience was that of a family of five young children who were left in a destitute and filthy condition. Their parents, who were of the shiftless sort, were both sick in the hospital at the time their poor little ones whose ages ranged from two to ten years were left without food or sufficient clothing during the cold days of February which was the coldest part of a very severe winter. As both parents wished the Society to take charge of their family the Police Magistrate was asked to fix a day for having them taken before him with a view of obtaining an order for maintenance, but he wished to take time to consider his jurisdiction as the children came from the township of Southwold although they were living in the city when taken in charge by the Society. After a delay of six weeks the matter was taken up by the Magistrate and on the evidence an order for delivery and maintenance was made against the County of Elgin, to take effect on the date when the children were actually placed before him. He refused to make the order cover the time that had elapsed since the application was first made for an investigation.

The County Council of Elgin was then applied to but that body also refused to do justice to the Society, taking the ground that they are governed by the order of the Magistrate. The Society was thus made to bear a loss of $68.47.

It has been found necessary to help with both food and clothing several families who through sickness and other causes were in need and who being residents of the adjoining township were not reached by the charitable organizations of the city. As the jurisdiction of this Society extends over the whole county any suffering or needy or neglected children within the county are the objects of its care.

During the twelve months just ending thirteen children have been cared for in the Shelter. Of these eleven were placed in foster homes. Two were returned by the persons who had adoptd them, but we cannot say that there was any fault in the children to cause their return. In one case an older and larger boy was secured from one of the English Societies and in the other the people seemed to tire of the care of the child. The other nine all found good homes where they are both giving and receiving blessings.

The reports of visits by Mrs. Harvie to the homes of children who are wards of this Society are encouraging. In every case the relations between foster parents and children are satisfactory.

The Society must make provision for obtaining a permanent Shelter as the house which Mr. Young has kindly given the use of for that purpose is for sale and may pass to a new owner at any time. The people of the city have always when called upon in the past generously supported us and they may be relied upon to respond liberally when the necessity is made plain to them.

The following were elected to the various offices for the ensuing year :

President : F. W. Wright, Esq., J.P.
First Vice-President : Geo. K. Crocker, Esq.
Second Vice-President : J. A. Kilpatrick, Esq.
Secretary : W. J. Shaw, Esq.
Treasurer : Miss A. King.
Agents : Wm. Fairbrother and W. E. Nicholls.

Berlin.

The annual meeting of the North Waterloo Children's Aid Society was held in the County Judge's Chambers on Saturday the 10th day of December, 1904. In the absence of the President, the Rev. R. Von Pirch, through illness, the Rev. Mr. Wagner was requested to take the chair, a letter was read from the President in which he said that owing to illness he was obliged to resign the office of President of the Society, and wishing the Society much success.

In the report of the work done by the Society during the year a number of interesting cases were mentioned. It was said that the lives of two infants had been saved, one a case in which the mother a person of a weak mind had given her infant to a friend to keep. Notice was received by the Society that the infant was being neglected and upon investigation this was found to be too true, the infant appearing to be so emaciated that her life was despaired of. She was taken to the Shelter of the Society where she has been restored to the best of health. The other was a case of an infant, mother dead and father unable to make a living having lost his sight, the infant given to relatives to bring up. These upon inquiry were found to be unfit for the duty upon more grounds than one. The infant

was taken to the Shelter and is now a very fine child. There is also under the care of the Society a waif found at the barn of a farmer in Wellesley, and an infant abandoned by his mother. A bright girl of about eleven was removed from her mother's home for the best of reasons, and placed her with a well to do farmer in the country where she has a good home. Several families have been quietly looked after during the last year with apparently good results. "The Orphanage" is still our "Shelter." It is a home established by several benevolent people for the children of poor people unable to provide for their families where the children are placed to board, if this can be collected, if not they go on the free list until they are disposed of by the relatives. There are now, including the children of the Society, some twenty-five little ones within its walls.

A resolution was passed sympathising with Mr. Von Pirch and thanking him for the interest he had taken in the work of the Society.

The following are the officers elected :

President : Rev. Mr. Wagner.
Vice-President : Rev. Mr. Boese.
Treasurer : Mrs. Lackner.
Secretary : F. Colquhoun.
Committee : Mrs. Kaufman, Mrs. Janzen, Mrs. W. H. Bowlby, Mrs. J. B. Snider, Mrs. Roat, Mrs. Catherine Breithaupt, Mrs. W. H. Breithaupt, Mrs. H. Brown, Rev. Mr. Andrews, Rev. Mr. Bradley, Rev. Mr. snider, Rev. Mr. Gilchrist, Rev. Mr. Lavell, Rev. Mr. Schulz, Rev. Mr. H. S. Hallman, Rev. Mr. Haunch, Mr. Cook, Mr. Clement, K.C., Mr. Millar, K. C., Mr. H. J. Bowman, Mr. Fennell, Sheriff Motz, Dr. Honsberger, Dr. Biehn and Dr. Hilliard.

Kingston.

The annual meeting of the Children's Aid Society of Kingston was held on the 3rd January, 1905, in the new schoolroom of the First Baptist Church. There was a good audience present. Rev. C. E. Cartwright, President of the Society, occupied the chair. The following is a summary of the report read by the agent.

"Eight meetings of the Society were held during the year. Some calls from outside the city came before us and we did what we could to meet them, but the Society would require more funds than we receive to deal with them properly. The agent attended the Police Court eleven times, a score of boys were tried for various offences. Most of the boys and their parents were visited and counselled as to the future. The agent also attended Judge Price's court where a case of sad depravity was tried involving one who came under the age limit with which our Society has to do. The chief delinquent got off on suspended sentence with a warning that if again brought before the Judge severe punishment would be inflicted. The number of family visited has been over thirty.

Eight children were given to our guardianship and are variously disposed of. Four were sent to foster homes and others will soon also be placed in homes. A number of applications have been received for children, some of these could not be met as we had not the children required. Fifty-three letters and 120 post cards have been sent out by the Secretary.

Judge Macdonald, of Brockville, gave a very instructive address which was much appreciated by all present.

The following officers and committees were chosen :

President : Rev. C. E. Cartwright.
Vice-President: Rev. A. Laird.
Solicitor: G. M. Macdonnell, K.C.
Treasurer : Dr. S. W. Dyde.
Secretary and Agent : Rev. D. Macallum.
Committee : Mrs. D. Ross, Mrs. Mowat, Mrs. D. Macullum, Misses Meecher, Baker, Ronan, Revs. Dr. Macmorine, M. MacGillivray, D.D., J. D. Boyd, D. Laing, D. M. Solmdt, J. R. Black, E. J. B. Pense, and John MacDonald.

Goderich.

Through the active interest taken by the President, Mr. James Mitchell, the Children's Aid Society of Goderich and Huron County has done some effective work during the past year. The annual report gives the following information :

"Early in the year a family of four attractive children were committed to our charge by the authorities of a neighboring town. The conditions surrounding what to these children constituted home were of the most deplorable and degrading character, and the case until it was finally adjusted was one that cost your Executive lots of worry and labor, besides being an expensive one on our funds but the result is that all the children are in com-

fortable and happy foster-homes, and the unfortunate mother of weak mind is in an institution where she will be well cared for.

"In another family two children were left to themselves through the imprisonment of the father, the mother having abandoned the home a couple of years before. While arrangements were in progress for placing them in houses, the mother returned and took the children back with her to a Michigan town, beyond our jurisdiction.

"A family north of Seaforth, to whom reference was made in our last report, has been visited, and found in most unfavorable conditions, but on the promise, and with some effort to fulfill it, of the parents that they would do better, it is still under supervision, and may possibly need our active interference in a few weeks.

"During the year your President has been consulted several times by the P. M., the Crown Attorney and the County Judge regarding cases where boys under 16 had been committed for acts of theft. The trial proceedings in each case were watched by your Executive, and the boys visited and counselled with. In every case the boys seemed to appreciate the kindly solicitations shown, and most of them were released on their own promises to do better in the future, a promise which we believe has been fairly well kept. One lad was committed to the Mimico Industrial School.

"The County Council made a grant of $50 to the Society, which was much appreciated.

"Reference was made in our last report to the provision made in the Children's Protection Act for the formation of county committees. Nothing has yet been done to carry out these provisions, largely because the work is one that only a few persons in each community care to have the responsibility of, but our experience has shown that with a committee of this character in each of the larger sections of our county the work would be more effectively and properly looked after, and cases now unheard of would receive the attention their needs demand. We suggest that your incoming Executive take this matter into consideration and endeavor, even if personal visits are necessary, to arouse the co-operation of a few good citizens in our towns and perhaps larger villages.

James Mitchell, *President.*
W. J. Field, *Vice-President.*

The officers elected were:
President : James Mitchell.
Vice-President : R. S. Williams.
Secretary-Treasurer : A. Bissett Thom.
Executive Committee : Mesdames Jas. Robertson, J. P. Brown, C. Beck, M. Swanson and S. Clark.

Barrie.

The Secretary reports as follows :—As the last annual public meeting was held in the end of January instead of the beginning of the preceding December this report covers a period of about ten months.

About 25 children have received special attention during the year, 5 were made wards of the Society, and 1 committed directly to Mr. Kelso's care.

The position of the Society as an organization befriending children has entailed a good deal of work outside of what is specifically assigned to it by

law. And there is no doubt that if the county were thoroughly organized the Society's work would be largely increased—both what may be called its prescribed work and that which falls to it by reason of its protective relation to children. A movement looking to such fuller organization, involving larger demands on the Secretary's tim,e and some remuneration in return, has been decided upon by the Society, and it is hoped that the coming year will see active steps taken to carry ou this policy.

The thanks of all who are interested in this work are again due to the President for ungrudgingly devoting time to it throughout the year, to Sheriff Drury for many acts of personal service, to Mr. Donald Ross, the Society's Honorary Solicitor, for kindly taking charge of legal business, to Mrs. M. Burton, the Treasurer, to Chief King, the Society's Agent, to Mrs. McKee and other ladies for looking after the children's clothing, to the

newspapers of the town for courteously giving space in ther columns for the Society's matters, and to the Town Council for the gratuitous use of its room and of the Town Hall.

Officers for 1904.

President : H. H. Strathy, Esq., K.C.
Secretary : Rev. C. S. Pedley, B.A.*
Treasurer : Mrs. M. Burton.
Vice-Presidents : Hon. Sheriff Drury, Rev. J. J. Redditt, Rev. Dr. McLeod.
Hon. Solicitors : Mr. Donald Ross, Mr. C. W. Plaxton.
District Representative : Mr. J. A. Mather, New Lowell; Mr. R. Graham, Saurin; Mr. C. S. Wright, Penetanguishene; Dr. McCullough, Alliston.
Executive Officer : Chief of Police King.
Visitor : Mrs. T. McKee.

*Mr. Pedley resigned and Rev. James Chapman was elected secretary.

Brantford.

The Brantford Society was one of the earliest organized, and has always been active in the work of rescuing neglected and dependent children. They have all along been fortunate enough to be backed up by the city council giving money grants as required for the purposes of the Society so that while gifts and donations from the citizens are always thankfully received, yet they do not have to allow the work to suffer for want of funds. From the Secretary'e report at the last annual meeting we glean the following facts: That complaints were fewer against parents and guardians for neglect of children than in earlier days of Society's work. The cause was stated as the result of good times, with plenty of employment, and the knowledge that a constant watch was kept on their movements. Eight children had been made wards of Society by order of magistrate. None have been accepted any other way. Eleven complaints against parents have been carefully investigated and such proceedings taken as circumstances warranted. Eighty-six applications for children had been received. Five children placed in foster homes. Three had been returned to the Society, and at that time three still in the shelter. The officers are:

President: Dr. Nichol.
1st Vice-President: Harry Cockshutt.
2nd Vice-President: T. H. Preston.
Treasurer: C. Cook.
Corresponding Secretary and Superintendent: S. M. Thomson.
Honorary Solicitors: Messrs. Harley and Sweet, and Messrs Brewster Muirhead and Heyd.

The work in 1904 has continued active, and many very encouraging things have come to be known in connection with the work some of those placed out by the Society in the early days are now young men and women, and some are married and keeping house for themselves. All in all this Society has great reason to be thankful for the good that has been accomplished for neglected and dependent ones.

Incidents of the Work.

The following incidents of the work have been furnished by the Society: Seven or eight years ago little Ellie, seven years of age, was placed in a home where the only child, a little girl, had died. The Secretary had a call a few days ago from the mother, and Ellie now a well grown girl, and evidently, the delight of the mother's heart. Ellie's own words are, "I have got a good home anyway." A day later the father called and said that after their own little girl died his wife was heartbroken, dull and melancholy, but since the day Ellie came to the house everything has been diffrerent, a new interest in life awakened, and comfort and happiness was now their lot.

Bobby and Benny were about ten and twelve years old when they were made wards of the Brantford Society. They were restless, mischievous boys, and hard to manage, but patience and painstaking have been amply rewarded, they are now grown to manhood, being twenty and twenty-two years of age, and fine, strapping, well doing lads, each with a little savings account in the bank.

This Society recently received handsome donations from several of the fraternal societies, who thus express their appreciation of the work that is being done. The Society lost a good friend in the late Chief of Police

Vaughan, who was a constant adviser and helper in every way he could since the organization of the Society. His successor, Chief Slemin, has, since his appointment, shown a willingness to help, and with the Secretary goes personally to visit wherever and whenever necessary.

St. Catharines.

It is a great pleasure to be able to report that a Children's Aid Society has been organized for St. Catharines and the County of Lincoln. The matter was taken up by the lady managers of the Protestant Orphans' Home of that town, which has been in existence for many years. After several meetings, at which the objects and work of the Children's Protection Act were fully explained, it was decided to proceed with organization. At a meeting held in July in the office of Major John S. Campbell, Solicitor, the subject was fully considered. Among those present were: Messrs. A. H. Malcomson, John Marshall, E. Poole, P. I. Price, Rev. J. H. Ratcliffe, Rev. James Masson, Rev. N. I. Perry, M. J. McCarron, John S. Campbell, W. B. Burgoyne, Mesdames C. A. Wilson, J. S. Campbell, Youmans, Killmer, Henderson, Clench, Burgoyne, and Misses Larkin and Stevens.

Captain H. A. Malcomson was elected chairman, and John S. Campbell Secretary pro tem.

The question was taken up and discussed at some length, and it was moved by P. I. Price, seconded by J. S. Campbell,

That whereas it is the unanimous opinion of the meeting that a Children's Aid Society should be organized, with headquarters in St. Catharines, and jurisdction over the county;

Be it, therefore, resolved, that a Society be now formed to be known as the Children's Aid Society of the County of Lincoln, the institution to be the same as other Children's Aid Societies in the province, and the work to be carried on under the Children's Protection Act of Ontario.

The election of officers was then taken up, with the following results :

President: Rev. N. I. Perry.
1st Vice-President: M. J. McCarron.
2nd Vice-President: A. H. Malcomson.
Secretary: Miss E. M. Stevens.
Treasurer: E. Poole.
Honorary Solicitor: J. S. Campbell.

An executive committee consisting of those present and R. E. Boyle, H. E. McSloy, M. Brennan, Mrs. Carman, Mrs. Scott and C. A. Case were appointed with power to add to their numbers, they to complete the details of organization.

A Government Order-in-Council was passed on September 23rd, 1904, duly authorizing the Society to have and exercise all the powers conferred by the Act. Since organization a deputation has been appointed to wait upon the city council to urge upon them the necessity of providing more moral and legal methods of trying youthful offenders than has been the custom.

Several children have been reecived and placed temporarily in the Orphans' Home, and the committee of that institution very generously donated $50 toward getting the Children's Aid Society properly established.

Chatham.

The ninth annual meeting of the Children's Aid Society of Chatham and Kent County was held on Tuesday, December 6th, 1904, and was largely attended.

The report of the Secretary, Mrs. A. Fraser, showed that the Society had held ten meetings during the year, and that the work had been most successful in every way.

Treasurer Fred. Stone announced that the balance in the bank at the last annual meeting ($329.67), together with receipts since then, amounted to $545.46, and that the disbursements amounted to $240.26, leaving $305.20 on hand. This balance includes the capital account (consisting of various legacies) of $303.85, leaving the balance to credit of current account of $1.35.

The executive officer, Dr. R. V. Bray, reported that fewer children had been taken from their homes during the year, and that but six children had been made wards of the Society, all of whom were now happily placed in good homes. The number of visits made was 80: letters written, 89; number of cases reported, 23, embracing 46 children, of these 10 cases, 16 children, being in town and the balance in the neighboring townships; number of interviews, 88. Dr. Bray regretted that persons laying complaints were sometimes unwilling to give evidence, without which nothing could be done. He also urged that greater inter-communication between the various societies of the Province be brought about. Twelve children were brought into

the police court, and eight applications for children had been received, but they could not supply the demand.

A very interesting address was given by Mrs. Harvie, Provincial Visitor, who discussed the aims and history of the Society, and the work accomplished. She thought that in a progressive city like Chatham there should be a fine children's shelter, that the executive officer should receive a good salary, and that there should be substantial grants from the municipalities. The Society stood for the taking away of children from homes did not improve and for the reduction of crime. The closing of the Penetanguishene Reformatory marked a new epoch in child-saving, and the Province as a whole was being cleansed of juvenile crime, largely owing to the Society's work. A boy or girl should never be sent to gaol until he or she had been given every opportunity of doing better. The Society stood for industrial education, for good homes, for the care, welfare, protection and upbuilding of childhood.

Crown Attorney H. D. Smith also gave an address, in which he pointed that the Society was in the best sense a paying institution, as the children reclaimed would in nine cases out of ten have been a burden on the community. Costs even in minor cases of theft came against the county, so that when the Children's Aid Society was called in it effected a great saving both to the city and county. If the children were not thus looked after they would come time and again before the courts, each time an expense to the county. No society gave such good value for the money spent, and he urged substantial grants from the municipalities, feeling confident that there would be a satisfactory return in the decreased cost of administering justice.

Officers Elected.

The election of officers was then proceeded with:

President: D. S. Paterson, B.A.

Vice-Presidents: Mesdames W. D. Sheldon and W. Young, Messrs. W. R. Baxter and H. Macaulay.

Executive Officer: Dr. R. V. Bray.

Secretary: Mrs. Annie Fraser.

Treasurer: F. Stone.

Hon. Solicitor: Thos. Scullard.

Auditor: C. E. Beeston.

Advisory Board: Miss Esther Abram, Mesdames J. L. Bray, Mrs. Brady, W. M. Drader, S. M. Glenn, Goodland, Waddell, Malcolmson, W. E. McKeough, A. E. Pilkey, H. D. Smith, S. Stephenson, Jos. Taffs, D. S. Paterson, H. J. Stevens, J. E. Oldershaw, and F. E. Malott, Rev. W. H. G. Colles, Messrs. J. W. Humphrey, Robert Park and J. W. Plewes.

City Council: Mayor McKeough and Ald. Scullard.

County Council: Thos. Robinson and Clerk Gosnell.

Harwich C. E. Union: George W. Riseborough.

Correspondence Members: All Public School teachers of the County.

Children's Committee: East Kent—Mrs. W. C. Sifton, Palmira; John Vester, Fayo; J. G. Little, Ridgetown; Mrs. John Porter, Ridgetown; Harry J. French, Dresden; Arthur Leverton, Bothwell; Mrs. W. H. Jamieson, Blenheim; Mrs. Wm. Laughton, Bothwell. West Kent—Dr. Mitchell, Wallaceburg; Mrs. A. D. Brander, Wallaceburg; W. C. Estabrook, Glenwood; Mrs. John Fergusson, Tilbury; Mrs. John Shanks, Port Alma; Mrs. J. N. Halliday, Merlin; Robert Smith (Dover), Chatham.

Dresden.

The Children's Aid branch at Dresden report a membership of thirty-two. Five meetings were held during the past year and several cases of children were considered. A number of children in a condition of destitution were relieved and several parents were notified that they must send their children to school regularly.

Ottawa.

The twelfth annual meeting of the Children's Aid Society, of Ottawa, was held at the city hall on October 13th, 1904, Mr. W. L. Scott presiding.

After the opening remarks the Treasurer, Mr. J. R. Armstrong, presented the following report: Receipts, personal subscriptions, $68; interest, $7.40; civic grant, $300; balance in bank from last year, $356.81; total, $732.21. The disbursements were $378.94, leaving a balance in bank of $353.21.

The Secretary, Mr. John Keane, presented his report, showing that in the eleven years of its existence the Society had taken charge of at least four hundred children, and placed them in good homes. During the past year forty-four children were committed to the custody of the Society, and of these thirty-three were placed in foster homes, or in one or two instances replaced with relatives during the good behavior of the latter. The work is steadily increasing until now it is felt that more help is needed. One of the principal events of the year was the resignation of the Society's officer, Mr. Bartlett, and the appointment of Mr. Peter McGuire to the position. The building to be used as a place for juvenile offenders instead of placing them in the police cells or the gaol will soon be completed.

The following officers were elected:

President: Mr. W. L. Scott.

Vice-Presidents: Sir Louis H. Davies, Rev. Canon Pollard, Rev. Father Whelan, Mde. Lamothe, Mrs. John Thorburn, and Mr. John Gorman.

Secretary: Mr. John Keane.

Treasurer: Mr. J. R. Armstrong.

Members of Council: Mr. Sheriff Sweetland, Principal James White, Mr. W. W. Edgar, Col. Irwin, C.M.G., Mr. George O'Keefe, Mr. P. Martian Coté, Mr. A. H. Whitcher, Mr. C. B. Taggart, Mrs. J. B. Featherston, Mrs. W. Leggo, Mrs. A. Robertson, Mrs. Arthur Bond, Mrs. E. A. Mara, Mrs. L. N. Rheaume, Mrs. F. X. Valade, Miss Mary McK. Scott, and Miss M. Cassaday.

Honorary Solicitors: Charles A. Murphy, A. J. Forward, D. J. McDougal, J. U. Vincent.

Cobourg.

The Secretary writes as follows: Since the Children's Aid Society, of Cobourg, was organized nine years ago it has had charge of seventeen children, all of whom, except one, belonged in this neighborhood. That one came from the eastern part of the Province, and, proving unfitted for the home provided, was sent on to Mr. Kelso. Of the others one died in infancy, and the others have been placed in homes, and satisfactory reports

have been received from the majority of them. Two or three cases are now engaging our attention, and we expect to take action as to these in a short time. The office of President became vacant recently by the death of the late R. Wilson, Esq., who had ably filled the position since our organization. His successor has not yet been appointed. The other officers are as follows:

Vice-President: Mrs. H. F. Holland.
Secretary and Treasurer: Jno. W. Bickle.
Agent: J. C. Ruse.

Colborne.

The annual meeting of the Children's Aid Society of Colborne, Cramahe and Haldimand was held in the council chambers, Colborne, on Tuesday evening, October 11th, 1904. The report of the Agent showed that cases requiring attention were being looked after, and that good work was being done.

The following officers were elected for the ensuing year:

President: Mr. James McGlennon.
First Vice-President: Rev. Mr. Duncan.
Second Vice-President: Mrs. Deans.
Secretary-Treasurer: Mr. W. W. Southon.
Solicitor: Mr. W. L. Payne.
Physician: Dr. Willoughby.
Agent: Mr. W. H. Smith.
Board of Management: Revs. Duncan, Fidler, Taylor, and Shaw; Mesdames Fidler, Payne, Taylor, Duncan, F. L. Webb, and James McGlennon; and Messrs. Brown, Gale, Cornwell, and H. S. Keyes.
Auditors: Messrs. Thomas Brown and W. L. Payne.

Sault Ste. Marie.

Over a year ago a Humane Society was formed in Sault Ste. Marie, one branch of whose work was to look after neglected and homeless children. Later it was decided that this was not entirely satisfactory, and that there was need for a society devoted exclusively to work for children. A visit was made by the Provincial Superintendent, who addressed several meetings, and a regular Children's Aid Society was organized. On the 5th of October, 1904, a Government Order-in-Council was passed, approving of the organization of the Children's Aid Society of Sault Ste. Marie, and the District of Algoma. Cases requiring it have received attention throughout the year, and since the organization of the Children's Aid Society three girls, whose parents were not giving them care and oversight, were looked after, and a child whose parents were both dead was placed in a good foster home. The merchants and other residents of the town have been liberal in their contributions to the Society, and its success seems to be assured.

The officers for the year are:

President: John Dawson.
Secretary: Nelson Simpson.
Treasurer: Frederick Rogers, D.C.L.
Agent: I. J. Downey.

Uxbridge.

During the past year the Children's Aid branch at Uxbridge has exerted a wholesome influence in that district. The President, Mr. T. C. Nicholls, B.A., in his report of the year's work, mentions that two young children who had been much neglected, were arrested for stealing, but, owing to the Society's intervention were let off on suspended sentence, and that now the neighbors are taking an interest in them and helping them to do right. Then a woman who beat her children unmercifully was told of the seriousness of her conduct, and the penalty attached to the practice of such cruelty was explained to her, since which time she has not repeated the offence, and has given the children better care.

Lindsay and Victoria County.

The tenth annual meeting of the Children's Aid Society of Victoria County was held at Lindsay on the evening of October 21st, 1904. The chair was occupied by Dr. White, who gave an address outlining the good work of the Society. The Treasurer, Mrs. Milne, reported that there was a balance in the treasury, after which Mr. E. E. Sharpe presented the following report:

Mr. President and members of the Society: It is with great pleasure that we present to you the 10th annual report of this Society. Ten years ago it was the privilege and duty of your secretary to give notice that a public meeting of the citizens of this town would be held in the council chamber for the purpose of hearing Mr. J. J. Kelso, of Toronto, the Superintendent of the Child Saving Department. Mr. Kelso's object in coming here was to create an interest in this new work, and if possible to organize a Society for the better protection of children. The outcome of the meeting was the formation of a Society which has been the medium of bettering the condition of about 55 neglected and dependent children of this town and county. Many more than the given number have been aided and provided for without being legally transferred to the care of the Society.

The 1st President of our Society was Mr. D. Ray, who very ably filled the position for four years. The new organization very soon had opportunity of manifesting its usefulness, in looking after two or three motherless children, whose father was quite incompetent of so doing. The home of the children was one of the very worst in town, yet the children have grown to be promising citizens owing to the timely aid of the Society. Soon again we were called upon to look after the interests of two little girls who were living with their mother some distance to the north of us. As this appeared to be a very difficult case to deal with, the Provincial Superintendent secured the services of Constable Short to aid in bringing the children to town. The personal appearance of the dirty, illclad, unkempt little creatures verified all that had been reported to us in regard to woeful neglect and destitution.

Our work steadily increased, and instead of one, two and three children coming under our care, we received them in lots of three and four at a time. Lately we have been getting control of individual children, and these have been mostly of the larger and older class.

In years past there appears to have been failure on the part of the Society to deal with some cases of uncared-for children, for in looking over

the minutes of the preceding years it was evident that resolutions had been passed and were not carried out, and in almost every case the children reflect our neglect of duty. Our work during the year now ending has been mostly in completing the work commenced in the previous years, and this has been most successfully accomplished.

A matter of considerable importance to our Society is the appointment of a Children's Committee throughout the county. This committee consists of members chosen and appointed by the County Judge, Sheriff and Warden. These members, if alive to the work, could aid in a great degree the bringing about of better conditions in some of the rural districts.

The membership during the present year has exceeded that of any previous year, there being at present 85 members enrolled at one dollar per membership fee ,and one life member, besides there are contributions of small sums to the amount of $5.50.

Quantities of useful second-hand clothing have ben received during the year, and much of it has been given to those needing the same.

Your Board of Managers have met in regular meeting eight times since our last annual meeting, and the average attendance of members has been nine.

Towards the end of August the Superintendent, Mr. Kelso, paid out town a visit, and very acceptably speaking in a general way of the work that is being carried on in the interests of child-saving and its need of support.

The following officers were electeed:

Hon. President: Dr. Herriman.
President: Dr. J. A. White.
Vice-Presidents: Mrs. Trew and Rogers.
Treasurer: Mrs. Milne.
Secretary: Mrs. E. E. Sharpe.
County Committee: Mrs. E. Le Tere, Little Britain; Mrs. C. E. Weeks, Woodville; Mrs. (Dr.) John McKay, Woodville; Mr. Thomas Watson, Sonya; Mr. John Walsh, Kirkfield; Mr. Newton Smail, Lindsay; Mr. John Bailey, Head Lake; Miss T. Scully, Reaboro; Mr. Eugene Shine, Downeyville.

Napanee.

The Secretary of the Children's Aid Society of Napanee reports as follows: The annual meeting was held on November 28th. During the past year our Agent has placed three children in foster homes, making a total of sixteen children which have passed through the charge of the Society during its six years' existence. We are pleased to report all but one of these children as living under favorable training and greatly appreciated in the foster homes to which they have been sent. The other child, as was reported last year, died a few months after leaving our charge.

Our work during the year has been by no means burdensome, there having been no expense incurred in transferring the three children committed to our care except the regular commitment fees.

Since our last meeting a deputation waited on the county council and secured a temporary grant of twenty-five dolars. We also communicated with township councils regarding expenses incurred in dealing with children from their immediate districts, and secured reimbursements in every case but two.

The following officers and committee members were re-elected:

President: Mr. Stephen Gibson.
1st Vice-President: Mrs. E. McGurn.
2nd Vice-President: Dr. C. H. Wartman.
Secretary: Fred. L. Hooper.
Treasurer: Miss M. Shirley.
Agent: Chief Creen.
Committee of Management: Mrs. A. W. Grange, Mrs. J. R. Defoe, Mrs. F. A. Ruttan, Mr. I. J. Lockwood, Mrs. James Gault, Dr. M. A. Symington, Mr. A. E. Paul, Mrs. Freman Lane, Mrs. A. McNeill, Miss Cartwright, Mr. Henry Wilson, Mr. Thomas Jamieson, Mr. Checkley, Mr. F. W. Burrows, Rev. A. McDonald, Mrs. W. T. Gibbard, Mr. E. W. Scott, Mr. V. Kouber.

Sarnia.

The annual meeting of the Sarnia Society was held on Friday evening, October 7th. Mr. Kelso and Mr. Adam Brown, of Hamilton, were present, and addressed the meeting.

The Secretary reported that during the year twelve children had received protection and care, making in all thirty-two since the organization of the Society. Of the twelve children ten have been provided with homes.

Two were sent to the Hospital for Sick Children to receive expert medical attention.

Regarding the progress of the children placed in other years, with few exceptions, encouraging reports were received from Mr. Kelso, of calls made at these homes by Mrs. Harvie, in the course of her visitation.

The following officers were elected for the ensuing year:

President: R. G. McArthur.
Vice-President: H. Ingram.
Secretary: J. Wilkinson.
Treasurer: H. Ingram.
Agent: D. Stokes.
Solicitor: R. E. LeSueur.

Temporary Home Committee: Mrs. Lawrence, Mrs. Clark, Mrs. Phillips, Mrs. Towers, Mrs. Ingram.

Foster Home Committee: R. G. McArthur, D. Stokes, T. F. Towers, H. Ingram, W. F. Lawrence, J. Wilkinson.

Board of Management, re-elected as follows—Gentlemen, J. F. Elliott, D. Stokes, W. F. Lawrence, G. L. Phillips, T. F. Towers, C. L. Crassweller, R. C. Palmer; ladies—Mesdames G. L. Phillips, W. F. Lawrence, H. Ingram, Wm. Ellis, D. Clark, R. Kenny, C. F. Towers, D. Stokes, J. G. McCrae, D. N. McCamus, J. McNabb, C. L. Johnston.

Stratford.

At the annual meeting of the County of Perth Children's Aid and Humane Society a favorable report of the year's work was submitted. The Treasurer, Mr. John Read, handed in his book for audit, which showed city debentures, $500, drawing interest at five per cent., and cash in savings bank, $109. An honorarium of $25 was voted Mr. Durst, the capable officer of the Society. Mr. Durst reported the case of a family whose children were suffering from neglect, and the matter of their transferrence to proper homes is being considered. The Society is doing much good, not only in looking after unfortunate children, but in protecting dumb animals.

The following officers were elected:

President: W. J. Ferguson.
Vice-President: Mrs. (Dr). D. M. Fraser.
Treasurer: John Read.
Solicitor: J. J. Coughlin.
Secretary: Mrs. Foley.
Convener of Children's Committee: Mrs. Megan.
Chairman of Educational Committee: Rev. D. Williams.
Chairman of Cruelty to Animals Committee: Dr. Orr.
Chairman of Finance: William Buckingham.

County Committee: Mrs. T. L. Hamilton, Listowel; Mrs. S. T. Rutherford, Listowel; Mrs. J. E. Burton, Listowel; Mr. J. C. Burt, Listowel; Mr. M. McBeth, Milverton; Mr. John Brown, M.P.P., Stratford.

Woodstock.

The annual meeting of the Children's Aid Society of Oxford County, was held in the Y. M. C. A. rooms, Woodstock, on Friday, December 9th, 1904, with a small attendance. As mentioned in previous reports, there has been great difficulty in arousing sufficient interest in the work to ensure its being carried on effectively.

Mr. Daniel Larke, on whom the brunt of the work has fallen, reported that during the existence of the Society he had been able to provide foster homes for twenty-four boys, nineteen girls and seven babies, all of whom are doing well. Owing to lack of public support it was impossible to realize more than a small portion of the good work contemplated by the Children's Act.

The following officers were elected:

President: Dr. D. McAlpine.
Secretary: J. S. Mackay.
Treasurer: George Innes.
General Agent: Daniel Larke.
Counsel: F. R. Ball, K.C.
Executive Committee: George Innes, J. S. Mackay, O. White, Dr. A. McLay, F. R. Ball, K.C., T. Zeats, James Brady, Rev. J. C. Farthing, and John Morrison, of Ingersoll.

Guelph.

The Guelph Humane and Children's Aid Society has done a very important and useful work during the past year. Regular monthly meetings are held, at which matters relating to children and humane work are duly considered. A Children's Shelter is maintained on Waterloo Avenue, and about thirty children have been cared for there by the Matron, Mrs. Allan. The Children's Committee, under the direction of Mrs. William Hart, has been specially active in looking up homes for neglected children, and has given considerable assistance to the Provincial office in this direction. Cases of neglected children reported from various parts of the county are also dealt with, and altogether a good deal of progress is being made. Mr. Sheriff Allan is President, Miss Janet C. Melvin Secretary, Mrs. W. Hart Chairman of Committee on Foster Homes, and Mr. W. E. Buckingham Honorary Solicitor.

Brockville.

The Society at Brockville has also been doing some useful work during the year, with Mr. W. Millar as Secretary, and Mr. A. J. Traill as Agent. The latter, especially, has given a good deal of time and attention to the work, but speaks of giving it up, owing to the demands made upon his time. This would certainly be a loss, as Mr. Traill has shown himself to be fully qualified in every way for a work of this kind. The work languishes here as in other places, because of the backwardness of the community in supplying sufficient funds to properly carry it on. There should be

an agent with a salary sufficient to justify his giving all his time to the work. The burdens of crime and pauperism can never be lightened otherwise.

Walkerton.

The Children's Aid Society of Walkerton has jurisdiction over the County of Bruce, and there is a large and important work there which has yet to be developed. During the past year several meetings of the officers were held, at which matters affecting the welfare of neglected and dependent children were considered. The President of the Society is Mr. A. Shaw, K.C., and the Secretary-Treasurer Mr. J. Morgan.

Other Societies.

In Orillia, Dunnville, Galt and Paris there are organized branches and any cases of special importance are attended to. It has often seemed as if a more vigorous work could be accomplished in these places, but unless funds can be raised to pay an agent, but little advance can be expected.

INDUSTRIAL SCHOOLS.

INDUSTRIAL SCHOOLS.

The four Industrial Schools continue to carry on the work of reforming delinquent children. Under the amended law pupils are received up to sixteen years, but the majority of those committed are from twelve to fourteen. The total population of these schools is now about 320, an increase of fifty over the previous year. One cause of this increase is the abolition of the reformatory, but the chief reason was the reduction of the cost to the municipality from $2 per week to $1.25. Magistrates are much more ready to send boys than they formerly were. The Ontario Government now contributes twenty-five cents per day for each pupil instead of ten cents, and this has transferred from municipalities to the Government an annual charge of over $15,000. There is the danger of the Industrial School system becoming unduly expensive, and this can best be safeguarded by greater activity on the part of Children's Aid Societies drafting off eligible children to foster homes.

The gathering together of large numbers of depraved children is attended by serious risks, as it is extremely difficult to counteract the bad influence of one child upon another. During the past few months the prevalence of criminal thoughts and tendencies among these lads was unpleasantly demonstrated, when seven youths, all Industrial School graduates, were arrested in Toronto with revolvers in their possession, and many robberies traced home to them. To guard against such occurrences there should be increased thoroughness in the work of reformation, better classification, fewer boys in each class and cottage, and more rapid placing out in new surroundings.

Number in the Schools.

The number of pupils in each school at the end of the year was as follows: Victoria Industrial School, 198: Alexander Industrial School for Girls, 25; St. John's R. C. Industrial School, 75; St. Mary's R. C. Industrial School for Girls, 22; total, 320.

VICTORIA INDUSTRIAL SCHOOL.

J. J. Kelso, Esq.,
Superintendent Neglected and Dependent Children, Toronto.

Sir.—I have the honor of submitting the following report of the Victoria Industrial School for the year ending Dec. 31st, 1904.

No. of boys received during the year	71
No. of boys returned during the year	8
Total	79

No. sent to farm situations	32
No. returned to their homes	28
No. of escapes (not returned)	6
Total	66

No. of boys in attendance December 31st, 1904	191
Total number admitted since opening of the school	989
No. of boys in the school during the year 1904	257
Average No. of boys for the year	186

Cause of Committal.

Incorrigibility	92
Larceny	71
Incendiarism	9
Vagrancy	14
Burglary	2
Placing obstruction on railway	3
	191

The average age of those committed during the year is 12 years.

4 were 8 years of age, 10 were 9 years of age, 30 were 10 years of age, 33 were 11 years of age, 45 were 12 years of age, 37 were 13 years of age, 18 were 14 years of age, 11 were 15 years of age, 3 were 16 years of age.—Total 191.

GENERAL INFORMATION.

It is a matter for satisfaction that the general health of the school has continued good throughout the year. We have had but one case of contagious disease. The importance of regular, systematic dental inspection, as an important adjunct in the maintenance of good health, has been long felt. The work of caring for the teeth of the boys has been performed by Dr. J. G. Adams, Toronto. The teeth of most of the boys are in a deplorable condition, showing that little or no attention is given to their care by parents.

The discipline and the work of the school have been good. The boys seem to show considerable interest in their work. Especially is this true in the school of letters, where we have two faithful, painstaking teachers. This department is under the supervision of the Board of Education of Toronto, who not only supply the teachers, but also the Public School supplies, including text-books. The boys attend school for the half of each day and work at their trades the other half. This system is preferable to that of

attending school all day for these lads. They do not seem to be able to concentrate their minds on their studies for a much longer period than from three to four hours. Our system affords about an equal division of time to manual and scholastic training. It must be remembered that the large majority of boys committed are persistent truants from school; this is the primary cause of commitments; from playing truant they easily become companions of larger and worse boys. The next step is the police court for some infringement of the law. Hence they do not take kindly to the school room. All mental effort seems a drudgery. The task of the teacher, therefore, in stimulating mental activity, is a difficult one. Add to their former truant habits, the fact that they are below the average public school boy in intelligence; and the further fact that so many of them have injured their mental growth by free indulgence in the cigarette; the public may then

have some slight conception of the difficulties that beset our teachers. That the boys make the progress they do is a tribute to the excellent teaching ability of the teachers. The subjects taught in the more advanced classes are arithmetic, reading, literature, composition, geography, history, hygiene, writing, spelling and dictation. In the junior classes the time is almost exclusively devoted to arithmetic, reading, spelling and composition.

Not having a resident chaplain, we are dependent largely on outside assistance for our religious instruction. Every Sabbath morning the boys are taken to the village for divine worship. On Sabbath afternoons the entire school is formed into classes for the study of the international series of Sabbath School lessons. These are taught by our own officers.

As shown in statistical tables the number of boys in attendance December 31st. is 191. These are divided into five groups, according to age and

size, and are placed in cottages. Each cottage is in charge of an officer and matron, who are selected because of their special fitness for this class of work. We always endeavor to secure christian men and women for cottage supervision. They act in the capacity of father and mother to a large family of boys. This is the nearest approach to home life that is possible under such conditions. The officer is also an instructor in some trade taught in the school. The boys assemble in their cottage reading room in the evenings, when from one to two hours (according to the season) are devoted to the preparation of lessons for next day's work in the school room; the reading of books, magazines, etc., by the boys, or some book by the officer or matron in charge; games, etc.

On the play ground, the boys prove themselves adepts at all kinds of athletic sports; baseball and football are the ones most favored. Lacrosse and cricket are occasionally indulged in. During the winter months basket-ball and hockey are the popular sports. Skates are provided for all who wish to use them and ample opportunity is given for indulgence in this excellent out-door exercise on the large skating rink of the school. All these sports have their place and value in developing manliness and physique in the boys. We have been able to supplement this in our gymnasium, where a very moderate supply of apparatus for physical culture has been placed. We have also one hundred rifles, supplied by the Department of Militia. These have proved of great service in our military drill.

During the session of the Legislature in 1904 an amendment to the Industrial School Act was passed whereby the control of children by the Industrial Schools was extended until they reach the age of twenty-one years, and the age of admission to the school raised from fourteen to sixteen years. This was made imperative owing to the closing of the reformatory at Penetanguishene. This change in the law will, no doubt, prove beneficial. We will need a cottage for the exclusive use of the larger and older boys that are now being committed to the school, and for such of the older boys who may have been returned to the school. The erection of such a cottage will be proceeded with in the spring.

I have the honor to be, sir,
Your obedient servant,

C. Ferrier,
Superintendent.

St. John's School.

To J. J. Kelso, Esq.,
Superintendent of Neglected and Dependent Children.

Sir,—I have the honor of forwarding the enclosed information relative to the St. John's Industrial School, for the year ending December 31st, 1904:

Number of boys in School Jan. 1st, 1904, 55; number received since to Dec. 31st, 1904, 43; number sent to places, 5; number sent to parents, 15; number in school at this date, 78; average age of boys sent out, 14 years; average age of present boys, 11½ years.

Boys were received from the following localities:

City of Toronto, 18; Hamilton, 6; Ottawa, 7; Stratford, 1; Guelph, 2; County of Essex, 1; County of Simcoe, 2; County of Halton, 1; County of Renfrew, 2; County of Brant, 1; County of Leeds, 1; County of Victoria, 1; Absconded, 1.

The health of the boys during the year has been very satisfactory, with the exception of a couple of wrenches. We had no sudden calls for a doctor. We give all possible attention to the mental improvement of the pupils, the greater number of whom are much behind in the school grades. The senior boys learn the trades taught in the School, devoting the forenoon to those industries, and the afternoon to the school rooms. During the winter we have night school. The city boys do not wish to go to the country to work, as they have a craving for the excitement of city life.

The locality here is quite healthful, and the new wing, which is nearly completed, will afford general convenience. I am, sir, yours very respectfully, B. Orbanus.

Financial Statement.

The financial statement of St. John's Industrial School for the year 1904 is as follows :

Receipts from municipalities, $4,169.94; from the Government, $3,010.79; from the Government towards building fund, $6,000; other resources bequest, $100.

Expenses, house, $4,408.27; salaries, $1,694.90; cost of building addition, $14,086; former debt, $22,000; increased by $4,000, making it at present, $26,000. No interest has been charged on debt. Francis F. Rohleder, Treasurer.

Alexandra School.

J. J. Kelso, Esq.,
Superintendent Children's Department, Ontario.

Sir,—I have the honor of submitting the following report of the Alexandra Industrial School for girls for the year ending Dec. 31st, 1904.

The number in the School is twenty-three, and has varied but slightly during the year.

The number committed the past year was nine; one was re-committed; two escaped; seven were placed out in situations; and two sent to their homes.

Of those placed in the School during the year six were from Toronto; two from London; and one from Orillia.

The industrial part of the training is well looked after by the matrons (or housemothers) who patiently direct and teach the household work, and te sewing, making all the clothing and house furnishings. The teaching is done in as thorough a manner as the limited time at their disposal will allow. The laundry is presided over by a special officer for that purpose, and different girls are appointed to that work from time to time, thus daily habits of industry and thrift are inculcated.

In the school of letters there has been steady and marked progress in the majority of cases, much interest is taken in the examinations held each month, while the general interest taken in the school work is most encouraging. Our teacher, Miss McGowan, has the faculty of being able to secure and hold the interest of her pupils in their studies, which is a somewhat difficult thing to do with those who have long been truants, and many of them also mentally deficient. The order maintained would shame many a class in an ordinary public school.

The old saying, "All work and no play makes Jack a dull boy," applies just as much to "Jennie," and so plenty of recreation is provided. In the summer, looking after their own little flower gardens, basket ball, and other healthful games, and then there are swings, a merry-go-round, etc., outings to the woods and lake, thus getting near to nature's heart. In the winter it is skating and sleigh-riding, with indoor games and entertainments.

The spiritual training is one of the most important factors in our work, in fact, the most important, for what permanency can there be in character-building without it. Family worship is held morning and evening, texts of scripture are committed to memory, and recited at these times. Our Sabbath is spent in the following way: Attending the morning service in the churches in East Toronto; Sunday School in the afternoon, studying the international series, with Mr. Fenton, of East Toronto. A special feature of this service is the singing of gospel hymns, which the girls most thoroughly enjoy. A week-night service is also held, conducted by the local ministers. The seed has been sown carefully and prayerfully, we cannot estimate the good which may have been done, but must leave the results with the Omnipotent Being, who will not let anything be lost that is done in His name.

To sum it all up, the Alexandra Industrial School endeavors to supply that which the girls have lacked, namely, proper home training, with its discipline and teachings, encouraging the sweet family life with all its helpfulness, studying each individual child so as to try to bring out the best in each, endeavoring to instil into their minds the principles of truth and honesty, trying to avoid making mere machines of them, and, in short, teaching all that goes to make up one of God's best gifts to the world, "the true woman." The work is certainly trying and difficult, and requires consecration, great patience and perseverance, and much love for humanity with all its frailties.

We must, before closing, beg the interest and help of our readers for those found to be too mentally deficient to take care of themselves in the world, interest has been aroused to some extent, and something has been done, but not enough.

Yours respectfully,
CLARA P. LUDGSDIN.

Alexandra Industrial School, memo of Treasurer's account for the year 1904:

Receipts: Received from municipalities, $1,436.66; parents and friends, $487.05; Ontario Government grant, $1,345.60; total, $3,269.31.

Expenditure: Provisions, $648.98; fuel and light, $460.50; clothing, $299.31; general furnishings, $129.12; salaries, $1,424.90; miscellaneous, $536.53; insurance, $75.00; total, $3,574.34; excess of expenditure over receipts, $305.03.

M. WILKES,
Treasurer.

ST. MARY'S INDUSTRIAL SCHOOL.

The number of girls in this school on Jan. 1st, 1904, was 9; admitted during the year, 12; and discharged, 1; leaving the number at present in school, 20.

The terms of three other girls have lapsed, and it is probable they will be leaving the school in a short time.

These girls are under the care of the Sisters of the Good Shepherd. They are kept entirely apart from the women who seek a home at that institution, and do not associate nor have intercourse with them in any way.

Their education in ordinary school subjects is attended to by a capable teacher, and they are also taught plain and fancy sewing. For the past six months they have had a piano at the school, and some of the girls, who had never taken lessons before, have become quite proficient musicians.

The girls are, with few exceptions, content, and show a decided improvement in appearance. The great problem with regard to the inmates of this as of other industrial schools is what to do with them after the term for which they were committed has elapsed. The home surroundings of many of them are bad, and in very few instances have the children sufficient strength of character to withstand evil influences. The solution would be to place them in country homes, but they are of such an age, when released, that they are not always content to have homes chosen for them.

JUVENILE IMMIGRATION.

From the Quarrier Orphans' Home of Scotland.

BRITISH CHILDREN.

Report of the Juvenile Immigration Work Carried on in Ontario.

THERE has been an increase during the past year in the number of children brought from Great Britain and placed in homes in Ontario. This is due to the increasing favor with which juvenile emigration is regarded in the old land, to the prosperous times in this country, and the very large demand that continues to exist in the rural districts for these children.

A controversy has been carried on for some time past in the columns of the "Manchester Guardian" as to the treatment accorded these children in Canada. A gentleman writing from this side urged that boys and girls should not be emigrated until they were old enough to protect themselves as there was a great deal of ill-usage and over-work among the farming community. These views were endorsed by some and denied by others and the controversy will undoubtedly creat in the old land a feeling of uneasiness and uncertainity as to the fate of these young people sent out to begin life amid new and strange surroundings. My own view is that while there are undoubtedly cases of hardship, hard work and scant privileges, this is not the prevailing condition and that the great majority find good homes and reasonable opportunity to develop in a happy and natural manner. All the children are certainly expected to work and this is very largely the motive that prompts the application for them. At the same time this is not in itself a serious objection if there are compensating advantages. The essential thing is that the children should be given good food, comfortable clothing, a suitable sleeping room and should have all the social advantages of the home and neighborhood. In the great majority of cases the children enjoy these privileges, and they do not mind the incidental work of the farm, which is participated in by all alike—by the master and mistress, the hired help, or the boy and girl whom they have taken to "raise." The loneliness and isolation of Canadian rural life is fast becoming a thing of the past. Railway facilities, electricity, an improved postal system by which letters and newspapers come to the home almost daily, tend to keep the country people as well informed on public affairs as the inhabitants of large cities, and there is that greatest of all blessings, social equality and unrestrained participation in the church and other meetings, that has always been accorded to these boys and girls. Work is a blessing to these young people, and work in the pure country air, epecially in so healthy and exhiliarating a climate as that enjoyed in nearly every part of healthy and exhilarating a climate as that enjoyed in nearly every part of always taking for granted, of course, that it is not unreasonable in amount or length of time. The hardships of pioneer days are fast disappearing and it is safe to say that almost every day will see some new improvement or labor-saving device introduced upon the farm. Then the children soon get into Canadian ways of thinking and doing. They form close friendships with the neighbors where they reside, and since they are constantly

advancing toward manhood's estate, any ill-usage or neglect is not likely to be of long duration. Neighbors, as a rule, are always ready to sympathize with these young people, and sometimes complaints are prompted by local jealousies and a universal willingness to interfere in other people's business, rather than by any real grievance. Be that as it may, all complaints of this kind are promptly and systematically investigated, not only by the English Societies interested, but frequently by the local Children's Aid Society and this department, and if there is any truth in the charge the child is removed to another home and neighborhood and the danger of any subsequent ill-treatment avoided. In some cases of extreme ill-treatment prosecutions have been instituted and punishment equal to, if not in excess of the offence, administered. There is no country in the world that has better child-protection laws than Ontario, nor is there any country where the spirit of kindness and humanity dominates all classes more than in this banner Province of Ontario.

But while all this is true, there is need for a more frequent visitation of these children. A visit of once each year, while it complies with the letter of the law, does not fully insure the best results. Two or three visits at different seasons of the year, with a thorough investigation, would be very desirable. Often the visitors make a flying call that is almost useless. It is not sufficient to hail the boy and his employer over to the side of the vehicle and drive on after a five minutes conversation; there should be a stay on the premises of several hours in order that conditions may be carefully observed and an opportunity given the child to unbosom himself after he thoroughly understands the object of the visit. I have known of many visits that were worse than useless simply because the main desire of the visitor was to see as many children per day as possible. This policy of frequent and systematic visiting involves considerable expense and, as in many other things, the fear of expense has prevented the best work being done. If those who hold the purse strings would provide liberally for frequent and proper visitation then much of the over-work and ill-treatment complained of would be avoided and the system made as nearly ideal as could well be devised.

In my intercourse with the various superintendents of the receiving homes in Ontario I can say without hesitation that they are all men of the highest character, greatly interested in their young wards and extremely anxious to help and protect them. A strengthening of the office and visitation staff would I am sure be welcomed by them and would relieve them of many anxieties.

Inspector Byrne's Report.

Mr. P. Byrne, who inspects the children for the Ontario Government before they leave England, sends the following report:

Liverpool, November 19th. 1904.

J. J. Kelso, Esq.,
Superintendent, Neglected and Dependent Children, Toronto.

Sir,—I have the honor to report that during the past season there have been officially inspected by myself and my assistant, 21 parties of child-emigrants who were sent out for settlement in Ontario by the following Training Homes in this country, namely:—

Dr. Barnardo's Boys' Home, Stepney, London.
Dr. Barnardo's Girls' Home, Barkingside, Ilford, Essex.

Catholic Emigration Society's Home, Southwark, London.
Manchester Orphan Homes, Strangeways, Manchester.
Mrs. Birt's Sheltering Home, Liverpool.
Wesleyan Children's Home, Bonner Road, London.
Wesleyan Children's Home, Edgworth, Lancashire.
Miss Macpherson's Home, London.
Mr. Fegan's Home, Southward, London.
Mr. Galloway's Home, Ardrossan, Scotland.
"Waifs and Strays" Society's Home, London.
The Quarrier Home, Bridge of Weir, Scotland.

The total number of children in the several parties was 1,754 against 1,674 last year. The boys numbered 1,180 and the girls 574.

Regarding the children generally who have been emigrated during the present year, I can say little beyond what I have already stated in my reports of the various parties separately, namely: That on a close inspection, I was favourably impressed by their general appearance, demeanour and intelligence. The reports I received as to their characters and conduct while in the Homes were also favourable and showed that those responsible for their training, education and selection for emigration, are as careful as ever to send out only such children as are likely to make their way and grow up good citizens of the Province.

I have the honor to be,
Your obedient servant,

P. Byrne,
Agent for Ontario.

Children Received During the Year.

The following table gives the number of children reported as received by the Ontario distributing homes during the year:

Agency	Boys.	Girls.	Total
Marchmont Home, Belleville	58	36	94
The J. W. C. Fegan Home, Toronto	49	...	49
Dr. Stephenson's Home, Hamilton	78	8	86
The Macpherson Home, Stratford	125	56	181
Dr. Barnardo's Home, Toronto	740	...	740
Dr. Barnardo's Home, Peterborough	...	417	417
Church of England Society, Niagara	...	32	32
Catholic Emigrating Association	75	25	100
Quarrier Home, Brockville	55	...	55
	1,180	574	1,754

Dr. Barnardo's Homes.

Dr. Barnardo has emigrated to this country in the course of the season, 874 boys and 424 girls, of whom 740 boys and 417 girls were located in Ontario. The children crossed from England in the following detachments: April 3rd, 1904, boys 267, girls 5; May 30, 130 girls; July 31, 348 boys, 136 girls; 9th October, 200 boys, 112 girls; 4th November, 53 boys, 41 girls; arriving at various dates, 6 boys.

During the year the organization and work of supervision by personal visitation and correspondence has been well maintained. In view of the large increase in numbers, the staff of travelling inspectors, as well as the

clerical staff, has been strengthened. The demand has exceeded anything known in the experience of the past, every child having been applied for ten times over. The younger children have been boarded out in foster-homes, while the older boys and girls have been placed in situations. The demand for boys and girls, although by no means confined to the country, is chiefly in the rural districts, and it is amongst the farmers that homes are found for them. The policy of the management has always been to discourage the settling of these young people in the cities and towns, believing that their prospects for the future are far better and their value to the country as colonists greatly enhanced by their being brought up on farms, thus assisting in the development of the agricultural resources of the country. The work continues to be under the general direction of Mr. A. B. Owen, as Canadian Agent.

Hazel Brae, Peterboro'.

About four hundred girls have been received at Hazel Brae, Peterboro', Dr. Barnardo's receiving home for girls, during the season of 1904. Those old enough to work and to take wages have been placed out immediately, in most cases having been promised before their arrival. A large proportion sent out this year have been little girls under school age, who have been placed as boarders that they may have the opportunity of growing up amidst Canadian surroundings, of attending Canadian schoools and of thus generally becoming better fitted for the work and the duties which lie before them in Canada. The general record of the girls is reported as satisfactory—a goodly number of marriages, four deaths, a few failures and a few returns to England, the latter being chiefly young women who have saved enough from their earnings to pay a visit to a mother or some near relative, and to have a sight of the Old Country once more. The systematic visiting of the girls has been carried on as usual—in addition to which many special visits have been made where personal advice was thought desirable, or when there was any suspicion or rumor of neglect or harsh treatment. A larger work has been done the past year than ever before. Miss Loveday continues as Secretary with Miss Woodgate as Matron.

Marchmont Home, Belleville.

The number of children received at this well known receiving agency during the past year was 94, made up of 58 boys and 36 girls from six to seventeen years of age. These children were carefully selected by Rev. Robert Wallace, who has for a number of years past made an annual trip to the old land for this purpose. A considerable proportion of these children came from Manchester and others from an orphanage at Saltcoats, Scotland. The first party arrived on April 25th, accompanied by Mr. Wallace, and on May 19th a party of girls came out in charge of Miss Smethurst, who has been connected with the Manchester institutions for a number of years. Before returning she visited quite a number of children placed out in former years and expressed great satisfaction at their treatment and surroundings. Mr. T. R. Ackroyd, the Honorary Secretary of the Boys' and Girls' Refuges at Manchester, also visited Ontario during the past summer and spent a week in travelling through the rural districts visiting lads in their homes. He also stated that he was delighted with the homes and prospects of the children, and on his return to England, wrote a series of letters to the Manchester Guardian commending the work. In addition to these special visits, there is a permanent visitor employed who regularly calls upon all the children under eighteen and reports upon their welfare.

The demand for children continues as great as ever and owing to the prosperous condition of the country the wages paid to boys is much higher than formerly.

The Fegan Boys' Home.

Mr. Fegan's Canadian Distributing Home, 295 George Street, Toronto, received a party of forty-nine boys on April 26th and at once placed them all out in situations. The Canadian Superintendent, Mr. George Greenway, reports that they have all been recently visited and appear to be doing well and giving satisfaction, very few complaints being made against them. The ages of the boys brought out this year were from ten to twenty years, the average age being fifteen. During the past few years there has been a great improvement in the treatment accorded these lads and there is now very little truth in the statements sometimes made that they are overworked and ill-used.

From 1885 to 1904, inclusive, there were 1,560 boys sent out by this Home. A recent revision of the lists gives the following information:—

Boys in Ontario,	Addresses known	592
" States,	"	16
" Manitoba,	"	24
" returned to England,	"	16
Boys who have died		38
Boys returned to England,	Addresses unknown	160
" gone to United States,	"	90
" gone to Manitoba,	"	76
" whereabouts unknown		548
		1,560

The Stephenson Children's Home, Hamilton.

During the year there were 78 boys and 8 girls sent out from England to the Stephenson Receiving Home at Hamilton, this number including young men and women who came out with the party and are now placed in situations in Ontario. The first party, consisting of 51 males and 6 females, arrived on April 6th; four young men arrived on April 11th; and on October 18th a party of 23 boys and 2 girls was received. The ages ranged from nine to twenty years, the majority being over fourteen years of age. The girls were placed in homes that had been specially arranged for them before their arrival by Mr. Frank Hills, the Canadian Superintendent, and the institution is not at present contemplating re-opening the girls' department. The demand for these boys and girls continues to be far in excess of the supply and they were all placed out within a short time after their arrival, most of them in farm homes. They have all settled down and seem to be giving great satisfaction, and, with a very few exceptions, they receive the best of care and attention and are happy and contented. They are visited at least once a year and any complaints made receive prompt and careful attention.

The Miss MacPherson Home, Stratford.

There has been received at this agency during the year 125 boys and 56 girls, a total of 181. The first party, consisting of 53 boys and 20 girls, arrived on May 10th; a second party of 50 boys and 22 girls came out on the 6th of August; on September 17th a party of 17 boys and 14 girls was

received; and early in the spring a party of five older boys arrived. These children have all been placed out in foster-homes and are doing well. They were, as a rule, bright and intelligent and had good manners and training. There has been on serious sickness among them with the exception of one boy of fifteen who has died from heart disease. During the year Miss M. E. Miles, of London, England, and Miss E. Smyly, of Dublin, Ireland, were sent out to visit the children and made a gratifying report of their progress and condition. Mr. W. H. Merry is Superintendent.

Niagara-on-the-Lake.

During the past year the record of the Church of England Waifs and Stray's Society in Canada has been one of steady advancement in the work of caring for and supervising the young girls brought out for colonization.

In 1904, three parties came out from England on the 28th April, 28th July and 22nd September, numbering 32 girls, of which the ages varied from ten to eighteen years. These children were fully up to the average, if not superior to other years and readily found good homes in the Province.

Of those placed out only nine have been returned to the Home, and of these none for any serious charge, the principal being "unsuitable."

The Lady Visitor has been busy on the year, paying her visits to the charges of the Home. During 1904 upwards of 200 calls were made, entailing the travelling of some 5,000 miles to reach them.

Her reports show that the majority "are doing well," some "fairly well," and improving in many ways, notably in regard to health. Many who have looked rather "weaklings" when sent out have developed and grown mentally and physically. They look bright and happy, even though they may not be giving entire satisfaction, even in face of a complaint from the foster-mother or mistress, expressing a wish to remain where they are, and usually make a solemn promise to "do better." The Hon. Secretary, Mr. J. de W. Randall, writes: "I have on fyle in my office some 2,000 reports taken in the past 3 or 4 years from all parts of the Province and from all conditions of life. These reports are made with the object of giving accurate information as to the condition of the children, both as to themselves and the home in which they are placed, how they are clothed, cared for and educated. In this mass of information I fail to find one instance that would warrant the criticism in the Manchester papers, and though this information collected at a great expense is of the nature of a 'private report,' still I would be pleased to have anyone interested in the work examine it."

The Quarrier Home, Brockville.

When the Ontario Act regulating the importation of British Children was passed in 1897, Mr. Quarrier took offence, claiming that the Act discriminated unfairly against a worthy and desirable class of children. In consequence the emigration of young people from the Quarrier Homes at Bridge-of-Weir, Scotland, was discontinued. During the past year both Mr. and Mrs. Quarrier passed away and the committee in charge, finding that the provisions of the Act did not entail any hardship, decided to take up the work again. Accordingly Pastor D. J. Findlay, of Glasgow, while on a visit to this country in July last, made application on behalf of the

Board of Directors for authority to again place out Scottish boys and girls in this Province. An order-in-council was passed granting the desired permission and on Oct. 26 a party of fifty-five boys arrived at "Fairknowe," Brockville, the well known receiving home from which many children in past years received their first introduction to Canadian life. These boys, ranging in years from ten to fourteen, were speedily provided with homes and situations and their interests will be looked after by Mr. Alex. Burges, the resident agent of the Homes.

The Catholic Immigration Association.

The two Catholic child immigrating Societies, carrying on work in Canada, were amalgamated in a new Society, called the Catholic Emigration Association. During the year under the two Societies then Emigrating, there were received from England—257 Boys and 64 Girls—Of these 97 boys and 12 girls were placed in the Province of Ontario, and the balance in the other Provinces, principally Quebec. In addition to those received from England—52 Boys and 15 Girls—were replaced in the Province of Ontario, making a total of 149 boys and 27 girls actually placed in that province during the year. Thorough visitation of the children has been made during the year, the result being most satisfactory. The children were found to be well-treated except in but one or two cases, and to be giving general satisfaction. During the year an Old Boys and Girls Association was formed for the purpose of obtaining and keeping track of those out of the control of the Association. It began with a membership of 50, which grew by the end of the year to about 180. Mr. Cecil Arden is the resident agent, his address being the receiving home at Ottawa and 386 St. Antoine St., Montreal.

ABOLITION

OF

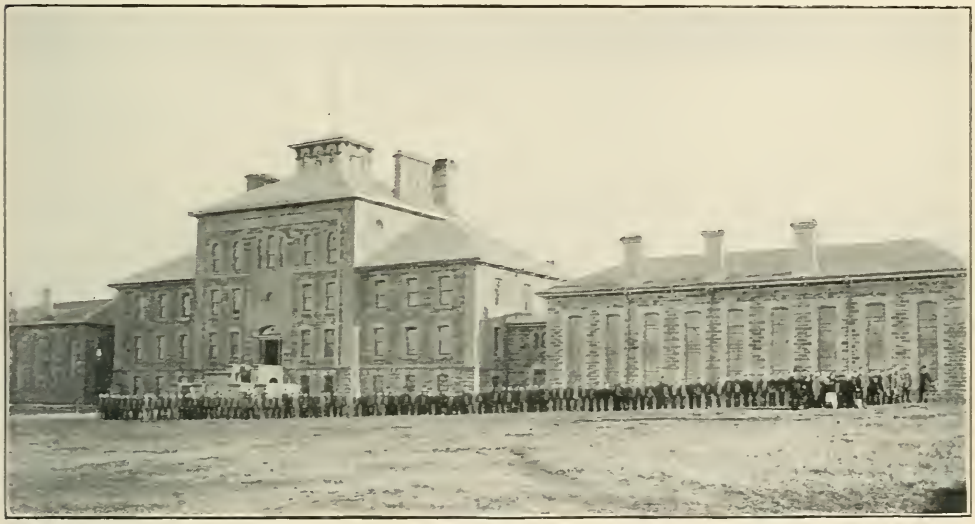
Penetang Reformatory

PENETANG REFORMATORY.

An Account of How it was Closed and the Disposal made of the Inmates —Their Conduct and Progress.

Toronto, Dec. 20, 1904.

When it was decided to abolish the Ontario Reformatory for Boys at Penetanguishene a question of some moment was as to the disposal that should be made of the hundred odd boys who were in the institution. The matter was referred to the writer, who saw in it a splendid opportunity for



Reformatory and Inmates.

useful philanthropic work and undertook to assume the guardianship of the lads and provide them with free homes and situations. Every boy was taken over, without regard to his previous reputation or offence, and this report, written ten months later, purports to give a complete and unbiassed account of how the experiment worked out. It was a great success—so great that one feels like exulting in the possibilities opened up for future efforts with so-called incorrigible boys. Clearly it has been demonstrated that lads, however degraded, can be reclaimed and restored to good citizenship if only the right methods are used; and if there is failure it is because of lack of faith, lack of thoroughness, and lack of sympathetic co-operation. These young people, with rough exterior and possibly repellant manner,

were found to have hearts readily responsive to good impressions, and investigation proved that in many cases they had gone astray through causes over which they had no control.

Boys not so Bad as They Look.

Boys are of complex character—they often appear on the surface to be what they are not in reality and they frequently do and say things which are not a correct index of their true feelings or disposition. Especially in the case of the so-called bad boy is there a tendency to conceal the naturally good tendencies of the heart under a rough manner and forbidding countenance, but it is an almost invariable experience that if such boys are dealt with in the proper spirit of kindly companionship and sympathy they can be influenced for good and perhaps impressions made that will influence the life and character for all time to come.

Boys crave affection and sympathy fully as much as girls and owing to the fact that they, as a rule, receive so little consideration in this respect their hearts' best impulses are more easily stirred by the kindly word and the intuitive belief that they are understood and appreciated.

Police officials "take no chances," as one of them remarked to me while he gripped a small lad firmly by the arm. They apparently look upon a boy who has once been convicted of wrongdoing as incapable of ever doing right again and consequently unworthy of confidence. There are, of course, many good and kindly disposed men among these officials, but their business of hunting up culprits and the fact that their professional standing is at stake often leads them to take an unsympathetic attitude and thus create in the youthful breast a spirit of hatred and revenge that not infrequently develops into a settled career of crime.

Boys are usually what they are thought to be and live up to the standard set for them whether it be a high and noble one or low and debasing, and when they are given to understand that they are thoroughly bad and no longer worthy of confidence they have no incentive to prove themselves any different.

Population of Reformatory Fell Off.

For several years past the population of the Ontario Reformatory for Boys at Penetanguishene had been steadily diminishing. At one time there were 265 boys in the institution, but of recent years its population fell to about 150. There were several reasons for this decline. The establishment of the Victoria Industrial School at Mimico in 1887 was a practical duplication of the work: the Children's Protection Act, passed in 1893, introduced an extensive home-finding movement; and through this office situations were provided for many homeless lads and minor offenders.

The Reformatory frequently came up for discussion in the Legislature and its work was adversely criticized by many officials and philanthropic workers. To bring about an improvement it was decided by the Government to build a new institution in the County of Oxford along modern lines. The land was secured and an expensive building was about to be erected when the suggestion was made that it might be possible to abolish the Reformatory altogether, first, by providing for the inmates of the institution in foster-homes and situations, and then by directing that future commitments should be made to the Children's Aid Societies and the Industrial Schools. This plan was favored by the Government and, as already stated, the work of providing for the boys placed under the direction of this office.

Already the experiment had been successfully tried of befriending and placing in foster-homes some twenty or thirty young lads who were committed to the Reformatory, but intercepted on the way there. The excellent progress made by these lads and the fact that none of them got into any subsequent trouble indicated the possibilities for a more complete and radical home-finding work, and it was decided to attempt larger things for unfortunate, crime-tainted youth.

Not a Hopeful Outlook.

The first necessary step was to collect all available information concerning the history, former home surroundings, etc., of each boy, and then the institution was visited to view the situation at closer range. The outlook was not at all encouraging. Letters came from constables and other officials who had been written to, and with great unanimity they replied "Do what you like with the boy, but don't let him come back to this town." Then the lads themselves when grouped in the yard of the institution, presented a forbidding appearance. They were all addicted to chewing tobacco, profanity, etc., and had the swagger and bravado of professional criminals. One of the officials, when told that the boys were going to be set at liberty, raised his hands in horror at such a proposition. They were there for every crime on the calendar, and in his opinion, and doubtless it would have been the opinion of many others, they should be kept in custody to the last day of their sentence. But there is a thought here worth noting : A crowd or a gang is always worse than its individual members. Men and boys will do things in concert that they would never dream of entering upon singly—and all the success that has been attained with the Reformatory boys was through separating them from each other and from former surroundings and dealing with them entirely as individuals. The boys, I found, were hardened by their incarceration. They encouraged each other to resist good influences, besides disseminating all the badness they knew—and every day was making them worse instead of better! This was the testimony of the boys themselves, and in conversation with them

later they mentioned instances of things they had learned concerning crime of which they had been ignorant before commitment.

Entering into a Compact.

Through the kindness of the Superintendent, Mr. McCrosson, a room was provided, and each boy was interviewed in turn. They entered with indifference if not defiance, not understanding why they were to be questioned—they left in nearly every case with ambitions aroused and dawning consciousness of manhood that was afterwards to have a fuller and nobler development.

They could not understand why a stranger and an official should take personal interest in them, and when they realized that this interest was prompted by love and sympathy they were more than willing to yield a hearty and loyal co-operation in regaining a useful and honorable position in society.

To each boy it was clearly explained that his liberation was a matter of personal favor and responsibility, that in going out he would be fully trusted, helped in every reasonable way and would have a friend to look to, while on the other hand any failure on his part would involve the discrediting of his benefactor and would bring undoubted pain and disappointment to those who wished to help him. This promise and this appeal made a deep impression. In some cases tears flowed down their cheeks at the thought of somebody being willing to trust them and to give them an opportunity to show that they were not entirely lost to the sense of goodness and honor. Some few spoke in genuine sorrow of the pain they had caused their mother, others referred to the fact that they had never known a mother's love, and, sadder still, some of the boys, with downcast eyes, admitted that their parents had never taught them the difference between right and wrong and were indeed the cause of their being in the institution. With all these boys, each with his own broken life and early misfortunes to contend against, it was impossible not to sympathize deeply, and these touching interviews gave an added incentive to help and befriend them.

Long Sentences.

A number had good homes and respectable relatives and had been given long sentences by magistrates who felt that the law must be vindicated even if a boy's young life was sacrificed. Many of the offences for which sentence was passed were committed impulsively and without any realization of consequences or prompted by any deep-laid scheme or badness of heart, and a three, four or five year term of imprisonment they regarded as too severe a punishment. Some magistrates were, of course, actuated by the best of motives, honestly believing the boys would have an opportunity to receive a fine education, learn a trade, etc.

Some Returned to Relatives.

Where possible boys were again returned to their homes, after promises had been faithfully made on both sides. Where the home was not what it should be some of the lads were placed, under agreement, with uncles, grand-parents and other relatives who were deeply interested in their welfare and desirous of helping them to regain their lost standing. These cases were disposed of first, recognizing the great immutable law of kindred

The Old Reformatory Dining Hall.

that leads all human beings whether young or old to crave for association with those to whom they are bound by the sacred ties of blood.

Others Sent to Farms.

The next class taken up was the boys who were acquainted with farm life and willing to accept situations in the country. Later a number were taken who could not be allowed to return to improper homes and who were persuaded to be content in country situations for the present at all events. This was by far the most desirable course, and was followed by the most satisfactory results.

Every Boy Placed Out.

A number followed who were not adapted to the country and who required to be provided for in the cities, and then the most difficult cases were considered, until every boy in the institution was provided for outside of public institutions and the county entirely relieved of their maintenance. This was done notwithstanding the fact that special grants had been made to the Industrial Schools in consideration of their receiving the residue. The work of placing out was begun in February and continued until the last boy had been successfully disposed of.

Securing Co-operation.

As already stated, the first step in this new departure was to secure the interest and co-operation of the lad himself, awakening his affections, enkindling his enthusiasm, and inciting him to self-respect, ambition and the desire to make something of his life before it was too late. Good clothing was provided in order that they might have no cause to be ashamed or humiliated before others, and they were brought to Toronto in small parties of four or six so that there might be ample opportunity for becoming personally acquainted with each boy and learning something of his manner, habits, disposition and inclination. On the boys' arrival in Toronto they were met by the writer, provided with an ample supper, cordially welcomed and given full information concerning the efforts that were being made in their behalf. The next day they were shown around the city, taken to entertainments, etc., and were released entirely from anything like surveillance or restraint.

Treated Like Gentlemen.

Such treatment completely bewildered them. "Why you treat us like gentlemen," said one lad, and without a doubt they thoroughly appreciated and enjoyed this display of confidence in them and gave frequent expression to their determination to live a right life and prove themselves worthy of the interest that had been taken in them. Before going to his home or situation each boy was given a neat valise with some extra clothing, stamped envelopes that he might write of his progress, a Bible, etc., and was informed that if anything went wrong he was welcome to return when he would be again received and assisted in every reasonable way. Each boy left Toronto with the high resolve and purpose to lead a good life and even though some may fall when pressed by temptation their lives will inevitably be better for the emotions that stirred their breasts over the kindly treatment they received.

Why They Became Criminals.

Talking to a group of these boys one afternoon the question was asked them, Why is it that so many former inmates of the Reformatory took to

crime? They almost with one voice exclaimed that it was because nobody cared what became of them. This experience has proved literally true for had these boys who spoke thus been simply liberated without subsequent care and supervision, the providing of situations, etc., three-fourths of them would almost certainly have fallen back into the ranks of the criminal, the tramp and the street corner loafer, for there were not more than three or four in the entire lot who could have gone out alone to secure for themselves a situation or a boarding place. Their conviction, imprisonment in the gaol and confinement in the Reformatory where they were shut off entirely from the rest of mankind, had completely unnerved them, depriving them of the ability to cope with the world in an honest, manly way, while unfortunately giving them, through association, a better knowledge of the devious paths of vagrancy and criminality.

Regarded Themselves as Prisoners.

All the boys spoke of the institution as "the prison," and of themselves as "prisoners." They were there to "do time" as they expressed it, and they laughed incredulously when it was referred to as an educational institution. This is the common belief among boys who are committed to institutions of a reformatory character, and it should be pondered by those engaged in magisterial or reclamatory work. Far better that they should be saved to good society by changing their occupation, their homes if necessary, giving them lots of work, trusting and encouraging them— and not by banishment to a restraint which they abhor, and to associations which often lead to their further undoing.

Home Surroundings Were Bad.

When making enquiries concerning the former home surroundings of these boys the replies received were most discouraging. But they indicated clearly the causes that led to the lad's committal. Some of them were as follows:—

Re H. M.—The family you refer to is a bad crowd. The mother has gone to the States, having left her husband, who is the boy's step-father, and he is a person who will not look after the boy. If you can keep him under your control by all means do so.

J. L. G.—His father is a worthless man and need not be considered. He takes no interest in the boy, and neither at the time of the boy's commitment did he appear nor since has he as far as I know taken any interest or made any enquiries regarding him.

F. C.—This boy's farther is dead and his mother has married again. He has practically no home, as his step-father has a son about his age who has not a good reputation and there will be constant jealousy. He should be sent to a home a long way off.

G. L.—This boy has no relatives. He was brought up by a foster-mother, who is in feeble health and never had the slightest control over the boy, the result being that he did not receive proper training.

G. B.—This lad's mother is dead and the father is a worthless sort of man who did not care for his children. Two others of this family are now in the Orphan's Home and an elder brother served a term in the Reformatory and has now drifted away to some other city.

William C.—This boy's family are bad from beginning to end, and there would be no hope for him if he were allowed to return. The best thing to do is to send him to another home a long way off.

M. B.—This boy's father is dead and his mother is a disreputable woman. The child had to associate with the worst people in the city, and what could be expected from him if he again came in contact with these characters? Better keep him away from here.

Arthur D.—This boy's father is a drunkard, and is no good whatever, consequently there is no place here for the boy. He would probably do much better in another locality.

Joseph B.—This boy's mother was unmarried, and he never knew what it was to have a home with kindly treatment and moral instruction. He has therefore grown up wild and naturally drifted into the Reformatory.

James B.—The relatives of this boy are all of a low class and they cannot look after him properly. There is no chance of his doing well if he came back here.

Fred. J.—Boy's mother was unmarried and he was brought up by grandparents who were too old and poor to look after him. He was always on the streets and coming into conflict with the police. His mother is now married and living in the United States. She does not want him and there is no use in his coming back here.

Orphans and Half-Orphans.

Many of these young lads were deprived of one or both parents. Out of ninety boys it was found on enquiry that forty—almost half the entire number—were either orphans or half-orphans. Thirteen of the boys had neither father nor mother, fifteen others had no mother, while there were twelve whose fathers were dead and mothers were compelled to work for a living. In not less than thirty-five instances the mothers were the sole support of the family and were compelled to work out all day as charwomen, the children being left to their own devices in the meantime. Over twenty of the boys had a step-parent and while it would be unfair to say that all these step-parents were cruel, still there was a strained relationship, a lack of sympathy and harmony which drove the boy to the streets and led to his commitment to the Reformatory. In fact, in three-fourths of the cases the boys would never have been committed to the Reformatory or got into any serious trouble had both their parents been alive, respectable, and reasonably attentive to their children's welfare! As a rule the boys were bright and willing, easily influenced for good and readily responsive to kindness, while a few that could not be thus reached were mentally and physically degenerate and subjects more for a custodial institution for the feeble-minded than for a reform school or an independent life.

Over Two Hundred Years to Serve.

The supreme importance of this method of dealing with the boys will be realized when it is stated that the lads paroled had an aggregate of 218 years yet to serve. Think of it from any standpoint—the deprivation to

the boys themselves, the long seclusion from the world in which they must ultimately earn their living and in the most valuable and impressionable period of life! Think of the loss to the community in bright young workers who might be fitting themselves for useful trades and avocations, the expense to the community in maintaining them for all those long years, in addition to the loss of wages which they might have been earning! In the Reformatory the cost of maintenance was about $500 per week, while in the month

On the Farm.

following their liberation the boys were not only self-supporting, but were earning an aggregate of two hundred and fifty to three hundred dollars per week.

Saving of Public Funds.

The great saving of public funds effected by this method of dealing with the boys can be seen at a glance. Formerly the Reformatory cost the Province for maintenance from twenty-eight to thirty thousand dollars per annum. All that expense has been done away with, and to-day there are but three of these boys being maintained at a total cost of about three hundred dollars per annum. In addition to the annual saving for maintenance there is a saving on capital account of at least one hundred thousand dollars, for a new and expensive building would have been an absolute

necessity, and as a matter of fact plans had been drawn for such a building.

The entire cost of providing for the boys was about $2,500—not much more than one month's maintenance of the institution.

Broke the Record.

For over eight months not one of the boys thus set at liberty on their personal word of honor got into trouble or in any way came under the observation of the police, but it would be almost miraculous if this splendid record could be maintained throughout; therefore, the record was broken. Word was received in the latter part of November that one of these boys was in the lockup charged with stealing a pair of buckskin gloves from a livery-man with whom he had been working. After remaining steadily in a situation for over six months and winning golden opinions he had run away and although every effort was made to locate him, nearly two months had elapsed and this was the first intimation received of his whereabouts. By request the boy was released and since that time has been doing well. The offence was not a serious one and for nine months this was the only instance brought to my knowledge of any of the boys being arrested. This is a record of which anyone might feel exceedingly proud, and it goes to prove that if taken in the right way boys can be trusted when they have been placed on their honor and treated with respect and consideration. Later on another boy was arrested and sent to the Industrial School for stealing a small article from a departmental store—but up to the day of closing this report there has been no really serious offence committed—and only three in any way brought before the courts.

Met a Former Companion.

The boy just mentioned as having been locked up for stealing was not a bad-intentioned boy and explained that he would never have got into trouble if he had not met a boy of seventeen whom he had known in the Reformatory and who was discharged before the inmates passed into my care. This other lad had been arrested no less than six times since he left the Reformatory and was recently committed to the Kingston Penitentiary for two years. Does not this instance show very clearly that the acquaintanceship formed in an institution of that kind is hurtful, and that instead of being helped to do better the boy was actually made worse by our system of reformation? One does not like to place too much credence on the statements of these lads, but a large number of them, without solicitation, repeatedly said that they learned more badness in the Reformatory than they had known before, that instead of being made better they were made much worse by their incarceration, and that in the ordinary course of events they would have continued in crime after their discharge.

The great importance, also, of supervision should be emphasized. Many reform school graduates get into trouble because they are not closely looked after, helped to get employment, boarding houses, etc.

Boys Who Ran Away.

Twelve boys ran away from the homes or situations in which they were placed. This does not necessarily mean that they were failures or that they are not doing well at the present time. It was to be expected that all would not be content to remain where placed after the first surprise at regaining their liberty had died down. Some were of a naturally restless disposition, craving continual change of scene, some quarrelled with their employers, some were not treated as well as they should have been, and some had aspirations to earn more money than they were getting. Of the boys who ran away the present addresses are known of all but three. In several cases they returned to their former homes and satisfactory reports having been received concerning their conduct there it is not deemed wise to re-arrest them or do more than encourage them to keep out of trouble. Visitors from this office have personally called upon the majority of these runaways and reported that everything was satisfactory and interference would be unwise. Mothers, relatives and friends reported in the case of others that the boys have had a salutary lesson and have settled down to behave themselves in future, and altogether there is no reason to feel more than a temporary disappointment at their failure to remain where first located.

Boys Personally Visited.

Where at all possible every boy has been personally visited no matter where located, not only to ascertain how he was getting along, but to commend and encourage both him and his employer—correspondence has been kept up and this has had a steadying effect. The following are sample reports:—

"Found F., a boy of eighteen, working at the hotel, where he has been employed for the past six months. He has been steady and industrious, and the chief clerk spoke of him very highly."

"C. was found at the farm of ——. He seems to be a frank, honest, open-hearted lad. Mrs. B. said that she had found him a fairly good boy, although he had a bad memory and was careless about remembering what he was told to do. Is probably not fitted for a farmer as he does not care for horses. He attends church with the family and is going to school for the winter. He already has a fair education, being in the third book. There is no complaint whatever, and visitor is of opinion that the lad may stay there as long as it is considered best for him to remain."

W., another boy about fourteen, placed on a farm, where he has remained steadily for eight months. Report: "This boy is a good worker and is getting on splendidly. From various sources in the locality visitor heard a good report of him."

H., a youth of nineteen, but small for that age, and not up to the average in mentality. Report: "This boy is now getting along contentedly with Mr. M. He ran away a few weeks ago, having been induced to do so by a hired man in the neighborhood. Was brought back within a week and he stated to visitor that he would not do such a thing again. Has agreed to remain contentedly for the winter at all events. The home is a splendid one, and there is a baby girl, of whom the boy is very fond, and in every way he has the best of care and helpful surroundings."

T., a youth of eighteen, placed on a farm where he has now been for eight months. Report: "This boy is doing well and there was no complaint whatever as to his conduct. Is contented and wishes to stay all winter. The farm is a good one and the housekeeping first-class."

SOME LETTERS RECEIVED

What Employers and Relatives say About Boys Since their Parole.

Has Been a Good Boy.

The following brief letter means a great deal when all the circumstances are considered. Two years ago a boy was sent to the Reformatory for various offences and when taken over by this department had four years yet to serve. He has from the first responded well to the interest taken in him and at the time this letter was written had been for eight months in the one place.

"Dear Sir,—I thought I would drop you a few lines and tell you that M. is getting along all right and has been a good boy since he came here. He is going to school now. I expect to give up the farm before very long and M. thinks that he would like to go to his own home then. I remain, Yours, etc."

Earning One Dollar Per Day.

"Dear Sir,—I am glad to inform you that my son is well and is working at ———factory and getting $1.00 per day. He has been a good boy since he came home and I think the lesson he has learned has done him good, especially your kindness to him. Dear sir, I am glad to see you take such an interest in these boys, and I hope you will excuse me for not having written you before."

Eight Dollars Per Month and Board.

The following letter was received in November regarding a youth of eighteen who had been out about nine months:—

"W. is still working near here although he is not with us now. He thought it was too quiet with us, but he is working for a neighbor and is getting $8 a month. We never allowed him to have any tobacco, but he uses it now. He does not always speak the truth, but I think he is getting steadier than he was. Yours respectfully."

Is Getting on Well.

A member of the Legislature writes:—"I am pleased to say that the boy you sent here is getting on well. He is working with the — Company and earning one dollar per day, and is living at home. They say he is improving in character and giving no trouble."

Learning Fruit Farming.

In the spring sent a boy who had a liking for the country to a fruit farm. After being there eight months the following very satisfactory letter was received:—

"B. is well and appears to be quite happy with us. He has some nice boys for company and does well considering his former bad surroundings. He is a little slow, but one cannot expect too much. I hope your large family of boys are all doing as well as he is. Yours respectfully."

A Long-Headed Boy.

One of the boys, after he had been placed in a home in the country, wrote, saying: "Please tell me how much wages I am to get so that I'll know how hard to work."

Helping to Buy a Home.

"Dear Friend,—I thought I would write you a few lines to let you know I am well and was glad to hear from you. I would have written oftener but have been working steadily. I am on the railway now and am making $1.35 per day, and have drawn $40.00 every month since my return. We have just moved into a new house and I give all my wages to my father to help pay for it. We will be very pleased to have you call whenever you can come. I have found out home is the best place. Will say good-bye. From your loving friend."

Learning a Trade.

"Dear Friend,—I thought I would take a while to write and let you know how I am getting along. I am working every day at my trade learning the plumbing and gas-fitting, and I am getting along fine. I have not lost a day since I started to work. I work from seven till six, but some nights I work overtime till nearly eleven. I thank you a great many times for getting me out."

May Get Married Soon.

"Dear Sir,—Because I have waited long to write that does not say that I did not think of you. I have employment right near home and get $48 a month. I started work about a month after I left you and have been advanced to what I am getting now. I am glad to see that you do not forget me and I hope you never will as I will always remember you. I have given up tobacco and do not drink, and I never lose a minute from my work. I think this will be all for the present. I go to see a girl now and I may get married before long, and if I do I will tell you. Good-bye, and a thousand thanks, from a boy that is very much obliged to you."

Looks Like a Different Boy.

The Secretary of one of the Children's Aid Societies writes concerning one of these boys placed out in the country, as follows:—

"Saw S. C. this morning. He is greatly changed for the better and looks like a different boy. He says he is quite contented and foster-father states that he is doing very well."

At Home and Doing Better.

A youth of seventeen, who was placed on a farm, stayed four months and then ran away. Lost track of him for three months and then received the following letter from a relative:—

"Dear Sir,—I was very sorry to hear that J. disappointed you by running away. He came home a little over a week ago and has been working around here. When he left his place he went north and intended going to the lumber camp, but was taken sick and had to go to the hospital. Then he started to come home without any money, and he looked a poor lost boy

when he arrived. He says he is going to be a good boy and work hard and help me, and I believe he will not give any trouble in the future. Thank you very much for your assistance."

A Printer and Publisher.

One of the boys, who, while under a sentence of five years in the Reformatory, was taken over and provided with a home, is a striking example of what can be done for lads of this description. After a few weeks of friendly care and shelter he was apprenticed to the proprietor of a country newspaper, and he has remained there for ten months to date, steadily improving his opportunities. He is learning the fascinating business of printer and publisher and may some day be the editor and proprietor of an influential journal. As in the case of so many other of these boys, it was not

Pleasures of Country Life.

inherent badness but uncongenial home surroundings that got him into trouble. His mother was dead and a strict father failed to understand that love and sympathy were more potent factors than commands and threats in securing obedience. This boy has never seen the Reformatory to which he was sentenced, and so his bright young life has been saved from the stigma and the evil association that our system of "justice" and "reformtion" had intended.

A Misunderstanding.

A boy who had been in the Reformatory was being taken by Mrs. Harvie to a home in the country. The man with whom he was to be placed had a brother who was governor of the gaol in the district and for conveni-

ence he arranged to meet the lad there. This led to a misunderstanding on the boy's part which caused him some very bad moments, as the following letter will show:—

"When we got into S. I heard Mrs. Harvie say that we were going to the gaol and I got terribly scared. I was just going to run away and I heard a man in a rig call out 'Hello, there,' but I would not listen to him. I thought he was going to take me to the gaol. The man kept yelling to me and at last I turned around and told Mrs. Harvie to see what he wanted and the man says, 'I am so and so.' 'Well,' Mrs. Harvie says, 'here is your boy.' I thought he was the gaoler for sure and I got into the rig and asked him where he was going. He said, 'I am going to the mill and from there to the gaol.' I was frightened all the worse. When we got to the gaol he went in and brought some papers and a man came out and I was ready to make a jump for the street. But the man got in the rig and we started off and he told me we were going to the farm. Say, there wasn't a gladder fellow on the streets than I was then.

Well, I think I am doing what I should now, and I like being out here in the country. Write to me soon. Your friend."

Blamed it on the Chaplain.

A lad just received from the Reformatory was discovered surreptitiously smoking and was at once questioned as to how he came to do such a thing. "Oh," he replied, "we all use tobacco up there, and its all right, ain't it? Why, the chaplain says," sis he, "Boys don't never drink liquor. If a man asks you into a bar to have something take a cigar. So we all smokes." Needless to say the accuracy of his statement as to the chaplain was doubted.

To His Uncle's Farm Instead.

One boy eleven years of age was committed to the Reformatory for five years, largely at the request of relatives, who claimed they were unable to control him. When official notice was received at the Parliament Buildings, a reply was sent to the committing magistrate that the sentence was illegal as the boy was under age for that institution. The matter was reconsidered and with a little further enquiry the lad was transferred to the care of an uncle in Manitoba. This arrangement has worked well so far, the boy being delighted to go to the North-West and the uncle being pleased at the prospect of having his assistance for light chores about the place. There are many other cases in which similarly beneficial results could be brought about if a little care and forethought were exercised before coming to a decision. Commitment to an institution is generally the easiest, but is rarely the best way of disposing of a lad of spirit.

Don't Mention It.

A lad ended up his letter in this fashion: "When you write don't mention the place where I was before."

"One of the Worst."

A lad who was supposed to be "one of the worst boys in the Reformatory" was treated with special kindness on account of his reputation, with

the result: He has now been for nine months in steady employment as a helper at carpentering and painting. Is well spoken of by all who know him. Is happy, contented and grateful. One such case as this would alone be a good year's work, for who can tell what he may be and what he might have been!

Started Badly But Ended Well.

Another of the "worst" boys gave an immense amount of trouble and anxiety. After much urging to do right and various changes of situation, he ran away, and hope, so far as he was concerned, seemed to be at an end. However, several months later he was found at his mother's home, working hard and steadily, saving money to help his family and full of ambitions for the future—not the slightest cause for complaint from anyone.

His First Watch.

A boy's reply in acknowledging the receipt of his first watch:

"Dear Sir,—I received the watch in due time and it's a dandy. I am very thankful to you for it. I have learned how to wind her up, and I am going to church to-night and will carry her for the first time. So thanking you again for your kindness, I will close, hoping these few lines will find you as well as they leave me."

Helping Support a Sick Brother.

One of the boys ran away after he had been placed in a particularly good home and the reason given was that he was required to go to school and he felt himself too much of a man to mix with small boys again. A good deal of concern was occasioned by this action on his part and this was increased by the fact that numerous efforts were made to locate him without success. Recently, however, a letter was received from his mother saying that he had been off in the States, had returned home on hearing that his brother was sick in the hospital, and was at work and devoting his wages to supporting this sick member of the family. He was now anxious to do right and was a help and comfort in the home. The mother concluded with grateful thanks for the interest that had been taken in him and a promise that if he were allowed to remain at home she would report at once if anything went wrong.

History of Each Boy.

To those who are interested enough to go into the matter more fully a history sketch of each boy is given herewith. The cause of his committal, his former social condition; the disposal made of him and his present progress. This report is revised up to the end of 1904, so that the work may be said to cover from nine to eleven months. The boys are referred to by numbers as their identity could not well be revealed. If it were possible to reproduce photographs the great improvement that took place in the appearance of the lads would be noticed at once, and would show even better than words what has been accomplished. This however would not be prudent. All photographs used in these reports are of such character that identification and consequent annoyance to either child or foster parent is practically impossible.

Case No. 1.

This boy, seventeen years of age, was committed to the Reformatory at thirteen for shop-breaking. Father dead, mother married again. In interview boy stated that he, with a number of others, broke into a store and took some candies and cigarettes. The others, he claimed, were allowed off through family influence, while he was committed to the Reformatory. Seemed to be a bright, attractive lad and promised to take care of himself and not get into trouble if released. The institution reports as to his conduct were favorable but some of his companions spoke of him as weak in character and inclined to take things. Had the parents interviewed. Mother stated that she had had fourteen children, eleven of them now living and doing respectably. Said that the boy's offence was simply a piece of folly and that neither she nor her family knew anything about his conviction until after the affair was over.

Order issued for lad's release on parole. Secured employment for him and he went to live at home. Two weeks later owing to quarrels with step-brothers and sisters was turned out of the house. Gave up his situation because he did not like the work. Provided him with a boarding place and after a short time with employment. When he began to earn good wages family quarrel was made up and the lad returned to his people.

Case No. 2.

This boy, about fourteen years of age, was committed to the Reformatory one year ago for an indefinite period. Charge, incorrigible. Had an interview with the boy. Did not know exactly why he was sent to the institution, but thought it was because he was roaming about and did not go to school. Stated that his parents were laborers and there were five small children. Did not think there was any use in his going home and would be quite pleased to go to a situation some place else. Made enquiries about parents. Found they were both living, but were very poor. Live in a country village; father earns small wages as a laborer, mother has four children under twelve to look after. Took the boy out and found that he was greatly addicted to tobacco. Supplied him with chewing gum and he promised to stick to the lesser evil. After a few days in receiving home sent him to a situation in the country. The family, well to do and highly respected, promised to take an interest in him. Wrote to the boy as follows, and the letter is typical of others:

"Mr. C. told me he left you safely with Mr. H., who promised to give you a good home and treat you well if you proved to be a good boy. I hope you are doing your best, for I am very much interested in you and anxious to see you get on well. You know the reason I undertook to help you was because I believed you would try to show that you were a better boy than some people thought. All the other boys are doing well and I want you to be just as good as they are. I enclose a stamp and would like you to write to me soon. Your friend,"

In a few days the following reply came:—

"Dear Sir:—I received your kind and welcome letter and was glad to hear from you. I got the mouth organ you sent me to-night and thank you very much for it. Please tell Mr. C. I am glad he left me here, for I like the people and they say they think they will keep me on as long as you will leave me. Will you please write to my mother and tell her I am out and tell her how it was I got here. Tell her I thought she had enough children to take care of at present."

Wrote to the boy again, to his mother, and to his employer. The agreement was that the boy was to have light employment and to receive remuneration at the rate of $3 a month to cover clothing, etc.

Official visitor called to see how the boy was getting along. Received a splendid report of him. The family liked him very much and found him useful. With regard to his education, they were starting him in the second book and giving him lessons at home. The boy stated that he was pleased and satisfied with his new surroundings, but later visitor heard that he had been boasting in the neighborhood that he was not going to stay there as he could earn more money by looking out for himself. Wrote to the boy expressing pleasure at hearing that he was doing well and urging him to continue.

Mother writes asking if boy will be allowed to write to her and if she may have his exact address. Expressed thanks for the interest taken in her boy. Replied giving her his address and asking her to urge the boy to be content where he is and to please those around him.

At the end of ten months the boy still continues contentedly in his first place.

Case No. 3.

This boy, eighteen years of age, was brought to Ontario from Manchester, England, by Rev. Robert Wallace. Was in several farm houses but not being bright mentally frequently got into trouble. Committed to the Reformatory for an indefinite period. Had a talk with him and found him willing to do right as far as he knew how. Promised to work steadily if taken out and placed on a farm. Received him from the Reformatory and placed him in a good farm home where everything seemed satisfactory. Had the boy visited twice. Visitor reported:

"The people are kind and sensible and do not expect too much of him. He is not up to the average in mentality, and will require a good deal of attention, training and advice. The people state that he works well when someone is with him, but if left alone will not do anything."

After remaining there some weeks the boy disappeared. There was no quarrel of any kind and the people were surprised that he should have left them. Since then have not been able to find any trace of him.

[It might be stated here that the number of English boys in the Reformatory in a population of one hundred was two.]

Case No. 4.

This lad, now seventeen years of age, was committed two years ago to the Reformatory for an indefinite period up to five years, the charge being larceny. In an interview with him found he was extremely anxious to be given an opportunity to show that the could be trusted. Had a prepossessing manner and appearance and was well spoken of by the officials. Sent an assistant to inspect the home and discuss the matter with the parents. A comfortable, tidy home. Mother a sensible, intelligent woman; father engaged in steady employment. Only one other child in the family, a boy about fourteen. This boy, of strong religious inclinations, said he was always praying for his brother and would watch over him and help him to do right when he came out. Arranged for the boy's return home. Later received a letter that he was employed on the railway at $1.35 a day.

Later enquiries reveal the fact that this lad is now leading an exemplary life, and is liberally helping his parents to maintain the home.

Case No. 5.

This boy, now seventeen years old, was committed to the Reformatory at thirteen on the ground of incorrigibility. Learned, however, from correspondence that the real cause was poor home surroundings. Ascertained that the father was a confirmed drunkard, physically strong, but cruel and tyrannical with his family. Had been in gaol for beating his wife, and as he only works occasionally the mother, who is a timid woman, has a very hard time and has three small children to provide for. Would be

helped by benevolent people if the father were out of the way, but no one will do anything for the family while he is around. It was recommended that the boy be not returned to his home. Explained the whole matter to him and offered to get him a good situation on a farm in another part of the country. Although fond of his mother and anxious to see her agreed to this, the mother also approving of his plan. Placed him on a farm at $8 a month and his board. Received a letter from him that he liked his place and that he knew of a good home in the neighborhood for another boy. Farmer also wrote that he was satisfied with the lad's behavior. Wrote mother telling her of the boy's progress and assuring her that every possible interest would be taken in him. Mother replied expressing gratitude for this interest. One month later farmer and boy turned up at the office. Had a quarrel and boy wanted to leave. Thought he had too much work to do and that he was not given sufficient liberty. In a half hour's arbitration secured mutual concessions and the boy agreed to return. Invited both parties to dinner and they went away quite pleased.

A month later boy left his situation and returned to Toronto. Did not like the farm. Sent him on to his mother, as he would not agree to any other arrangement, and his sentence had practically expired.

Local correspondent reports:—"Boy will not work; is cruel to his little brothers and sisters. Mother would be glad now if he had not come back." Latest report was that the young man had gone to another city in search of employment. Father is in the Central Prison.

CASE No. 6.

This boy, now between fifteen and sixteen years of age, was committed to the Reformatory two years ago for an indefinite period up to five years for larceny. Mother dead—a fact that explains a great deal. Authorities in town where he came from refused to consent to his return, as he had given a great deal of trouble and they had no faith in his reformation. Had an interview with the boy and explained this to him. He agreed that if provided with a home elsewhere he would try to conduct himself properly. Brought him to Toronto and arranged a situation for him as assistant gardener in a surburban residence at $8 a month and his board. While waiting for the gentleman who was to accompany him to his new situation he made an excuse to go out for a few minutes and disappeared. Notified relatives of his action and informed them that unless they reported immediately on hearing from the boy a warrant would be issued for his arrest. A week later received word that they had heard from him and that he was working on a farm at $12 a month. Wrote again that his exact address must be furnished. A week later this was forwarded, and it was then ascertained that the boy had a good situation, was in proper surroundings and was most anxious to be allowed to remain. Agreed to this. A few days later received a communication from the Department of Justice at Ottawa that the boy had been unconditionally pardoned on application of relatives. Later received a very nice letter from the boy's aunt stating that he was behaving himself nicely and that she would take an iterest in him.

As showing how some families cause expense and trouble to the community it might be stated that two other children in this family are now in an orphans' home and an elder brother served a term in the Reformatory.

CASE No. 7.

This boy, fourteen years of age, was committed to the Reformatory when eleven on a charge of larceny. Father dead, mother a charwoman: no one to look after the boy and see that he attended school. Sent to the Reformatory for an education. Was satisfied after an interview with the boy that he could be trusted to do well if placed in anything like reasonable surroundings. Communicated with the local authorities concerning his return home but found this course was not favored. Report said: "Mother is in feeble health and never had the slightest control over the boy. It would be the worst thing that ever happened for the boy to come back to his old surroundings." Had the boy brought to Toronto and after a few days placed him with an elderly man, postmaster in a small village and retired farmer, the chief consideration being valuable clothing and a good home in return for light services. Told boy that if anything went wrong to write at once and he would be assisted. In a few days received a letter from him that the did not have a nice sleeping room. Wrote making enquiries as to this and learned that the cause of complaint had been removed. Letter from the boy expressing contentment and saying "I have learnt a good deal since I have been here. I know how to hitch up and harness a horse and lots of other things I never knew before."

Notified the mother of the action with regard to her son and assured her that every care would be taken to see that he was happy and contented. Later received

from clergyman's wife, on behalf of mother, letter asking that the boy be allowed to return. Replied explaining that this was not considered advisable and that it was in the boy's own interest that he should be on a farm instead of running the city streets.

Sent visitor to interview boy and report on his home and progress. Following report received: "Boy is good-natured, willing and probably a good worker. He is however, quite a talker and might under some circumstances be a mischief maker. He spoke highly of his new home and made some complaints as well. Urged him to be patient—told him there would always be a few unpleasant things in this world and that he must never take the matter in his own hands and run away, and that if dissatisfied he must inform Mr. Kelso of the fact. Said he would like to se his mother, but was willing to wait until he was allowed to go there."

Lawyer's letter received asking that the mother be allowed to correspond with the boy.

Employer writes that boy continues to do well, and the conditions remained unchanged when this report went to press.

Case No. 8.

This little boy, not yet ten years of age, was committed to the Reformatory three years ago when he was only a little over eight years of age, the charge being larceny. He should never have been committed to the Reformatory and was only sent there to avoid the expense of dealing with him in another way. Found that he had become addicted to chewing tobacco since going to the institution and was fast becoming hardened by associating with older and worse boys than himself. Father dead, mother married again. His return to his old home objected to on the ground that, in addition to picking up with his old associates, the boy would not be made welcome by his step-father. Decided therefore to place him out amid new surroundings. Mother wrote asking to have him back. Said she had him committed to the Reformatory in order that he should get some schooling, and thought she could manage him all right now.

Placed the boy with a highly respected farmer and his wife who had no children of their own and promised to do well by the boy if he remained with them. Mother wrote again saying that she fully approved of the action taken in regard to her son and asking if she might go to visit him after he got settled down. Boy writes telling all about his new home and expresses himself as being very well pleased with it all. The official visitor called and reported that everything was satisfactory, the home a good one and the boy contented.

Latest report—still doing well.

Case No. 9.

This lad, eighteen years of age, was sentenced to the Reformatory for two years for larceny. His time had almost expired when it was decided to allow him to go home without waiting for the exact date of release. Officials did not give him a good character. Brought the boy to Toronto, fitted him out with clothing, etc., and urged him to lead a good life. Told him if he was ever in any difficulty to come back and he would be assisted. Ascertained that the boy's people were respectable but in very moderate circumstances. The boy had formed bad associations and would go away from home for days without permission. After his return received satisfactory reports of his progress and that he was in steady employment. Mother wrote that there was only a few weeks of his time remaining and she would rather he had remained for the full time than be under any surveillance. Two months later this young fellow left home and beat his way on a freight train to Toronto all to say that he had not been satisfied with his old home and was going to strike out for St. Louis as he thought he could do well at the World's Fair. Gave him his breakfast and half a dollar and urged him to take care of himself and work honestly for a living. Would judge however that his intention is to lead an adventurous life.

Latest report—Young man returned home. Attended religious services and has professed conversion. This may make a decided improvement in him.

Case No. 10.

Colored boy between fifteen and sixteen years of age. Had already served three years in the Reformatory on a five years' sentence for larceny. Conduct in the institution had been good but home very unsatisfactory. Father in prison several times and boy's return to old surroundings would mean a continuance in wrong-doing. Decided to send him to a new locality and boy promised to be agreeable to this and to do his best. Sent him to a northern city where employment was secured for him.

Has avoided bad company and has in every respect kept his word. Was employed all summer on one of the boats at $16 a month and his board. Was well spoken of by the officers.

Later—Since navigation closed have not been able to locate him as he took employment at a northern port.

CASE No. 11.

Indian boy about fifteen. Had been in the school for two years on a charge of larceny, indeterminate sentence. Boy favorably spoken of by the officials, and his conduct in the institution good. Found that his former home was very unsatisfactory and that he could not be returned there. Parents' whereabouts unknown. Had been living with an aunt. Got beyond control, did not attend school, was constantly stealing, was found drunk on two occasions, and was a great annoyance to the neighborhood. Found the boy had acquired a knowledge of gardening and placed him on a fruit farm in another part of the country at $5 a month and his board. Have had several letters from him stating that he liked his place and was getting on well.

Latest report—Still remains in the same place.

CASE No. 12.

Young man eighteen years of age. Had been in the school four years on a sentence of five years for larceny. Parents dead and the trouble was caused by lack of proper home surroundings. Found in conversation with him that he was a fine, intelligent young fellow, anxious to do right and in every way worthy of release. Secured employment for him at $5 a week and he acted in a thoroughly trustworthy manner. Called one day to state that an uncle in another town was anxious to have him go to live with them and would provide him with employment, etc. Ascertained that they were respectable people and agreed that it would be all right for him to go there. No complaint of any kind has reached me and the young man appears to be conducting himself well. Have had several letters from him expressing gratitude for the interest taken in him.

Latest report—Visited Toronto for several days. Is employed in a hotel; seems steady and reliable; no complaints.

CASE No. 13.

Young man over eighteen years of age. Has been in the school about four years. In commitment paper was classed as incorrigible but the real trouble was a bad home. Parents worthless people; living by begging, stealing, etc. Several children in the family, none of whom ever attended school. This lad strong and healthy but not of very bright intellect. Asked several persons in the neighborhood of his home to take an interest in him and get him employment. Encouraged him in every way possible to keep up the good reputation he had earned in the institution and stick to his work.

Latest report—Made enquiries as to his progress during past nine months. Learned that he had been working on a farm, etc., and had not been in any trouble.

CASE No. 14.

This boy, fifteen years of age, was committed to the Reformatory for housebreaking and theft. Had already served three years. Father a farm laborer of poor character. Boy received no early training or education but worked around in the country. In conversation promised to do well if given another opportunity. Agreed to help him if he would be satisfied to go to another neighborhood altogether. Relatives not interested in him; had made no enquiry concerning him. After some little acquaintanceship sent him to a farm, where he still is after a period of three months. Is in very desirable home surroundings and will receive an opportunity to properly learn farming, and to gain some education.

Latest report—Ran away from farm but was brought back a week later. Said he had been encouraged to strike out for himself by an acquaintance. Is more contented now and will remain until the spring.

CASE No. 15.

This lad, committed to the Reformatory at thirteen, is now about sixteen. His offence was larceny, but, as in so many cases, the trouble was that he was not looked after properly at home. Father a farm laborer, careless and indifferent, boy drifting

around from place to place with no restraint. Got into bad company and all the circumstances indicated that he would become a confirmed criminal unless action were taken. Interviewed the boy. Did not find him very prepossessing, although he expressed his willingness and great desire to be given a chance to show how good he could be. Was anxious to go to his home. Could not agree to this but offered to get him a situation within fifteen or twenty miles. Got him two or three different places but he was restless and dissatisfied, especially after an interview with his parents, who informed him that now that he had the prison clothes off he was as free as anybody. Boy ran away at instigation of his father. Sent a police officer to his house to arrest him and bring him back, but he had been spirited away. In all probability he has gone to relatives in another part of the country.

Latest report—Boy living at home again. Decided not to interfere with him as he appears anxious to do right.

Case No. 16.

This boy, fifteen years of age, is not very bright mentally. Owing to separation of parents did not receive proper care or training in earl yyouth. It was a question of allowing him to go to live with his mother, who wished to have him and promised to take particular care of him and see that he remained steadily at work, or committing him to the Asylum for the Feeble-Minded. On the recommendation of several persons consulted agreed to place him with his mother. At last accounts the boy was at work and causing no trouble.

Case No. 17.

Young man, eighteen years of age. Was brought to Ontario by one of the English child-saving societies when about twelve. Was placed out on several farms but acted badly, and at sixteen years of age was committed to the Reformatory for three years. The Superintendent of the institution reported that the had been well behaved and was entitled to favorable consideration. Interviewed the young man and promised to take an interest in him if he would do what was right. The English society asked to be relieved of any further responsibility as they had had enough trouble with him. Placed him on a farm at $75 for a year and his board. He did not act very well when first received but improved considerably, then grew restless and wanted to leave the farm. Wrote him, sent a book, etc., and the people replied that he was encouraged by this remembrance. Has promised to do better in future. Is still on the same farm where first placed.

Latest report—Left the above farm and went to work for a neighbor. Did not interfere with him, owing to his age, but he will probably do all right.

Case No. 18.

This lad, now sixteen years of age, is feeble-minded, although strong and healthy in appearance. Was sent to the Reformatory because authorities in his native town did not know what else to do with him. Made some enquiries and as the home had considerably improved and parents were attached to the boy decided it would be better to let them have him again than to place him in the asylum. Friends have promised to take an interest in him and it may be that he will be able to earn his living.

Letters received indicate that the lad is at work and will probably be all right now.

Official visitor called and reports: "This boy whose parents are poor appears to be doing very well at the present. He is employed in a saw mill and his father said he has given no trouble since his return. The boy is deficient mentally, and is probably better at home than he would be anywhere else.

Case No. 19.

Young man between eighteen and nineteen. Committed to the Reformatory at fifteen as incorrigible. The chief trouble, however, was that his father was dead, his mother was living with a married daughter ,and there was no place for this lad. In addition he was not extra bright mentally. When brought to the Reformatory he had to be carried owing to weakness and exhaustion from neglect and starvation. Is a French-Canadian. Mother wrote that she was anxious about him, that she had emigrated to the United States and would take him with her. Brought the boy to Toronto, and was arranging for him to go when he ran away and for some time was lost track of. He wrote to his mother however that he was working with a farmer and was getting on well and she replied that this was quite satisfactory to her as she was really not in a position to take care of him and as long as she knew just where he was and how he was getting along it would be all right.

CASE No. 20.

A large, strong youth of the laboring class; French-Canadian descent. Seventeen years of age. Father dead, mother out at service. Boy classed as incorrigible, but the trouble was really the absence of a proper home. Has the reputation of being a quiet, well disposed lad, able and willing to work. Made enquiries in the neighborhood from which he came and ascertained that his return there was not considered advisable. Boy not particular where he went. Arranged situation on farm in another part of the country at $8 a month and his board. Has remained in the same situation without change to date.

Letters received from him lately indicate that he is getting on all right.

CASE No. 21.

Boy of thirteen, committed to the institution at ten years of age charged with larceny, but poor home surroundings the real cause. He was of illegitimate birth, his mother had gone to the States, and he was being supported by his mother's parents, old people who were very poor and unable to give the child proper care. Did not receive any schooling and was allowed to run wild. Found that he was a nice boy and likely to do well in proper environment. Ascertained the mother's address and corresponded with her, and to the satisfaction of all concerned the boy was placed with the mother's sister, a respectable married woman living in the northern part of the Province. She agreed to give him a good home and to be responsible for his welfare.

Latest report—Mother came over from States and stole the boy from her sister. Next came a letter from a Prevention of Cruelty Society that boy was in their care, having been ill-treated by man with whom mother was living. Wrote offering to receive the boy, but was informed he had been given over to mother again.

CASE No. 22.

French-Canadian boy of fourteen. Committed from the eastern part of the Province for an indefinite term for petty offences, but in reality to get him away from bad surroundings. Father dead, mother keeping hotel. Found that the boy was a bright, smart lad, well spoken of in the institution. Considerable correspondence with local people as to his future, the general opinion being that it would be unwise to allow him to return. The boy was therefore placed on a farm where he remained for six months.

Latest report—Boy wrote to his mother revealing his address. She visited him and took him away in middle of the night. He will, however, be all right, as the local Children's Aid Society is acquainted with the house and will exercise supervision.

CASE No. 23.

French-Canadian youth, aged seventeen. Committed for an indefinite period as incorrigible, but the history particulars revealed the fact that his parents were both dead. He was not of bright intellect, was living around anywhere, and some disposal had to be made of him. It was at first proposed to transfer him to the Asylum for the Feeble-Minded, but as he was strong physically and of quiet disposition it was decided to try him on a farm. Was provided with a suitable situation.

Latest report—Has made satisfactory progress up to the present time.

CASE No. 24.

French-Canadian youth of fifteen. Committed for five years as incorrigible. Real cause bad home surroundings. Well spoken of by the officials of the institution, but his return to former home strongly opposed. After considerable correspondence boy was allowed to go to a respectable married sister in Michigan. Has since written that he was well and happy.

CASE No. 29.

Colored youth of sixteen. A quiet young fellow, highly spoken of by the officials. No necessity for further detention, but found that local people were thoroughly opposed to his return home. Sent visitor to make special report, which read as follows: "This boy has virtually no home. His parents are drunken, worthless people. The mother is periodically insane, and the elder brothers are drunken toughs. The younger children had to be committed to the Children's Aid Society." Decided therefore to

look up a suitable home in another part of the Province, the boy on his part promising to be content wherever placed and to do his best to please the people he lived with. Is now on a farm with worthy people, east of Toronto, and is usefully and happily employed. Relatives have never enquired for him and boy does not seem particularly anxious to meet them.

Latest report—Lad personally visited. Is doing well in every respect.

Case No. 30.

This is a particularly satisfactory case. Lad of sixteen running wild on streets of Toronto. Committed to the Industrial School. Escaped from there, re-arrested on charge of highway robbery and committed to the Reformatory for five years. Had an interview with the boy and found that he could be influenced by kindness and a good home. Had a particularly sad early life. His father died and his mother married again; then later she died and left him to the stepfather, who did not want him. Received no kindness, affection nor moral instruction and grew up to feel he had no place in the world. His offence due to homelessness. Promised to befriend him and see that he got a chance in the future. After a short stay in the Shelter placed him on a farm north of the city, where he is making excellent progress. Has given up the use of tobacco, etc., and has shown himself exceedingly anxious to merit the good opinion of all who have interested themselves in him.

Latest report—Boy had a row with his employer and threatened to leave. Wrote to him not to spoil his good record. Transferred him to his employer's brother, and so far no change has occurred. Received present of a watch for giving up tobacco.

Case No. 31.

Boy of fourteen. Mother dead, father married again. Lad had a respectable home and seems to have been well treated, but got into bad company and was arrested for larceny. Was committed for three years to the Reformatory largely at the request of his father. Had been there one year when his case was enquired into. After several interviews with his parents it was decided that he should be given another chance, the boy himself promising to turn over a new leaf and get steady employment. After being at home a short time he wrote that he had a situation but was not getting very much wages. Was trying hard to keep his promise to be a good boy and was quite happy. Has been in several situations since that time and now earns about seven or eight dollars a week. Is not likely to get into any further trouble.

Case No. 32.

This boy, sixteen years of age, was committed for larceny. Had a very poor home and was allowed to run the streets at all hours of the night, selling newspapers, etc. Father dead, mother married again. While arrangements were being made for his return home on approbation an order came from Ottawa for his absolute discharge. Enquiries made since his return home indicate that he is getting on very well and he has shown his interest in the work by capturing and returning to the Shelter another boy who had run away.

Case No. 33.

Young fellow of seventeen ,a waif from birth. Has ben in public institutions all his life up to thirteen or fourteen. Mentally dull and his manner and actions indicated that his affections had never been properly developed. Was sent to the Reformatory for theft. Promised that if he were given another chance he would do well and offered to go to a farm home. A suitable situation was found for him, where he remained four months. Left his place and came to Toronto. Went to work for a former employer. Is doing fairly well.

Case No. 34.

Young man of eighteen. Committed for larceny at the age of sixteen, and having gone a long way in wrong-doing it was found difficult to influence him for good. Parents both addicted to drink, and several children in the family had an unfortunate time of it. Younger brother had to be sent to the Industrial School. Other children have been in the Children's Shelter, and was informed that a girl of twelve, who is at present at home, is sure to go to the bad sooner or later owing to the drunkenness and degradation that prevails. The young man made many promises to do well in the future and agreed to go a home in another part of the country when informed that

he could not go to his parents. Met with a slight accident before leaving the institution which led to complications and necessitated his being placed in the hospital. When convalescent he made his escape from the hospital, intending to return to his former home. His unwise action in quitting the hospital brought on an attack of illness which ended in his death a few hours later. He was given decent Christian burial.

CASE NO. 35.

Quiet inoffensive boy of fifteen. Has been in the institution nearly two years having been committed as incorrigible. The underlying reason for his committal however, was that his father was a farm laborer and did not earn enough to support his large family of children. Boy received neither schooling nor moral instruction, and naturally drifted away from a home where there was not enough food, clothing or kindness to go around. As the boy had always lived in the country there was no difficulty in getting him a good place on a farm, where he is now making excellent progress. Home was selected within reasonable distance from his parents so that the lad could see them from time to time. Employer writes that the boy is doing well.

Latest report—Boy behaving nicely. Has now been over ten months in the one situation.

CASE NO. 36.

Boy between fourteen and fifteen. A difficult case to handle, owing to the fact that the boy was of weak character and anxious to return to his former home, all the reports of which were particularly bad. Had a personal visit paid to the parents in order to see if they were worthy to have the boy with them again, and the report received was as follows: "This boy has worse than no home. His father varies between the poor house and the lunatic asylum, and his mother is keeping a disorderly house and living with another man." Two sisters were employed at cigar making and other members of the family had a bad reputation. Brought the boy to Toronto and got well acquainted with him. After three or four weeks of kind treatment he agreed to accept another home away from his relatives, and promised to be content and obedient. Placed him on a fruit farm.

Latest report—Was in the same situation at time of writing. Sent him a watch as encouragement. Employer particularly patient. A noteworthy case of child-saving.

CASE NO. 37.

Young man about twenty years of age. Discharged by special order from the Department of Justice at Ottawa. Having very poor family connections and being without money or prospect of work, he asked to be taken care of as well as the other boys. Gave him shelter and obtained him work. After doing exceedingly well for three weeks he received a letter from his mother begging him to come home, and he left at once without stating his intentions. A few weeks later he wrote asking to be taken back as he had not been able to obtain work, and his relatives were poor and unable to help him. Allowed him to come and obtained another situation for him. This he kept only one day. Provided him with another situation. He remained two days and left again without reasonable excuse. Had not the courage to look for work himself and everything in that line had to be done for him. Got him another situation, at which he remained three days. Next sent him to work on a farm, but after two days he turned up again in the city and begged to be given another chance in town as farm work was too hard. Received him again and placed him in another situation which he kept for two days. Informed him that he could have no further assistance. Disappeared. Two months later heard from him that he was in the north-west with his father and was at steady work. This almost hopeless case did not prove so hopeless after all. Has since written regretting the trouble he gave.

CASE NO. 38.

This boy was sent to the institution for two years for larceny, the chief trouble however being that he had not been properly controlled at home, the family being in poor circumstances. His time having almost expired he was released by order of the Department of Justice. Have not followed this case up as there would be no justification for my doing so.

CASE NO. 39.

This boy, fifteen years of age, was committed for an indefinite period owing to the fact that his parents were separated, and his grandfather, with whom he lived, was unable to support him. Upon being brought to Toronto it was found that the boy

was suffering from malignant tomors, and he was placed in the hospital for treatment. Remained there for two months, after which he was returned to his relatives.

Latest report—Left his relatives and found work in another part of the Province; was arrested for going off with a horse and buggy belonging to his employer. Claimed that he only took it for a drive. Released on suspended sentence. Disappeared and not since heard of.

Case No. 40.

This lad, seventeen years of age, was placed in the institution largely at his father's request, having become disobedient and unmanageable. After considerable correspondence the father agreed to receive him back again, the boy on his part promising that he would give no further trouble. He remained in his home for some time and then wrote privately that he was not at all happy and would like if a situation could be got for him some place else. He secured a situation himself and afterwards moved to Toronto, where he is at present employed.

Case No. 41.

This boy, about fourteen years of age, was committed as incorrigible, but the difficulty was poor home surroundings. Father, a laborer, has several children, and never exercised proper control over them nor given them moral example or instruction. After some correspondence a relative of the family agreed to take the lad. His mother has since written stating that he is now a good boy and has not given the least trouble since his return.

Case No. 42.

This bay, sixteen years of age, was committed for larceny. His father was described as a worthless fellow, but his mother and elder brother were described as respectable and steady. Arrangements were being made to place the boy in a situation when an order came from the Department of Justice for his unconditional release. He is now living with relatives and there has been no cause of complaint.

Case No. 43.

This lad, eighteen years of age, was committed for larceny, having stolen some articles from his employer. His parents were both dead and he resided with his grandfather. The lad's conduct in the institution was exemplary, and after considerable correspondence arrangements were made for him to go to an uncle in another part of the Province who occupied a good position and promised to exercise a father's care. So far the conditions have been very satisfactory and there is no reason to anticipate any further trouble.

Visitor for the Department made the following report: "This boy has excellent prospects of doing well for the future. His uncle is in comfortable circumstances and takes a great interest in him. He is attending business college and expects when he graduates to obtain employment with a leading business firm."

Case No. 44.

This lad, about fifteen years of age, was given a term of five years for housebreaking and larceny. As in the case of a good many other boys who get into trouble, his mother was dead, and the home influences were not of the kindest. The lad spent a good deal of time on the streets and in company with other boys, and naturally got into mischief. Enquiry proved that it would be unwise to send him home at present as he has not yet been away for a year and the home conditions have not altered to any extent. The boy promised that if given an opportunity he would show that he could get along all right. Was placed in a farm situation but the people could not keep him—found that he was cruel to the cattle, would neglect his work and was very much addicted to tobacco. Was brought back and placed in the Industrial School.

Case No. 45.

This boy, nearly seventeen years of age, had an unusually bright appearance, and evidently belonged to a better class than the majority of the inmates. Was committed on the serious charge of highway robbery and assault, but he explained in the course of conversation that it was more of a holiday escapade in which he participated with three companions, the idea being to distinguish themselves in an unusual way. His parents were both dead and he had been living with relatives, and, having very little

congenial home life, was led to form acquaintanceship with careless young fellows of his own age. As it was quite impossible to return him to his former home surroundings he expressed himself as willing to make a new start somewhere else, and a farm situation was found for him. He has since written expressing himself as being quite happy and contented, and his employer also reported that he liked the boy, but found him quite ignorant of farming and slow.

Latest report—Still in the same situation and doing nicely.

CASE No. 46.

This boy, now about fourteen years of age, was of illegitimate birth, and when returned from a foster-home where he had spent the most of his youth he was adopted by his own mother, who was married to a farmer and had two or three children. The boy, however, was not aware of the relationship. Committed a serious offence and was sent to the institution. In an interview the lad said that he was anxious to do right but that he did not like his home and did not want to go back there. Upon his promising to turn over a new leaf if placed in a good home elsewhere he was taken out and provided for. His conduct has been very satisfactory since that time.

Latest report—No change; getting on well.

CASE No. 47.

While committed to the institution on the serious charge of housebreaking and larceny, this boy did not have anything of the appearance of a hardened offender. His mother was dead and the home circumstances were not congenial. His offence was breaking into summer cottages, and he explained that this was done more out of curiosity than with any intention of stealing. As it was deemed inadvisable to return him to his home, a situation was found for him as driver for a doctor, and he is making admirable progress. He is being patiently dealt with and is gradually overcoming his numerous faults.

Latest report—Still in the same home; greatly improved in every way.

CASE No. 48.

This boy, fourten years of age, although guilty of shop-breaking and larceny, was really committed to the institution because there was no proper guardianship being exercised over him. His parents, while not exactly bad, were of no account, and never attempted to exercise proper control over him or to give him instruction, either mental or moral. The children all grew up to do exactly as they pleased, and application was made to have his sisters placed under the care of the Children's Aid Society. The boy, a bright, attractive lad, had no vicious tendencies, and proved responsive to good influences. No difficulty was experienced in getting him a satisfactory home in the country, and he has since written that he is well pleased with his place. His employer is satisfied, and to help this boy has so far been an easy and pleasant task.

Latest report—Personally visited several times. No complaint. Now attending school.

CASE No. 49.

Although this boy, about sixten years of age, had a good home and had apparently no reason to go wrong, he was constantly getting into the Police Court. After being treated leniently on several occasions was committed to the Reformatory on a charge of house-breaking. When spoken to he expressed contrition for the trouble and pain he had given his parents and promised to make a good use of his time in future if he were pardoned. After a good deal of correspondence it was decided to give him another chance at home and in several months now there has been no complaint made against him.

Latest report—Working steadily and getting one dollar per day.

CASE No. 50.

This is another boy of fourteen having a good home and no apparent cause for wrong-doing. On a closer study of this case it was found that he was not bright mentally, and had a character that was easily influenced for bad. Got into trouble on several occasions and stated that it was his companions that induced him to do wrong. He was committed to the institution largely at the request of his father, and had been there about a year. After discussing the matter with his parents it was decided to place him in charge of an uncle in another part of the country, and so far this plan has worked out satisfactorily.

Case No. 51.

This young man, between fifteen and sixteen, was committed to the institution for three years on a charge of burglary. At the institution he tried to escape, which gave him rather a bad name. In conversation, however, he appeared anxious to do what was right, and promised that if an interest were taken in him he would not do anything wrong again. Promised to make enquiries and see what was best to be done. The authorities at place where he came from did not want him back on any consideration, claiming that his old companions would lead him astray again, and the had little faith in his promises of reformation. Informed the lad that he could not return to his old town, but that if he would be content to take a situation on a farm he would be given an opportunity to earn his discharge. This he readily assented to and a good country home was provided for him. Everything went well for the first month or so until he got writing to his mother. She moved to another town and asked that he be allowed to go to her. As the attachment appeared to be strong on both sides a promise was made that in a few months an arrangement of that kind would be made. In the meantime the young fellow was too impatient to wait and disappeared from his situation. He hired out in another neighborhood and after earning money for railway fare made his way to his mother's home, and I received word of his arrival there the next day. Agreed not to interfere provided he went to work and avoided bad companions. Have since received word that he is working as an attendant on stone masons and is going to learn the trade of bricklaying and masonry. A correspondent wrote that there was evidently a decided change in the lad, and that as the home conditions had improved he might safely be let alone.

Case No. 52.

This boy, fifteen years of age, had proved a difficult case to handle. He was under the care of the Children's Aid Society for some time, but would not stay in any situation or home provided for him. His father was dead and as his mother and sister worked in a laundry there was no one to give him proper attention, with the result that he made his home on the streets. He went tramping and was arrested in another city charged with stealing, and committed to the institution for two years. Found on interviewing him that he was a bright attractive lad, acting as a messenger or guide in the institution and exceedingly willing and obliging. Cultivated his acquaintance and secured from him a promise that he would settle down if some interest were taken in him and a good home provided. Brought him to the city and on the way he begged to be provided with tobacco, saying it was impossible now for him to do without it. Gave him a liberal supply of chewing gum and candies instead, and encouraged him to give up his old habits, which he promised to endeavor to do. Got him into a fine farm home, and he remained there for six months. Received the most satisfactory accounts of him; that he had overcome his desire for tobacco, had not used any profane or saucy words, and seemed happy and contented with his surroundings. However, he suddenly disappeared and although careful enquiry has been made nothing has yet been heard of him.

Latest report—Received word from the police in one of our towns that this boy was in custody charged with stealing a pair of buckskin gloves from a livery stable. A period of eight to nine months had elapsed and this was the first boy to be arrested. The record was broken. He did not go more than twenty miles away, and in two months had worked at three places. He has the tramp instinct highly developed and it is doubtful if he will settle down steadily anywhere. The police authorities agreed to discharge him to my care and the people to whom I first sent him took him back He is there now and promises to be more content in future.

Case No. 53.

Young man, sixteen years of age. Was committed for larceny, but during the year he served his conduct was exemplary, and there was really nothing to be gained by keeping him in confinement. Found on enquiry that he had a good home—parents both living, father in steady employment, and both feeling exceedingly grieved that their boy should ever have got into such trouble. Arranged for his speedy return and heard afterwards that there was great rejoicing over this unexpected leniency. The boy is at work and there is no reason to anticipate any trouble in the future.

Case No. 54.

Boy of fourteen committed for larceny and had served nearly one year on a five years' sentence. The cause of the trouble was that parents were separated and the

boy had no proper home influences. Ascertained on enquiry that there were a sister and an aunt in another city, both in steady employment, and that an older brother was also thinking of settling there. Brought the boy down from the institution and got him employment. Encouraged the scattered family to take up housekeeping again and the young people met together, took a house and sent for the mother, so that the result in this case was to reunite a family and give them all an impetus toward building up a pleasant, comfortable home. The boys are so filled with enthusiasm over the new idea that there is no likelihood of their doing anything wrong. Any wages left after paying their living expenses will go to the purchase of furniture, etc.

Latest report—Family decided to return to the town in which they formerly lived. Boy at work and earning good wages. Has since returned to Toronto and taken a situation.

CASE No. 55.

This lad, now nearly sixteen, is another illustration of the trouble that is brought upon children by the disagreement of their parents. The home life was anything but pleasant, and the boy had spent his time on the streets with other lads as unhappily situated as himself. Found that he was well-disposed, with a fair amount of education and anxious to show his trustworthiness. As he was greatly attached to his mother sent him to his former home, but he wrote shortly after that he had difficulty in finding employment, as the fact of his having been in the Reformatory was against him. Offered to get him work in Toronto if he cared to come here, but he replied that he had secured a situation. Received word a month later that he had gone to another city in the hope of bettering his condition.

Latest report—Boy returned to the old neighborhood and went to live and work with his father, the parents being still separated. Not likely to get into any further trouble.

CASE No. 56.

A fourten year old boy sent to the institution for five years for larceny, but the difficulty, as in so many other cases, was that the father had gone away and left the mother with several small children to look after. This boy, being the eldest, was allowed to do pretty much as he liked and soon fell into the hands of the police. It was really in order to give him a chance in life that the magistrate sent him to the institution. Found on interviewing the boy that he was a quiet, inoffensive young fellow who under proper conditions would not be in the slightest danger of doing wrong. Brought him to Toronto and sent him to a farm home. Parents became reunited and the father claimed that he had not deserted his family but had simply gone away to make some money. The home has now been re-established and as they are living in another city the likelihood is that they will do better for their children than in the past. Promised that if everything continued satisfactory for the next three months would allow the boy to return home.

Latest report—Sent visitor to se the boy. Found he was doing well. Decided to leave him there for the winter, as his parents were shiftless people, and desired the boy for his earning power more than anything else.

CASE No. 57.

This boy, fourten years of age, came from an apparently good home, though perhaps the fact of his mother being dead and his father married again may have had some influence in leading him to reckless conduct. He was sent to day and Sunday School, and there was apparently no reason why he should do wrong. He was always getting in with bad companions and was arrested by the police on two occasions. When a clearly defined case of stealing some articles was brought home to him the magistrate sent him to the Reformatory for three years and he had served about nine months of this time. The officials reported that his conduct and deportment were good and that it would be safe to give him another chance. Found, however, that the authorities at the place where he came from would not hear of his returning there. Boy responded readily to the invitation to show that he could be trusted, and in various conversations spoke and acted in a satisfactory manner. Placed him in a quiet country home with good people who agreed to take an interest in him. Has been there for ten months and is doing nicely. Gave him permission to visit his father at Christmas and he returned promptly at the time appointed.

Latest report—Circumstances remain unchanged. Boy has been visited several times and all satisfactory. His father also visited him and approved of what had been done.

Case No. 58.

Boy nearly sixteen years of age, sentenced to three years' imprisonment for burglary. After carefully studying this boy's case in all its bearings decided to give him an opportunity to redeem himself, but as his early life had been of a roving character had little hope that he would be able to overcome his natural tendencies. Placed him in a farm situation where he remained about a month. Would not give up his fondness for tobacco chewing, and this and other faults led to his return. Kept him a few days and placed him on another farm in another part of the country, where he did well for some weeks and then disappeared. Do not know at the time of writing just where he is but have no doubt that he found his way back to relatives to whom he was greatly attached. It is not likely that the boy will take to crime again as a career, but it is doubtful if he will settle down in any employment that requires application or restraint.

Latest report—This boy made his way home. Has been living with his mother and earning one dollar per day for two months past. Helps to support the family, and contributed $25 to purchase a cow. No complaints. Mother grateful that he is not molested.

Case No. 59.

Young man of eighteen years. Term of four years almost expired. The father had deserted the family and the children had a hard time owing to the fact that the mother was compelled by her circumstances to go out working by the day leaving the youngsters to look after themselves. This boy naturally drifted into crime and was sent away. Encouraged him to make good use of his life and offered, if he did not get on well in his former home, to help him find employment in Toronto. He appeared grateful for the friendly interest taken in him, and promised that he would keep out of trouble. At his old home he was unable to earn much wages and became discouraged. At last decided to take advantage of my offer, beat his way on a freight train for over two hundred miles and arrived at my house at daylight thoroughly worn out and hungry. Had him provided with breakfast, etc., got him a boarding place and recommended him to a situation. Two days later he left the city stating that he was going to try his fortune in Chicago.

Latest report—Received a call from this young man, after a lapse of six months Was dressed well. Has been for a considerable time past employed taking care of horses, and getting from fifteen to twenty dollars per month and his board. Cheerful and contented.

Case No. 60

Fine lad of seventeen. Had been in the institution for nine months on a charge of larceny. During that time was uniformly well behaved and progressive and highly spoken of by the officials. Father had abandoned his home and family, leaving the mother to support the children by day labor, with the inevitable result that the children were left to the own devices. This lad ambitious to help to support his mother. Praised and encouraged him in this laudable undertaking and sent him home. Satisfactory accounts received since that time.

Latest report—Is now in United States and is steadily employed in a factory there.

Case No. 61.

Refined and gentlemanly youth of sixteen, sentenced to three years imprisonment for asault and highway robbery. When asked about this he replied that he and his companions had got into the escapade largely in a spirit of bravado, and without any realization of the seriousness of their offence. Had heartily repented, and had no intention of doing anything of the kind again. Found that the same unfortunate family conditions prevailed as in so many other of these cases. Father dead and mother compelled to work for a living. Made arrangements for the boy to go to his uncle, who agreed to be responsible for him, and visitor, who made special trip to see how boy was doing, reports that he is in steady employment, and has been well behaved since his release.

Latest report—Boy left his uncle's place and returned to the city. Ascertained from local correspondent that he had only worked three days in six weeks, the excuse being that he could only get $3.50 per week, and he would not work for that. So far no criminal tendency had developed. Wrote offering to get him work elsewhere, but that he must get employment of some kind at once or an officer would be sent for him.

CASE No. 62.

An exceedingly troublesome case. Boy, seventeen years of age, of good education, appearance and manner, but incurably addicted to cigarettes and laziness. Parents both in the theatrical business and travelling all the time so that the boy never had any real home life. Was not taught any trade or business and still expects his parents to support him. All this was not fully ascertained until after he was taken out and provided with a boarding place and situation. He promised great things but disappointed every expectation. Left his situation and loafed about, professing every day to be going to his work. Smoked on every possible occasion and lied persistently Placed him in the Industrial School until his father's wishes in the matter were ascertained.

Latest report—Father an actor. Came from the United States and took him to New York.

CASE No. 63.

An incurable tramp, 15 years of age. This lad is a mulatto of illegitimate birth without a settled home from infancy. When quite young lived at various farm houses and working for his board would leave on the slightest provocation. Ran away from a farm house and slept in a shed all night with the result that his foot was frozen and his leg had to be amputated at the knee. Was then taken in charge by a Children's Aid Society and placed in four different homes but would not stay in any of them Committed to the Reformatory for five years. Had already served one year and promised faithfully that he would settle down. Agreed to get him a situation in a factory where he could sit at his work, owing to his lameness. Sent him off with high expectations but three days later he started on the tramp again. Got back to place from which he was originally sentenced, and was again assisted and provided with suitable work. After a week's trial he disappeared again and later turned up in Michigan. Sent an official for him and placed him in the Industrial School. One reason why the boy is so fond of tramping is that having only one leg he is able to collect money from the charitably disposed—another instance of the folly of indiscriminate charitable relief.

CASE No. 64.

Boy of fifteen. Had been greatly neglected all his life, owing to father being a confirmed drunkard. Was committed to the School for five years in order to get some education, as he was unable to read or write. As it was impossible to return him to the place whence he came it was decided to place him on a farm, the boy promising to do his best. Got him a situation at $5 a month with good home and board. Did well for some time and then grew careless and farmer complained of his inattention to work. Promised to let boy visit his former home in the fall and this proved an incentive to good behavior.

Latest report—Had a row with his employer owing to the cruel usage of an animal and left. Went to work on a neighboring farm. Sent an official to look into the matter and bring the boy back, but he had disappeared the day before, saying he was going to the States. Nothing heard of him since, although his former home has been visited and relatives questioned as to any news of him.

Later still—Ascertained that the boy is working on a farm only a few miles from his former situation.

CASE No. 65.

Owing to separation of parents and consequent lack of proper home surroundings this boy, aged sixteen, was frequently getting into bad company and stealing small articles to sell for pocket money. Was committed for five years and served nearly one. Recommended by the officials as well behaved boy with a good disposition. Was anxious to go back to his former home but this was not approved of by the local authorities. Placed him in a farm situation but he only remained there a short time, running away and going back to his former home. Stated that his reason for running away was that he was sent to school and he felt that he was too big to mix with school children. Sent an agent to visit the boy and he agreed to return of his own accord, and started out to do so but did not arrive.

Latest report—Went instead to the States. Remained there four months, then returned home. Is in steady employment and helping support a sick brother. Agreed not to molest him, as there is no likelihood of his getting into crime.

CASE No. 66.

This boy, sixteen years of age, was sent to the institution for larceny, and had served six months on his sentence of five years. Said that he had simply been helping

a ragpicker to move an old stove that had been left in a back yard and did not think he was doing anything wrong. Greatly neglected by his parents. Education poor. Found that a well known farmer living in another part of the country was an old friend of the family and placed the boy in his care. Has been doing well, and earning $10 per month and his board.

Latest report—After remaining in this situation for seven months left without permission and returned to his parents. Notified local correspondent to keep a close supervision of him. Wrote also to Salvation Army officers and others who were interested in the family.

Case No. 67.

Colored youth of eighteen. Classed by the institution authorities as the "worst boy in the institution." Had served term in the Industrial School, and had afterwards been before the magistrate for larceny. In the institution had been quarrelsome and disobedient, and at the time of visit was confined in the punishment cell. Had a long talk with him and made a strong appeal to him to let people see that he could do better than they thought. Had him come to Toronto and found him willing and obedient. His behavior throughout satisfactory, and when another boy ran away he volunteered to go after him and bring him back, accomplishing his task successfully. After waiting a time until his character had been fairly well strengthened placed him with relatives and have heard from him frquently since. He is working in the city and has not got into trouble of any kind.

Latest report—Met this youth on the street. Well dressed and tidy looking. Doing well; grateful for kindness shown him. A remarkably satisfactory outcome.

Case No. 68.

Another colored youth of sixteen. Had served a term in the Industrial School. Afterwards charged with larceny and sentenced to the Reformatory for three years. Father dead. Mother had moved to United States, and as strong attachment existed between them sent the boy to her. When placed on the train said he wanted to get as far away as possible from the Reformatory, and no one here might ever expect to hear from him again; and this has proven the case, for letters of enquiry, etc., have failed to find him or his mother.

Case No. 69.

A very respectably connected lad of sixteen. Committed for a term of years for a serious offence. This was the lad's first error as far as could be learned, and there were many favorable petitions for his early parole. As his conduct was good during the six months he had already served and arrangements were made by his friends for him to go to employment in another part of the country he was allowed to go. His conduct since has been all that could be desired, and there is no likelihood of his ever getting into trouble again.

Case No. 70.

A feeble-minded youth of fifteen, committed for five years for larceny, but in reality because he had no proper home. Parents separated, mother of no account, a brother in the Industrial School. Decided that the proper place for this youth was in the Asylum for Feeble-Minded, to which he has been transferred.

Case No. 71.

A degenerate youth of sixteen, committed to the institution for two years for larceny. Although not entirely lacking(his whole history indicates that he should spend at least the next ten years in a custodial institution, where he could support himself by his labor. Did everything possible to test his ability to make his living honestly, provided him with good clothing, suitable boarding place and employment, and studied his actions carefully. He left his employment without cause, and spent any money earned or given to him foolishly. Had to send him to the Industrial School, for the present at least.

Latest report—Largely signed petition, headed by Member of Parliament, asked for boy's return to his parents. This request was acceded to, and so far there has been no cause for complaint. Is earning $1 per day.

CASE No. 72.

A youth of sixteen, of illegitimate birth, brought up by his grandparents, who were unable to give him education or proper control. As he grew up spent all his time on the streets and was taken in charge on two or three occasions. Sent to the institution in order that he might be in proper environment. Found him a strong healthy lad, likely to do well in a good farm home. Secured him a situation in the country at wages, where he has remained to the present time, fulfilling all the expectations formed concerning him.

Latest report—Left situation without permission and went to lumber camp. Taken sick and sent to hospital. On discharge made his way to grandmother, with whom he formerly lived. She wrote of his return and that he had obtained work in the neighborhood. Magistrate also wrote that so long as the lad kept at work it would be inadvisable to interfere.

CASE No. 73.

French-Canadian youth of fifteen. Sent to the institution for four years in order that he might get some education, his parents being very poor. Had already been in the school a year and arranged to place him in the care of an uncle in another part of the country.

Visitor, who was in the neighborhood recently, reported: "Learned from the store-keeper, who has taken an interest in this boy, that he yet remains with his uncle. The boy's father went to see him a few days ago, and reported that he was doing very well and quite contented to remain for some months longer.

CASE No. 74.

Gentlemanly, refined, French-Canadian lad of eighteen. Was sentenced to three years' confinement for larceny. Had served about a year of this time, and by his uniformly good conduct had won the respect of all with whom he came in contact Should never have been sent to the institution, as he was not naturally of a criminal disposition, and the punishment was altogether too severe for a first offence. As he was well connected, there was no difficulty in arranging for his return home, and since his return he has written expressing grateful appreciation of the assistance given him.

Latest report—Earning $40 per month in a position of considerable trust. Likely to get married before long.

CASE No. 75.

This boy, fourteen years of age, was sentenced to an indefinite term in the Reformatory because of his frequent wandering away from home. He was adopted in infancy, and both his foster-parents seemed to think a great deal of him, and to give him every reasonable opportunity to get on well, but he apparently was not happy. He had been in the institution six months and his foster-parnets were most anxious to have him returned home. The boy promised to do his best to conduct himself properly in the future, and was quite willing to return. He is now at home and so far there has been no further trouble.

Latest report—Ran away from home, but was induced to return. Had another dispute with foster-father and went to the Children's Shelter. Stole small articles from a departmental store counter and was arrested. Committed to Industrial School.

CASE No. 76.

Boy of fifteen. Was up before the magistrate on three different occasions for minor offences. Committed indefinitely to the Reformatory. Although the boy had only been there about six weeks he seemed to be sufficiently punished, and to fully realize that the way of the transgressor is hard. Was particularly grieved that he should have brought sorrow to his mother, for whom he appeared to have a more than ordinary attachment. Worked along the line of this affection and was able in the course of two or three weeks to restore him to his home. Have since received letters both from relatives and officials that there is a marked improvement in his conduct, and he is now in steady employment.

CASE No. 77.

Boy of fifteen. Uncongenial home surroundings led this boy to spend a good deal of his time on the streets, with the inevitable result that he got into bad company, and was frequently in trouble; trivial offences at first, but leading on to settled crim-

mal habits. Father well meaning, yet a little strict and harsh in discipline; mother dead, and step-mother, while anxious to do her duty, unable to take the place of an own mother. Boy committed to Reformatory for five years largely at father's request. Petition received to the effect that the boy only needed a change of home, as he was not inherently vicious. Agreed to try him in a situation in another part of the country, with the consent and approval of all concerned, especially of the lad himself. So far he has done exceedingly well, and he is engaged in learning a business that will insure him a livelihood as well as congenial employment in the years to come.

Latest report—No change; still doing well.

CASE No. 78.

Boy of fifteen. Convicted of stealing money from his employer. Two former cases recorded against him. Poor home surroundings. Committed to the Reformatory for five years but by special request this sentence was afterwards altered to the Industrial School, where it was considered advisable to send the boy for the present.

CASE No. 79.

Another case of a motherless boy going astray through lack of proper attention in early life. Now about fifteen. Step-mother impatient with his faults and father indifferent. Was cared for temporarily in three different institutions, and ultimately sentenced to the Reformatory, for wandering off and sleeping out at nights, etc. Decided to try him in a country home, but while awaiting completion of arrangements in Toronto he ran away. A pleasing and gratifying instance was that two other Reformatory boys went after him ten days later and brought him back in triumph to the Shelter. He is at present in the Industrial School.

CASE No. 80.

Lad of fifteen, mentally deficient. Parents living separate, and boy left without a home. Worked around with various farmers, leaving of his own accord whenever the notion entered his head. Was tramping through the country with an adult when taken in charge and placed under the care of a Children's Aid Society. Ran away from foster-home and was committed to the Reformatory. After being there some months it was decided to bring him to Toronto and study him a little. In a short time he ran away and was found on a farm some twenty miles off. Brought back again and looked after more closely, but he managed to run away again, and has doubtless found employment with some farmer in the country. Although decidedly lacking in intellect, he is shrewd and sharp in some things, particularly in concocting stories as to his name, history, etc., whenever closely questioned.

CASE No. 81.

This case affords a good illustration of how a young lad may be made a criminal without committing any serious offence, and it is not an isolated case either. When about fourteen this particular lad was committed by a well meaning magistrate to the Reformatory in order that he might get some education. He would not attend school, and his mother consented to his commitment on the understanding that he would get a fine education. He was in the Reformatory for nearly three years, and then owing to some infraction of the rules he was transferred to the Central Prison, where he had been for seven months. When the matter was brought to my attention, a visit was paid to him and he was found dressed in the regulation prison garb, with jail bird written all over him. Regretted to learn that there were some ten or fifteen other boys who had been transferred from the Reformatory to the Prison for attempting to run away—the most natural instinct in the world. As this boy had a number of respectable and well to do relatives he was taken out, provided with proper clothing, and by special request sent to an older brother.

Latest report—Six months have elapsed. Doing well; no complaint whatever. Steadily at work.

CASE No. 82.

This boy, seventeen years of age, was committed to the Reformatory from a northern city. His parents were both dead, and he had been wandering from place to place. Got into considerable trouble through his precarious mode of life. At the Reformatory, he with a number of other boys, tried to escape, for which he was transferred to the Central Prison. Finding that his conduct there had been excellent it was decided to take him out, as his original sentence had over two years and a half to run.

Lad expressed gratitude for this consideration and went to work the following week Has been doing well so far and states that he is studying at night and intends to make a good deal of sacrifice to get an education.

Latest report—Has left the city without saying anything as to his intentions Nothing heard of him since.

Case No. 83.

A nine year old boy. Was committed to the Reformatory for four years for house-breaking and theft. Had been neglected by his parents and had got in with some older boys, who led him into all sorts of mischief. Took charge of this little fellow, and after considerable correspondence arranged to place him under the guardianship of an uncle who was a well to do farmer. Has been no trouble since that time.

Case No. 84.

An eleven year old boy, brother to the preceding lad. Also committed to four years in the Reformatory on a charge of house-breaking. Not naturally a bad boy; simply neglected by his parents, who seemed to have no proper control of him. Found that the boy was suffering from the results of an accident some months previous. Placed him in the Children's Hospital for treatment, and after a considerable stay there arranged for him to go to a well to do relative who agreed to become responsible for him. Do not anticipate any trouble in the future.

Case No. 85.

This boy, twelve years of age, was sentenced to four years in the Reformatory for petty thefts, etc. Father had deserted family years before and was supposed to be dead. Mother was working out and unable to properly educate or look after the boy, with the result that he got into bad company, or rather assisted to create bad company among other boys situated similarly to himself. Instead of allowing him to go to the Reformatory placed him in the Children's Shelter, and found him to be a willing, obedient lad. Had never known what proper home treatment was. Is now in a country home and has been doing well.

Case No. 86.

This boy of thirteen was committed to the Reformatory for five years for theft and general waywardness. In response to urgent requests from prominent citizens who knew the circumstances, placed the lad in the Children's Shelter instead of allowing him to go on to the Reformatory. Asked him what his ambition in life was, and he replied with evident earnestness that he wished to be a Presbyterian minister. His mother being dead and father married again, his home life was not congenial, and a change of environment was what he needed more than anything else. After a short time placed him with a well known and highly respected farmer, who promised to take a special interest in him, and during the past year the boy has behaved himself in a satisfactory manner.

Case No. 87.

Boy of twelve, committed to the Reformatory for five years largely at the request of father, who charged him with all sorts of offences. The real trouble was that the boy's mother was dead and step-mother did not want him around. Instead of allowing this boy to go on to the Reformatory, sent him to the Children's Shelter, and found him a bright, well intentioned boy, but unable to read or write. Placed him in a farm home where the young ladies of the family agreed to supervise his education, with the result that he is now a good scholar, and is making excellent progress in every way. As in the case of a good many other of these lads there was absolutely no necessity for him to go to a reformatory, his one great need being a home where he would be understood and appreciated.

Case No. 88.

A ten year old boy, committed to the Reformatory for five years because homeless and neglected, and the local municipality unwilling to pay for his board or otherwise help him. Was placed in the Industrial School for a short time instead and afterwards sent to a farm home in the country, where he has remained steadily to the present time.

A Record to be Proud of.

Anyone who follows the foregoing records carefully will agree that these unfortunate boys, so heavily handicapped, have done remarkably well and that they have loyally adhered to their promise to live down the past and show they could be trusted. Personally I regard the part I have had in bringing about these results as the greatest pleasure of life. There has been hard work and keen anxiety and solicitude, but it has all been amply repaid by the gratitude and worthy conduct of the boys in whose behalf the enterprise was entered upon. There has been hearty co-operation on the part of Mr. and Mrs. Cunningham, my office staff, agents of Children's Aid Societies and those also who gave the boys homes and encouragement.

Inspector Noxon's Co-operation.

And in speaking of the co-operation of officials it is only right to say that Mr. James Noxon, as Government Inspector, both of the Reformatory and the Central Prison, gave the scheme his hearty endorsation, and smoothed away many difficulties that otherwise might have been insurmountable, officially and privately. He could always be relied upon for any needed assistance.

Advantage of Sending Boys to the Country.

It will be observed that in the majority of instances homes were found for the boys in farming districts, and that has been decidedly beneficial. In the first place it "broke up the gang" and it removed the lads from the bad associations that led to wrongdoing. The life of the country is essentially industrious, outdoor occupation builds up the constitution, and the home offers them social and moral privileges that cannot be obtained in large cities. All these influences had been lacking hitherto, and many of the boys were quick to appreciate and enjoy them. The good effect on character has been most noticeable, and is sure to be permanent in its results even though the boys may not remain for any length of time on the farm.

Saved by Separation.

In finding homes and situations the boys were widely scattered and care was taken that they should not know each other's address. To this day the great majority have not the slightest knowledge of where their former companions are located. Undoubtedly had the boys been able to get together they would have defied restraint and have resisted good influences. But sent entirely among strangers, with nothing to remind them of the past, they adjusted themselves quickly to new conditions and were much more amenable to kindly direction and control. If the young lads now sent to reform schools could be dealt with in this manner there would not only be a great saving of public funds, but the percentage of failures would be materially reduced.

Discouragements.

It is a curious fact that nearly all the discouragements in this undertaking came from officials whose business it is to deal with criminals. Constant association with the derelicts of society evidently made them thoroughly pessimistic, for whenever consulted they shook their heads doubtfully, if they did not openly condemn the experiment as folly. "The young devils," remarked one officer, who has for a quarter of a century been engaged in the the work of convicting criminals: "I would keep them locked up to the last day of their sentence." While others did not speak out so strongly their general attitude was in harmony with the idea. Punishment and the vindication of the law were cardinal principles with them, and they had very little faith in the proposed method of solving the criminal problem.

Keep Boys Under Normal Conditions.

It should always be remembered by philanthropic workers that however good the intention may be in sending him there, it is almost invariably injurious to a boy later in life to have been in a reform school. It frequently renders it impossible for him to attain to a position of trust, and it often shuts him out from getting a situation of any kind, where the fact is known. The suspicion and coldness with which these reform school graduates are received has driven many a well-disposed youth to fall back upon reform school acquaintances who like himself had been spurned and had entered upon a lawless life. And who, knowing the friendlessness of their position could blame them? Some have not only been refused work and taunted with their record, but have actually been hindered when they desired to do right. The mother of a notorious young criminal when asked how it was that her son had taken up such a career, replied: "Well, sir, when he was a boy he was sent to the reformatory. After he came out he promised to do all right, but every time anything was stolen in our neighborhood the detectives came and searched the house, the boy was thrown out of work by these suspicions, and at last he said it was no use trying to keep straight." It is an undoubted fact that many of these lads felt they were unjustly treated by society and that they were justified in waging a warfare of crime. This feeling, with the newspaper notoriety given them, has inspired many youths not only to continue in crime, but to plot bigger and more sensational things than had ever been attempted. And the logic of it all is, keep the youth of our country in normal surroundings so that they may not be thus handicapped, or have any incentive to a criminal career

Gain the Lad's Sympathy and Goodwill.

There is only one way of reforming a boy and that is by securing his friendship, his goodwill, his co-operation. To reform a boy who is determined not to be reformed is about as impossible as attempting to drive

water up a hill. He may be kept for months or for years in the institution and go through prescribed routine with apparent obedience and yet at the end of it all come out a far worse boy than when he entered. But get into friendly, sympathetic relationship with the same boy, learn his wishes and aspirations, at the right psychological moment place him out amid good surroundings, show that you trust and believe in him, visit and encourage him from time to time, and if he fails to respond you can put it down that he is deficient and that his proper place is in the asylum for the feeble-minded. Normal boys like to be regarded as rational human beings and they have a great depth of loyalty for the man who knows how to treat them right and to rely upon their honor.

This report is sent out in the hope that it may exercise a widespread educational influence. Friends reading it can help by passing it on to others, and possibly by giving a share of their time and means to this cause. If good people everywhere would direct their attention more than ever before to this neglected class of children there are illimitable opportunities for effective social service—service that will tell, not only in young lives saved to happy and useful careers, but, in the greater safety of the community from crime, and in greater economy in the administration of public institutions.

PREFACE ..... v.

SCHEDULE A.—Shewing the Licenses issued, extended, transferred or removed, and the Revenue received by the Province therefrom in 1901, 1902 and 1903 (by Districts) 2

SCHEDULE B.—Comparative statement of the number of Licenses issued from 1874 to 1903 inclusive (by Counties and Cities) and total in the Province 6

SCHEDULE C.—Statement in detail of Licenses issued, extended, transferred or removed in the Municipalities, the amounts paid to such Municipalities and amounts imposed by by-laws of Municipalities for 1901-1902, 1902-1903 and 1903 1904 (by Cities, Towns, Incorporated Villages and Townships) 32

SCHEDULE D.—Amount of fines collected, and amounts paid for expenses of Commissioners and Salaries of Inspectors in 1901-1902, 1902-1903 and 1903-1904 122

SCHEDULE E.—Statement of Sundry Expenses 125

Recapitulation of Receipts and Expenditures, 1901-1902, 1902-1903 and 1903-1904 128

SCHEDULE F.—Comparative Statement of Commitments for Drunkenness in the County Gaols from 1876 to 1904 inclusive 129

SCHEDULE G.—Statutory Fees and Duties payable for Wholesale, Tavern and Shop Licenses 131

SCHEDULE H.—Names of Municipalities in which Local Option By-Laws are in force in License Year 1905-6, and votes polled 132

SCHEDULE I.—Statement showing prosecutions under The Liquor License Act in the License year 1903-1904, and the result thereof 134

SCHEDULE K.—Names and Addresses of Inspectors for each License District 137

LICENSE REPORT.

PROVINCIAL SECRETARY'S OFFICE,

LICENSE BRANCH,

TORONTO, 1ST MARCH, 1905.

To the Honourable WILLIAM MORTIMER CLARK,

Lieutenant-Governor of the Province of Ontario.

MAY IT PLEASE YOUR HONOR:

I have the honor to submit the Twenty-ninth Annual Report, and accompanying Schedules, representing the operation of the Liquor License Laws.

NUMBER OF LICENSES.

Schedule A is a comparative statement of the number of Licenses of the various denominations issued, and of the number extended, transferred or removed in each of the License Districts of the Province during the past three license years, and may be thus summarized:

Years.	Licenses.							Extensions, transfers and removals of licenses.			
	Tavern.				Shop.	Wholesale.	Total.				
	Yearly.		Six months.								
	Ordinary.	Beer and wine.	Ordinary.	Beer and wine.				Extensions.	Transfers.	Removals.	Total.
1901-2	2,577	36	57	10	308	26	3,014	15	278	13	306
1902-3	2,593	35	53	13	307	22	3,023	23	491	18	532
1903-4	2,548	29	65	10	300	22	2,974	46	524	11	581

Provincial Revenue.

The same schedule shows the Revenue derived by the Province from Licenses and Fines to have been for

1901-2	$301,369 17
1902-3	304,789 59
1903-4	304,677 70

Licenses in Counties and Cities.

Schedule B is a Statement of the number of Licenses issued in the several Counties and Cities during the past thirty years.

Licenses in Minor Municipalities.

Schedule C gives in detail as regards each City, Town, Incorporated Village and Township, and the Unorganized Territory of the Province, the number of Licenses, and of extensions, transfers and removals granted during the past three years.

Total Collections.

This Schedule also gives the amounts collected on account of Licenses and Fines, including the sums imposed by municipal by-laws, the totals of which were as follows:

1901-2	$627,852 22
1902-3	644,095 94
1903-4	649,412 90

Municipal Revenue.

The payments to the Municipalities are shown by the same Schedule to have been in

1901-2	$245 477 65
1902-3	250,229 76
1903-4	257,866 64

The amounts imposed in each Municipality by by-laws, in excess of statutory duties, are also given in this Schedule.

Fines.

The fines collected during the past year, as shown by Schedule D, amounted to $20,465.00, as compared with $16,559.00 in 1902-3.

Salaries of Inspectors—Expenses of Commissioners.

The payments under these heads are also shown in Schedule D.

Miscellaneous Expenditure.

Schedule E shows the expenditure of enforcing the Act in the several districts other than those included in Schedule D, consisting of office rent, postage, stationery, printing, advertising, magistrates, constables, witness, counsel and detective fees, etc., etc.

Commitments for Drunkenness.

Schedule F shows the number of Prisoners committed for drunkenness during the years from 1876 to 1904 inclusive. The number committed during the year 1904, as compared with 1903, shows an increase of 603.

The average yearly commitments for each period for five years from 1876 to 1900 inclusive are as follows:

From 1876 to 1880 inclusive	.....	3,812
1881 to 1885 "	.....	4,016
1886 to 1890 "	.....	4,311
1891 to 1895 "	.....	2,703
1896 to 1900 "	.....	1,920

The names of Municipalities in which Local Option By-laws are in force, and detailed statements showing the vote polled are given in Schedule H.

A statement showing the number of prosecutions under the Act and the result thereof will be found in Schedule I.

The statutory duties payable for wholesale, tavern and shop licenses, are set out in Schedule G.

The names and post office addresses of Inspectors of Licenses are set out in Schedule K.

Special Inspection of License Districts.

The special inspection of the License Districts, and the examination of the work of the license officials therein, from time to time, have been continued during the past year.

Respectfully submitted.

W. J. HANNA.

Provincial Secretary.

SCHEDULE.

SCHEDULE A.

The six Months' Licenses and the Licenses *extended* do not appear in the above Schedule or recapitulation, and as a consequence the total number of Licenses issued, according to the Statement, does not correspond with the number as shown in Schedules A and C. Beer and Wine Licenses are included with the ordinary licenses, under the heads of Tavern Licenses and Vessel Licenses respectively. An *extended* License is good for a period not exceeding three months. It is not in the nature of a new License, but simply a permission, granted by the Board of Commissioners, to the holder of a license expiring in April, to continue his business under the old license for the specified period, that he may be able to dispose of his stock on hand and quit the business without loss. Six Months' Licenses run from the first day of May to the thirty-first day of October, and are not valid after the latter date. They are granted to localities which are largely restored to in summer by visitors, where the Board of Commissioners are of the opinion that increased tavern accommodation for the summer months is necessary.

SCHEDULE C.

SCHEDULE C.

COMPARATIVE STATEMENT BY MUNICIPALITIES, showing the number of Provincial Licenses, whether Ordinary or Beer and Wine, issued, and the number extended, transferred or removed, the gross sums deposited to the credit of the License Fund Accounts therefor, and for fines, the amount imposed by municipal by-laws for licenses in excess of statutory duties, for 1901-2, 1902-3, 1903-4, and the revenue paid over to the municipal treasurers during the license years 1901-2, 1902-3, and 1903-4.

Eighth Annual Report

OF THE

Provincial Municipal Auditor

1904

PRINTED BY ORDER OF
THE LEGISLATIVE ASSEMBLY OF ONTARIO.

TORONTO:
Printed and Published by L. K CAMERON, Printer to the King's Most Excellent Majesty.
1905.

EIGHTH ANNUAL REPORT

OF THE

Provincial Municipal Auditor

1904.

PARLIAMENT BUILDINGS, TORONTO.
31st December, 1904.

To the Honourable F. R. LATCHFORD, K. C., M.P.P.
Attorney-General for Ontario.

SIR,—I have the honour to submit to you herewith the eighth annual report of the Department of the Provincial Municipal Auditor.

There were no uncompleted audits carried forward from 1903 and this year's work commenced with a clean sheet.

During the year 1904, the following municipalities petitioned the Lieutenant Governor in Council for audits under the Act therein made and provided, viz.:

Town of Midland.
Town of Smith's Falls.
Township of Russell.
Township of Tilbury West.
Township of Tilbury East.
Village of Point Edward.
Township of Enniskillen.
Township of Wainfleet.
Township of North Tilbury.
Town of Essex.
Township of Caledon.
Township of Ferris.

Some of these audits are not yet completed. Those that are finished, I have thought it best to print "in extenso" and attach to this report, except in the case of the village of Point Edward, of which I have given an abstract account.

The following Audits are those remaining but will be finished in a short time. They are in the hands of F. H. Macpherson, F.C.A., of Windsor, Ont.

Township of Tilbury East.
Township of Tilbury North.
Town of Essex.

The following examinations and inspections of the books of the municipalities throughout the Province have been made this year (1904):

JANUARY.

Town of Petrolia, County of Lambton.

The assessment of this town amounted at date of my visit to about $1,300,000. The total receipts for 1903 were $78.412.00 and payments $89.295.49, showing an overdraft by the corporation on their banker of $10.883.49. Collector's roll about $40,000.00, seventy-five per cent of which was paid when I was there. Tax rate 26 mills. I found the Treasurer's books correct and well kept. He receives $250 per annum, and has been in office about two and a half years. Assets $292,941.48, liabilities $223,761.12.

Township of Enniskillen, County of Lambton.

An audit by F. H. Macpherson, F.C.A., in accordance with a petition, has just been concluded and is very satisfactory. See report attached.

Township of London, County of Middlesex.

The assessment roll of this township was $4,199.325.00, collector's roll for this year $36,874.23. Tax rate 6 and five-tenths mills without school rates or nine mills average including these. There are no debentures due by the township. Total receipts for 1903, $55,596.41, and payments $39,747.54. Treasurer acts as Clerk also and receives $800, per annum. Books correct and well kept. Balance in banks $15,848.87.

MARCH.

Township of Ekfrid, County of Middlesex.

Total receipts for 1903, ...	$20,717.68
Total payments for 1903, ...	19,462.18

Showing a balance in bank of $1,255.50. Assessment roll, $2,012,300. Collector's roll $18, 575.55, nearly all paid. Books poorly kept. Treasurer over 80 years of age. Tax rate 7 mills without schools. About $3,000 owing on debentures.

Town of Strathroy, County of Middlesex.

Total receipts for 1903, ...	$73,221.99
Total payments for 1903	$73,759.73
Overdraft Trader's Bank, Strathroy.	537.74

Total assessment of municipality $943.459. Collector's roll for 1903, $21,103.16, all paid except $270.92. Tax rate 21 mills. Treasurer receives $185 for keeping town books, also public school books, which is too little. Assets $116.515.50. Liabilities $110.723.47. Treasurer keeps books only fairly well but does not get much encouragement to do better. An audit by some outside accountant would do good.

Village of Newbury, County of Middlesex.

Assessed value of village $65,000. Tax rate 16 mills, collector's roll $1,045.43, mostly paid. Assets, including schools, $6,387.76. Liabilities, $2,657.

Treasurer does not keep books well or does he get much encouragement, only $15 per annum, and has to provide two sureties for $1,500.

Township of Mosa, County of Middlesex.

Total assessment of township $583.395.00. Tax rate 16½ mills without school rates. Total receipts $20,569.78. Total payments $19,033.72, leaving a balance of $1,536.06 in Traders Bank, Glencoe. Collector's roll $14,293.53, fairly well paid up. Assets $9,088.06, liabilities $11,020.18. Treasurer gets $120 per annum and has been in office 10 years. Books well kept.

Village of Glencoe, County of Middlesex.

Total receipts for 1903, $9,992.69. Total payments for 1903, $9,892.40. Balance $100.29. Total assessment $307,435, collector's roll $6,173.02, nearly all paid. Tax rate 20 mills on the dollar, total assets $20,929.55. Total liabilities $11,205.26. Treasurer gets $50 per annum. Books well kept.

Township of Lobo, County of Middlesex.

The assessment of this municipality foots up $1,754,855. The collector's roll amounts to $16,300.16, all practically paid. Tax rate four mills without school rates or eight mills, inclusive of them. Total receipts $30,568.57. Payments $20,062.65 leaving a balance of $10,505.92 mostly in Molsons Bank, London. Treasurer keeps his books fairly well. He gets a salary of $120. There is only one debenture outstanding amounting to $2,640.73 for a school.

Township of Adelaide, County of Middlesex.

The total receipts for 1903 were $18,014.81, the total payments for 1903 were $12,409.99, leaving a balance of $5,604.82 in Bank of Commerce, Strathroy. Assessment for year was $1,512,225. Tax rate 5.33 mills on the dollar without school rates. Treasurer receives $100 per annum. He cannot be said to keep his books very well. Collector's roll for 1903, $11,017.46, all paid except $27.20. Total assets $7,397.02, total liabilities, $4,509.91.

Township of Caradoc, County of Middlesex.

Total assessment for 1903 was $1,214.860. Tax rate 10½ mills without school rates. Collector's roll $20,558.41, paid in full excepting $8.54. Total receipts for 1903 were $32,511.84. Total payments $24,809,34, leaving a balance of $7,702.50. Total assets $12,354.08. Total liabilities $13,055.88. Treasurer receives $115 per annum and has been in office 23 years.

Township of Delaware, County of Middlesex.

Total receipts for 1903 were $10,616.60. Total payments for 1903 were $9,377.04. Balance on hand $1,239.56. Assessment roll $591.175. Tax rate 9 mills without school rates, collector's roll, $8,561.23, all paid except about $100. Treasurer's salary $50 per annum. Total assets $6,374.31. Total liabilities, $4,210.30. Treasurer is not much of a book keeper but he appears to be accurate.

Township of Metcalfe, County of Middlesex.

Total receipts for 1903,	$19,877.77
Total payments for 1903	15,982,87
	.$3,894.90

$2,268.38 was in the Traders Bank Strathroy and the balance in the Treasurer's hands. The assessment of the township was $103,200. Tax rate 7½ mills without schools. No debentures unless one drainage one. Assets $5,851.83. Liabilities $3,301. Collector's roll for 1903 was $13,416.26, of which $1,036.76 remained unpaid at date of my visit. Treasurer's salary $70 per annum and has been in office 7 years.

Township of Westminster, County of Middlesex.

Total assessment of township $3,023,850. Tax rate 6 mills without school rates. Collector's roll, $26,302.83, all paid at date of my visit except $47.85 returned to County Treasurer. Practically no liabilities. Treasurer keeps books very well. He receives $200 per annum. Receipts for 1903, $40,793.16. Payments, $32,557.78, balance, $8,235.38, in Bank of Toronto, London. The county rate, $7,285.21, has to come off this balance.

Township of Biddulph, County of Middlesex.

This township was assessed in 1903 for $1,229,020. Tax rate was seven mills without school rates. Collector's roll $11,450.13, which was paid in full. Total receipts were $19,517.23. Payments, $16,263.64, showing a balance of $3,253.59, in Standard Bank of Canada, Lucan. The cash in the bank will meet the county rate and all other liabilities. Treasurer receives $55 per annum, has been in office fifteen years, and is an excellent officer.

Village of Lucan, County of Middlesex.

The total receipts of this municipality for 1903 were $10.234.40, and the payments $10,034.06, leaving a balance in the bank of $200.34. The village was assessed for $199,055.00, and the tax rate was 4½ mills, which yielded $4,898.29, practically all paid. The assets amount to $23,331.63, which includes $5,564.47, deposited in Merchants Bank for sinking fund, and the liabilities (nearly all debentures) to $18,077.61. The treasurer keeps the books thoroughly well and it is evidently a labor of love with him for he has done it for twenty-five years, only receives $20 per annum besides giving first-class security.

Township of West Williams, County of Middlesex.

The assessment of this township for 1903 was $889,080.00. The collector's roll, $8,861.38, all paid except about $5. Tax rate 6 7-10 mills without school rates. Total receipts for 1903 were $13,233.82. Total payments $10,201.90. Books are poorly kept and improvement is badly needed. Treasurer's salary $75, four years in office.

Town of Park Hill, County of Middlesex.

Total receipts for 1903 were $28,336.48, and payments $25,663.41, leaving a balance on hand and in bank of $2,673.07. The assessment of the

municipality was $370,842.00. Collector's roll $8,071.73, all paid except about $500. Tax rate 19 mills. Assets, $36,061. Liabilities, mostly debentures, $22,150.00. The treasurer receives $70 per annum and is careful and accurate in his work.

Township of East Williams, County of Middlesex.

The total receipts for 1903 were $17.377.73, and the payments $11,518.16 showing a balance in bank of $5,859.57. The assessment of the township amounted to $1,232,670.00. Collector's roll $11,528.18. Tax rates 6.02 mills without school rates. There are no debentures against the township or in fact any liability when the county rate $3,767.04 was paid in February. The treasurer keeps his books very well and receives a salary of $85 per annum. He has been in office five years.

Township of McGillivray, County of Middlesex.

Assessment of township for 1903 was $2,050,455.00. Collector's roll $16,273.35, paid in full. Tax rate 4 3-10 mills without school rates. Total receipts for 1903-4 were $20,054.20. Payments for 1903-4 were $17,908.95. Balance in bank and on hand $2,145.25. The liabilities consist of school debentures about $1,500. The treasurer does not keep his books well, and had only been in office six months when I saw him. He gets $100 per annum.

Township of West Nissouri, County of Middlesex

Total receipts for 1903 were $32,985.42, and payments $28,108.94, showing a balance on hand $962.09 and in bank $3,914.39. Assessment of municipality was $1,471,195.00. Collector's roll $18,023.89, practically all paid. Tax rate 9½ mill on dollar, without school rates. No liability except county rate, since paid, also Thorndale bridge contract, probably settled soon after my visit. Treasurer's books not well kept. He has been in office fifteen years and receives $75 per annum.

Township of North Dorchester, County of Middlesex

The total receipts of this township for 1903 were $25,193.87, and payments $23,125.66, leaving a balance in the bank of $2,068.21. The assessment of the township was $1,721,262.00. Collector's roll $18,646.71, all paid. Tax rates 7 mills without school rates. There are no debentures against the municipality. The treasurer acts as clerk also and receives a salary of $300 per annum. He keeps the township books fairly well.

County of Middlesex.

This municipality stands assessed for 1903 at $34,116,182.00. The county rates for 1903 were $71,956.40. Balance unpaid on 1st March was only $5,366.01. The tax rate was 2¼ mills. The total debenture debt at the date of my visit was $486,260.00. There is a sinking fund composed of the county's own debentures amounting to $67,660.00. The total receipts for 1903 were $172,981.69. The total payments $177,623.82, being an overdraft on the bank for $4,642.13. The treasurer receives a salary of $1,600.00, and has been in office 16 years. He is an excellent officer and everything in the office is in good shape.

Township of York, County of York.

The total receipts for 1903 were $102.594.10, and the payments $95,299.68, leaving a balance of $7,294.42 on hand and in bank. Total assess-

ment of Township $6,004,529.00. Tax rate 5.018 mills without school or local rates or statute labor. Debentures $78,528.45. The assets amounted to $138,199.46, and the liabilities to $137,624.00. Collector's roll 1903. $81,625.73. Balance due 1st January, 1904, $17,257.21. Treasurer's salary has averaged $2,000 since 1895. Books well kept. Also experienced auditors whose fee amounts to $200 each.

County of York.

Total receipts for 1903 were	$96,036 57
Total payments for 1903 were	74,739 93
	$21,296 64

consisting of cash on hand $298.42, and in Imperial Bank of Canada $20,998.22. Total assessment of County $26,030,975.00. County rates for 1903 $46,365.17, generally promptly paid. Tax rate about 1¾ mills on dollar. Treasurer's books well kept. Salary $1,200 per annum. Total assets, including county property, $196,126.12; liabilities $115,647.98.

Town of North Toronto.

Total receipts for 1903	$47,801 70
Total payments for 1903	50,916 19
Overdraft Bank of Commerce	$3,114 49

Total assessment of municipality, $873,530.00. Collector's roll for 1903, $18,319.78. Due on 1st January, 1904, $4,116.88. Tax rate 17½ mills on the dollar. Books well kept. Treasurer acts as clerk also and receives for the dual office $650 per annum. Total assets $133,505.25; liabilities. $101,636.13.

Town of East Toronto.

Total receipts for 1903	$43,010 09
Total payments for 1903	43,004 04
Balance	$6 05

Total assessment, $823.045.00. Collector's roll, 1903, $24,059.64, nearly all paid. Tax rate 25 mills on dollar. Treasurer acts as Clerk also and receives $700 per annum. His books are not as well kept as they might be. There is a sinking fund of $15.200.39, partly in cash and partly in town debentures. Total assets $104,298.18; total liabilities $103,938.01.

West Toronto Junction.

Total assessment of town $2,097,525.00. Exempts paying school rates, $484,615.

Total receipts for 1903	$118,251 27
Total payments for 1903	88,921 15
Balance	$ 29,330 12

in Molsons Bank, Toronto Junction. Collector's roll for 1903, $70,792.84. Unpaid on 31st March, $11,856.88. Tax rate, 30 mills on dollar. Total

assets $843,547.99 ; total liabilities $1,101,145.91 (mostly debentures). Treasurer keeps the town books very well and receives a salary of $900 per annum. He has been in office eight years.

Village of Weston, County of York.

Total receipts for 1903.....	$10,760 93
Total payments for 1903	9,598 52
	$ 1,162 41

In bank, $1,149.18; on hand, $13.23. Assessment of village, $309,090. Collector's roll for 1903, $7,739.01, all paid except $36.91. Rate, 25 mills. Treasurer acts as Clerk also. Salary, $150. In office three years. Assets. $32,629.96; liabilities, $17,282.82. Books fairly well kept.

APRIL.

Village of Port Colborne, County of Welland.

The receipts of this municipality for 1903 were $9,041.98, and the payments $9,224.87, showing an overdrawn bank account of $182.89 at the end of the year. The assessment of 1903 footed up $368,488.00. Collector's roll $5,606.52, which was all paid except $22.62. Tax rate, 15 mills. The assets comprise waterworks and cement walks, also schools, and amount to $46,000 in round figures; the liabilities, chiefly debentures given for these purposes, reach $45,000. Treasurer keeps correct accounts and will do better in time, having only been in office about a year.

Township of Humberstone, County of Welland.

Total receipts for 1903 were.....	$13,626 73
Total payments for 1903 were.....	12,466 65
Balance on hand and in bank.....	$ 1,160 08

Assessment of township footed up $899,750.00. Collector's roll $10,374.44. Paid within about $50. Tax rate 5 6-10 mills without school rates. Treasurer has been in office since 1887. He receives a salary of $80 per annum. Total assets of township, $7,927; total liabilities, mostly drainage debentures, $4,132.27.

Town of Niagara, County of Lincoln.

The assessment roll of 1903 calls for $555,570.00. Collector's roll, $12,168.54, of which about $1,200 remains to be paid. Tax rate 22 mills. Total receipts $25,279.71. Total payments $25,193.76. Total assets, which include waterworks and electric light plants, $84,325.88; total liabilities, $46,414.79. Treasurer keeps the town books very well, acting as Clerk also, and receives a salary of $600 per annum; in office five years.

Township of Wainfleet, County of Welland.

Total receipts for 1903 were	$18,786 61
Total payments for 1903 were.....	18,553 23

leaving a balance of $233.38 in treasurer's hands. The assessment roll footed up $899,380.00. Collector's roll $12,733.80, all paid except returns to county treasurer, $78.72. Tax rate 7 mills without school rates or special taxes. The liabilities, which consist mostly of drainage debentures, amount to $4,807.70, and the assets to $36,084.33, of which $21,000 consists of Town of Welland debentures, the interest of which is payable to township schools. Treasurer appears to be a careful officer and receives a salary of $75 per annum. He has held the position for 16 years. A Government audit was asked for in this township and was granted. The report of the auditor is attached herewith.

County of Welland.

The total assessment of this county amounted at the date of my visit to $9,691,525.00. The county rates to $27,816.55, of which there was $4,322.58 due on 1st of January, 1904. The county assets amount to $131,869.09, and the liabilities to $4,500, so that the county may be said to be practically out of debt. The tax rate levied is 2½ mills on the dollar. The treasurer is a careful competent officer, and has occupied his present position about three years. His salary is only $600.00, and commissions probably $50 per annum.

MAY.

Town of Goderich, County of Huron.

The total receipts for 1903 were $147,612.01, and the payments $144,256.43, leaving a balance on hand and in bank of $3,365.48. The collector's roll was $31,519.92, of which at the date of my visit there was about $1,000 still due. Tax rate 25 mills. The assets of the town were $268,398.85, and he liabilities $236,181.49. The treasurer receives $540 per annum, and is a capable official. He has been in office 14 years. For the last few years the ratepayers seem to have made a determined effort to improve the financial rpospects of the town and they appear to have succeeded to some extent. Total assessment of town, $1,396,330.00.

Township of Colborne, County of Huron.

Total receipts of 1903 were $10,277.19, and payments $9,561.03, leaving a balance in treasurer's hands of $716.16. Assessment of township footed up $1,084,950.00. Collector's roll, $9,252.69, mostly paid. Tax rate about 8½ mills on the dollar, inclusive of schools. Assets $3,968.85: liabilities, $1,863.30. Treasurer keeps his books fairly well; receives $70 per annum and has been in office three years.

Town of Clinton, County of Huron.

This town was assessed for 1903 at $628,622.00. Total receipts $30,461.97, and payments $19,620.36, leaving a balance in Molsons Bank. Clinton, of $10,841.61. Collector's roll, $15,815.22, nearly all paid. Tax rate 23 mills. Assets, $92,271.92; liabilities, $76,582.24, nearly all debentures, against which there is a sinking fund of $16,437.60. The treasurer is a new appointment, but promises to do well. Salary $100 per annum.

Township of Tuckersmith, County of Huron.

Total receipts for 1903.....	$16,411 86
Total payments for 1903...	13,851 22
Leaving in bank and on hand.....	$ 2,560 64

The assessment of the township equalized was $1,923,214.00. Collector's roll $11,809.70, all paid except $25.36. Tax rate about 4 mills on the dollar, without school rates. The assets, comprising some $17,000, invested in mortgages for school purposes, amount to $19,946.99; and the liabilities to $3,054.57, all debentures. The treasurer is a good officer, has been in the position three years, and receives $100 per annum.

Township of Ashfield, County of Huron.

Total receipts for 1903.....	$14,802 94
Total payments for 1903.....	14,541 55
Balance.....	$ 261 39

Total assessment of township, $1,679,600.00. Tax rate 4 3-10 mills, not including schools. Collector's roll $14,484.14, all paid except $223.21. Total assets, $6,600.94; liabilities, $4,853.88. Treasurer's salary $90 per annum; in office three years.

Township of West Wawanosh, County of Huron.

Assessment of township for 1903 was $1,428,100, equalized. Collector's roll, $8,950.61, paid in full. Tax rate 3½ mills without school rates. Total assets, $3,025.78; liabilities, $3,928.04. Treasurer has been in office 17 years and receives a salary of $90 per annum. Total receipts, $11,883.14. Payments, $10,619.77. Balance, $1,263.37 on hand.

County of Huron.

Total receipts for 1903 were $79,652.95 ; total payments, $72,856.34, leaving a balance of $6,796.61 in Canadian Bank of Commerce, Goderich. The total equalized and assessed value of the county was $32,301,290.00. The county rates $43,068.31, nearly all paid at the date of my visit. The county liability consists of one sterling debenture (due 1916) of £15,000 sterling, against which the county holds a sinking fund in cash and securities, $33,613.29. The treasurer has been 20 years in office and receives a salary of $1,350 per annum. The county books I found accurate and well kept.

Township of Morris, County of Huron.

The total receipts for 1903 were $19,365.80; total payments $15,687.55: balance on hand and in bank $3,678.25. Assessment of township $1,827,116. Collector's roll $10,952.98: paid in full. Tax rate 2 6-10 mills without school rates. Assets, $5,431.23; liabilities, $8,395.58. The treasurer's books are well kept, and he gets a salary of $100 per annum and has been in office 14 years.

Village of Blyth, County of Huron.

The assessment of this municipality for 1903 was $230,300.00. Collector's roll, $4,902.14, all paid except $41.19, returned to county treasurer. Tax rate 18 mills on dollar. The receipts for the year were $10,030.45, and the payments $8,424.27, leaving a balance of $1,606.18 on hand and in bank. The treasurer keeps the village books very well, receives a salary of $40 per annum and has been in office eight years. Total assets $30,809.42; total liabilities, $26,848.53.

Town of Seaforth, County of Huron.

Total receipts for 1903	$44,125 77
Total payments for 1903	43,007 09
Balance in bank and on hand	$ 1,118 68

Total assessment of town $618,350.00. Collector's roll, $16,589.85. all paid except $372.77. Tax rate 25 mills. Total assets $51,130.21; liabilities (debentures) $82,178.43. The treasurer has been in office since 1879. I found his books correct. His salary is $125 per annum. There is a sinking fund account in cash and securities of $22,055.13.

Township of Hay, County of Huron.

The assessment of this township for 1903 amounted to $1,833,060.00. The collector's roll to $17,757.02, practically all paid. Tax rate 4 1-10 mills. excluding school rates. Total receipts for year, $23,267.91; total payments. $22,354.86, leaving a balance of $913.05 in the bank. The treasurer's books are well kept and he has occupied the position for three years, receiving therefor the sum of $90 annually. The assets of the township are $4,378.33. and the liabilities $1,391.09.

Township of Grey, County of Huron.

The total receipts for 1903 were	$17,553 16
The total payments for 1903 were	16,806 40
Balance in Standard Bank, Brussels	$ 746 76

Total assessment of township, $1,788,900. Collector's roll $15,675.70, all paid. Tax rate 3 9-10 mills without drainage or school rates. Total current assets, $20,591; liabilities, $42,580.02. On the 31st December, 1903. there was deposited in the Standard Bank of Canada, Brussels, the sum of $15,214.73 to the credit of the drainage account of the Township of Grey in addition to the sums mentioned above. No entry of monies connected with the drainage accounts appears in the treasurer's regular cash book. I strongly advised an audit for say five years, the drainage accounts not having been properly kept and they are now in confusion. The treasurer has been in office 20 years and receives a salary of $95 per annum. He is a very worthy man and I have no doubt honest in his intentions, but there should be an audit without delay or the township will suffer loss.

Township of Stephen, County of Huron.

Total receipts for 1903	$17,667 63
Total payments for 1903	17,608 56

leaving a balance of $59.07 in treasurer's hands. The township was assessed for $1,808,320.00. Collector's roll, $15,170.73, paid in full. Tax rate 3.45 mills without school rates. There are no liabilities in debentures or otherwise. Treasurer has been in office since 1888 and keeps his books fairly well. He has a salary of $90 per annum.

Township of Usborne, County of Huron.

Total assessment of township $1,822,850.00. Collector's roll, $12,595.72, paid in full. Tax rate 4 mills on dollar, without school rates.

Total receipts for 1903	$17,481 42
Total payments for 1903	13,074 45
	$ 4,406 97

$3,712.64 in Molsons Bank, Exeter, balance on hand. There are no liabilities after paying the county rate, $2,685, and $120 sundries. Treasurer has been in office eight years and keeps his books accurately. His salary is $80 per annum.

Township of Turnberry, County of Huron.

The receipts for 1903 were	$9,441 39
The payments for 1903 were	7,356 44
	$2,084 95

Balance in Bank of Hamilton, Wingham. Total assessment of township $1,517,735.00. Collector's roll, $7,585.91, all paid. Tax rate 3 mills on dollar, without school rates. Assets, $3,075.64 ; liabilities, $1,628.73. Treasurer has been in office 20 years and receives $100 per annum, which he deserves.

Township of Stanley, County of Huron.

Total receipts for 1903	$17,641 28
Total payments for 1903	16,636 39
Balance on hand and in bank	$ 1,004 89

Total assessment of township, $1,668,200.00. Tax rate, 2 3-10 mills. without school rates. Collector's roll, $11,648.44; all paid except $22.97. The assets are $3,020.86, with no liabilities. Treasurer has been in office 25 years, and gets a salary of $75 per annum. Books fairly well kept.

Township of McKillop, County of Huron.

Assessment of township, $2,018,800.00. Collector's roll for 1903. $14,679.64, paid in full. Tax rate 4 5-8 mills, without school rates. Total receipts for 1903 $21,396.32. Total payments $17,179.37, leaving a balance in bank and on hand of $4,216.95. Assets amount to $32,702.81; liabilities to $12,742.16. Treasurer has been in office five years and receives a salary of $80 per annum.

Township of Hullett, County of Huron.

Total receipts for 1903.....	$18,876 86
Total payments for 1903.....	17,147 06
Balance in Bank of Hamilton, Blyth	$ 1,729 80

Total assesment of municipality, $1,908,420.00. Collector's roll. $15,753.85. All paid except $7.41. Tax rate 4 5-10 mills without school rates. Assets consist of town hall and the above amount in cash, and liabilities amount to $5,535.45, all drainage debentures. Treasurer has been in office 15 years and receives a salary of $275 per annum as clerk and treasurer.

Township of East Wawanosh, County of Huron.

Total receipts for 1903.....	$11,220 61
Total payments for 1903.....	8,946 84
	$ 2,273 77

in Dominion Bank, Wingham. Total assessment of township, $1,449,800.00. Collector's roll, $7,766.74; all paid. Tax rate 2 6-10 mills on dollar. There were no liabilities. Treasurer has been in office since 1885. He keeps his books well. Salary $80 per annum.

Township of Puslinch, County of Wellington.

The assessment of this municipality amounts to $1,459,340.00 for 1903. Collector's roll $12,724.37, paid in full. Tax rate 5 mills on dollar, without school rates. Receipts for 1903 were $16,222.88, and payments $12,469.06, leaving a balance of $3,753.82, which pays the county rate, the sole liability. and $716.12 over. Treasurer keeps his accounts very well, has been in office 10 years and gets $110 per annum.

Village of Erin, County of Wellington.

The total receipts for 1903 were.....	$2,618 76
The total payments for 1903 were.....	2,588 91
Balance in treasurer's hands.....	$ 29 85

Total assessment of village, $112,275.00. Collector's roll, $1,664.15. all paid except $8.35. There are no liabilities and the only asset mentioned is a town hall, valued at $1,000. Treasurer's salary $10 per annum; in office three years.

Township of Guelph, County of Wellington.

The assessment roll of this township amounts to $1,524,150.00. Collector's roll, $10,746.63, all paid. Tax rate 4½ mills, without school rates, Assets, $8,506.63; liabilities, $6,817.01. Treasurer, who acts as clerk, receives a salary of $100 per annum and has been in office since 1888. His books are fairly well kept.

Township of Maryborough, County of Wellington.

Total receipts or 1903 were $24,566.57, and payments $22,196.27, leaving a balance on hand and in bank of $2,370.30. The township is assessed for $1,753,180.00. Collector's roll, $18,267.05, paid in full. Tax rate 5 4-10 mills, without school rates. Assets, $4,250.96; liabilities, $6,760.46. Treasurer is a careful officer and receives a salary of $75 per annum, which might be increased.

Township of Eramosa, County of Wellington.

Total receipts for 1903 were $13,644.62, and payments $12,979.53, leaving a balance of $665 in the bank. Assessment of township $1,848,005.00. Collector's roll $12,135.71, paid in full at the date of my visit, except about $100.00. Tax rate 4½ mills without school rates. Assets $8,612.25. Liabilities $7,111.57. Treasurer acts as clerk also and receives a salary of $265. He is an excellent official.

Township of Erin, County of Wellington.

Total assessment of township $2,022,575.00. Collector's roll $14,161.75. of which the sum of $1,202.64 was due at date of my visit. Tax rate 3 mills without school rates. Total receipts for 1903 $16,296.63. Payments $15,978.06, leaving a balance in treasurer's hands of $318.57. Assets $2,932.88. Liabilities $543.21. Treasurer has been in office 17 years and receives a salary of $90 per annum

Village of Fergus, County of Wellington.

Total receipts for 1903 $14,877.95. Total payments for 1903 $13,900.39, being a balance in bank and cash on hand of $977.56. The village assessment was $445,045.00, and the collector's roll $9,289.14, all paid except about $40, remitted by council. Tax rate 20½ mills on the $. The assets of the municipality were $31,382.59, and the liabilities (all debentures) $6,312.61. The treasurer acts as clerk also and receives a salary of $250 for the dual office, and $35 additional for keeping the school books. He does his work well and may be considered the Nestor of municipal officers as he has been in office for 42 years.

County of Wellington.

The revised assessment of the county for 1903 was $27,632,817.00. Tax rate 1.66 mills on the dollar. County rate $45,870.48, paid in full. Receipts for 1903, $83,305.23. Payments $71,068.55. Balance in Traders Bank of Canada, Guelph, $12,236.68. Total assets, $128,968.80. Liabilities $38,169.04. Treasurer has been in office 36 years and receives a salary of $1,200 per annum. The county books are not kept in accordance with the modern ideas of book-keeping, but I find them accurate, and as the treasurer is not far from 80, I am reluctant at this time to insist on a change.

City of Guelph, County of Wellington.

Total assessments for 1903, $4,119,000, of which there were exemptions to the amount of $165,000. Collector's roll $85,813.83, of which there was uncollected on 1st April $3,169.63. Tax rate 20½ mills on the $. Total receipts for 1903, $777,278.44. Total payments for 1903, $777,121.97.

Balance in Canadian Bank of Commerce, Guelph, $156.47. Total assets, including water works, city buildings, school parks, Guelph Junction Railway stock and bonds, local improvements, Electric Light and Power Company, $1,098,269.68. Total liabilities, chiefly debentures, $872,994.65. Sinking funds, mostly invested in city debentures, $139,584.70. Treasurer is an able and experienced officer and I found his books correct. He gets a salary of $1,000 per annum.

Township of Nichol, County of Wellington.

Total receipts for 1903, $8,938.66. Total payments for 1903, $7,890.61. Balance in bank and on hand $1,048.05. Total assessment of township $1,323,545.00. Collector's roll $7,330.77. All paid except $110. Tax rate 2 7-10 mills on $, without school rates. Total assets $4,755.70. Liabilities $5,246.25. Treasurer keeps books well. Salary $75 per annum, 2 years in office.

Village of Elora, County of Wellington.

This municipality was assessed for 1903 at $299,640.00. Collector's roll $7,342.97, practically paid in full. Tax rate 24 mills. Total receipts for 1903, $11,247.91. Total payments $8,740.10. Balance in Merchants Bank of Canada, Elora, $2,507.81. Assets $20,274.60. Liabilities $15,094. Treasurer acts as clerk also, receiving for the dual office $75 per annum, which is much too little. Has occupied the position for 5 years.

Township of West Garafraxa, County of Wellington.

Total receipts for 1903, $15,409.90. Total payments for 1903, $14,975.62. Balance on hand and in bank $434.28. Total assessment of township $1,684,810.00. Collector's roll $12,759.24, paid. Tax rate 4½ mills on $, without school rates. Assets $9,109.70. Liabilities $7,861.13. Treasurer has been in office 12 years and receives a salary of $90 per annum.

Town of Mount Forest, County of Wellington.

Total assessment of municipality $684,575. Collector's roll $20,999.38, all paid except $57.61. Tax rate 29 mills on dollar. Total receipts for year, $170,053.15. Total payments $168,543.58, leaving a balance in Ontario Bank of $1,509.57. Treasurer's books are well kept. He has been in office since 1897 and receives a salary of $100 per annum.

JUNE.

Town of Palmerston, County of Wellington.

Total receipts for 1903 were $29,655.17, and payments $29,036.38, leaving a balance of $618.79 in Bank of Hamilton, Palmerston. Total assessment of municipality $467,655.00. Collector's roll $12,612.63, paid to within $50. Tax rate 25 mills. Total assets $50,602.29. Total liabilities $97,603.73. Treasurer gets $100 per annum and is a careful officer. In office since 1896.

Village of Clifford, County of Wellington.

Total assessment of municipality is $129,585. Collector's roll $1,781.40.

(Tax rate 13½ mills) which was paid in full. Total receipts for 1903, $8,704.56. Payments $6,344.64, which leaves $2,359.92 on hand and in bank. There are no debentures. Other indebtedness comes to $3,822.10, and assets to $5,836.52. The treasurer has been in office 3 years and receives $20 per annum. For a municipality in such an excellent position as this one three times the present amount would be little enough as he is a careful man and does his work well.

Township of Minto, County of Wellington.

This municipality has an assessment roll for 1903 of $1,841,645.00, and a collector's roll of $15,100.86, which at the date of my visit in June had all been paid. The tax rate was 4½ mills without school rates. Total receipts for 1903, $24,842.66. Payments $22,380.07, which leaves a balance in the Standard Bank of Canada, Harriston of $2,462.59. Total assets $3,980.19. Liabilities $11,878.92, mostly for drainage purposes. Treasurer keeps his books well and has been in office 15 years. He receives a salary of $110 per annum.

Township of Arthur, County of Wellington.

Total receipts for 1903 were $16,923.06, and payments, $15,701.07, leaving a balance on hand and in bank of $1,221.99. Total assessment, $1,651,500. Collector's roll, $12,880.61, paid. Tax rate 4 3-10 mills without school rates. Total assets $2,436.77. Total liabilities, $957.75. Treasurer has been in office since October, 1902, and receives a salary of $100 per annum.

Village of Arthur, County of Wellington.

Total assessments of this village for 1903 was $322,280. Collector's roll, $7,482.70, paid in full. Tax rate, 26 mills on dollar. Total receipts for 1903, $21,555.35; payments, $21,437.74. Treasurer makes a good officer and has been in office four years; salary $85 per annum. Total assets, not including school property or town property, $1,104.95. Liabilities, $23,918.92.

Township of West Luther, County of Wellington.

Total receipts for 1903, $14,032.77; payments, $13,243.68, leaving a balance in bank of $789.09. Total assessment of township, $891,400. Collector's roll, $10,353.28, nearly all paid. Tax rate, 5½ mills without school or drainage rates. Assets, about $2,500. Liabilities, $7,399.45, chiefly debentures. Treasurer has just assumed position at $80 per annum.

Township of Wolfe Island, County of Frontenac.

Equalized assesssment of township, $637,400. Collector's roll, $9,800, all paid but about $200. Tax rate about 2½ cents on the dollar, including school charges. Total receipts, $10,522.77. Payments, $10,136.40. Total assets, $6,074.88; liabilities, $3,142. Treasurer has been in office for eleven years and receives a salary of $60 per annum.

Village of Portsmouth, County of Frontenac.

Total receipts for 1903, $3,213.47; total payments for 1903, $2,267, leaving balance in Ontario Bank of $946.47. Assessment of village equalized,

$115,000. Collector's roll, $2,297.82, paid in full. Tax rate, 18½ mills public school supporters; 23 mills, separate school supporters. Treasurer has been in office five years and receives $50 per annum. Total assets 31st December, 1903, $5,310.91; liabilities, $1,583.49.

Township of Kingston, County of Frontenac.

Total receipts for 1903 were $21,918.18, and payments, $15,442.03, leaving a balance in Standard Bank of Canada, Kingston, of $6,443.53, and $32.62 in treasurer's hands. Total assessment of township was $1,102,225. Collector's roll, $15,471.69 nearly paid in full. Tax rate 8¼ mills without school rates. Total assets 31st December, 1903, $13,939.55; liabilities, $7,248.82. Treasurer has been in office seven years and receives a salary of $150 per annum. Books well kept.

Township of Howe Island, County of Frontenac.

Total assessment of township, $52,812 (1903). Collector's roll, $1,524.11, paid in full. Tax rate about 3 cents on dollar including all rates. Receipts for 1903, $1,982.99; payments, $1,567.19; assets, $671.05 including above balance of $415.80; liabilities, $610.44. Treasurer receives $20 per annum. Books only indifferently kept.

Village of Garden Island, County of Frontenac.

Total assessment of municipality, 1903, $50,600. Collector's roll, $1,644.50, paid in full. Tax rate, 3¼ cents, including all rates. Total receipts, $2,395.24; payments, $1,999.56. Balance on hand, which is sole asset, $395.68; no liabilities. Treasurer has been in office three years and keeps his books without a fault; he does not appear to get any salary, however.

Township of Storrington, County of Frontenac.

Total receipts for 1903, $9,155.97. Payments, $9,153.59. Assessment of municipality, $421,942. Collector's roll, $8,876.44; $369.60 not accounted for by treasurer probably one-half of this due in cash. Assets, $3,617.75; liabilities, $718.70. Treasurer has been in office thirty-seven years and receives a salary of $60 per annum.

Township of Pittsburgh, County of Frontenac.

Total receipts for 1903	$21,785 01
Total payments for 1903	17,993 89
Balance in bank and on hand	$3,791 12

Total assessment of township, $810,362. Collector's roll, $13,975.24, paid in full less $15.88. Tax rate, 14 mills, including schools. Assets 31st December, 1903, were $7,719.28; liabilities, $5,468.73. Treasurer keeps the township books very well and receives $100 per annum; has been in office six years.

Township of Loughborough, County of Frontenac.

Total assessment of township, $403,020. Collector's roll, $7,982.79, all paid except $150. Tax rate 2½ cents on the dollar including all school rates.

Total receipts for 1903, $8,248.34; payments, $8,238.61; assets 31st December, 1903, $4,391.52; liabilities, $3,995.83. Treasurer has been in office nineteen years; salary, $75 per annum; keeps books fairly well.

Township of Hinchinbrooke, County of Frontenac.

Total receipts for 1903, $6,541.95; total payments, $6,280.73, leaving a balance in treasurer's hands of $261.22. Total assessment of township, $163,992. Collector's roll, $5,060.47, paid in full. Tax rate, 13 mills without school rates. Assets, $1,517.96; liabilities, $1,128.30. Treasurer has been in office since 1893 and receives $45 per annum. I cannot say much in favor of his book-keeping. He does not keep the form of cash-book prescribed by Government.

Township of Palmerston, North and South Canonto, County of Frontenac.

Total assessment of municipality, $56,482. Collector's roll, $2,258.16, all paid. Tax rate, 15 mills without schools. Total receipts for 1903, $3,026.06; payments, $2,684.21. Total assets including above balance of $341.85, $1,137.66; liabilities, $1,425.96. Treasurer has been in office for thirty-two years and gets a salary of $40 per annum.

Township of Portland, County of Frontenac.

Total receipts for 1903	$11,778 06
Total payments for 1903	11,368 28
Balance on hand	409 78

Assessment of township, $452,650. Collector's roll, $10,175.20, about $1,150 still to pay in June, 1903. Tax rate, 2¾ cents for all municipal purposes. No bank account. Does not keep books on Government system, although fairly correct. Total assets, $7,072.08; liabilities, $3,742.57. Treasurer has been in office eight years; salary $75 per annum.

Township of Oso, County of Frontenac.

Assessment of township, $92,315. Collector's roll, $3,534.43, paid less $160.56, returned to county treasurer. Tax rate 17½ mills without school rates. Total cash receipts, $4,404.84; payments, $4,017.41. Assets, including above cash balance of $387.43, $2,216.08; liabilities, $603.23. Treasurer has been in office five years and keeps books fairly well, for which he receives $35 per annum.

Township of Clarendon and Miller, County of Frontenac.

Total receipts for 1903	$2,695 63
Total payment for 1903	2,467.74
Balance in treasurer's hands	$227 89

Total assessment of township, $69,000. Collector's roll, $1,587.94, paid in full. Tax rate, 23 mills on dollar. No bank account. Total assets, $1,749.02; liabilities, $168. Treasurer keeps the township books fairly well. He receives a salary of $45 per annum.

County of Frontenac.

The total receipts of the county for 1903 were $80,083.72, and the payments, $79,972.62. Of the former amount the sum of $32,021.44 was in the form of an overdraft from the Ontario Bank, Kingston. At the date of my visit in June this overdraft had been reduced to $12,598.40. The assessment of the county for 1903 was $6,342,497.60, and the county rate struck was 5 mills on the dollar, producing $31,714.52, of which there was due on the 15th June, 1904, the sum of $3,958.74. The assets of the county were $161,615.41, and the liabilities $124,983.44, inclusive of the above overdraft on bank on 31st December, 1903. The treasurer has been in office seven years and receives a salary of $900. He is likely to improve and turn out an efficient officer.

JULY.

Town of Newmarket, County of York.

Total receipts for 1903	$31,073 10
Total payments for 1903	27,663 68
Balance in treasurer's hands	$3,409 42

Total assessment of municipality, $533,070. Collector's roll, $12,993.97. Amount paid, $12,613.30; uncollectable, $380.67. Tax rate, 24 mills on dollar. Total assets, $88,122.73; liabilities, $59,929.35. New treasurer assumed office 14th May of this year, 1904. He is to receive $400 per annum.

Town of North Bay, District of Nipissing.

Total assessment of municipality, $739,379. Collector's roll, $22,973.97. Balance due 31st July, $2,924.78. Tax rate, 29½ mills separate school supporters, 30 mills public schoool supporters.

Total receipts for 1903	$59,255 56
Total payments for 1903	57,812 72
Balance in bank and on hand	1,442 84

Treasurer's salary $300 per annum; seven years in office. Water works under municipal control. Electric light, private company. Treasurer is a good officer, but he would be better still if his books were more closely written up to date.

County of Hastings.

Total receipts for 1903	$96,966 59
Total payments for 1903	96,962 56
Balance	$4 03

Of the first amount the sum of $43,862.38 is an overdraft on the Merchants Bank of Canada, Belleville, which overdraft was reduced at the date of my visit in July, 1904, to $26,945.39. The assessment of the county was $11,715,000. The tax rate, 3 7-10 mills on dollar, which produced $43,345.50, of which there was paid up to 19th July about $40,000. Treasurer has been

in office twenty-nine years and receives a salary of $1,250 per annum. The county books cannot be said to be kept in an up-to-date manner, but they are considerably better than they have been in past years. Assets of county on 31st December, 1903, amounted to $107,074.14, and liabilities $50,038.44 (principally bank).

The City of Belleville, County of Hastings.

Total receipts for 1903	$196,574 58
Total payments for 1903	199,998 60
Overdraft, Bank of Montreal	$3,424 02

Total assessment of municipality, $3,878,200. Collector's roll for 1903, $92,672.65, due 1st July, 1904, $18,535.81. Tax rate 23 3-10 mills on dollar. Total assets $555,858.90, of which sinking fund forms a part—$52,912.18. Water works, $193,111.39. Special deposit rolling mills, $30,115.29. Liabilities, $824,208.60, of which amount debentures form the principal part—$714,581.20. Treasurer receives $700 for city work and $200 for water works, and is a very busy man. He has occupied the office since March, 1903. I find him accurate.

Township of Sydney, County of Hastings.

The assessment of this township for 1903 was $2,056,980. Collector's roll, $19,263.95, paid. Tax rate 5 1-10 mills on dollar without school rates. Assets on 31st December, 1903, were $13,604.54; liabilities, $10,607.91. total receipts, $21,980.12; payments, $21,802.26. Treasurer has been in office six years and receives $110 per annum. Books well kept.

Village of Tweed, County of Hastings.

Total receipts for 1903 were	$9,522 85
Total payments for 1903 were	9,393 53
Balance in treasurer's hands	129 32

Assessment of municipality, $275,780. Collector's roll, $5,569.91. Balance due in July, $516.99. Tax rate, 20½ mills public school, separate school 15 mills. Total assets including school property, $19,458.84; total liabilities, $11,298.41. Treasurer has been in office since 1891 and receives a salary of $50 per annum.

Township of Limerick, County of Hastings.

Total receipts for 1903	$2,113 58
Total payments for 1903	1,973 34
Balance in treasurer's hands	140 24

Total assets of township, $60,330. Collector's roll, $1,603.46, all paid except $29, remitted by council. Tax rate 12 mills without school rates. No bank account. Total assets, $1,536.70; liabilities, $1,028.51. Books not kept as well as they should be. Treasurer receives $110 and acts as clerk also.

Township of Tyendinaga, County of Hastings

Total assessment of township, $1,407,378. Collector's roll, $17,193.10, mostly paid. Tax rate 6 6-10 mills without school rates.

Total receipts for 1903	$18,696 10
Total payments for 1903	16,136 06
Balance in treasurer's hands	$2,560 04
Total assets, 31 December, 1903	$4,758 79
Total liabilities	543 93

Treasurer has been in office since March, 1890 and receives $150 per annum. He does not keep a bank account.

Township of Thurlow, County of Hastings.

Total receipts for 1903	$19,865 33
Total payments for 1903	18,232 75
In Canadian Bank of Commerce, Belleville	1,632 58

Assessment of township, $1,975,650.00. Collector's roll, $17,698.05; all paid before July except $725. Tax rate, 5 1-10 mills, not including school rates. Total assets, $9,242.58. Liabilities, $5,842.65. Treasurer has been in office since 1877, and receives a salary of $80, with an allowance for stationery, etc., of $20. Books carefully kept.

Township of Dungannon, County of Hastings.

Total receipts for 1903	$3,011 50
Total payments for 1903	2,791 38
Balance in Treasurer's hands	$220 12

Assessment of township, $52,843. Collector's roll, $2,143.14, of which there is still about $1,000 of 1903 taxes due. Tax rate, 3½ cents on the dollar, including school rates. Total assets, 31 December, 1903, $2,220.12. Liabilities, $550.83. Treasurer has been in office four years, and receives a salary of $35. His books might be better kept, but he does not receive much encouragement to do better.

Township of Bangor, Wicklow and McClure, County of Hastings.

Total receipts for 1903	$2,719 36
Total payments for 1903	2,560 65
Balance in Treasurer's hands	$158 71

Total assessment of municipality, $62,930.00. Collector's roll, $2,604.71. Due on 20th July, 1904, $927.71. Tax rate 2½ cents on dollar, which includes school rates. No bank account. Total assets, $2,963.42. Liabilities, $2,222.43, 31st December, 1903. Treasurer keeps his books fairly well. He has been in office ten years and gets a yearly salary of $35.

Township of Rawdon, County of Hastings.

Total assessment of township, $1,170,730.00. Collector's roll, $13,580.20. Paid in full except some $23 allowed by council. Tax rate 7½ mills, excluding school rates.

Total receipts for 1903	$15,527 55
Total payments for 1903	14,077 24
Balance in Sovereign Bank, Stirling	$1,450 31

Total assets, $6,401.92. Liabilities, $9,559.07. Treasurer's books are well kept. He has been four years in office and gets $80 per annum.

Townships of Elzevir and Grimsthorpe, County of Hastings.

Total receipts for 1903	$4,466.85
Total payments for 1903	5,386 46
Overdraft in Dale & Co.'s Banking office, Madoc	$919 61

Total assessment of municipality, $96,929. Collector's roll, $3,759.43; $400 still to pay. Tax rate, including school rate, 4 cents on dollar. Total assets, $5,374.68. Liabilities, $3,336.17. Treasurer has been in office two years and receives a salary of $120 as clerk and treasurer. His book-keeping cannot be commended.

Township of Monteagle and Herschel, County of Hastings.

Township assessment amounts to $88,545. Collector's roll, $3,877.88, of which there was due at the date of my visit, $1,971.73. Tax rate about 5 cents on the dollar, including school rates. Total receipts, $4,734.73. Total payments, $4,544.41. Total assets, $4,068.20. Liabilities, $3,787.30. Treasurer keeps books fairly well. He has been in office ten years and receives a salary of $35 per annum.

Town of Trenton, County of Hastings.

Total receipts for 1903	$129,318 73
Total payments for 1903	128,987 94
Balance in bank	$330 79

Total asessment of town, $1,111,081. Collector's roll for 1903, $26,977.03. Due on this roll at the date of my visit in July, $3,612.93. Tax rate, public school supporters, 23 7-10; tax rate, separate school supporters, 26 9-10. Sinking fund, in Ontario Bank, $3,998.80. Total assets, $173,079.56. Liabilities, $163,395.61. Treasurer has been in office one and one-half years and receives a salary of $300 per annum. Books well kept.

Town of Brockville, County of Leeds.

Total assessment of municipality, $3,572,155. Collector's roll for 1903, $86,540.74; about $2,000 due at date of my visit in July. Tax rate, 24½ mills on the dollar, same rate for 1904.

Total receipts for 1903	$402,820 66
Total payments for 1903	402,128 71
Balance in treasurer's hands	$691 95

Sinking funds, deposited in banks and loan and savings company, $151,488.71. Total assets, including water works, electric light and power company, granolithic walks and sewers and schools, $737,551.83. Total liabilities, $682,717.62. Treasurer is a correct and careful official and receives a salary of $800 per annum. He has been in office since 1896.

Counties of Leeds and Grenville.

Total receipts for 1903	$39,627 97
Total payments for 1903	53,501 11
Overdraft Bank of Toronto, Brockville	$13,873 14

Total assessment of county, $17,002,451.00. Tax rate, 1 4-5 mills, producing $31,929.64, paid. Total assets, including sinking funds, $25,557.72, $146,785.66. Total liabilities, $73,276.86. Treasurer receives $1,200 per annum and has filled the position satisfactorily for six years past. I understand, however, he is about to resign.

Town of Prescott, County of Grenville.

Total receipts for 1903	$73,265 60
Total payments for 1903	71,000 23
Balance in Traders Bank, Prescott	$2,265 37

Total assessment of town, $1,030,260.00. Collector's roll, $22,885.10. Paid, less exemptions $775. Tax rate 25 mills on dollar. Total assets, including water works and electric light, $213,876.28. Total liabilities, $160,000. Debentures, $167,851.97. Treasurer has been recently appointed at a salary of $200 per annum. He appears to be a good officer, and I think will make a success.

Town of Gananoque, County of Leeds.

Receipts from 21st May, 1903, to 31st December, 1903	$59,302 59
Payments	58,117 75
In Bank of Toronto and Merchants' Bank of Canada, Gananoque	$1,184 84

Total assessment, $1,156,258.00. Tax rate 2 cents on the dollar. Collector's roll, $23,916.60, paid less exemptions $1,524.57. Total assets, including sinking funds, $22,213.35, $97,585.22. Total liabilities, $84,750.94. I cannot compliment the treasurer on his book-keeping, as he keeps no regular cash book. I have advised him to keep the regular government form of cash book, in fact, it is imperative for the safety of the town's finances that he should do so. He receives $200 per annum.

The receipts up to 23rd July, 1904, were	$92,895 09
The payments up to 23rd July, 1904, were	92,018 22
Balance in banks and on hand	$876 87

Township of Caledon, County of Peel.

The treasurer of the above municipality, Mr. John Harris, died 20th June, 1904. On an examination of his books by myself, they were not found in a satisfactory condition, and a government audit was instituted, which disclosed a deficit of several thousand dollars. The report of the special auditor will be found at the end of this report. Mr. Harris was thirty years in office and received a salary of $130 per annum.

AUGUST.

Town of Essex, County of Esssex.

Total receipts for 1903	$55,846 48
Total payments for 1903	55,519 28
Balance on hand and in bank	$327 20

Total assessment of municipality, $394,526.00. Tax rate 28½ mills. Collector's roll about $11,000; about $1,000 still due on 1903 roll. Total assets, including water works and local improvements, $70,862.75. Liabilities, $58,110.15. Treasurer has been in office ten years. Gets an yearly salary of $50. Cannot find much to commend in the way of bookkeeping. On account of the unsatisfactory state of the collector's rolls a government audit was petitioned for and is now being gone through with.

City of St. Thomas, County of Elgin.

Total assessment for 1903	$5,154,988 00
Collector's roll for 1903	98,407 13

Collector's roll paid within $1,000 at date of my visit in August, 1904. Tax rate 21 mills on dollar.

Total receipts for 1903	$421,176 05
Total payments for 1903	414,301 34
Balance	$6,874 71
In Imperial Bank of Canada, St. Thomas	$6,816 22
Cash on hand	58 49
	$6,874 71

Sinking funds, $97,662.35. Total assets, inclusive of above amount for sinking funds, water works, schools, city hall, etc., $587,242.08. Total liabilities, chiefly debentures, $528,533.31. The treasurer receives $1,500 for keeping the books of the city and also the water works. He keeps them very well, but has a little too much to do, and naturally occasionally gets behind with his work.

County of Elgin.

Total receipts for 1903, $89,029.69. Total payments, $73,741.40, leaving a balance on hand in the Molsons Bank, St. Thomas of $15,288.29. Total assessment of county, $20,495,604.00. Tax rate of county 1½ mills, producing $30,742.00. The total assets of the county, including the county buildings, House of Industry, registry office, etc., amounted on 31st December, 1903, to $217,430.52, and the liabilities to $68,926.81. The treasurer has been in office twenty-three years, and keeps his books accurately although rather inclined to old fashioned methods. He receives a salary of $1,200 per annum, and pays his own premium to the guarantee company for $10,000.

SEPTEMBER.

Town of Sault Ste. Marie, District of Algoma.

Total peyments for 1903	$165,257 47
Total receipts for 1903	115,145 65
Due Canadian Bank of Commerce, Sault Ste. Marie	$50.111 82

Total assessment of municipality, $3.722,759.00. Collector's roll for 1903, $88,579.87. Balance due 1st September, 1904, on roll 1903, $15,896.09. Tax rate 23 mills. Total assets $424,426.45. Liabilities, $655,037.73. Treasurer receives about $700 per annum in salary and perquisites. He is a busy man and does his work well.

Township of Shuniah, District of Thunder Bay.

Total receipts for 1903	$5,511 03
Total payments for 1903	4,882 00
	$629 03
Deceased treasurer W. H. Langworthy deficit	547 68
Balance on hand	$81 35

Total assessment of municipality, $121,918.00. Collector's roll, $6,112.95; paid on to date, resident taxes, $1,570.12, non-resident taxes, $568.13. Tax rate 1¾ cents on the dollar. Sinking fund, in bank, $515.70, loan to school, $1,500, $2,015.70. Total assets, $10,136.80, including sinking fund as above. Liabilities, $10,323.59. From what I could hear, there does not appear to be much hope of the municipality recovering the amount the late deceased treasurer was behind, either from his estate or sureties. A new clerk and treasurer has now taken his place. Salary $225.

Town of Port Arthur, Thunder Bay District.

Total receipts for 1903	$529,228 66
Total payments for 1903	526,370 76
Balance in Ontario Bank, Port Arthur	$2,857 90

Total assessment of town, $1,845,273.00. Collector's roll, $39,121.26. Tax rate 23.74 mills on dollar. Amount due on roll 1st August, $6,760.00.

Sinking fund, deposited in bank, $18,990.04. Total assets, including street railway, electric light company, water works, power development and the above sinking fund, $443,151.27. Liabilities, $414,506.74 at 31st December, 1903. Debenture liability, 7th September, 1904, $620,275.00. Treasurer has been in office since 1893, and receives a salary of $1,500 per annum. I found his books correct and well kept. This municipality has embarked largely in municipal ownership, water works, power development, telephone, electric power, street railway, etc., hence the large increase in the debenture liabilities since last year.

Town of Fort William, District of Thunder Bay.

Total receipts for 1903	$244,148 15
Total payments for 1903	243,716 67
Balance on hand	$431 48

Total assessment of town, $2,147,170.00. Collector's roll, $50,626.03. Paid to 20th September, 1904, $32,000.00. Tax rate, 1903, 27 mills. Tax rate, 1904, 25 mills. Total assets, including sinking funds, water works, electric light, telephone, sewers, local improvements, schools, etc., $454,145.96. Liabilities, $425,878.76, 31st December, 1903. Debenture liability, 7th September, 1904, $491,703.15. This municipality was visited by a severe fire in March, 1903, which compelled the erection of new municipal buildings. The ratepayers have also gone in for municipal ownership, the same as their sister municipality of Port Arthur. The officials appear to be well up in their business, and their remuneration is better than in some localities. Treasurer receives $700, clerk $900, and auditors $125, each per annum. It is claimed that the water works and electric light departments are self-supporting.

Township of Keewatin, District of Rainy River.

Total receipts for	$8,277 29
Total payments for 1903	9,064 69
Overdraft on Bank of Ottawa, Keewatin	787 40

Total assessment of municipality, $285,000. Collector's roll, $8,309.76, balance, $1,074.12, now due. Tax rate 26 mills for public and 30 mills for separate school supporters. Total assets, $2,100.87; liabilities, $5,411.43. Treasurer is an experienced and capable officer and receives $50 a year salary, which, it is safe to say, should be doubled.

Town of Rat Portage, District of Rainy River.

Total receipts for 1903, $592,527.62; total payments, $592,672.14, showing an overdraft of $144.52. Total receipts to 21st September, 1904, $287,976.47; total payments, $286,303.06, showing a balance in banks of $1,673.41. Total assessment of municipality, $1,656,140. (1903). Collector's roll, $52,745.23, about $45,000 paid out to date. Tax rate 26 mills. Total assets, $353,017.62; liabilities, $338,984.62, 31st December, 1903. The electric light and telephone company is nearly completed. Water works account stands in books at $158,000 and wants about $20,000 more to complete.

This is another municipal ownership municipality. Treasurer keeps books correctly and receives $1,200 per annum. He has been in office three years.

Town of Paris, County of Brant.

Total receipts for 1903	$99,727.40
Total payments for 1903	83,724.20
Balance	$15,903.20

Of which $87.35 was on hand and $15,815.85 in the Canadian Bank of Commerce agency Paris. The total assessment of the municipality for 1903, was $1,123,572.00. Collector's roll for 1903 $20,943.89, paid. Tax rate 20 mills for 1903, 23 mills for 1904. Sinking funds are in the form of a Bank of Commerce Receipt for $7,600. The water works and electric light departments are handled by a Board of Commissioners. Total assets, including schools, water works and electric light, also town property amount to $204,069.-27. The liabilities all debentures $110,085.88. The treasurer has been in office five years, and acts for the School Board as well as the Town, receiving a salary of $1,000 which is well earned, the municipality's books and accounts being in exceptionally good order.

Village of Grimsby, County of Lincoln.

The total receipts of this municipality for 1903, were $8,703.89 and the payments $8,708.36 leaving a balance in the Treasurer's favor of $4.47. Total assessment of municipality was $231,810.00. Collector's roll $5,502.85 of which $5,136. was paid at the date of my visit in October. Tax rate 24 mills Total assets of village were $7,200, and liabilities in the form of debentures $6,286.92. Treasurer has been in office 16 years and receives $100 per annum. The books of 1904 were not written up at the date of my visit, which omission is clearly wrong.

OCTOBER, 1904.

Township of Dumfries South, County of Brant.

Total receipts for 1903 were	$20,463.05 and
Total payments for 1903 were	17,478.88
Leaving balance in Canadian Bank of Commerce of	2,984.17

Total assessment of Township $2,200,000.00. Collector's roll $15,853.42. All paid except $4.30. Tax rate 3 7-10 mills without school rates.

The late Treasurer was in office 10 years and died in office last September. He was a careful officer, lived respected, and died lamented. He was succeeded by the clerk who acts in the dual capacity of Clerk and Treasurer. Total assets $3,708.47, liabilities $5,969.73, all school debentures.

Township of Oakland, County of Brant.

Total assessment for township for 1903 was $471,219.00. Collector's roll $3,045.16 paid. Tax rate about one cent on the dollar, including all charges.

Total receipts	$4,765.64
Total payments	4,099.44
Balance on hand	666.20

Total assets $6,910.91, liabilities $2,400.00. Balance of railway debenture. Treasurer receives a salary of $55, and has been in office 18 years. His books and accounts are poorly kept.

Township of Onondaga, County of Brant.

Total receipts for 1903 were	$7,197.54
Total payments for 1903 were	6,356.51
Balance in Treasurer's hands	841.03

Total assessment of municipality $706,240.00. Collector's roll $6,193.13 paid in full. Tax rate 5.04 mills without school rates or specials. Total assets $3,841.03, liabilities $2,166.58. There is no properly kept bank account, otherwise the books are fairly well kept. Treasurer has been in office six years and receives an annual salary of $60.

Township of Burford, County of Brant.

Total receipts for 1903	$23,632.65
Total payments for 1903	21,603.71
	2,028.94
Cash on hand	$ 398.35
Bank of Commerce, Brantford	1,630.59
	2,028.94

Equalized assessment $3,000,105.00. Collector's roll $20,433.72, paid in full. Tax rate 5 6-10 mills without school rates. Total assets $5,211.16, liabilities $1,209.00. Treasurer is a very good officer and has been in office five years. He receives a salary of $150. per annum.

Township of Brantford, County of Brant.

Total receipts for 1903	$45,410.83
Total payments for 1903	39,840.93
	5,569.90

Balance in Canadian Bank of Commerce, Brantford. Total assessment of municipality $3,842,391.00. Collector's roll for 1903, $25,914.83, paid, excepting $31.57, remitted by Council. Tax rate 4½ mills, without school or special rates. There are surplus funds invested in mortgages $67,790.00. Cash in Bank $952.30. Other assets $18,674.50, liabilities $17,107.32. The former Treasurer died in February 1904, and was succeeded by Mr. Albert Foster, who is also County Treasurer. He receives $300 salary per annum. This municipality from its large invested surplus funds, should be amongst the most happily situated financially in the Province.

County of Brant.

The equalized assessment of this county amounted in 1903 to $11,608,865.00 County assessment, 1 1-10 mill, producing $12,770.00 paid in full. The County property is valued at $106,000.00 and cash in bank amounts to

$11,700.16 making $117,700.16 against $5,525.17 total indebtedness. Total receipts, $33,191.60. Total payments, $21,491.44. Balance as above, $11,700.16. Treasurer has been in office eight years and gets a salary of $750. I found his books and accounts very well kept.

NOVEMBER.

Town of Oakville, County of Halton.

The assessment of this town in 1903 was $456,495.00. The Collector's roll for same year was $9,198.47, of which there was only remaining unpaid the sum of $204.42. Tax rate 2 cents on the dollar, with ten per cent. off for prompt payment.

Total receipts for 1903 were	$30,118.04
Total payments for 1903 were	23,467.34
Leaving this balance in the Bank of Toronto, Oakville	$6,650.70

The assets of the municipality amount to $56,343.52, which includes a sinking fund of $10,602.17 and the claim against the estate of the late Treasurer amounting to $8,054.65 now in litigation. The liabilities are $48,147.74. The new Treasurer has only been in office a short time and is likely to do better when he gets some experience. His salary at present is $100 per annum.

Town of Aurora, County of York.

Total receipts for 1903 were	$29,576.79
Total payments for 1903 were	29,599.00
Balance due Ontario Bank, Aurora	$ 22.21

Total assessment of municipality, $448,689.00. Collector's roll for 1903, $10,532.22, of which there was due at the date of my visit in November, '04, the sum of $509.44. Tax rate, 23 mills. The assets of the town amounted to $51,898.92, and the liabilities to $24,712.21. There is no sinking fund. The Treasurer receives $100 per annum from the general funds and $20 from the High School. He has been in office for 40 years. I found his books and accounts well kept.

Township of Nottawasaga, County of Simcoe.

The assessment of this township for 1903 was $2,520,719.00. Collector's roll $21,635.56. All paid except $15, returned to County Treasurer. Tax rate 3 8-10 mills on dollar, without school rates or specials. Total receipts for 1903 amount to $32,015.61 and payments to $23,799.22, leaving a balance of $8,216.39 deposited ($7,503.90 in the Bank of Toronto, Collingwood and in the Treasurer's hands, $712,49). The total assets of the township amount to $9,859.49 and liabilities to $6,542.22. Treasurer has been in office four years and receives a salary of $250 per annum. Books fairly well kept.

Town of Collingwood, County of Simcoe.

Total receipts for 1903	$129,877.14
Total payments for 1903	126,686.19
Balance in Bank of Toronto, Collingwood	$3,190.95

The total assessment of the municipality was $1,929,133.00. Collector's roll for same year $50,689.32, all paid except $347.59. Tax rate 25 mills. The total assets of the town were on 31 Dec., 1903, $325,921.63,which included $16,250 debentures held over. Sinking fund $3,874.30. Water works $91,383.60. Electric light $46,990.64. Corporation property $62,900.00, etc., liabilities, chiefly debentures $389,383.35. The Treasurer has been in office since 1882 and is an industrious and capable official. His salary is $750 per annum which should be increased. I found his books correct.

Township of Collingwood, County of Grey.

The assessment of this municipality for 1903 was $1,381,955.00. Collector's roll $16,257.58, paid in full except $174 returned to County Treasurer and a clerical error of $9. Tax rate on dollar without school rate or specials 6 mills.

The receipts for 1903 were	$21,768.05
The payments for 1903 were	20,500.29
Balance in Treasurer's hands	$ 1,267.76

Which with a few overdue taxes and the Town Hall valued at $1,500, comprise the assets $3,051.33 and the liabilities are only $332.13. The Treasurer has been in office fourteen years and receives a salary of $100 per annum. I found his books correct and well kept.

Township of Tilbury North, County of Essex.

Total receipts for 1903	$16,940.25
Total payments for 1903	16,801.38
Balance in Treasurer's hands	$ 138.87

Total assessment of township $647,935.00. Collector's roll $11,733.32, practically paid in full. Tax rate 6½ mills on dollar without school rates. Total assets $12,345.49. Total liabilities $31,056.32, chiefly drainage debentures. Treasurer does not keep a bank account, otherwise his books are very well kept. He gets salary of $125 per annum and has been in office five years. An audit is being proceeded with in this township.

Village of Tilbury, County of Kent.

Total receipts for 1903	$19,081.84
Total payments for 1903	19,057.86
Balance in hands of Treasurer	$ 23.98

Total assessment of municipality $217,985.00. Collector's roll $7,884. Paid to about $50. Tax rate 29 7-10 mills on $. Total assets 31 Dec., '03, including water works, etc., $26,936.87. Liabilities, chiefly debentures $26,397.93. Treasurer has been eight years in office and might keep the books of the municipality better than he does, but he does not get much encouragement to do so, his salary being only $50 per annum.

Town of Amherstburgh, County of Essex.

The assessment roll of this municipality calls for $488,115.00. Collector's roll $15,324.23. Nearly all paid. Tax rate 27 mills. Separate School supporters 30 mills on dollar. Receipts to 1st November, 1904, $66,778.94. Payments $66,492.15. Balance in Sovereign Bank, Amherstburg, $286.79.

Total assets, including water works $50,000. Town hall $15,000. Electric light $5,000.00, etc., $83,351.31. Liabilities $94,349.42. Treasurer has only been in office since Feby., 1904. So far as I can see the books are correct, but the Treasurer keeps them according to a system of his own and not according to modern ideas. He receives $100 per annum and no one can say that he does not earn more than that at all events.

DECEMBER.

Town of Owen Sound, County of Grey.

Total receipts for 1903 $178,140.78. Total payments $148,395.16, showing a balance in the Traders Bank of Canada, Owen Sound of $29,487.08 and cash on hand of $258.54. The assessment of the municipality for 1903 was $3,240,413.00. For municipal rates and for school rates $3,407,413.00. Tax rate 25 7-10 mills. Collector's roll $87,000.00, of which $1,000 is still due. The assets of the town amount to $658,617.26, inclusive of sinking funds $101,326.05, water works $138,646.00, electric light $35,375.00, gas works $39,135.00, school property $91,450.00, etc., etc. Liabilities, chiefly debentures $741,999.22. The Treasurer receives $1,500 per annum to pay himself and office help. He has the water works and electric light books to keep besides the town books and any incidental business that may be turned into the town. He is a highly competent official and has occupied his present position for thirty-three years. I think it will be readily admitted that he should have more help in the office.

Township of Sarawak, County of Grey.

Total receipts for 1903	$9,906.46
Total payments for 1903	9,806.92
Cash on hand and in bank	$ 99.54

Total assessment of municipality $306,590.00. Collector's roll $6,232.36. All paid except $96.85. Tax rate 18¼ mills, including school rates. Total assets including sinking fund $4,191.38, $11,055.43. Liabilities $16,033.33, chiefly debentures. Treasurer has been in office since 1898 and only receives $55 per annum, which is too little to give the attention the office ought to receive.

Town of Thornbury, County of Grey.

The assessment roll of this municipality foots up $234,305.00. Collector's roll $4,695.53, which is all paid except $34.10. Tax rate 20 mills on dollar.

Total receipts for 1903	$7,663.12
Total payments for 1903	6,395.12
Balance in Bank of Toronto, Thornbury	$1,268.00

Total assets including above balance and $1,414.58 for sinking fund also in Bank of Toronto. $4,756.61 liabilities. $5,893.85 (chiefly debentures.) I found the Treasurer's books correct. He has been in office since January, 1903 and receives $50 per annum.

County of Grey.

The total receipts for 1903 were	$88,454.17
The total payments for 1903 were	56,292.34
	$32,161.83
Balance Molson's Bank, $15,821.65; Merchant's Bank, $16,340.83	$32,161.83

Total assessment of County $29,090,478.00. Tax rate 1 4-10 mills, yielding for County rates $40,726.66, which amount was paid in full. The total assets of the County, including cash in banks, County property, etc., amounted on 31 Dec., 1903, to $134,665.75 and the liabilities to $20,204.60. The Treasurer has been in office thirty-one years and receives a salary of $1,400 per annum. I found his books correct in every particular. In fact I may say that I do not know of better kept books in the Province.

Township of Derby, County of Grey.

Total receipts for 1903	$15,565.29
Total payments for 1903	14,092.90
	$1,472.39
In Trader's Bank, Owen Sound, $1,232.74; cash on hand, $239.65	$ 1,472.39

Total assessment of township $795,350. Collectors roll $10,797.13. Paid in full. Tax rate 8.76 mills without school rates. Total assets $3,072.39. Liabilities $996.60. Treasurer has only been one year in office. He receives $75 per annum.

Village of Dundalk, County of Grey.

Total receipts for 1903	$9,508.19
Total payments for 1903	9,705.34
Due Treasurer	$ 197.15

Total assessment of village $162,000.00. Collector's roll for 1903 $3,900.12. Paid in full except $11.32 defaulted. Tax rate 24 mills on dollar.

Total assets $10,218.20. Liabilities, chiefly debentures $16,039.85. Treasurer has been in office 16 years and receives a salary or $25 per annum. I found the books correct and well kept.

Township of Sydenham, County of Grey.

Receipts to 1st December, 1904	$16,063.98
Payments to 1st December, 1904	8,265.40
Balance in Telford & Co's Bank, Owen Sound	$7,798.58

Equalized assessment of township $1,673,000.00. Collector's roll for 1903 $15,728.74. Paid $14,273.13. Tax rate 6 8-10 mills without school rates. Total assets balance in Telford's bank as above $7,798.58. Liabilities, school debentures $187.52. Treasurer has been in office twenty years and receives a salary of $100 per annum

Town of Durham, County of Grey.

Total receipts for 1903	$24,565.18
Total payments for 1903	21,932.46
Balance in Standard Bank, Durham	$ 2,632.72

Total assessment of municipality $622,036.00, of which $259,550 is subject to school tax only. Collector's roll $9,169.59. Paid in full. Tax rate 21 mills. Total assets $36,327.82. Liabilities, chiefly debentures $50,693.96. Treasurer has been in office since 1892 and receives a salary of $85 per annum, which is much too little for the quality of work given. I found the books of the municipality correct and well kept.

Village of Markdale, County of Grey.

Total assessment of municipality $206,265.00. Collector's roll $3,813.13. Paid in full, excepting poll tax. Tax rate 16 mills 1903, 18 mills 1904. Total assets which does not include local improvements $12,802.53. Total liabilities which does not include local debentures $7,772.49. Treasurer has been in office since 1896 and receives a salary of $35, which cannot be considered an equivalent for his services as he is a good officer and correct.

Total receipts for 1903	$8,661.60
Total payments for 1903	7,413.20
Balance in Lucas & Co's Bank, Markdale	$1,248.40

Township of Proton, County of Grey.

Total receipts for 1903	$18,083.62
Total payments for 1903	16,964.05
Balance in Treasurer's hands	$1,119.57

Total assessment of township $932,250.00 Collector's roll $13,345, of which $275.54 was returned to County Treasurer, $23.64 remitted by council and the balance paid. Assets, which include sinking fund deposited in Bank of Hamilton $2,406.30, $6,600.18. Liabilities, chiefly debentures $8,080.00. Treasurer in office since 1902. Salary $100. He promises to make a good officer in time.

Township of Egremont, County of Grey.

Total receipts for 1903 $17,383.37. Total payments $15,852.34. Balance $1,531.03, deposited in Ontario Bank, Holstein. Total assessment of municipality $1,549,300.00. Collector's roll $12,719.88. All paid except $4 in exemptions. Tax rate 5 6-10 mills on dollar, without school rates. There

are no liabilities. Treasurer receives $80 per annum. Has only been in office a few months. I think him likely to do well. He is succeeding a good man.

Township of Glenelg, County of Grey.

Total receipts for 1903 $11,926.19. Payments $10,233.80, showing balance of $1,692.39, of which $214.27 was in treasurer's hands and $1,478.12 in Standard Bank of Canada, Durham, 31 Dec., 1903.

Total assessment of township $668,515.00. Collector's roll $8,845.29. All paid except $48.58. Tax rate 6 6-10 mills without school rates. Total assets $2,892.39. No liabilities. Treasurer receives $100 per annum and has been in office three years. I found his books correct.

Township of Holland, County of Grey.

Total assessment of township $840,655.00. Collector's roll $11,469.31. Paid in full except $45.24. Tax rate 6½ mills, excepting school rates.

Total receipts for 1903	$13,203.98	
Total payments for 1903	12,364.45	
	$	839.53
Balance in Treasurer's hands and McDonald's Private Bank, Chatsworth	$	839.53

Total assets, including above balance, $2,533.15. No liabilities. Treasurer is a good officer and has occupied the position 17 years. Salary $100 per annum.

Township of Sullivan, County of Grey.

Total receipts for 1903	$16,458.02	
Total payments for 1903	15,996.32	
Balance in Treasurer's hands	$	461.70

Total assessment of township $1,177,675.00. Collector's roll for 1903 $13,717.84. Paid. Tax rate 5 7-10 mills without school rates. Total assets $2,652.83. Liabilities $150.00. Treasurer has been in office fifteen years and receive a salary of $85 per annum. He is a worthy man and reliable, but away behind in his book-keeping.

Township of Normanby, County of Grey.

Total assessment of township $1,743,730.00. Collector's roll $15,344.82. All paid except $8.80. Tax rate, not including school rates, 4 mills.

Total receipts for 1903	$18,471.99	
Total payments for 1903	17,699.35	
Balance in bank and on hand	$	772.64

Total assets, including above balance, $2,275.44. No liabilities. This is a model township with a model Treasurer who is worth considerably more than $100 per annum.

In reviewing the work of the past year, it is noticeable that the county municipalities are not affected this year in the matter of deficits as they were in 1903. This year the township municipalities are the offenders viz:— Township of Russell, township of Caledon, township of Tilbury West, township of Ferris, and the amount is naturally much smaller. A peculiar state of affairs exists in Tilbury West township, where the council of 1904 has handed back a large sum ($4,835) to the treasurer after the latter had placed the money in the bank to the credit of the township in accordance with the finding of Mr. Macpherson's audit. I give this audit in full at the end of this report.

I am informed that an entirely new council has replaced the Tilbury West council of 1904, and that it is proposed to investigate the action of their predecessors for acting as they did.

I think some improvement can be noted in the book-keeping of the municipal treasurers for the past years, but there is room for much more. When will municipalities learn that there is no use in electing men to the office of Treasurer who have no knowledge of accounts or business methods of any kind? Even the county municipalities are not blameless in this respect. The fact of being an honest man and popular, does not constitute the only qualification for being elected a municipal Treasurer. Some knowledge of acocunts and business methods should be considered an essential. Such however, is not the case. I know of one instance in 1904, of an important county treasurership going to a very worthy man it is true, but a man who knew absolutely nothing of accounts, and what is more, admitted that he did not.

It is to be hoped that unless in very special cases, there will be a lull in the granting of municipal bonuses. During the past year it has been amply demonstrated that undertakings so fostered are not always attended with success. Municipal debts, so far as counties and townships are concerned, are on a very satisfactory footing, but in the case of cities, towns and villages, there has been a strong tendency to launch out, which it would be well to check. The municipalities have been most liberal as a rule in the assistance of companies and corporations asking aid for different enterprises, some in the way of loans, some in the form of bonuses, and it seems reasonable that they should have a little rest.

To anyone brought into close connection with the municipalities, the great prosperity of the counties and townships cannot but be evident. Their freedom from debt, the slow but sure increase in the value of land and agricultural values generally, are most gratifying indications of the high standard of material advancement prevailing throughout the Province.

I am, Sir,

Your obedient servant.

J. B. LAING,

Provincial Municipal Auditor.

Parliament Buildings,
Toronto, 31 December, 1904.

Town of Midland Report, January, 1904.

W. A. Douglas, Auditor.

To His Honour the Lieutenant-Governor-in-Council:—

In accordance with instructions received from the Provincial Municipal Auditor dated the 6th day of January, I proceeded to the Town of Midland on the 18th of January and examined the books and vouchers of that municipality.

I am glad to be able to report that I found the accounts substantially correct, the few errors that I discovered were simple inadvertencies of a trifling character. At the same time the accounts were in that state of inadequacy which might be expected in a municipality in which each officer was left largely to his own initiative. I would, therefore, make the following recommendations:—

Cash Book: In this book the payments of the debentures and interest thereon were entered in one column, making no distinction between principal and interest. These two items should be separated. The payments for water rates were not entered till the end of the year. It would be better to have these entered as they are collected, in the same manner in which other receipts are entered.

The Ledger: Hitherto no ledger has been kept. I would recommend that one be procured, as in that manner certain accounts can be kept in a more convenient form than at present.

This book should commence with a statement of assets and liabilities. with separate accounts opened for the permanent assets of the town, so that they can be increased as the works are extended or diminished as the works depreciate. Accounts should also be opened, charging the collector with the amount of the taxes he is to collect, and as he makes his returns the balance remaining, with discounts and rebates deducted, should correspond with the amount remaining uncollected as shown in the roll. When the collector hands over the roll to the treasurer, then the balance remains as a charge of taxes in arrears and should corespond with the list thereof.

A similar method should be adopted with the collection of the water rates and electric light.

In the ledger also should be entered the balance unpaid of each debenture. As each instalment of principal is paid, the amount should be debited to its own debenture and the balance should show the amount still to be pald on that account.

As to the accounts in the ledger will not be numerous, a book of three or four hundred pages will be sufficient for the present.

Journal: To enter up the accounts properly in the ledger it will be necessary to have a journal. Through this book will be entered the charge against the collector or collectors, the credits or debits of interest or discounts and such other items as do not pass through the cash book.

Collector's Roll: This book has hitherto been entered according to the alphabetical order of the names of the ratepayers. This method may do in a small municipality; but experience has shown that it is much more convenient to have the roll entered according to the streets. This method has the following advantages:—It is much less likely that any lot will be overlooked; a comparison of assessments is very much simplified; the search for lots will be much facilitated. Then by numbering each assessment and using the same number in the receipts or payment and in the collector's book, also in the record of arrears it makes all future reference easy and simple.

Summary Statements: In the book of collections, whether of taxes or of rates, it is well at the time of closing the books to make a summary statement after the following form:

Arrears forward ... ... $.....
Amount to be collected ... . $.....
Interest to be added ... ... $.....
Total to be collected ... ... $.....

Amount collected ... ... $.....
Rebates ... ... $.....
Discounts .... $.....
Total .... $.....
Balance in arrears ... ... $.....

Electric Light Accounts: Herewith I send a form of accounts used by the Electric Light Company at Ottawa. This has been furnished me by the kindness of the Rollo L. Crane Co., and it is admirably adapted for its purpose. As this is arranged according to the method of "continuous balance" it saves a great deal of time as it always shows the balance of any account and does not need to have the account closed and the balance carried down as in the old method.

Balances from Accounts: In the statement of assets and liabilities certain balances have been inserted as "estimates." This method is not to be commended. By the 15th December lists of arrears should be prepared most accurately compared with the ledger balances and the returns published according to these figures. "Estimates" cannot be accurate and are likely to degenerate into slovenly methods and should not be permitted.

Certifying of Vouchers: It would be well to have rubber stamps so that each voucher can be stamped as follows:

Used for ... ... $.....
Used for ... ... $.....
Used for ... ... $.....
Certified correct ... ...
Order No ... ...

In this way each account would show exactly the service to which it was to be charged and also the numbers of the orders so that the auditors could see that it was properly authorized.

The Pay Sheets: The pay sheets as made out at present are exceedingly crude and unsatisfactory. A proper form should be provided, with space in the heading for the dates and also specifying the nature of the work, the time employed, rate, total wage. If wages are paid in cash, then the sheet should be signed by each man.

Water Works Register: A register should be provided not according to names but arranged according to streets so that there will be a permanent record of the charges to be made at each time of collection. By leaving a few lines blank between each entry, space will be left for any changes that may occur. A form after that used in this city is sent herewith.

Arrears of Taxes: The account would be much more convenient for reference if it were entered according to the streets as in the assessment roll. The principal amount charged should be in one column and the interest in another. In this way the total of the principal can at once be compared with the amount of the arrears as shown in the roll, and the total of the

interest can be entered through the journal into the ledger so that the ledger balance and the total of the arrears can correspond. A form for this purpose is sent herewith.

By some inadvertence this account seems to have escaped the examination of the auditors. There was no memorandum of any audit and there were some trifling errors.

Statement of assets and liabilities: This statement would be much improved in form if the various items were placed under appropriate headings. *Property* being the first, including land, buildings and plant; *Arrears of Taxes and Rates* being the second, and *Bank Balances* the third. This would give it better mechanical form and at the same time facilitate the reading. The arrears of water rates and electric light are given as estimates. This cannot be correct and should not be permitted.

In the list of liabilities there is only one item mentioned as "Outstanding Account" whereas accounts to the amount of $5,927.13 had been incurred before the end of the year which were paid subsequently. A list of these will be found at page 25 of the account book sent herewith. While some of these were dated subsequent to December 15 the large majority were subsequent to that date.

Accompanying this Report will be found a book containing the following accounts:—

First: Analysis of the Waterworks Construction Account.
Second: Analysis of the Waterworks Maintenance Account.
Third: Analysis of Electric Light Construction.
Fourth: Analysis of Accounts Outstanding 31st Dec., 1903.
Fifth: Assets of Liabilities 31st Dec., 1903.
And Sundry Statements.

W. A. DOUGLAS,
Auditor.

TOWNSHIP OF RUSSELL REPORT, MAY, 1904.

G. O. Merson, Auditor.

Toronto, 19th May, 1904.

To His Honour The Lieutenant-Governor in Council of the Province of Ontario.

May it please Your Honour:

Agreeably to Order in Council, dated 30th March, 1904, and to instructions received from the Provincial Municipal Auditor, I proceeded on the 30th March, 1904, to the Township of Russell, in the County of Russell, and beg leave to report as follows regarding the financial affairs of that Township.

2. On my arrival there was handed to me a copy of a resolution passed by the council of the municipality on the 26th of March, 1904, instructing that the audit be conducted in the Village of Russell, and that the examination commence in the year 1898 and continue down to the 26th March, 1904.

3. The offices of Clerk and Treasurer during the period under review were occupied as follows:—

1898, 1899, 1900, 1901, Mr. W. R. Craig, Clerk.
1898, 1899, 1900, 1901, Mr. T. Lachapelle, Treasurer.
1902, Mr. P. E. Guerin, Clerk.
1902, Mr. W. R. Craig, Treasurer.
1903, Mr. P. E. Guerin, Clerk.
1903, Mr. T. Lachapelle, Treasurer.
1904, Mr. W. R. Craig, Clerk.
1904, Mr. T. Lachapelle, Treasurer.

4. The audit examination and inspection of the books, accounts, and vouchers of the Municipality of the Township of Russell, as conducted by me covered the period from 31st December, 1897, to the 31st March, 1904, and occupied 36 days.

5. The examination of the by-laws in the municipality's by-law book revealed several discrepancies in computations and dates, but in cases where these exist and affect the question of monies raised on debentures, I observe that the debentures realized par and that the validity of these by-laws were accepted by the investors.

6. By-law 114 "B" was as passed to aid and assist the Ontario Pacific Railway Compay by giving $10,000 by way of bonus, and to issue deben-

tures therefor, and to authorize the levying of a special rate for payment of debentures and interest. The debentures are payable in 20 years from the 1st June, 1897, and have coupons attached for interest at 3½ per cent. per annum, payable yearly. The annual levy under the by-law is the sum of $683.75, divided as follows:—Principal $500, interest $183.75. The New York and Ottawa Railway Company are at present the beneficiaries under this by-law, but I find no record of by-law or notice of any kind to the township intimating change of name of the railway company from the Ontario Pacific Railway Company to that of the New York and Ottawa Railway Company.

7. The township has been paying yearly $350 interest and depositing with the Bank of Ottawa the balance of $333.75 in a sinking fund account bearing 3 per cent. interest, compounded, for the purpose of retiring the principal of $10,000 at the end of 20 years.

8. On the 1st of June, 1904, the township will require to arrange for and deposit to the sinking fund account with the Bank of Ottawa the corrected annual levy of $372.16, and also the sum of $435.60 in order that the correct amount to that date may be provided for.

9. The corrected annual levy under the above by-law to pay interest in the meantime and to create a sinking fund earning 3 per cent. interest compounded, in order to retire the principal of $10,000 at the end of 20 years is $722.16 divided as follows:—Interest $350, sinking fund $372.16.

10. The examination of the cash book to 31st March, 1904, reveals a shortage in cash of $1,618.73, which shortage occurs in the years 1901, 1902 and 1903, and is chargeable as follows:—

Mr. T. Lachapelle ....$	301 83
Mr. W. R. Craig	1,316 90
	$1,618 73

1. The municipal cash book so far as this township is concerned has never been treated seriously, for the reason that the local auditors never conducted the annual examination of the accounts of the municipality by recognizing the cash book as the basis of the audit, they confined their duties as auditors to examining a book "Titled Journal" and which is partly a ledger and partly memoranda. The result of this perfunctory audit was (*a*) to overlook bank interest in the years 1901, 1902 and 1903, amounting in all to the sum of $521.82; (*b*) a loan from the bank on note of $3,000, on which discount of $15.30 was charged; (*c*) sundry charges by the bank in connection with debentures, etc., of $1.40; (*d*) credits to the township amounting to $30, charged against the Police Village of Russell for proportion of township officers' salaries; (*e*) an error of $1,000 in addition on page 118 of the ledger; (*f*) a difference of $284.91 between the balance starting the township accounts for the year 1902, and the balance found at the end of the year 1901, and (*g*) errors of 1c. on page 99, 6c. on page 100 and 1c. on page 133 of ledger.

12. Upon my finding these errors and discrepancies to exist I deemed it prudent to summon the auditors and took their evidence on oath on the 19th April, 1904, with the result that they confirmed my findings and explained the methods adopted in the course of their audit. The auditors confined their examination of the township accounts to the book "Titled Journal." They were particular to see that orders were produced drawn upon

the Treasurer for the several payments, but they did not observe that a great many of these orders had never been signed by the Clerk. They did not compare the stubs of the Treasurer's receipt book with entries in the "Journal," under receipts more than in a casual manner. The treasurers did not make it a rule to add up the several accounts of receipts and expenditures in the "Journal;" this duty was left for the auditors, with the result that errors in additions occurred and the treasurers only passed from one to the other the amounts or balances in their hands as found by the auditors. The auditors never compared the bank cheques with the payments in the Treasurer's books.

13. The municipal cash book contains no record of any transaction (receipts or expenditure) for the year 1903.

14. The statement furnished by the auditors to the Department of Agriculture and examined by me contain the same discrepancies in addition and otherwise as found by me in the books of the municipality.

15. The additions in the municipal cash book have been irregular, and were very incomplete until completed under my examination.

16. The payments of debentures have never been divided between principal and interest, and considerable difficulty was experienced by me in consequence in arriving at the total debenture debt of the township.

17. The liability of the township to the Police Village of Russell, as certified by the local auditors is incorrect, and is allowed by me at the 31st Dec., 1903, at the sum of $166.81. The local auditors passed a charge of $36.38 against the P. V. of Russell in connection with what is termed the "Cherry Award." This award relates to a drain passing through a portion of the P. V. of Russell. The township made a special levy in connection with this work against the several ratepayers benefited, and having collected the same, the amount is therefore chargeable against the township.

18. I append herewith the following statements of receipts and expenditure for the years 1898, 1899, 1900, 1901, 1902, 1903, and for the three months to 31st March, 1904. *(b)* Statement showing the cash shortage at 31st Dec., 1903, and at 31st March, 1904, showing the liability of the two treasurers of the township. *(c)* Statement showing the total debenture debt and the liabilities maturing in the year 1904. *(d)* Statement of the assets available to liquidate the several liabilities, and showing an actual deficit in assets of $2,879.86, which is subject to increase by the amount uncollectable from the two treasurers. *(e)* Statement of the Police Village of Russell for the years 1898, 1899, 1900, 1901, 1902 and 1903.

Drainage.

19. The following drainage schemes have either been completed or are in progress or under consideration:—

(a) York; *(b)* Hebert; *(c)* Bourbonnais; *(d)* Champagne; *(e)* Grignon; *(f)* Morrow; *(g)* Wood, Eadie; *(h)* Fournier Creek; *(i)* Marshall Sequin; *(j)* Dunbar; *(k)* Petit Castor; *(l)* Bissaillon; *(m)* Stanley Stephenson; *(n)* Wilson; *(o)* Pacquet McMahon.

20. Separate statements are attached to this report giving the standing of these drainage schemes as at the 31st Dec., 1903.

21. I further append statements of these several drainage schemes showing the engineers' original estimates and the expenditures under heads as nearly as possible to that estimate. The vouchers for disbursemets on these works are very complete.

22. The statements of the several drainage schemes giving effect to interest on monies in bank show the following results:—

(a) York	Deficit	of.....$	153 000	
(b) Hebert	"	"	55 22	
(c) Bourbonnais	Surplus	"		47 67
(d) Champaigne	"	"		572 83
(e) Grignon	Deficit	"	79 01	
(f) Morrow	"	"	348 98	
(g) Wood, Eadie	"	"	599 56	
(h) Fournier Creek	"	"	804 64	
(i) Marshall Sequin	Surplus	"		41 50
(j) Dunbar	"	"		2,103 32
(k) Petit Castor	"	"		8,115 78
(l) Bissaillon expenditure	"	"	15 25	
(m) Stanley Stephenson	Expenditure	"	56 19	
(n) Wilson	"	"	36 00	
(o) Paquet McMahon	"	"	165 26	
			$2,313 11	$10,881 10

23. Notes (*i*) Marshall Sequin item of $41.50 is payable to the Township of Cumberland.

(*j*) Dunbar item of $2,103.32 is payable to the Township of Osgoode, and should be dealt with by the township council at their earliest convenience.

(*k*) Petit Castor item of $8,115.78 is to be expended by the Township of Russell in building bridges on the Petit Castor river.

(*h*) The Fournier Creek drain is unfinished and the deficit of $804.64 will be increased.

24. I deem it advisable to call the attention of the council to the following matters in connection with the accounts of the several drainage schemes.

Re York Drain.—The engineer's report on this excavation estimates the cost at $2,580.10. I find the actual cost as per expenditure to be $2,839.21, leaving a shortage of $259.11, from which I have deducted $60.10 of premium on sale of debentures, and allowed $45.91 of interest earned by the debenture monies in bank, leaving a net shortage of $153.10. In connection with this drainage scheme I find that Mr. R. Morrow has been paid for farm crossings the sum of $7, instead of the sum of $3.50. He will therefore have to refund to the township the sum of $3.50. The township have a liability of $3.40 to T. W. Hamilton for work done as per engineer's report. Upon the recovery of the above amount of $3.50, and the payment of the liability of $3.40, then the York drainage scheme is entitled to recover from the several ratepayers benefited the sum of $153.

Re Hebert Drain. The engineer's report on this excavation estimates the cost at $1,245.20. I find the actual cost as per expenditure giving effect to the amount received from the Township of Finch of $132, to be $1,156.76. The levy on the ratepayers amounted to $1,068, which taken from the original cost leaves a shortage of $83.76, from which I have deducted the premium on sale of debentures of $28.83, and allowed the sum of $4.71 for interest earned by the debenture monies in bank, leaving a shortage on this work of $50.22.

I find a liability of $5 to O. Richard for farm crossing unpaid.

Upon payment of above liability of $5 then the Hebert drainage scheme is entitled to recover from the several ratepayers benefited the sum of $55.22.

Re Grignon Drain. The engineer's report on this excavation estimates the cost at $2,361.60. I find the actual cost as per expenditure to be $2,451.75, and there was raised by debenture the sum of $2,202.90, leaving

a shortage of $248.85, from which I have deducted premium of $59.48 on sale of debenture and allowed $28.51 of interest earned by the debenture monies in bank, leaving a balance of $160.86. The Township of Finch paid to the Township of Russell the sum of $70.85, and I find that payments in error have been made to Edmond Richard of $5; Alphonse Beuyere of $5; and Alphonse Courvalle of $6 for farm crossings, and that there remains an unsettled liability of $5 to Oliver Richer for farm crossing. Upon recovery of the above over-payments of $16, and the payment of the liability of $5. then the Grignon drainage scheme is entitled to recover from the several ratepayers benefited the sum of $79.01.

Re Morrow Drain. The engineer's report on this excavation estimates the cost at $3,733.74. I find the actual cost as per expenditure to be $4,015.21. There was raised by debentures the sum of $2,896.54. The Township of Cumberland paid to the Township of Russell the sum of $778, and there was realized the sum of $67.46 of premium upon the sale of debentures. I have allowed the sum of $20.33 of interest earned by the debenture monies in bank, after giving effect to these several credits I find the Morrow drainage scheme entitled to recover from the several ratepayers benefited the sum of $252.88, to which has to be added an unsettled liability of $31.10, allowance for work done, and $65 for farm culverts, in all the sum of $348.98.

Re Wood, Eadie Drain. The engineer's report on this excavation estimates the cost at $2,471.51. I find the actual cost as per expenditure to be $2,964.38; another was raised by debentures the sum of $2,280.75. The Township of Cumberland paid to the Township of Russell the sum of $110; another was realized the sum of $30.68 of premium upon the sale of debentures. I have allowed the sum of $539 of interest earned by the debenture monies in bank. There was also recovered the sum of $4 refund of freight. After giving effect to these several credits, I find the Wood, Eadie drainage scheme is entitled to recover from the several ratepayers benefited $533.57, to which has to be added an unsettled liability of $32 for farm crossings and $34 for private ditches, in all the sum of $599.56.

Re Fournier Creek Drain. Unfinished. The engineer's report on this excavation estimates the cost at $4,344.40. I find the actual cost to date as per expenditure to be $4,885.61, and there was raised by debenture the sum of $4,025.95. The Townships of Cambridge and Cumberland are assessed for $145.55, $172.90 respectively. Another was realized the sum of $53.41 of premium upon the sale of debentures. I have allowed the sum of $53.82 of interest earned by the debenture monies in bank. The unsettled liabilities on this work are as follows:—Contractor, $231.91; farm crossings, $48; private ditch, $19; rebates, $71.75, in all the sum of $370.66, exclusive of liabilities payable by the Township of Cumberland. After giving effect to the several before mentioned charges and credits I find the Fournier Creek drainage scheme is entitled to recover from the several ratepayers benefited to cover entire cost and liability to Dec. 31st, 1903, the sum of $804.64.

Re Champaigne Drain. The engineer's report on this excavation estimates the cost at $7,013.03. I find that the actual cost as per expenditure to be $6,817.33, and there was raised by debenture the sum of $6,659.13. The Township of Cumberland paid to the Township of Russell the sum of $241.30, and there was realized the sum of $178.47 of premium on sale of debenture. I have allowed the sum of $323.26 of interest earned by the debenture monies in bank. There is an unsettled liability of $25 for farm crossings. After giving effect to the several charges, unsettled liabilities and credits I find the Champaigne Creek drainage scheme has a surplus of $572.83.

Re Bourbonnais Drain. The engineer's report on this excavation estimates the cost at $6,250.25. I find the actual cost as per expenditure to be $6,295.52, and there was raised by debenture the sum of $5,609.50. The Township of Cumberland paid to the Township of Russell the sum of $530.73, and there was realized the sum of $150.44 of premium on sale of debentures. I have allowed the sum of $77.52 of interest earned by the debenture monies in bank. There is an unsettled liability of $25 for farm crossings. After giving effect to the several charges, unsettled liabilities and credits, I find the Bourbonnais drainage scheme has a surplus of $47.67.

Re Marshall Sequin Drain. The engineer's report on this excavation estimates the cost at $3,372.36, apportioned as follows:—Township of Cumberland, $1,789.84; Township of Russell, $1,582.52. I find the actual cost as per expenditure to be $1,491.64. The amount realized from the sale of debentures was the sum of $1,556.49. I have allowed the sum of $7.65 of interest earned by the debenture monies in bank. There is an unsettled liability for farm crossings of $31. After giving to the several charges, unsettled liabilities, and credits, I find the Marshall Sequin drainage scheme has a surplus of $41.50.

Re Dunbar Drain. The engineer's report on this excavation estimates the cost at $3,084.55, apportioned as follows:—Township of Osgoode, $883.28; Township of Russell, $2,201.27. I find the expenditure by the Township Russell to amount to the sum of $85.28. I have allowed the sum of $4.47 of interest earned by the debenture monies in bank. Debentures were issued to the amount of $2,201.27, and realized the sum of $2,184.13 After giving effect to the several charges and credits the balance of $2,103.32 should be paid over to the Township of Osgoode, and I recommend the Council of Russell to take the necessary action to have this payment made.

Re Petit Castor Bridges. I find no engineer's report in this neither copy of specifications or contract. This work is undertaken by the Township of Winchester to excavate the Petit Castor River, and the Township of Russell have undertaken to build the bridges necessary in that township for which debentures were issued for $7,906.85. These realized a premium of $103.94. I have allowed interest on the debenture monies in bank amounting to $319.72. The expenditure to 31st December, 1903, amounts to $214.73. The amount at the credit of this work available to build bridges is the sum of $8,115.78.

Re Bissaillon Drain. This work is unfinished, in fact it is at present under consideration. No money has been borrowed on debentures, and the only transaction giving evidence of the possibility of such a work eventually being realized is a charge of $15.25 for engineering.

Re Stanley-Stephenson Drain. The charges to December 31st, 1903, in connection with this work is a payment to the Township of Finch of $35.43 and law costs of $20.76 in all the sum of $56.19

Re Wilson Drain. The charges to 31st December, 1903, in connection with this work is a payment of $36 on account of engineering.

Re Pacquet McMahon Drain. The charges to 31st December, 1903, in connection with this work amounts to engineering $155.26, amending by-law $10, in all, the sum of $165.26.

Re The Several Drainage Schemes. In the year 1903 Mr. P. E. Guerin, the then Township Clerk, prepared six amending by-laws for the purpose of adjusting the several drainage schemes of the township, and received

fees for the work as follows:—Pacquet McMahon $10, Hebert $20, Grignon $20, York $20, Bourbonnais $20, Champaigne $25, amounting in all to the sum of $115, with the exception of the York drain amending by-law, no schedules of assessment or refund chargeable against or allowed to the several ratepayers are attached to the several amending by-laws, and in every case the amounts of extra levies or refund are inaccurately computed. I recommend the Council of the Township of Russell to call upon Mr. P. E. Guerin to refund the sum of $115 or assume the responsibility and expense of having new amending by-laws prepared to provide for the correct extras levied or refunds in connection with the adjustment of the balances on the several drainage accounts.

Re Duties of Clerk. Mr. P. E. Guerin was Clerk of the Township of Russell for two years 1902 and 1903, and I find that he received in fees and salary everything he was entitled to, provided that his duties as Clerk were complete. One or two by-laws are copied in the by-law book of the township, and not one of the amending by-laws referred to in the immediately preceding paragraph are copied in the by-law book of the township. Mr. P. E. Guerin should be called upon to have this duty completed or to arrange that the cost of same should be provided for.

Re Grignon Drain. In connection with this matter I have given effect to the refund of $6.00 for farm crossing, a duplicate error issued to Alphonse Courvalle, ex-Reeve Paquet has stated to me his willingness to refund this amount and I therefore recommend the council of the township to call up ex-Reeve Paquet for this refund.

Mr. W. R. Craig has occupied the office of Clerk for many years, and I must express my satisfaction in the manner I found the execution of his duties as Clerk. He is well acquainted with the Municipal and Drainage Acts, and is particular about details.

Mr. T. Lachapelle, the Township Treasurer, has one or two orders for sundry payments in connection with drainage and other schemes. I have suggested to him to pay nothing further on these orders until he is authorized to do so again by the council. The council before authorizing the Treasurer to continue payments on these orders will first consider the several drainage schemes as embodied in this report, have amending by-laws prepared and passed in order that the several balances may be adjusted; have new orders issued, correctly prepared, drawn upon the Treasurer and have these take the place of these already in existence, and in the possesion of the Treasurer.

I must express my satisfaction in the manner the duties of the Treasurer are performed by Mr. T. Lachapelle.

The Reeve, the several members of the council and officials of the corporation of the Township of Russell, and others have throughout evidenced the utmost willingness to aid this investigation, and have rendered substantial assistance from time to time.

Further explanations will be furnished to the council or officials in connection with any matter contained in this report.

All of which is respectfully submitted.

G. O. Merson,
Chartered Accountant.

Toronto, 19th May, 1904.

TOWN OF SMITH'S FALLS REPORT, JULY 1904.

T. G. Williamson, Auditor.

Toronto, July 11th, 1904.

His Honor, the Lieutenant-Governor of Ontario in Council:

Sir,—By authority of an Order-in-Council, signed by Your Honor on the 8th day of January, 1904, and under instructions from the Provincial Auditor, I proceeded, on the 13th idem., to the town of Smith's Falls, for the purpose of making an inspection, examination and audit of the books, accounts, vouchers and moneys of the Municipal Corporation of that town.

2. This audit had been petitioned for by certain ratepayers of the said town, who desired it to extend for five years from 1st January 1899. The petition stated that large sums of money had been raised by sales of debentures, and expended during this period, and it was desired that the exact financial position of the municipality should be clearly made known.

Collection of Taxes and Water-rates.

3. It became necessary to look into this matter, as the Collector, Mr. Williscraft, was quite unable to balance his accounts so as to make a settlement with the Treasurer. According to his calculations, he had already paid in a considerable sum more than was called for by the Collector's roll. A first examination of his accounts failed to account for the discrepancy and it was not until the Collector's roll of 1903 was strictly examined from first to last that the cause of the difference was discovered.

4. The Collector's roll, which is prepared in the office of the Town Clerk, was found to contain a variety of errors, but especially one gigantic error in which, by the carrying forward of a total from one page to the second page following instead of to the first, the grand total of the Collector's roll was reduced by an amount of between seven and eight hundred dollars.

5. It appears that last year the Town Clerk having too much business on his hands was unable to complete the Collector's roll, and that he requested the town council to furnish him with some assistance. The Town Treasurer was deputed to render this assistance. Therefore it happened that a certain portion of the Collector's roll, amounting to about one-third, was prepared in the office of the Town Clerk, and the remainder by the Town Treasurer. It is highly creditable to the latter official that none of the errors appeared in the part of the roll prepared by him.

6. When these errors in the 1903 roll were discovered an exact settlement with the Treasurer was within measurable distance and was soon ac-

complished, as has already been reported to the town council in connection with the 1903 audit.

7. The same Collector, Mr. Williscraft, has collected the water-rates ever since the town had acquired the water-works. These collections were also in a most unsatisfactory condition. There was no evidence that annual settlements had been made, either as to taxes or water-rates, between the Treasurer and Collector. Repeated inquiries failed to produce any such documents. The Town Treasurer examined all the papers in his safe and could find nothing. The Town Clerk expressed his opinion that there had been no such settlements, and from all extraneous evidence this must be taken to have been the case.

8. It is hardly necessary to say that with such management of the town's principal finances, they soon got into a chaotic state. It is somewhat surprising that with so many intelligent and capable business men in the council, affairs should have been allowed to get into this state. Such is the fact nevertheless, and it became necessary to examine in detail the collection of water-rates from the very commencement. This in itself was a work involving great labor and taking up much time.

9. My co-auditor of 1903, Mr. R. J. Oliver, is to be credited with the greater part of this work, and we were finally able to reduce these matters to an exact settlement, as already reported to the council in connection with the 1903 audit.

10. We have every reason to believe that these figures are absolutely correct and capable of proof from the Collector's and Treasurer's books. Having rescued these matters from the chaotic state in which they were found, it is to be hoped that the council will see to it that they do not drift again into the same condition.

11. As collateral evidence of the extremely confused state of the collector's finances, it may be mentioned that two years ago a special committee of council was appointed to look into these particular matters and bring the books of the Collector and the books of the Treasurer into some kind of an agreement. The committee, after a long and tedious examination, reported that the discrepancies between the two sets of books were beyond their power to rectify and closed their report by very decided instructions to the Collector to see that he should make accurate settlements in the future.

12. It is hardly necessary to point out the danger in which the corporation lay during those years when it appeared to be nobody's business to take cognizance of how the Collector was doing his duty. It would not be fair to leave this part of the subject without saying that the Collector took a great deal more trouble in keeping his accounts than Collectors usually do, in so much that he had prepared for himself a special book for the taxes and a special book for the water-rates in which he recorded each collection and its date. I have never seen such books before in the hands of a Collector and it must be admitted that they were of great value to the auditors in arriving at an exact conclusion as to how matters stood between the Collector and the corporation.

13. The system by which the Collector deposited all moneys in the bank in his own name is a vicious one, which should not be tolerated in any municipality. There should be opened at the bank a tax account from which no moneys should be removable except by cheque of the Mayor and Treasurer. Into this account should be paid daily if possible all moneys of the corporation collected on this account.

14. The Collector, when making his deposit, should prepare a duplicate slip which should be initialed and returned to him by the bank teller. This duplicate slip when handed to the Treasurer would be sufficient proof that a certain sum had been deposited to the credit of the town, and this amount the Treasurer would at once enter in his cash-book. By this means the control of all the large amounts collected for taxes would pass at once into the hands of the corporation, a state of things very much to be desired. The moneys in this account could be removed at convenience by the Mayor and Treasurer and apportioned to the various funds for which it had been collected.

Bank Accounts.

15. One of the most fertile sources of trouble and disarrangement in municipal finances has been the failure to keep strictly separate all funds collected or procured for special purposes, such as moneys for schools, moneys received from sale of debentures, moneys collected for payment of debentures, etc.

16. To avoid the pitfalls which beset the path of any municipality which keeps all its moneys in one purse, it is desirable that another bank account should be opened, under the name of "Trust account" into which should be paid all moneys collected for special purpose.

17. An improved system of council orders should be also initiated which could be straightway transformed into bank cheques by the simple endorsation of the Treasurer. And, to make orders upon different accounts readily distinguishable from each other, it would be well that they should be printed on paper of different tints.

18. To complete these two accounts, it will be found desirable to open a third municipal bank account to be called "Tax account", into which the Collector should be instructed to promptly pay all taxes collected, taking from the bank a certified duplicate slip, which he will produce to the Treasurer as his voucher that these moneys have been deposited. The Treasurer will retain the certified slip and give the Collector a receipt for the amount. These moneys will be removable only by cheques of Mayor or Treasurer jointly.

19. The advantages of this change will be threefold, viz.:

A. As a safeguard. The moneys go directly to the bank and into the control of the corporation. The Treasurer is saved all counting, handling and depositing of the tax moneys. And the Collector should welcome the change also, for his responsibility ceases as soon as the moneys are deposited.

B. Because the tax moneys are all recorded together, the account will be of great assistance to the Collector and Treasurer in coming to a final settlement, and to the auditors in reviewing the work of the year.

C. The account will be a convenient, and even a necessary, means of apportioning accurately the special and general taxes as collected. Periodically, perhaps once a fortnight, the Collector should furnish to the Treasurer a statement showing the amounts deposited on the various accounts, which can then be transferred to the "Trust account", and "Current account" respectively by cheques of the Mayor and Treasurer.

20. Each of these three reasons is sufficient in itself to justify this change. Conjointly, they show advantages which cannot be overlooked or disregarded. There can be no doubt that this system, if properly applied, will work like clock-work and give the greatest satisfaction to the officials, the auditors and the ratepayers. Full auhority for this change will be found in R. S. O. ch. 228, sec. 19.

Debenture Sales of 1900.

21. These were the most important sales of debentures made by the town, and the ratepayers have been desirous to have the verified particulars of the transactions. This matter has been fully inquired into, and various letters from Toronto and Montreal purchasers are enclosed with this report, which show clearly that the Mayor spared no effort to sell the debentures to best advantage.

22. The form in which they were prepared was unfortunate and militated much against their sale. They were prepared without coupons, and could not be readily broken up into small lots. It therefore, became necessary to find a buyer who would take the whole lot, and the number of buyers who will purchase $150,000 worth of debentures in one lot, is not large in Canada. The best sale made by the town during that year, was a small lot of about $4,000 at par. In view of the extreme difficulty of handling the large lot, it would appear to me that the sale at 2½ per cent. discount must be considered a good one.

23. The various brokers were unable, after months of work, to make any definite offer, although the town was willing to sell at 97½ per cent. Finally Mr. F. A. Bethune was able to procure this price from a company which he represents, and the sale went through, he receiving ¼ per cent. commission, so that his company actually paid 97¾ per cent. Under circumstances of such difficulty, it would not have been matter for surprise if the town had been compelled to grant a discount of 5 per cent. insead of 2½ per cent.

Sale of Debentures.

24. As this transaction was very important and is of considerable interest to the ratepayers, it may be well to give brief extracts from the correspondence received by the Mayor on the subject. The writers are all insurance companies or brokers.

2*nd January*, 1900.

I am not prepared at the present time to consider any purchase of bonds at a rate that will yield the company less than 4¼ per cent. per annum.

6*th January*, 1900.

I am not inclined to recede from the price which I thought the bonds ought to yield the purchaser, namely 4¼ per cent. Times will no doubt change later on, although at the present I cannot see my prospect for cheaper money within any reasonable period.

10*th July*, 1900.

We have just bought some bonds of the town of . . . to yield us 4⅛ per cent. if your town is disposed to sell at this figure we may do some business.

11*th July*, 1900.

We regret that we are unable to use them on our market.

26*th September*, 1900.

We believe that we can get an order for a small amount. say $10,000. provided you will sell them to yield 4⅛ per cent. interest net. . . . We think,

taking everything into consideration, that unless you know positively where you can do better, it would be well for you to give our client the offering of them at his price.

6th December, 1900.

I should like to get a refusal to have your bonds to yield more than 4¼ per cent. per annum less one-half per cent brokerage.

11th December, 1900.

We do not see any prospect of selling them except at a discount, consequently would not care to make any bid for the bonds or go to the trouble of offering them when we know they would not sell. If they were made 4½ per cent's. and bore coupons we could no doubt handle them, but unless they bore coupons we could not handle them under any circumstances as they could not be divided.

12th December, 1900.

We may say that we have several offers to take lots of $10,000, which we may be able to supply with the 3½ per cent's. . . . It is simply astonishing the amount of bonds that are offered in the market at the present, it is certainly having a considerable effect on prices.

The letter from Ex-Mayor A. G. Farrell, to myself, dated 28th of May last, shows also that he spared no trouble to place these bonds.

25. It is regrettable that it should be necessary at this late date, to enter into the details of this sale. The Treasurer's cash-book should have contained at the time the exact amount received, with full particulars of how the amounts were arrived at, so that the ratepayers would have been fully apprised of the whole matter.

Collector's Roll, 1903.

26. The incomplete and incorrect condition of this roll has been responsible for a great deal of the difficulty in arriving at an exact settlement with the Collector. The work of detecting and eliminating its numerous errors occupied much time. It is almost incredible that this roll, which is one of the most important financial documents of the municipality, should be allowed to go forth before it had been revised, so as to assure that it was correct in every particular.

27. The Collector's roll should contain all the particulars prescribed by law (R.S.O. Chap. 224, sect. 129 to 132.) If this had been done, and the totals from each page had been tabulated at the end of the roll, the totals of the separate pages could have been made to prove the correctness of the grand total. As it was, the roll containing errors amounting to between seven and eight hundred dollars and the Collector was, of course, quite unable to balance his accounts under these circumstances.

28. The principal error was in the carrying forward of totals. The carrying forward of totals from page to page is to be deprecated for various reasons. If mistakes are made and afterwards discovered, every page subsequent to the errors must be altered. On the other hand, if each page stands by itself and does not appear in the totals until the whole are tabulated at the end of he book, any corrections are easily made and affect only the page on which they are found.

Municipal Cash Book.

29. The only absolutely complete system of keeping the municipal cash book, so as to reap full advantage of all its good points, is to carry the additions of each column forward, right through to the end of the year. The cash-book, thus treated, fulfils during the year the functions of the ledger as well as of the cash-book, each column being practically the same as a ledger account.

30. There is no absolute necessity for entries into the ledger being made more than once a year, excepting "miscellaneous items" which must be separated into their respective accounts. This is a great saving of time. The system gives some work in carrying forward the numerous amounts.

31. If this is felt a drawback, there is an available and alternative system which avoids, to some extent, the labor of these repeated transfers, and which still gives at the end of each month the same complete information. This alternative plan calls for the carrying of the totals, each month to be added to the summation of the succeeding one. Thus, January additions will be carried to the end of February, and these to the end of March and so on through the year.

Assessor.

32. There is no municipal official who has more important duties and responsibilities than the Assessor. The assessment constitutes the foundation upon which the taxes are levied, and the taxes constitute practically the entire income of the municipality. The appointment of assessors is seriously dealt with in sections 295 to 298 of the Municipal Act.

33. The duties of assessors are laid down in the Assessment Act and every assessor should have ample opportunity to study the instructions in sections 13 to 61. He is required to return his roll "*completed and added up*" by a certain specified time, and he is required to attach thereto his affidavit or solemn affirmation that he has performed his duties honestly and in accordance with law.

34. These are the actual words of the affidavit with respect to the various properties assessed: —

> "I make oath and say . . . that I have . . . set down in the "above assessment roll all the real property liable to taxation ". . . and I have justly and truly assessed each of the parcels of "real property so set down at its *actual cash value* as it would be ap- "praised in payment of a *just* debt from a *solvent* debtor."

35. It can hardly be contended that the valuations which have hitherto appeared in the assessment rolls of your town have been based upon the above principle. The town's assessment is admittedly too low, and there are various sufficient reasons why it should be advanced, so as to more nearly coincide with the principles laid down in the Act.

A. An increase in the assessment does not mean an increase of taxation. The same amount will be required for the town's expenses whether the assessment be high or low.

B. An unduly low assessment does actual injury to the financial reputation of the town. When you have debentures for sale, the first question an intending purchaser asks is "What is the total assessment?" Upon this and the total debt he forms his estimate of the value of the securities.

C. Low assessment means high rates. There is nothing more likely to dissuade settlers or investors than a high tax rate.
D. Low assessment unduly and unfairly restricts the number of ratepayers eligible for a seat at the council board.
E. It is safer to keep away as far as possible from the limit of taxation, as laid down in the Municipal Act, section 402.

36. The assessment rolls and Collector's rolls are of similar size and have generally the same number of lines on each page, with the apparent object that each page of the one shall correspond with the corresponding page of the other. There is decided advantage in this. When the Clerk adds up the assessment as entered on each page of the Collector's roll, and finds that the totals correspond with the same pages of the assessmnt roll, he may be practically sure that his figures so far are correct, and he can proceed with full confidence to his calculation of the various rates and to the completion of the roll.

37. The Assessment Act, section 130 (2) requires that the Clerk shall append a table setting forth.

A. The total amount of taxes levied in the roll.
B. The name, amount and aggregate proceeds of each separate rate levied.

This abstract settlement is required by the auditors in order to enable them to make a complete and satisfactory audit.

38. To show the fair value of all the taxable property in the town will tend to increase its dignity and credit. Although there may be some fixed assessments upon which taxes have to be paid that should not interfere with the full value of the properties appearing in the roll.

Severe penalties can be inflicted upon any Assessor who does not fulfil his duties properly.

39. In municipal finance, a certain sum of money must be collected to defray the annual expenditure, and any ratepayer who shirks any part of his fair liability, thrusts the same upon his neighbors. This is what any one should naturally avoid.

License Fund.

40. The total amount paid to the Municipality by the License District of South Lanark since beginning of January 1899 was $7,838.22, all of which is duly accounted for in the Treasurer's books.

Auditors Report, 1903.

41. This report, which was sent in some time ago, contained considerable information which it is not necessary to introduce in this report. The statements included with the report were,

1. Abstract of receipts and expenditures for 1903.
2. Details of receipts and expenditures for 1903.
3. Assets and liabilities as on 31st Dec. 1903.
4. Statement of money by-laws 31st Dec. 1903.
5. Current revenue account 1903.
6. Statement of taxes 1903.
7. Water-works abstract of receipts and expenditures 1903.
8. Water-works details of receipts and expenditures 1903.
9. Water-works assets and liabilities as on 31st Dec. 1903.

10. Memo. for settlement between Tax Collector and Town Treasurer.
11. Memo. for settlement between water-rates Collector and Town Treasurer.
12. Memo. for settlement between water-rates Collector and Water-works Department.

42. The accounts of the water commissioners, of the board of education and of the old library board were all duly audited and found in order.

Fire Protection.

43. Just what proportion of the water-works department can be fairly charged to fire protection has long been a disputed point. On one side it is argued that fire protection should be charged only for the water which it actually uses. But this is a very incomplete view of the position. The first necessity for water supply by power is for the protection of life and property. A very great part of the heavy cost of the system is by reason of the installation of larger power and heavier mains than would otherwise be necessary so as to furnish the supply and pressure required by the Fire Department whenever a fire is in progress.

44. Not only is the original cost increased. The keeping up at all times day and night, winter and summer, of the high pressure increases considerably the cost of maintenance. If the fire department were charged its proper share of the expenses alike of installation and maintenance, the balance would represent what consumers should pay for their supply. The community must pay the entire expense. Whatever share is charged to the Fire Department must be collected in the general rate, and whatever is charged to the consumers is collected in the form of water-rates.

45. It can hardly be denied that,

1. Fire protection should be paid for by all ratepayers, according to their respective interests.
2. Water supply should be paid for by all consumers according to the quantity used. Presuming that it had been necessary to install two systems, one for fire protection and the other for water supply, an absolutely clear view could be obtained. Taking all of the matters into consideration, a charge of $40 for each hydrant cannot be considered excessive.

Water-works.

46. These works are the most important asset of the corporation, and it behoves the council to manage them with the greatest foresight and prudence. The town is peculiarly situated, in so far as the soil is very shallow, and, in digging, the hard rock is soon reached, which means heavy expense. There is no doubt that the town has in its water-works and sewerage a serious problem, which if not handled with great discretion may result in increasing greatly the municipal debt which has already attained to a considerable amount.

47. The special legislation procured by the town empowering the council to proceed with the sewerage works and to issue debentures for the expense thereof without asking the authority of the ratepayers gives the council a very dangerous power.

48. The supplying of meters to all large consumers would be found to be decidedly profitable to the town.

The town must bear its fair share of the expenses for,

1. Hydrants for fire protection.
2. Water used for sprinkling streets and parks and for flushing sewers.
3. Free water supplied to various factories.
4. Water supplied to schools and municipal buildings.

For the use of hydrants $40 per year is generally admitted to be a reasonable charge.

Plumbing.

49. In connection with the water-works, a most desirable movement would be to establish a system of licensing plumbers whereby the corporation could retain control of all their work and insist and compel them to furnish complete records of all the work they do, so that the town engineer may be fully provided with this most necessary information.

Audit.

50. An important privilege was granted by the Legislature to municipal councils a few years ago, of which it may be found desirable that you should take advantage. Before this change was introduced, the new Council was instructed by the Act to appoint, at its first meeting, two auditors to review the financial transactions of the preceding year. This necessarily limited municipalities to yearly audits.

51. The change recently introduced gives to the council of any municipality the right to pass a by-law declaring that it is expedient to appoint auditors in November or December to review the work of the succeeding year. See Municipal Act, section 301. According to section 302 these auditors shall examine and report upon the accounts at the end of each month, instead of at the end of each year.

52. It will be observed that, although the change permitted is highly important, the principle underlying the original enactment has been carefully preserved. Hitherto, the new Council has been authorized to appoint auditors to review the work of the old council. Now the retiring council can appoint auditors to review the work of its successors. But neither council can appoint auditors to review its own work.

53. Some of the advantages likely to result from the new procedure may be mentioned.

A. The auditors can more completely review a month than a year. The larger the period to be covered, the more danger is there that some details may be overlooked.

B. The work is audited while the transactions are recent and fresh in memory, and the work will to some extent occupy the minds of the auditors during the whole year.

C. The monthly reports will give satisfaction and confidence to the Council, to the Treasurer and to the ratepayers generally.

D. Early in December, the accounts will be audited up to 30th November, and there should be but little difficulty in arranging to have the accounts up to the 15th December examined before the annual statement is published.

54. It is almost unnecessary to call attention to the great advantage of being able to publish a fully audited statement up to 15th December instead of the usual statement, which is frequently far from being correct.

Public School Moneys.

55. Various Acts of the Legislature lay down rules for the guidance of Trustees and others in the management of school affairs. A few extracts may be appended with advantage, as these matters are not generally so clearly understood as they should be.

56. The Public School Act of 1901, section 65 (9) calls upon the Trustees to submit to the Municipal Council on or before the first day of August, or at such time as may be required by the Municipal Council an estimate of the expenses of the schools under their charge for the current year.

57. Section 71 (1) of the same Act says that "the Council of every municipality shall levy and collect upon the taxable property of the municipality . . . such sums as may be required by the Trustees for school purposes and shall pay the same to the Treasurer of the Public School Board from time to time as may be required by the Board for Teachers' salaries and other expenses."

58. The Assessment Act, section 223, says that the Councils in paying over any school or local rate, shall supply out of the funds of the municipality any deficiency arising from non-payment of the tax. This is subject to a certain proviso with regard to taxes on personal property.

59. The Public School Act, section 65 (11) calls on the Trustees "to submit in the case of Urban municipalities, all accounts, books and vouchers to be audited by the municipal auditors (whose duty it shall be to audit the same) and to publish as soon as the audit is made, in one or more of the public newspapers, or otherwise, an abstract of the annual report of the auditors, with such findings and recommendations as the auditors deem expedient."

60. The sections quoted regulate the principal mutual business transactions occurring between the Municipal Council and the Board of Trustees during each year. It is noteworthy that section 71 (1) of the Public School Act gives no latitude to the Council in the matter of school moneys. It says that the Council *shall* levy and collect *such sums* as may be required by the Trustees.

61. Because the school moneys are collected by the Council and paid over to the Trustees, some ratepayers take the superficial view that the municipality actually provides the funds, but these are, with the exception of Government Grants, entirely provided by the school supporters themselves.

62. Practically the school position is as follows:—

The school supporters, by their chosen representatives, the Trustees, say to the Council,

"The school will cost so much this year. We are willing to pay this but we have no machinery for collecting it. You have the machinery and the power to collect it. Please collect this money from us and hand it over to the Trustees."

63. The fair and equitable principle is certainly that the School is entitled to every cent levied on its supporters. The principle upon which (see Assessment Act, sec. 223) Councils are held liable to make good any taxes not

collected is clearly because they have been granted full power to collect, and if they cannot collect promptly, they can do so later, by sale, if needed, of the lands assessed.

64. This view is further confirmed by the terms of the proviso in the said section 223, in virtue of which Councils are not required to make good for school rates any taxes uncollected on personal property, as they have not the same powers over personal property as over real property.

65. In striking a rate, it is almost impossible to make an absolutely exact levy. That being so, the rate should be fixed so as to produce rather more than less than the sum called for. Besides conforming with section 71 (1) of the Public Schools Act, this is clearly in the interests of the ratepayers generally, for the School supporters will thus bear the full levy, but if a smaller sum be levied, the general funds may be called upon to make up the shortage.

66. The Treasurer, according to the Municipal Act, section 290, "shall receive and safely keep all moneys belonging to the Corpora-"tion, and shall pay out the same to such persons and in such man-"ner as the laws of the Province and the by-laws or resolutions of the "Council of the Municipal Corporation, whose officer he is, direct."

67. His power to pay is definitely restricted. He must have authority from the Legislature or from the Town Council. There are various payments which, in the ordinary course of events, must be made by the Treasurer, without previously receiving the Council's authority, so as to avoid delay and expense. Railroad freights on material ordered for the departments are in this class. It is not fair, nor is it desirable, that the Treasurer should be required to assume any responsibility which can be properly avoided.

68. Therefore it would be well that the Council should pass a short by-law, giving the Treasurer authority to pay certain specified charges, with the proviso that the receipts be produced for ratification at the next following meeting of the Council.

69. The items which might be suggested as suitable for such treatment are,

1. Railroad freights on material ordered by the corporation.
2. Officials' salaries, as laid down by by-law.
3. Department pay rolls, when bearing the signatures of the chairman of the Committee and the Chief of the Department.

70. The by-laws might include authority for school payments also, unless the Council thinks it desirable to see each separate requisition before being paid. This is a matter which would be largely decded by the local circumstances.

Board of Health.

71. These accounts are in an unsatisfactory condition. During the five years under review large amounts of municipal funds have been expended by this Board, and yet a few weeks ago no accounts whatever had been prepared. This is not at all as it should be. The ratepayers are fully entitled to audits of all disbursements of municipal funds. R.S.O. ch. 228, gives ample power to insist upon a production of such books and accounts.

72. The Board of the New Public Library stands in a somewhat unique position, inasmuch as it has not been disbursing municipal funds, but sums received from Mr. Carnegie. The Board intends as soon as possible to submit the vouchers and accounts to the town auditors, and this should be satisfactory to the ratepayers.

Annual Statement of Receipts and Expenditures.

73. It had been my intention, had time permitted, to procure a book for the purpose of entering up these statements for the last five years so that they could be seen in juxtaposition for the purposes of comparison. I shall procure the book and send it down to the Town Treasurer by whom these entries had better be made and kept up annually.

74. The latter part of the book is ruled so as to make it easy to keep a clear record of all debentures due in each particular year. This is a matter which your Mayor is very anxious should be made quite clear every year to the ratepayers.

75. The absence of schedules appended to this report is fully explained by the fact that all necessary schedules have already been sent in to the Council with the 1903 audit, as is recorded in paragraph.

76. With regard to the extraordinary powers which the Council has in the matter of sewerage extension it should be a matter for serious consideration by the ratepayers, whether an application should not be made by the town to the Legislature for repeal or partial repeal of these powers.

77. I regret extremely that a sudden and severe sickness has delayed this report considerably.

I have the honor to be, sir,

Your most obedient servant,

T. G. Williamson,
Chartered Accountant.

The cost of this audit was $420.00.

Township of Wainfleet Report. July 1904.

T. G. Williamson, Auditor.

Toronto, July 15th, 1904.

His Honor the Lieutenant-Governor of Ontario in Council.

Sir,—By authority of an Order-in-Council, signed by your honor on the 31st day of May, 1904, and under instructions from the Provincial Municipal Auditor, I proceeded on the 7th June to the village of Marshville for the purpose of making an inspection, examination and audit of the books, accounts, vouchers and moneys of the municipal corporation of the Township of Wainfleet.

2. This audit has been petitioned for by certain ratepayers of the said township for the following reasons:

1. The reeve publicly acknowledged a deficit of $126.00 that he could not account for.
2. That three members of the council are illegally self-appointed members of the board of health and vote themselves pay for same.
3. That councillors perform labor and supply material to contractors of the municipality.

4. That the financial statement for 1903 as to county rate is false and misleading.
5. The councillors draw committee pay from the general funds of the township for work performed on ditches under the Ditches and Water Courses Act and Municipal Drainage Act.
6. That the reeve refused to lay on the table the accounts for committee pay of two councillors when asked by a ratepayer.
7. One councillor acknowledged his disqualification at the first sitting of the council and is still retained in the council.
8. That a contractor for 1903 was an auditor for 1903 for the township.

3. Major Barwell, the chief petitioner, was the only one who appeared to support the allegations in the petition. He made mention of many different matters, some of which were only suited for examination in the police court, and others appeared to be based to a great extent on suspicion and not to have proper foundation.

4. The matters were duly inquired into and found to be as follow:

1. The amount therein mentioned clearly refers to the amount of $127.31, returned to the county treasurer, as per auditor's report of 1902.
2. There is nothing in the Act, R.S.O. ch. 248, to prevent the members of the council from appointing themselves as members of the board of health. They have no power, however, to vote themselves any fees for this work and any moneys which have been paid to them must be refunded.
3. This matter will be dealt with more particularly later in this report.
4. There is no proper foundation for this statement.
5. This matter will also be dealt with more particularly in this report.
6. The reeve explains this by saying that he had not been given notice that these documents were required and had not brought them with him from his residence, several miles away.
7. This is a somewhat vague charge, and was not backed up by any sufficient evidence.
8. This is a very small matter; the facts in question are: There is a hall in the township owned by some society and held for it by trustees, of whom Mr. J. V. Williams is one. The municipality rented this hall for a voting booth for which it paid Mr. Williams as trustee a small sum. There is also another matter in this question in which Mr. Williams supplied the township with a certain quantity of white oak, which I understand was unprocurable elsewhere.

5. The treasurer, Mr. A. B. Maclean, appears to be essentially the right man in the right place. His books and accounts are well kept and the cash in his possession on behalf of the township was duly accounted for to me on the morning of my departure. I have shown him some methods by which he can make better use of the advantages offered by the new Municipal Cash-book of which he is ready to avail himself. The township is most fortunate in having such an able and trustworthy treasurer.

6. The clerk, Mr. John Henderson, has held this position for about one-quarter of a century and has kept the books of record generally in good shape. It appears, however, that it has not been customary in this township to retain and take care of the original bills which are sent into the council for work done, goods supplied, etc., etc. This is not as it should be as it leaves no particulars for reference except the reeve's cheques,

which give no particulars except the amount and the payee. It is most desirable in the interest of the township that these original bills should be carefully preserved, as indeed they are in every other municipality which I have ever visited.

7. *Tax Collections.* These are in a very satisfactory shape, the collector apparently succeeding in accounting for everything on the roll. The complaint that the collector carries taxes over from one year to another is not supported by evidence, as the only item to which it can refer is a amount of $11.17 due to the treasurer from the collector in 1902, and carried over by inadvertence or oversight to 1903.

8. Referring to clause 3 of the petition, it would appear that a considerable amount of laxity has prevailed at the council board with regard to the granting of orders. These have been frequently granted without the submission of original detailed accounts. No order should be passed without a written account which should be retained by the clerk and either filed by him or attached to the orders when they go to the treasurer. In such case the treasurer would file the orders and original documents together and the auditors would be in a much better position to do their work well, having the original accounts and the orders also before them.

9. In the matter of payments to councillors this laxity has also prevailed. This is not as it should be. The council is in a position of trust, handling the ratepayers' moneys, and they cannot be too careful in disbursing these moneys, more especially when making necessary payments to themselves.

Section 80 of the Consolidated Municipal Act, 1903, says:—"No person having by himself or his partner an interest in any contract with or on behalf of the corporation or having a contract for the supply of goods or materials to a contractor for work for which the corporation pays or is liable directly or indirectly to pay or which is subject to the control or supervision of the council or of an officer thereof on behalf of the council shall be qualified to be a member of the council of any municipal corporation."

10. Referring to clause 5 of the petition, there is nothing in the Acts quoted, giving councillors power to recompense themselves. In the Ditches and Watercourses Act the reeve takes the position of representative of the township. In the Municipal Drainage Act the council is now authorized to appoint two residents as drainage viewers.

11. At page 41 of the minute book, various payments to councillors for assistance are recorded. Enclosed with this report are various schedules, being copies of the accounts of Mr. E. Gardiner, Township Engineer. These copies are sent for the purpose of showing fully how these accounts are made up. These are matters which must be strictly inquired into when the settlements are being made, as to whether they are legal payments or illegal payments. If any illegal payments are made, sec. 80, already quoted, hangs over the payee ready to disqualify him.

12. *County Rates.* A memorandum of all amounts paid by the township to the county treasurer since January, 1898, was procured from that official, and the amounts agree exactly with the treasurer's books.

13. *Non-Resident Taxes.* In the same manner the list of non-resident taxes received from the treasurer was procured and found to be fully accounted for.

14. *License Fund.* All sums received from the license inspector since July, 1900, are duly accounted for.

15. In closing this report it may be well to say, that although the bulk of the claims in the petition are unimportant, there are some things which it has been well to inquire into. There has been a certain amount of carelessness and laxity in one or two directions, of which it is to be hoped the last has been seen. Apart from this the affairs of the township appear to be well and skilfully managed, a state of things upon which the township is to be congratulated.

I have the honor to be,
Sir,
Your most obedient servant,

T. G. WILLIAMSON,
Chartered Accountant.

Cost of this audit $125.

Report Township of Tilbury West, County of Essex, August, 1904.

F. H. MACPHERSON, F.C.A.,
Auditor.

Report of Special Inspection, Audit and Examination of the Books, Accounts, Vouchers and Moneys of the Municipal Corporation of the Township of Tilbury West, in the County of Essex.

Upon the authority of an Order-in-Council, approved by His Honor, the Lieutenant-Governor of the Province of Ontario, the 27th day of January, 1904, Frank H. Macpherson, a Fellow of the Institute of Chartered Accountants, of the City of Windsor, was instructed and empowered to make an inspection, examination and audit of the books, accounts, vouchers and moneys of the Municipal Corporation of the Township of Tilbury West, in the County of Essex, under the provisions of Chapter 228, R.S.O. 1897.

In pursuance of the said authority anl instructions, the said Frank H. Macpherson hereby reports that he has made an inspection, examination and audit of the various accounts of the said corporation.

The audit is made upon the petition of certain ratepayers, addressed to the Provincial Municipal Auditor.

Accompanying the petition were certain charges, upon which were based the request for the investigation. These charges are as follows:

1. That the amount of the surety in the matter of the defaulting collector, Thos. Bryan, has never been collected from his bondsmen.

2. That the ratepayers never received a proper statement of the costs of certain litigation between the M. C. Railway Co. and the township, *re* the Halligan Outlet.

3. That the township funds have been deposited in the bank in the name of the treasurer, thereby giving said treasurer power to use such township funds for his own use and benefit; also that only one bank account has been kept for both school and township purposes.

4. That the ratepayers have been paying more than their proper share of a $6,000.00 bonus to the Leamington & St. Clair R. Ry. Co.

5. That certain interest paid by order of F. H. Macpherson, *re* Big Creek Drain was not properly or fully accounted for to the ratepayers.

6. That the special and general rates have not been properly classified so as to be understood by the ratepayers.

7. That all cheques have not been properly issued or countersigned by the Treasurer.

8. That the clerk, after the engineer had failed to sell or let the contract of the Turnbull drain at the estimate, sold certain debentures of said drain, and that the drain is still untouched, and one year's taxes have been collected.

9. That debentures have been sold to private residents of the township, and that the interest payable on such debentures has not been made known.

10. That the officials or council refused to give full information to the ratepayers respecting moneys raised for costs of litigation between the township of Romney and The Sutheriand, Innes Co., Limited, said money transaction not appearing in the by-law or minute books *re* the Big Creek Drain.

11. That sums of money have been shown in the statements to have been refunded to ratepayers, some of which deny having received any : other ratepayers have been paying taxes in advance of the sale of special rate drains.

Dealing with the matters presented, in the order named, I find as follows :

(1) Thomas Bryan, Collector of Taxes, roll of 1892, failed to account for $1,017.98 to the township treasurer. $476.94 was subsequently obtained by the council from Bryan, and the sum of $75.00 due him as collector was retained and applied on account of the deficiency. A balance of $476.04 remained, and this the bondsmen were requested to make good. After some negotiation the council of 1895 decided to accept $75.00 each from the three bondsmen in full settlement. The sum was paid over, and the bond was cancelled (per resolution of record Dec. 16th, 1895). J. A. Buchanan the then Reeve, explains that owing to certain defects in the bond which were found to exist, it was thought best (all the council concurring) to compromise as stated above. The matter is of record in the minutes, and the facts could easily have been ascertained, had application been made to the Clerk and Treasurer. Mr. Buchanan's remembrance was that the loss to the township did not exceed $125.00 to $150.00 after deducting the salary due Bryan. The figures, however, show a somewhat greater loss. Subsequently there were further losses, by reason of the production of receipts for sums paid the Collector in 1891, returned as uncollected and sent to the county Treasurer. These amounted to $235.90 of which Tilbury North refunded 52 per cent. or $122.66.

(2.) The C. S. Ry. Co., appears to have received $101.15 in connection with the Halligan Drain; and later a payment was made to Clarke, Bartlet & Bartlet, Solicitors of $115.00 of which $85.52 was on account of costs in respect of this matter. These sums were charged in the general funds of the township, and appear to be the only disbursements pertaining to this work.

(3.) The statement made in the charge are in accordance with the facts; but I have found no evidence of misuse of the township funds through manipulation of the bank accounts; the school and general funds have all been carried in one account; and there is no especial (nor statutory) reason why these particular accounts should be maintained in separate bank accounts.

(4) In 1886 a sectional bonus ($6,000.00) was voted to the Leamington & St. Clair Railway Company, necessitating an annual levy upon the property

within the territory named in the by-law. The by-law provides for an annual levy sufficient to produce the amount required to meet the equal annual payment of $489.00. The township has been levying one mill upon the dollar of assessed value each year. The final levy will be made in the year 1906. Up to Dec. 31st, 1903, $271.43 had accrued by way of surplus, and I have carried this sum as a liability of the township. The excess levy in the years 1904, and 1905 should be added thereto, and in 1906, the township council should pass a by-law applying the sum thus produced toward a reduction of the final levy, providing in that year for the levy of a sum sufficient only to produce the balance of the $489.00. That the council of 1892 had this in mind is evidenced by the fact that account was taken of the excess in levies up to that date, in the settlement as between the townships of Tilbury North and Tilbury West. There would therefore be no serious ground for complaint here.

(5.) In connection with the examination of the Big Creek Drainage accounts in 1901 and 1902, it was found that certain interest ($383.59) had been earned by drainage funds on deposit in the Merchants Bank, which had not been entered in the accounts of the Treasurer. The attention of the Treasurer being called to the matter, proper entry was made and the published auditor's report of 1902 shows this item among the receipts.

(6.) There can be no two opinions as to the accuracy of this charge. The accounts have not been kept or presented to the ratepayers in understandable shape. Changes and recommendations looking to an improvement in this respect are embodied in the present report.

(7) There is nothing in this charge, for the reason that the methods adopted in the passing and paying of accounts do not necessitate countersignature by the Treasurer.

(8.) There is no evidence of irregularity in connection with the Turnbull Drain transaction. The by-law was passed in the regular way and authority given for the issue and sale of the debentures. It is true that the work was not undertaken nor the contract let previous to the sale. To be in strict conformity with the statute, no contract should be signed or no work of this character undertaken, until the funds have first been provided to enable the council to carry out its part of the contract. Had such a course been pursued in connection with the Big Creek Drainage work much litigation and expense would have been saved. The debentures once sold the council (not Clerk) has no option but to proceed with the annual levy provided for in the by-law. Where funds of this character are provided in advance of requirement the proper procedure of the Treasurer is to deposit them in a special account in the bank, earning such interest as can be arranged for. This interest to be passed to credit of the drain, and to be used, (as far as it will go) to meet any deficit, (should one arise) in the construction of the drain; or be added to the surplus which will be returned to the ratepayers interested should the cost of construction fall below the estimates. In the present instance the proceeds of the debenture sale was placed in the general accounts; to deal fairly with the ratepayers, I have allowed interest to the drainage work (at current bank rate) upon the funds in the Treasurer's hands. This should satisfy the petitioners.

(9) The by-law authorizing the debenture issue, in each instance, sets forth the interest rate, and these are always available to any ratepayer. Sales of debentures have been enquired into, and the conclusion arrived at, that the Township has realized the fair market value in each instance.

(10) Only one instance was presented of anything that could be construed into a refusal on the part of a member of council to furnish information (which was not in any way under his control) to a ratepayer. In an-

swer to my question, the complaining party admitted that he had not been refused information by the officials controlling the same.

(11.) My attention was called to two instances, in which the allegation was made that payments entered in the Treasurer's accounts as having been made to these ratepayers had not, in fact, been so made. I refer to these in order of occurrence:

(A.) Payment to B. Clapp, for, "error special rate, 3rd. Con. Drain", $7.36 entered in the accounts of 1892. Mr. Clapp, under oath, stated that he had not received the sum in question. The original warrant was not available at the time of taking Mr. Clapp's statement. Upon looking this up, however, it was found to have been issued in regular form by the Reeve on Dec. 19th, 1891, (not presented to the Treasurer till Jan. 2nd, 1892) payable to B. Clapp, and endorsed by "Benjamin Clapp." A comparison of this with Mr. Clapp's signature, since received, satisfies me that the original warrant was in fact endorsed by Mr. Clapp. It is quite possible however that he may be technically correct in stating that he did not receive the amount. The Collector's roll of 1891, contained an improper charge against Mr. Clapp's property (Mid. part N½ Lot 8, Con. 3), for special assessment on the drain in question. The probable explanation is that the Collector had been given the warrant by the council (payable to Mr. Clapp) to correct the error, and that the Collector had obtained Mr. Clapp's endorsation upon the warrant when receiving the balance of his taxes, in order to square the amount appearing against him upon the roll. In any event neither the township or Mr. Clapp is injured and there is no reflection upon any of the township officials concerned.

(B.) "John Sheppy, award line fence, Ford and Kendrick, $11.55", under date Dec. 15th, 1903. Mr. Sheppy states over his signature that he did not receive the above. The facts would appear to be as follows: On the Collector's roll, 1902, a special drain assessment was improperly charged against W½, S½, Lot 3, M.R.S. of $11.55. This property had just previously been purchased by Mr. Sheppy. Complaint was made by Sheppy to the Clerk, and the attention of the council was called to the error, and a warrant authorized to cover the same. The warrant is dated Dec. 15th, 1902, and is payable to "John Sheppy", or order, and the endorsation thereon, is in the same handwriting as is the signature to Mr. Sheppy's statement. The circumstances surrounding this transaction are doubtless similar to those in the case previously mentioned. No one is injured, and no reflection rests upon any of the officials. A clerical error occurred in writing the warrant, by introducing therein a reference to "award line fence Ford & Kendrick", as the transaction had nothing whatever to do with said award. In the warrant is also entered the words "error taxes", which latter is undoubtedly correct. The date of entry in the Treasurer's accounts is also misleading, being a year later than the actual date of the transaction, caused, as he advises, by an omission to enter it at the proper date.

Scope of Audit.

Having dealt with the several matters complained of, I come to a consideration of the affairs of the township, in other particulars; and, as is generally found to be the case, the examination has revealed errors, discrepancies, and irregularities, which were never suggested nor surmised by those instrumental in bringing about the audit.

The inspection and examination covers the accounts of the township from the date of division of the old township of Tilbury West into the townships of Tilbury West and Tilbury North, the present municipality of Til-

bury West being the senior township. The devision occurred in 1891, (confirmed by a special act, Chap. 81 Vict. 54) the separation going into effect as of Dec. 31st, 1891.

S. T. Anderson has been Clerk continuously since separation, having been appointed the year previous.

Thos. Beattie, Jr., has likewise been Treasurer during the entire period since separation, having been appointed in February of 1890.

Accounts at Separation.

By virtue of an agreement entered into, and dated April 16th, 1892, it was arranged that the liabilities and assets of the original township should be divided in the following ratio:

Tilbury North, 52 per cent.

Tilbury West, 48 per cent.

I have looked into the figures used in arriving at the settlement and note that certain items appear to have been overlooked, these omissions accruing to the benefit of Tilbury North.

On Dec. 31, 1891, the Treasurer charged himself with the amount of an overdraft in the local private bank of Westland & Nichol, in which the township account was kept, of $389.41. Immediately following the close of the year deposits were made to offset the amount of the overdraft, but the Treasurer neglected to take credit in his 1892 accounts for its payment, and the sum was not taken to account in the settlement. Of this amount Tilbury North should have borne 52 per cent. or $202.50.

Again, the amount of Tilbury North's interest in the "Arrears of Taxes," in the County Treasurer's office, was fully taken to account in the settlement. In the years 1893 and 1894, the county Treasurer sent to Tilbury North taxes amounting to $363.12, which were placed upon the Collector's rolls in the junior township ,and then, or subsequently, collected in full. Of this amount, Tilbury North accounted for $189.81 in the settlement the latter part of 1894 or early in 1895. The balance yet remains unsettled, amounting to $130.29, 48 per cent of which should be accounted for to Tilbury West, or $62.54.

Taking next the payments to be made annually by Tilbury North on account of special drain assessments, I find that the amounts contributable and contributed were as follows:

	Contributable.	Contributed.	Difference
1895	$1,099 23	$ 946 72	$ 152 51
1896	946 72	946 72	
1897	946 72	946 72	
1898	946 72	906 26	
1898	946 72	906 26	40 46
1899	906 26	906 26	
1900	385 61	385 61	
1901	385 61	385 61	
	$5,616 87	$5,423 90	$192 97

Tilbury North is, therefore, indebted to Tilbury West on account of the separation accounts, in the following sums:

Proportion of overdraft	$202 50
Monies received from arrears of taxes returned to Tilbury North and entered upon rolls	62 54
Balance due *re* drains, as above	192 97
	$458 01

Tilbury North is, however, entitled to a credit of $341.36, being 52 per cent. of $656.48, items received by the Township Treasurer in 1891, on account of the 1890 Collectors' Roll and other items, not entered in his accounts, and of which Tilbury North's interest was as above. Balance of principal due from Tilbury North in this connection $116.65.

Assessment and Taxation.

Collectors' Rolls.

The collectors' rolls for each of the years since and including 1890, have been examined, and the criticisms here made are applicable practically to them all.

The names, in many instances where repetition was necessary, have been omitted, and also the post office addresses. To make the roll fully in compliance with the statutory requirements, each name must be entered in full, and each post office address be written in full against each name.

The non-resident collector's assessments for each year have been entered in the back of the resident roll, a proceding altogether unnecessary, and one which opens the way to irregularity and possible loss to the municipailty, as has proven to be the case here. Particulars are given in the paragraphs dealing with the settlement of the rolls.

The Assessment Act provides that the non-resident roll shall be sent to the County Treasurer on or before November 1st in each year. In but two instances has this been done. The dates for the several years are as follows:

Roll of 1891 returned to county treasurer October 31st, 1891; roll of 1892 returned to county treasurer April 1st, 1893; roll of 1893 returned to county treasurer May 9th, 1894; roll of 1894 returned to county treasurer November 1st, 1894; roll of 1895 returned to county treasurer April 29th, 1896; roll of 1896 returned to county treasurer April 30th, 1897; roll of 1897 returned to county treasurer July 25th, 1899; roll of 1898 returned to county treasurer July 25th, 1899; roll of 1899—only one property, $81.30—not returned to county treasurer at all, and lost to the township, except at the pleasure of the taxpayer. Included as a possible asset.

Roll of 1900. No non-resident roll.
Roll of 1901. No non-resident roll.
Roll of 1902. No non-resident roll.
Roll of 1903. Not returned to county Treasurer during the year 1903.

The resident rolls have been returned earlier than is usual in many other municipalities, but not in any year (excepting 1899 and 1901) previous to April 8, the final date for the return of the township treasurer to the county Treasurer. The dates are:

Year.	Returned by Collector.	Sent County Treasurer.
1891	April 13, 1892	April 13, 1892.
1892	April 28, 1893	April 28, 1893.
1893	April 26, 1894	April 26, 1894
1894	(Date uncertain)	Nov. 1, 1894.
1895	April 28, 1896	April 28, 1896.
1896	May 14, 1897	Dec. 22, 1898
1897	(Date uncertain)	May 18, 1898.
1898	April 22, 1898	May 2, 1899.
1899	March 31, 1900	May 3, 1900.
1900	April 19, 1901	May 4, 1901
1901	March 22, 1902	June 2, 1902.
1902	April 18, 1903	June 16, 1903.

It will be observed that in several instances, although the collector made settlement of the roll in time to have the Treasurer's return of uncollected taxes in the hands of the county Treasurer previous to May 1, the township Treasurer neglected to forward same, entailing a loss to the municipality of the percentage chargeable by the county Treasurer against all arrears in his hands upon that date.

Until 1901, Sec. 129, Chap. 224 (Assessment Act), has not in any sense been complied with, to the extent that separate columns were not provided in which to carry the special drain rates, and other assessments which are required by law to be kept distinct and accounted for separately. The 1901 and subsequent rolls are in better form and more nearly in compliance with the statute. Neither has Sub-sec. 2 (Sec. 130) of the Assessment Act been complied with. The table provided for has not been appended to the roll. A partial schedule (pertaining to the schools) has been made. A pro-forma exhibit, setting forth the form in which this table should appear, is furnished. There is no recapitulation of the contents of the rolls in any year, by pages or in detail. Had the schedules, as required by statute, been prepared, errors in drainage levies, which have crept into the accounts, could have been detected and corrected during the making of the roll.

Some of the rolls do not contain the clerk's certificate, and of these, several are not dated, so that I am unable to determine in every instance whether the roll has been delivered to the treasurer in proper season.

There has been no proper return of the taxes by the several collectors to the treasurer, as prescribed in Sctions 147 and 148. No sworn statement has been delivered to the treasurer in any year, and, consequently, no duplicate furnished the clerk to enable him to forward the requisite notice.

Corrections have been made by the clerk in the collector's roll after it has left his hands and been delivered to the collector. This is altogether irregular and should not be permitted. The revised Assessment Act (1904) provides a serious penalty for such an offence.

The following taxes, appearing in the books of the county treasurer as having been returned to the township clerk to be entered upon the collector's roll of the several years, do not appear to have been so entered:

Year.	Description.	Amount.
1894	No. 8 on lot 6, N. M. R.	$ 9 16
1894	No. 16 on lot 5, N. M. R.	4 93
1895	Lots 11 and 12 on 6, S. M. R.	13 95

The township clerk is unable to explain these omissions, and should be held accountable therefor.

Drainage Accounts.

A careful examination of the drainage accounts of the township has been made, and reference is found necessary to the following:—

Big Creek Drain: The balance due to the township on account of Big Creek drain is taken from the report of the Provincial Municipal Auditor, dated May 18th, 1903. The sum now due this drain is $1,094.68, to which, of course, will be added interest from the date mentioned until payment.

In this connection I call attention to the balance of $50, due from S. T. Anderson, clerk, being an advance made by him on account of services, and

not deducted from his bill when finally presented. This sum is charged directly to the clerk together with interest from the date of the report.

In the report dealing with the Big Creek drainage reference was made to an item of $200, by which sum the accounts of Tilbury West were reduced, being excess in payment for services to J. A Tremblay, clerk of Tilbury North. This transaction was dealt with in detail in the report referred to. In view of the fact that the township of Tilbury West passed the account and issued its own warrant to the clerk of Tilbury North, I am of the opinion that the municipality cannot recover from the township of Tilbury North. Whether recovery could be had fom J. A. Tremblay, clerk, is a question which had best be referred to the township's solicitors. In the meantime the item is entered as a contingent asset.

Buchanan Drain, By-law 18: The balance standing at the debit of this drain, according to the treasurer's books, is $294.25. Under the original by-law the Township of Mersea was to have contributed $70. This sum has never been received from that township, and, including interest from 1893, now amounts to $110. It is the duty of the township to collect the assessment from Mersea, and I have entered the sum and interest as a credit to the drain and have included the amount as the direct asset of the township due from Mersea.

A supplementary levy, under By-law No. 76 of 1900, amounting to $124.50, was entered upon the roll of that year, but was not credited to the drain in the books of the treasurer. This also has been deducted from the debit balance, leaving the amount now due to the township $59.75.

Halliday Drain: This stands in the books of the treasurer at $467.52. By special levy under By-law No. 66, $413.19 was placed upon the roll, but was not credited to the drain in the books of the treasurer. The balance at debit of this drain now stands at $54.

Little Creek Drain. A balance of $25.61 stands at the credit of this drain. It is improperly credited with $18.76 of accrued interest; has not been credited with the sum of $91, received from Tilbury North as its proportion of expenses; has not been credited in the books of the treasurer with a special levy of $51, placed upon the roll of 1900 to cover the balance at debit of the drain at December 31st, 1897. On the debit side should be charged $46.90, balance of expenses recovered from Tilbury North. The net balance at credit of the Little Creek drain is $101.95, which amount is available for return to the ratepayers.

Seventh Concession Extension Drain. This drain is charged with a balance of $97.83. Upon the roll of 1900 a special levy was made to provide for this amount, and credit was not given in the treasurer's books. Receipts and expenditures of the drain, therefore, balance.

Sixth and Seventh Side Road Drain. A balance of $26.67 stands at the debit of this drain. By-law No. 72 of 1900 provided for special levy of an even amount to cover. The account is closed when this credit is given.

Sixth and Seventh Concession Drain. On December 31st, 1897, the treasurer's books showed a balance of $111.80 excess of expenditure over receipts. This was provided for by a special levy in 1900 (By-law 73) of an even amount, which sum had not been credited to the drain, and which account, with this entry made, is closed.

No. 2 Government Drain. The treasurer's books show a balance of $73.66 at the debit of this drain. Under By-law 69 a supplementary levy for an even amount was placed upon the roll of 1900, and with a proper credit, this account is also closed.

Lowden Drain. In 1898 expenditures of $89.00 are charged against the Lowden Tap Drain. Under By-law 74 of 1900, one-half of this amount was raised. The treasurer did not credit the account with a special levy which reduces the present debit balance to $44.50. According to the terms of the By-law above recited the Township of Mersea was to pay one-half of the costs incidental to the Lowden Survey. This, it appears, has not been done, and the balance has been entered as an asset of the township. The council should at once take steps to collect from Mersea this and other sums due, as per statement accompanying this report.

Robb-Dales Drain. On December 31, 1899, a balance of $152.91 remained at the debit of this drain. Under By-law 71, a supplementary levy of an even amount was placed upon the collector's roll of 1900. Subsequently the council were advised of the illegality of the levy, and $123.57 was returned to the interested ratepayers by resolution of the council. There yet remains $12.68 in the hands of the corporation, which should be refunded as follows:—

Herman Pettit, south half 17, con. 11.....	$8 45
Cameron Estate, Windsor, south half, west half 17, con. 11 .	4 23

These two items we have entered among the liabilities of the township. The balance of $152.91 has been entered as an asset. This should be dealt with by the council, and, if advised by its solicitor that the amount cannot be collected from the ratepayers interested, a charge made to the General Funds.

Jones Drain. Between the years 1894 and 1896, charges amounting to $56.75 are made against the Jones Drain. No by-law was passed which would authorize the charging of these items to a special account, and they should, therefore, be a charge against the General Funds. A resolution was passed in July, 1894, instructing the clerk to levy $50.75 of the above, which was doubtless done. In 1897, $194.00 appears to have been paid out on account of this drain. In the minutes of the council is found a resolution authorizing the engineer to take the levels, and appointing Wm. Dalgleish commissioner. Nothing further appears in the minutes. $14.00 was paid to Wm. Newman, engineer, for services, and $180.00 to Jas. Ferguson, contractor. The vouchers for the various sums which make up the last mentioned item are simple receipts from Ferguson to the treasurer, or are orders signed by Ferguson on Wm. Dalgleish, commissioner. There is no proper authority for payment, and the accounts were not passed upon by council at any time. A special levy of $180.00 or thereabouts was placed upon the collector's roll in the year 1897, which sum was not credited to the drain in the treasurer's books, and of which he doubtless had no information. No schedule is available showing the lots or parts upon which the special levy was made, and beyond the statement of the clerk that this was done, I have no information. I do not include this balance as an asset.

Town Line Drain. Under By-law 34, five levies were required, the ratepayers' proportion being $162.62. Levies were placed upon the rolls in the

years 1896-7-8-9, but was omitted in 1900. A special levy should be placed upon the roll of 1904 for this amount, and I have included it in the available assets. If not feasible to make the belated levy, then the whole amount should be charged to the clerk, who is responsible for the omission.

The collector's rolls, in so far as they relate to the special rates for drainage purpose are very incomplete and difficulties have presented themselves in endeavoring to check the accuracy of the levies. They have, however, been checked to such an extent as to satisfy me that no substantial amounts have been lost to the township, beyond those reported. A pro-forma exhibit has been prepared and forms part of this report, showing the manner in which schedules should be made up in connection with the collector's rolls of each year, which, if followed, will result in greater accuracy of work, and will also facilitate the checking thereof.

Refunds on Drains. I find that warrants have at various times been issued by the council in favor of S. T. Anderson, township clerk, for refunds in connection with the following drains:—

Dec. 15, 1893, Turnbull Drain	By-law 287	$1199 22
Feb. 21, 1893, No. 4 Government Drain	By-law 217	71 98
Apl. 1, 1893, Little Creek Drain	By-law 270	413 60
Apl. 1, 1893 No. 1 Government Drain	By-law 283	274 00
Feb. 21, 1893, Hyatt Drain	By-law 281	290 70
Apl. 16, 1894, Alexander Drain	By-law 7	928 09
Mar. 19, 1894, Old Governm't Tap Drain	By-law 17	40 70
Apl. 29, 1896, 6 & 7 Side Road Drain	By-law 29	92 55
Apl. 29, 1896, Town Line West Drain	By-law 34	131 93
June 27, 1896, Wyatt Drain	By-law 252	54 55
Sept. 3, 1898, No. 4 Government Drain	By-law 46	95 46
Mara. 7, 1898, Plouffe Drain	By-law 41	58 15
Mar. 6, 1899, No. 3 Government Drain	By-law 53	147 56
		$3798 49

These monies were paid over to S. T. Anderson by the township council for the purpose of being distributed to the parties entitled thereto in proportion to the amount of their several assessments. It was the duty of the township clerk to have prepared schedules showing the amounts payable to each of the interested parties under the several drains; to have paid the money over to them, and to have taken receipts therefor, to be held as vouchers by him in substantiation of the carrying out of his trust. Upon request being made for a production of the schedules and of this evidence of payment, the clerk states that he has no receipts to offer, not having taken any, and he was unable to furnish schedules. He claims to have paid the money to the proper parties with the exception of a small balance which he admits still having in his possession.

In order to corroborate, if possible, the verbal statement of the clerk, schedules were prepared showing the amount of the various refunds, and these were submitted to the township clerk, that he might supply the names and post office adddresses of the persons to whom he claims to have made payments.

Upon receipt of the schedules containing this information, notice was sent, so far as was possible, to all the parties entitled to receive refunds, and advices have been received from a very large number who claim that they have not, at any time, received from the township clerk, the refunds claimed by him to have been paid.

Summary of Drainage Refunds said not to have been paid by S. T. Anderson, Township Clerk:

				Interest to July 15, 1904.
1893 April 1	No. 1 Government	By-law 283	$ 83 66	$ 56 07
1893 Feb. 21	No. 4 Government	By-law 217	18 12	12 40
1893 April 1	Little Creek	By-law 270	143 44	96 03
1896 May 3	Hyatt	By-law 281	74 03	36 44
1893 Dec. 15	Turnbull	By-law 287	371 80	226 00
1894 April 16	Alexander	By-law 7	399 14	245 44
1898 Sept. 3	No. 4 Government	By-law 46	22 35	7 85
1899 May 6	No. 3 Government	By-law 53	22 09	6 99
1896 May 31	Wyatt	By-law 252	20 46	10 06
1898 Mar. 7	Plouffe	By-law 41	3 35	1 30
			$1,158 44	$ 709 78

Interest upon the above calculated at legal rate, amounts to $709.78, as will be found in the second column, making a total of $1.830.61. To this must be added the amount due the general funds of the township, details of which are furnished immediately following the detailed schedules.

No. 1 Government Drain, By-law 283.

Township's Proportion.

Out of these refunds the township was entitled to a sum in proportion to the amount contributed for roads and bridges, and should have received $542.65 in all, as follows:

		Amount.	Interest to July 15, 1904.
Turnbull Drain,	By-law 287...	$ 193 06	$ 35 45
No. 4 Government Drain,	By-law 217...	28 84	19 75
Little Creek Drain,	By-law 270...	31 38	21 25

Hyatt Drain,	By-law 281...	64 14	43 84
Alexander Drain,	By-law 7...	120 21	73 90
No. 4 Government Drain,	By-law 46...	18 00	6 35
Plouffe Drain,	By-law 41...	92	34
No. 3 Government Drain,	By-law 53...	32 82	10 50
		$542 65	$247 46
Less entered in Treasurer's accounts of 1893, as a refund from Turnbull Drain		$137 20	
		$405 45	$247 46

$137.20 is deducted previous to making the interest cadculation.

The Clerk, S. T. Anderson, having had these funds in his possession from the dates given in the above schedule, and the monies being the property of the township, it is entitled to interest, and I have added such at legal rate, in the statement of account showing the indebtedness of the Township Clerk, on this as well as on other accounts.

I may mention that I have to some extent gone into the schedules above with the Township Clerk, and he claims that he is certain that he has paid

some of the parties, but he is unable to produce any evidence in substantiation of his position. Again in the schedules filled in by him showing the names of the persons to whom payments were made I found in some instances that he claims to have paid money to owners of properties when the properties did not come into their possession for two or three years after he received the monies from the township council.

It was his duty to have paid the money to the person assessed upon the roll for the interested property during the year in which he received the refund, and if payments were made as he asserts, they were improper, and the township is responsible to the owners of record in the year in which the refunds were returned. My recommendation in the premises will be found under its proper head.

Ditches and Water Courses. The examination of the awards, assessments and collections in connection with the line fences and ditches and water courses, shows that the assessments made by the engineer have been paid either to the township treasurer or have been placed upon the collector's roll in terms of Sec. 27, Chap. 285, R. S. O., in the proper years, with the following exceptions:—

Line Fence.

A charge to north half 2 and 3, M. R. N. in 1896, as per warrants Nos. 50-53 inclusive, dated April 18, 1896, under Line Fence Award	$7 00
Northwest half 9, con. 11, Francis Birce, in 1897, as per award dated May 25, 1897	4 00
N½ E½ 9, con. 11, Richard Kinsman, in 1897, as per award dated May 25, 1897.	3 75
Lot 8, con. 8, Esau Hillman in 1903, as per award dated May 13, 1903..	2 00
Lot 7, con. 8, Adam Harkness, in 1903 as per award dated May 13, 1903 .	2 00
	$18 75

Ditches and Water Courses.

Anderson.

M. C. Anderson, centre pt. S ¾ 8, con. 11	9 00
J. Terryberry, W. pt. ¾8, con. 11	9 00
D. Kinsman, E. pt. S¾ 8, con. 11	9 00
H. White, N. pt. 8, con. 11	9 00
All the above under the award of Alex. Baird, Engineer, dated Oct. 31, 1896.	

Sova.

Alex. Sova, N. E½ 11, con. 9	1 00
The above under the award of Wm. Newman, Engineer, dated Jan. 8, 1898.	
Harris Rowson, N. ½ 15, M. R. S.	2 00

The above under the award of Wm. Newman, Engineer, dated Oct. 14, 1898. The above, and $5.00, the township's assessment under said award is due to Tilbury North, the initiating township.

Marchand.

Jas. Glasier, N. ½ 18, con. 10...	6 00
Peter Marchand, S. ½ N. ½ and N. ½ S. ½ 18, con. 10	8 00
The above under award of Wm. Newman, Engineer, dated Feb. 6, 1900.	
J. Marchand, S. ½ N. ½ 19, con. 10	1 00

The above under award of Wm. Newman, Engineer, dated Aug. 10 1900, J. Marchand was assessed $5.00 while $4.00 was the amount placed upon the roll.

Wismer.

T. Dunmore, V. lot 7, con. 11	$ 1 00
J. Cumison, 16 Ainslie Survey	1 00
J. Buchanan, 17 Ainslie Survey	1 00
J. A. LaRue, V. lot 10	1 00

Spence.

Nelson Vanidour, N. ¼ 6, con. 10	4 00
Wm. Goatbe, S. ½ N. ½ 6, con. 10...	4 00
Samuel Spence, N. ½ S. ½ 6, con. 10	4 00
Jas. Crozier, S. ¼ 6, con. 10	4 00

The above under the award of Wm. Newman, Engineer, dated July 26, 1902. The omissions herein amount to $92.75. This loss to the township having arisen through the neglect of duty of the Clerk, I have charged this amount in the statement setting forth the sums for which the Clerk is responsible to the township. It may be possible that some of these items are still collectable. Upon this point the township will be advised by its solicitor.

The Township of Tilbury North was assessed for certain expenses in connection with two awards under the D. & W. C. Act by the Engineer, payment for whose services was made by the initiating Township of Tilbury West, and the amounts of the several assessments against Tilbury North appear to remain unsettled. I have therefore charged the Township of Tilbury North with the following items.

Share of expenses, Goulet award, as per Engineer's award dated April 28, 1903 ..... $4 00
Share of expenses, Glasier award, as per Engineer's award dated June 12, 1903 ..... 6 00

Over-payment to Engineer.

I find that some over payments have been made to the Township Engineer. It has been customary that a warrant should be issued to the Engineer for the full amount of the expenses, leaving him to settle with the Clerk, and others interested. Such procedure was followed in the cases now under consideration. The sums payable to the Clerk would be as follows:

May 11, 1901, Buchanan Award	$1 50
Oct. 12, 1901, Fenner Award	1 00
July 14, 1903, Glasier Award	2 00
July 14, 1903, Keith Award	1 00
July 25, 1903, Pettit Award	2 00

This sum has been paid over by the Township Engineer and has been deposited to the credit of the township, these fees being included in the commuted salary of the Township Clerk.

General Remarks.

The Township of Mersea collected annually and should have paid over yearly to the Township Treasurer its proportion of the debenture levy in connection with the Union S. S. No. 12. All the payments were made with the exception of the one due in June, 1900, which sum has not yet been paid by Mersea. This amount ($115.95) together with interest ($28.70) has been included in the available assets of the Corporation.

There is due from Tilbury North its proportion of the debenture indebtedness of School Section S.S. No. 7 being 11/57 of the levy required to meet the debenture due in 1903 or $35.78.

In the Non-resident Roll of 1899 there appears but one property S½ 17, Con. 11 assessed to the Cameron Estate, Windsor, taxes upon which amounted to $81.30. The Township Clerk did not make the return to the County Treasurer, required by law, but contented himself with entering the amount in the resident Collector's roll. The Collector of taxes for that year states that he did not collect the amount, and I find upon enquiry that the Cameron Estate does not appear to have paid taxes for that year upon this property in question. This has been entered among the available assets, and I have no doubt upon the presentation of the claim to the Estate that the

amount will be made good. The Cameron Estate is aware that it is entitled to a number of refunds in connection with Drainage monies paid into the hands of the Township Clerk, S. T. Anderson, by the Municipality, and which it has never received. Particulars of these will be found in another portion of the report. In any event, the Township Clerk is responsible to the Municipality for the sum mentioned, in case it be not collected from the owner of the property.

In the year 1893 a safe was purchased for the joint use of the Township and Thomas Beattie. The total cost of the safe was $130.00, half of which was paid by the township. Attention is called to the transaction so that it may be taken into account in connection with the settlement with the present Treasurer, who has signified his intention of resigning immediately following the presentation of this report.

In January 1901 the Council entered into an arrangement with the Township Clerk, (S. T. Anderson) whereby his annual salary was fixed at $400.00, this too included all services with the exception of the registration of births, deaths and marriages. All fees collected by the Clerk in connection with Drainage, D. & W. C., line fence, etc., to revert to the Township. All drains constructed since that date have had included in the estimates, a sum covering the Clerk's fees. I have in each instance where the Drain Account is still open charged these fees to the Drain, thus crediting the General Funds of the Township.

I have not thought it prudent to disturb any of the Drain Accounts which have been closed finally without including the fees in question. Hereafter a warrant should be drawn in favor of the General Funds, and this should be handed to the Treasurer as his authority for the transfer from the Drain Account to the General Funds, of a sum sufficient to cover the Engineer's estimates.

In the accounts of 1903 I find warrant No. 797, $2.00 payable to S. T. Anderson as commissioner of construction accounts silex walks, Comber, and No. 800 $4.00 payable to the same person for making out debentures silex walk, Comber. It would seem that these items if properly chargeable under the resolution commuting the Clerk's salary, should be debited to the Police Village of Comber, and lot against the General Funds of the township.

The Treasurer (Thos. Beattie) makes the claim that, by a verbal arrangement with the members of the Council at the date of his assuming office, in 1890 and 1891, he is entitled to the interest earned by the Township Funds, which I have ascertained, and charged at $308.82. The contention of the Treasurer is that the interest was to go to him in addition to the salary named. There is nothing upon the records to confirm any such arrangement, but I have been informed that there was an agreement in the terms suggested by Mr. Beattie. In the absence of formal authority I have not been able to allow the amount, but have included the sum as due to the Township. I am of the opinion that Mr. Beattie is probably entitled to the sum mentioned and in view of all the circumstances, I think that the Council after satisfying itself that there was such an agreement should pass a resolution authorizing the issue of a warrant to the Treasurer for the amount named, plus interest $9.40, charged thereon, making total of $308.82.

I wish to point out that the Township has at no time been credited with interest earned upon its bank balances. In view of the fact that the Treasurer claims to have been entitled to the interest in any event, this may not be a matter of much moment at this time. Attention is called to the fact however, for the purpose of pointing out that arrangements should at once be made with the township bankers that interest be allowed at current rates upon the daily balance. Allowing the Treasurer the interest earnings upon

Township Funds, is, I need not say, an altogether improper and illegal practice, and should not be countenanced.

A practice of the Council, which should be discontinued, is to amend By-laws by resolution.

The great majority of the minutes of the Council are not officially signed by the Reeve. It is the duty of the Reeve to see that these minutes are regularly signed.

The Treasurer's accounts have not been kept in the manner which would enable a proper check by inexperienced and incompetent auditors. The Cash Book provided for under the Statute has never been kept. New books should be opened as of December 31st, 1903, and the accounts should be written up to date.

No proper provision is made for the care and filing of the township papers either in the office of the Township Clerk or of the Township Treasurer. Proper dockets and boxes should be provided (as nearly dust proof as possible) for the filing away of the Township vouchers and documents.

No proper debenture register has been kept and this deficiency has been supplied and the debenture record written up to December 31, 1903.

Some attempt has been made to copy the various By-laws into a By-law book, but this has been done promiscuously and irregularly, and without indexing so much so that the By-law book is of little practical value.

A Drainage Record book has not been kept, and one has been supplied and written up to date.

Treasurer's Bonds. The bond of Thomas Beattie, Treasurer, is as follows:—

A personal bond dated in February, 1890, signed by

Thos. Beattie, Jr.	John S. Ainslie.
Thos. Beattie, Sr.	Ainslie & Bro.
R. O. Y. Ainslie.	Coatbe & Brown.

in $5,000.00 each.

The attention of the Council is called to the fact that partnership signatures to a bond are valueless, and are not binding upon the firm as such, although recourse might be had against the individual partner who affixed the firm signature.

A recommendation is made that hereafter, guarantee bonds should be procured.

Collector's Bonds. The collection of taxes on the 1903 Roll being completed, and full returns having been made by the Collector, particulars of this bond is not necessary.

Accounts of the Treasurer. The accounts of Thomas Beattie, Treasurer, have been carefully scrutinized both as to receipts and expenditures from the date of his appointment to office in 1890, down to July 4th, 1904. Items amounting to $7,686.62 overlooked by previous auditors have been entered as credits of the corporation. To this I have added interest, $2,590.52. Debits have been charged to the extent of $494.63, and interest allowed amounting to $322.49. The difference $9,459.57, is included in the balance as taken on July 4th, 1904, and has been deposited with the receipts of the present year. Statement No. 1 covers these omissions in detail, together with interest.

Financial Position of the Corporation.

The present financial standing of the corporation is shown in statement 11. The available assets, $35,686.11 exceed the current liabilities, $21,213.-

17, by a large amount, $14,472.94, principally as a result of this investigation.

A competent audit annually, would have saved the ratepayers large sums of money, through a reduction in the annual township rate.

Debenture Liability.

The unprovided debenture liability of the municipality on Dec. 31, 1903 was as follows:

By-law.			
228	Leamington & St. Clair Ry. Co.	2 levies	$ 978 00
45	Big Creek Drain	3 do	4,756 61
46	No. 4 Government	4 do	691 57

			$17,506 83

Pro-forma exhibits accompany the report of:—

(a) By-law striking the annual rates.

(b) Schedule to be entered at close of Collector's roll.

(c) Schedule showing analysis of Collector's roll to be prepared by the Clerk and forwarded to the Treasurer immediately upon the completion of the preparation of the roll.

(d) Skeleton of Journal-entry to be made by Treasurer upon receipt of the analysis Schedule (c).

Recommendations.

As a result of the present examination, inspection and audit of the books, accounts and vouchers of the municipal corporation of the township of Tilbury West, I made the following recommendations.

(1) That all funds of the township shall be deposited in a Chartered Bank and that all payments thereout shall be made upon the warrant of the Reeve, countersigned by the Treasurer, excepting as noted in paragraph (2).

(2) That the present system of payments made by the Treasurer upon the order of the Commissioners or Engineer be abolished, and that alll accounts be passed by the council in regular session, before payment excepting fixed charges as debentures, interest, payment of school accounts, and any other items fixed by by-law or by statute which are payable to the Treasurer without reference to the council.

(3) That warrants, properly drawn by the Reeve, shall be countersigned by the Treasurer, as follows, "Crown Bank of Canada, Comber, will pay when countersigned by———Treasurer," thus becoming operative as a check upon the funds of the Township in the hands of its bankers.

(4) That guarantee bonds be required from all officers holding positions of trust, in substitution for personal bonds, premiums for same to be paid by the Corporation.

(5) That an official form of receipt with stub properly numbered shall be adopted, and that all monies received by the Treasurer, from whatever source, shall be acknowledged thereon.

(6) That expenditures on Award Drains shall be charged to individual accounts in the Treasurer's ledger and shall be balanced by the cash received from the taxpayer or through the Collector's roll.

(7) That the Treasurer shall keep a debenture register, after the form now supplied, and that immediately upon the preparation of debentures, and previous to delivery, he shall enter therein full details both as to principal, interest, and other required particulars.

(8) That the Treasurer shall decline to pay school warrants unless the orders are properly signed by at least two Trustees, and sealed with the Seal of the School Section.

(9) That the Treasurer shall decline to pay warrants when presented by other than the party to whom payable, unless, (*a*) properly endorsed, or (*b*) upon written order authorizing payment to another, which order order shall be attached to the warrant, after being endorsed by the person presenting it.

(10) That the Township Clerk (S. T. Anderson) shall be required to repay forthwith to the Township Treasurer, the sums found to be due by him to the Township, together with interest as per statement furnished herewith.

(11) That the Clerk shall copy all By-laws of the Township in the By-law book promptly indexing the same, and shall carefully preserve and file originals.

(12) That a proper Drainage Award Book (under Section 18, D. & W. C. Act) shall be kept, and that information pertaining to awards shall be promptly entered therein, in order of occurrence.

(13) That all records of Courts of Revision on assessment rolls and appeals against Drainage or other assessments be kept in a book especially provided for that purpose, and that decisions of the Judge in reference to all appeals of that official, shall be noted therein.

(14) That Drainage Records be hereafter kept in the book now supplied for that purpose.

(15) That the Clerk be required to carefully keep on file the following returns or copies thereof.

(*a*) List of lands liable to be sold.
(*b*) Assessors occupied returns.
(*c*) Return of taxes on occupied lands.

(16) That the Clerk be required to have the Collector's roll ready by the date specified by Statute, and that the Roll shall be completed and properly certified, with warrant attached, previous to being handed to Collector.

(17) That the By-law striking the rates shall show in detail the amount of taxes required to be levied for the several schools and shall also show in detail the sum to be levied on account of the Township contribution under the several Drainage By-laws; that the Clerk shall be required to prepare and enter at the close of each Collector's roll a summary and recapitulation of the contents threof as required by the Assessment Act, and following the pro-forma exhibit accompanying this report.

(18). That all accounts presented to the Council shall be in writing, and shall be certified by the member of the Council, having knowledge of the work before being presented; and that these be properly numbered and kept on file in the Clerk's office for reference.

(19) That the Township Council take immediate steps towards the settlement of the outstanding accounts with the Townships of Tilbury North, Tilbury East, Rochester, Mersea and Romney.

(20) That the Township Council shall discontinue the payment of refunds in bulk to the Township Clerk for distribution to the interested ratepayers.

(21) That all refunds shall be made by Reeve's warrant upon the Treasurer, after a proper By-law has been passed, in which shall be included a schedule showing in detail, the total amount of refund and the distribution to the individuals. In this connection it may be said that the only really equitable manner of dealing with refunds is to make a pro-rata reduction covering the balance of the existing assessments, so that the rebate will be received by the persons properly entitled thereto.

(22) That proper conveniences for the filing of township documents and records be supplied both to the Clerk and Treasurer.

(23) That the Collector of Taxes shall return his Roll previous to the 8th of April in each year, and that he shall make his returns of the uncollected taxes in form required by Statute, which includes a duplicate of the return to be made to the Township Clerk.

(24) That previous to settlement of the Collector's roll, the Collector will present to the Council a statement of all taxes which he has been unable to collect, other than those which may by law be returned to the County Treasurer; that all such statements shall be passed upon and confirmed by the Council before being finally accepted by the Treasurer in his settlement with the Collector.

(25) That proper books of account be opened in accordance with the findings of this report, and that the Treasurer be instructed in keeping thereof.

(26) That the Township Council shall at once take such steps as it may be advised by its Solicitor, looking to the return to the Treasurer, of the unpaid trust funds in the hands of the Clerk (S. T. Anderson) together with interest, to enable the Council to pay the claims which will be made against the Township in connection with the Drainage Refunds, referred to in this Report.

Conclusion.

I regret that I am unable to compliment the Township officials upon the manner in which the Township business has been transacted. At the same time I desire to state that these officials have rendered very considerable assistance from time to time during the examination of the accounts.

The time occupied and the expenses incurred in connection with the investigation have very much exceeded ordinary requirements in a Township audit, owing to the enormous amount of work necessitated in checking the Collector's rolls, Treasurer's accounts; preparation of refund schedules, and correspondence in connection therewith. Over four hundred letters have been written in connection with the audit.

The attention of the Council is called to Section 14, Chapter 228, R.S. O., 1897, which requires that the recommendations made in this report shall be carried into effect.

I shall be pleased to furnish further explanations, and advise with the Council in reference to any of the matters or any of the recommendations contained in this report.

All of which is respectfully submitted.

F. H. Macpherson,
Chartered Accountant.

Windsor, Ont., Aug. 10th, 1904.

List of Schedules.

The following schedules are included and form part of the report pertaining to the audit, examination and inspection of the accounts of the Township of Tilbury West, dated Aug. 10, 1904.

Schedule 1. Statement of items not entered in the Township Accounts as found by this audit.

Schedule 2. Statement of sums due from S. T. Anderson to the Township.

Schedule 3. Statement showing balance of Treasurer's Cash Account, July 4, 1904.

Schedule 4. Statement of account with the Township of Tilbury North.

Schedule 5. Statement of account with the Township of Mersea.

(1) For convenience the Special Rate Accounts are balanced with the debenture requirements, without taking into account the Non-resident roll; the adjustment being made through the General Fund; and the gross amount of the Non-resident Roll is credited to General Funds.
(2) Drain award levies are placed in General Funds here because of the practice in vogue of charging payments on account of awards to General Fund. As pointed out in the Report, a special account should be opened for each award, and then receipts either of cash or of assessments will be credited direct.
(3) Any surplus in special rates common to the whole Township goes into General Funds, and similarly any deficiency comes out of the same fund.

TOWNSHIP OF TILBURY WEST.

Statement of General Assets and Liabilities as of Dec. 31, 1903.

SCHEDULE A.

1 No. of By-law.	2 Name of Drain.	3 No. of levy.	4 Total No of levies.	5 Annual Lands.	6 Annual Roads.

(5) That the amounts specified in column 5, Schedule A, shall be levied in accordance with the several by-laws pertaining thereto.

(6) That for Puplic and Separate Schools purposes, a rate on $ of the assessed value of the whole rateable property in each school section be levied and collected for the maintenance of the said schools for the year.....in accordance with the Statute of Ontario, Ed. 1, Chap. 39, Sec. 71, and that the rate in each section be the rate set opposite the number of the section in column 6 of Schedule B hereto:

SCHEDULE B.

1 No. of School.	2 Trustees' Requisition.	3 Asst.	4 Tp. portion School Rate.	5 To be levied against School Section.	6 Rate.	7 Total Rates for Section.

(7) That for raising the sum of $..... required for General School Rate as enumerated in column 4, Schedule B, a rate of ..... mills on the dollar be levied on the whole rateable property liable therefor.

(8) That for the payment of debentures and interest thereon issued on account of the several school sections, due in the year ..... the following rates to be levied:—

(a) That a rate of ..... mills on the dollar be levied and collected upon and from the whole rateable property ($.....) liable therefor, in School Section No. .....

(b)

(c)

(9) That the Clerk shall also enter in the Collectors' roll for the year the following sums:—

Days S. L. at $1.00 each per Pathmaster Lists.
Dogs at $..... each see Assessment Roll.

(10) That this by-law shall come into force upon and after the final passing thereof.

Reeve.

Clerk.

By-Law No. .....

Being a By-law to fix rates for the levy and collection of taxes for the Township of ..... for the year .....

Finally passed ..... 190.....

Whereas the Municipal Council of the Township of ..... deems it necessary and expedient to pass a By-law for said purpose.

And whereas the total assessment of the Township of ..... liable for County Rate, Township Rate, General Debenture Rate and Special on Roads for Drainage Debenture Rate is the sum of $..... and the total assessment of said Township liable for General School Rate is the sum of $.....

Therefore the Muncipal Council of the Township of ..... in the County of ..... enacts as follows:—

1. That for raising the sum of $..... for County purposes, a rate of ..... mills on the dollar of the assessed value of the whole rateable property of the Township be levied and collected.

2. That for raising the sum of $..... for Township purposes, a rate of ..... mills on the dollar of the assessed value of the whole rateable property of the Township be levied and collected.

3. That for raising the sum of $..... for General Debenture Rate, a rate of ..... mills of the whole rateable property of the Township be levied and collected.

4. That for raising the sum of $..... as recited in column 6, Schedule A, for Special Rates on Roads for Drainage purposes, a rate of ..... mills on dollar of the assessed value of the whole rateable property of the township be levied and collected.

Audit Village of Point Edward, County of Lambton.

This audit was placed in the hands of G. O. Merson, chartered accountant of Toronto, in the latter part of May, 1904, and he completed it on the 16th June next in 24½ days, receiving from the municipality the sum of $229.20 for his services. Shortly after the completion of the audit a protest was lodged with this department, and the matter was again gone into, this time by myself. I found after a careful examination that there was no such deficit in the accounts as Mr. Merson had claimed—$227.25—and that the accounts of the late treasurer were correct in every particular. Under these circumstances I recommended the Government to refund to the municipality the amount they had paid to Merson, viz., $229.20, and also a sum of $25, incurred when going over the books in the second audit. I may state that this is the *first* time since this department was organized that any errors were proven against any of the numerous accountants employed from all parts of the province during a term of eight years. It is hoped that it will also be the *last*.

Township of Caledon Report, September, 1904, Edmond Gunn, Auditor.

Alton, Ont., September 28th. 1904.

To The Reeve and Council of the Township of Caledon,
County of Peel.

Gentlemen:

In making my report to you of the result of the investigation of the books, etc., of your treasurer, I think it would, perhaps, be well, although the period covered extends back over twelve years, to first of all take up the showings of the General Cash Book and the one kept for the Police villages of Alton and Inglewood, from the first of the present year to the 12th April, as written in by your late treasurer, Mr. John Harris, and later, from June 14th, 1904, to date, with Mr. J. L. Meek as acting treasurer.

In considering these two periods first then, and, as a guide to my remarks thereon, I would refer you to statements attached.

You will notice that your late treasurer started on the first of the year with a balance, as shown in the General Cash Book, of $1,347.56, which was

supplemented later by miscellaneous receipts amounting to $13.97, making a total of $1,361.53.

The total expenditure out of same, as recorded by Cash Book and Vouchers, amounted to $409.48, leaving a balance of $952.05.

In the matter of the police villages of Alton and Inglewood, the balances brought forward at the first of the year were $166.89 and 73 cents respectively. The total expenditure on account of the police village of Alton amounted to $86.75, leaving a balance of $80.14, while, in regard to the Inglewood village there seems to have been no payments.

On account of these balances, there was handed to Mr. J. L. Meek, acting treasurer, by Mr. J. G. Harris on the 14th June, 1904, the sum of $486.45, and I find that there is lying to your credit at the Bank of Hamilton, Orangeville, deposited there by John Harris, the sum of $155.34.

Taking the face of the books then, this leaves a balance still to be accounted for of $391.13, as per the following memo:—

Balance as per general cash book	$952 05
Balance police village, Alton	80 14
Balance police village, Inglewood	73
	$1,032 92
Balance in Bank of Hamilton, Orangeville	$155 34
Handed to J. L. Meek	486 45
Balance to be accounted for	391 13
	$1,032 92

In regard to that portion of the present year from June 14th, 1904, to date, with Mr. J. L. Meek in office, the attached statement will explain that in addition to the $486.45 received by Mr. Meek on the 14th June, 1904, there has been $4,000 of your paper discounted in the Bank of Hamilton, Orangeville, and receipts from other sources amounting to $8.85, making a total of $4,495.30. Out of this there has been a total expenditure for the municipality of $3,307.24, for the police village of Alton, $371.72, and for the police village of Inglewood $183.45, leaving a balance of $232.89, of which $208.52 appears to your credit at the Bank of Hamilton, Orangeville, and $24.37 is represented by cash in Mr. Meek's possession. Your present position then in cash and bank, as shown on the face of books, would be as follows:—

ASSETS.

Bank of Hamilton, Orangeville, J. Harris account	$155 34
Cash to be accounted for, J. Harris	391 13
Bank of Hamilton, Orangeville, J. L. Meek account	208 52
Cash to be accounted for by J. L. Meek	24 37
	$779 36

LIABILITIES.

Notes discounted with Bank of Hamilton, Orangeville..... $4,000 00

You will notice that I have been using the phrase, "on the face of books," meaning as they appear on the surface, for I regret to have to re-

port that the closer investigation of the period from January 1, 1892, to date, discloses various irregularities by which the township has failed to receive credit for amounts due to it.

In the first place I would call your attention to the attached memorandum taking the collectors' rolls for the last twelve years and comparing the amounts they represent with the items entered as being received from them in the cash book plus the amount of defalcation lists as sent to the county treasurer.

You will notice that the discrepancies during the twelve years total to the sum of $2,755.11. In making the comparison year by year you will see that the amount of difference in some years is very small, and, while in such cases this might be explained by items of returned dog taxes, etc., and which would not be included on defalcation list, such an explanation would hardly suffice where the difference runs over a few dollars. Moreover, although unfortunately, I have been unable to obtain all the various pass books of your collectors during these years, and in which amounts received were entered by treasurer as well as the balance returned uncollectable, still enough of them are available to show that, even if the making up of the defalcation list in itself did not imply the receipt by your treasurer of the balance of the year's taxes, the collectors were required to account for the full amount of the rolls.

I would next call your attention to the statement attached showing the various amounts of interest and rebates allowed by the Bank of Hamilton, Orangeville, on your account there, and, as shown by bank pass book, and which are not entered in cash book. Many of these credits by bank are duly noted in cash book, and I only record the omissions.

The effect of these omissions, of course, would be to increase the amount of cash available by your treasurer without his charging himself with same.

In checking over the various entries for receipts on account of non-resident tax with the data supplied by the county treasurer, I find an amount of $63.50 entered in statement issued by the county for 1897 as being sent to John Harris on the 5th of June of that year, but of which there is no record in cash book.

In the matter of distribution of license funds the memorandum supplied by the inspector of the license district of Peel shows two payments to have been made in the year 1895 of $45 and $204 respectively. The former amount is not entered in cash book as being received at all, while the latter, for some reason, is not shown by cash book as being received until March 1st, 1897.

I might say here that license fund check for $142.33, mailed from Brampton June 3rd, 1904, is not entered in cash book, but this check, I understand, is in possession of your clerk to be handed over to new treasurer when he takes office.

In checking over the various disbursements with vouchers, I find credit taken on the 18th of June, 1901, for $300 as if for the lifting of a note for that amount at the bank. There is no trace, however, either in the cash book or bank pass book that such a note was ever discounted in favor of the township. Among the vouchers for that year, and apparently as a warrant for the entry in cash book, there is a cancelled note for like amount without the corporation seal and signed unofficially by W. H. McKinnon and John Harris, due at the Bank of Hamilton, Orangeville, at one month from the 23rd April, 1901 (due May 26th, 1901). This note, while not maturing on the date of the entry in cash book, seems to have been passed by your audi-

tors as an authority for same. However, it is worthless as a township voucher, and has the appearance of having been used for private purposes.

The following memorandum therefore shows the amount of balances of cash book of your late Treasurer still unsettled for, and in addition sets out the amounts uncovered by the audit and due by him to the township, either through their having been short credited or wrongfully charged:—

Due as per Cash Book in addition to amount handed to Mr. Meek and balance at Bank of Hamilton, Orangeville	$ 310 26
Due Re Police Village of Alton	80 14
Due Re Police Village of Inglewood	73
Short credited from moneys receeived on account of Collectors' Rolls	2,755 11
Short credited—Interest allowed by Bank	89 44
Short credited—Non-resident taxes, 1897	63 50
Short credited—License Fund, 1895	45 00
Charge made for Note, June 18, 1901	300 00
	$3,644 18

I have made no attempt to compute the interest due on above, but you will doubtless appreciate that, at the rate of 5 per cent., which I understand, is what you are paying to the bank, the interest now matured on above items would amount to a considerable sum.

In further connection with above I might say that careful search failed to produce the cash books previous to the one now in use, which opens with the beginning of the year 1898. Prior, then, to that date, I had recourse to the statements prepared for the Auditors by the Treasurer, excepting in the years 1893 and 1894, when the statements for these two years being also missing, I had to use the reports as printed in connection with your minutes and by-laws.

In addition to the foregoing I would also call your attention to an error of $100 in the final additions of the collector's roll (West) for the year 1900. The amount as certified to by your then Clerk being $8,426.64, while the amount of taxes entered thereon actually totals to $8,526.64. According to the Collector's pass book the former amount is all that is shown as being paid into the Treasurer.

In making a few recommendations for the future, I would suggest that your Treasurer be instructed to supply to your auditors, and forming a part of the statement he prepares at that time a memorandum reconciling the amounts entered in cash book and defalcation list with the total of the collectors' rolls for the year.

The collectors, for their parts, should see that their pass books eventually balance with the amount of the roll they have to collect, and that the payments by them to the Treasurer, as well as the amount of taxpapers returned uncollected, are properly receipted for.

These pavments from the collectors to the Treasurer should be entered in cash book on dates received and not held over to be lumped finally in two or three amounts, as has been done in the past.

Excepting a limited amount to be used for current expenses, all moneys received should be deposited in the bank as speedily as possible.

The records of all transactions with the bank (deposits, discounts, withdrawals, etc., and showing the balances at all times), should be kept in the columns provided for same in the cash book. This has not been done in the past.

I understand that until lately the Treasurer has been the custodian of the present bond given to the township for the proper performance of his duties, and that the bond previous to this one is missing. I would suggest

that papers of like nature and value be kept in your Clerk's office, for production at any time when required, and that he be supplied with the proper means to provide against their loss or destruction by fire.

In conclusion then and in view of the foregoing I would strongly recommend that your Treasurer be instructed to have ready for inspection of auditors, in addition to the vouchers for payments, all papers, books, etc., relating to amounts due to the township in the course of the year, so that they will be able to satisfy themselves, not only that items of expenditure recorded had been duly authorized, but also that the township had received credit for all moneys to which it was entitled.

All of which is respectfully submitted.

Yours truly,

EDMOND GUNN, C.A.

The cost of this audit was $200.

TOWNSHIP OF FERRIS REPORT, DISTRICT OF NIPISSING, OCTOBER 4TH, EDMOND GUNN, AUDITOR.

TORONTO, October 12th, 1904.

TO THE REEVE AND COUNCIL OF THE TOWNSHIP OF FERRIS, NIPISSING DISTRICT.

GENTLEMEN:—

I have gone over the books of your Township Treasurer for the year 1903, checking, in so far as possible, with the material at hand, the various items of receipts and expenditures.

I cannot, however, but call your attention to the exceedingly slovenly and unsatisfactory way in which the cash book has been written up and the vouchers filed.

In fact, with the vouchers for so many of the entries being missing, and, in some cases, being of little value when found, the entries they represent being made in the cash book without any apparent regard of dates or order, and the whole kept in such a helter-skelter confusion, a satisfactory audit is almost impossible.

As an instance of improper vouchers, Warrant No 2, dated January 12th, 1903, for $9, payable to M. D. Nelan, is signed by M. D. Nelan as Reeve, and Warrant No. 3, dated January 12th, 1903, for $12.00, payable to M. Nelan, is signed by M. Nelan as Reeve; the absurdity of this needs no comment.

I have allowed these two charges to remain, however, as your council apparently authorized the Reeve to issue orders for like amounts at its meeting held on the 12th of January, 1903.

The debentures paid in 1903 are not shown as cancelled among the vouchers.

The report of your Auditor dated February 25th, 1904, and as published in the North Bay Times of March 10th, 1904, leaves out many items of overcharges in the cash book, and I have taken this report and endeavored to corroborate its findings in so far as possible.

Taking up the first receipt of moneys as recorded, I am unable, not having the collector's rolls, etc., as a guide, to ascertain whether the township has duly received credit for all amounts from the different sources of revenue to which it is entitled.

This is an important point, and should not be passed over by your Auditors.

I might say that there appears to be no credit for receipts from fines, licenses, etc., which are generally among a township's sources of income.

Passing on to the expenditures, I find under the class "Salaries and allowances," that items shown as being brought forward from 1902 and described more particularly in auditor's report as follows:—Under date of January 12th, A. Rochfort, $2.05; J. Guilmette, $2.10, and J. Hurtubise, $2.60, were charged in the year 1902, under date of December 15th, and appear in your published auditor's report for that year.

There appears to be some confusion with the two items of $34.15; charged under dates of May 13th and May 23rd, to Trader's Bank and M. D. Nelan, salary account respectively. In the minutes of your council meeting of February 28th, 1903, I find an authority for the passing of an order for $34.15 in favor of M. Nelan to offset an error apparently of the Trader's Bank in charging cheque to his account, but one charge against the town-

ship was all that was necessary. It certainly would be a hardship for the township if it had to pay accounts twice under such circumstances.

The effect of the withdrawal, then, of these charges from the list of expenditures would increase the balance of cash on hand at the first of the year as follows:—

1903—Jan. 12.	Charges in error, J. Rochfort.....	$2 05
" "	" J. Guilmette	2 10
" "	" J. Hurtubise	2 60
" May 13 and 23.	Item charged twice	34 15
" Dec. 31.	Cash on hand as per auditor's statement.....	429 81
		$470 71

I presume that there should be also a credit to the township (as formerly) for interest on current and savings accounts as allowed by the bank.

In regard to the statement of assets and liabilities you will doubtless appreciate that it would be impossible to corroborate the figures as shown on published statement without the proper data for comparison.

There appears, however, to be no mention among the liabilities of the issue of debentures for school purposes, the liability for principal on which, as I understand it, would amount at the date of statement, to about $680.

In making some suggestions for the future, I would recommend your council to strongly insist that all entries for receipts and payments be made in cash book consecutively on the dates of their occurrence. Every entry for payment should be represented by a voucher signed by the proper authority. These vouchers should be numbered in sequence with the corresponding number in the cash book and kept filed away in order so as to be ready for the auditors when required.

Your current bank account showing deposits, withdrawals and the balance at all times, should be kept in cash book in the columns provided for same.

Your Treasurer should keep proper record of the issue and payment of debentures and other debts contracted by the township, so that your liability along this line could be determined at any time.

In conclusion, then, your Treasurer should be instructed to prepare for the inspection of auditors, all books, papers, vouchers, etc., necessary for them to satisfy themselves, not only that all payments recorded have been properly authorized and made, but that the township has received credit for all moneys to which it is due.

Yours truly,

Edmond Gunn, C.A.

The cost of this audit was $21.15.

REPORT OF SPECIAL INSPECTION, AUDIT AND EXAMINATION OF THE BOOKS, ACCOUNTS, VOUCHERS AND MONEYS OF THE MUNICIPAL CORPORATION OF THE TOWNSHIP OF ENNISKILLEN, IN THE COUNTY OF LAMBTON.

F. H. Macpherson, F. C. A.,
Chartered Accountant.

Windsor, Ont., Dec. 20, 1904.

WINDSOR, Ont., Dec. 20, 1904.

SIR,—I have the honour to submit herewith Report of my inspection, examination and audit of the Books, Accounts, Vouchers and Moneys of the Municipal Corporation of the Township of Enniskillen in the County of Lambton.

I have the honour to be, Sir,

Your obedient servant,

F. H. MACPHERSON,

Chartered Accountant.

The Honourable, The Lieutenant-Governor,
The Province of Ontario, Toronto, Ont.

REPORT OF SPECIAL INSPECTION, AUDIT AND EXAMINATION OF THE BOOKS, ACCOUNTS, VOUCHERS AND MONEYS OF THE MUNICIPAL CORPORATION OF THE TOWNSHIP OF ENNISKILLEN, IN THE COUNTY OF LAMBTON.

Upon the authority of an Order-in-Council approved by His Honour, the Lieutenant-Governor of the Province of Ontario, the 27th day of January, 1904, Frank H. Macpherson, a Fellow of the Institute of Chartered Accountants of the City of Windsor, was instructed and empowered to make an inspection, examination and audit of the books, accounts, vouchers and moneys of the Municipal Corporation of the Township of Enniskillen, in the County of Lambton, under the provisions of Chapter 228, R.S.O., 1897.

In pursuance of the said authority and instructions the said Frank H. Macpherson hereby reports that he has made an inspection, examination and audit of the various accounts of the said Corporation.

The audit is made upon the petition of certain ratepayers addressed to the Honourable the Lieutenant-Governor of Ontario. The request for the investigation is based upon the following grounds:

"That your petitioners have reason to believe for a number of years past great irregularities have existed in the management of the financial affairs of the said Township of Enniskillen; that in the said township a large number of drainage and other works have been undertaken under The Municipal Drainage Act as local improvements, that large sums of money raised under local improvement by-laws for drainage and other purposes and remaining as surplusses after the completion of the works for which they were raised have been wrongfully applied to general municipal purposes instead of being repaid or credited to the ratepayers entitled thereto; that moneys have been received by the municipality and not credited or entered upon the accounts of the township; that transactions have taken place ostensibly in the interest of the municipality which were really for the personal benefit of individual members of the township council; that property purchased by the township council nominally for the township has been sold for the benefit of the Reeve of the township, and to the Reeve himself, and that there is every reason to believe that the financial affairs of the said township have been conducted in a loose, irregular and unbusinesslike and wholly unwarranted manner, and that gross irregularities have prevailed to a large extent in connection therewith."

My findings in connection with the charges that drainage funds have been misapplied will be found under the head of Drainage Accounts. The charge "that transactions have taken place ostensibly in the interests of the municipality which were really for the personal benefit of individual members of the township council," and "that property purchased by the township council nominally for the township has been sold for the benefit of the Reeve of the township, and to the Reeve himself," has been carefully enquired into. Notices were sent to all petitioners, and to present and past members of council, and officials of the township, advising that I would meet the petitioners and others at the township hall in the Town of Petrolea on Monday, May 16, 1904, to take evidence regarding the above charges and hear statements relative to the conditions of affairs in the township generally.

The above charge would appear to relate to the purchase by the township of the E. ¼ of lot 7, con. 13. The circumstances attending the purchase of this property I find to be as follows, (these findings being based upon evidence taken and statements made upon the day in question): Upon this property (50 acres) was a gravel pit of some 19 or 20 acres which the township was desirous of possessing. The council held a special meeting Dec. 4, 1902, to consider the purchase of the property which was being sold under mortgage, and the Reeve was instructed to attend the sale on the 5th and bid up to $6,000. The terms of sale required a payment of 10 per cent. at time of purchase, and a warrant was drawn upon the Treasurer for $600.00 in favor of the Reeve to enable him to comply with the said terms in case the township bid was favorable. The Reeve attended the sale, bought the property for $5,600, and made a deposit thereon of $600.00. At a meeting of council Dec. 16th, the Reeve reported his action, which was duly recorded. The property was held for about two months, when it was sold to one Thomas Franklin, the township reserving the gravel pit upon said lot for 999 years, paying therefor the sum of $1,900, the balance of the purchase price being provided by the said Franklin. To save expense the deeds were made direct from the mortgagees to Franklin, the township taking a lease of the gravel pit for the term mentioned. The conclusion arrived at is, that the interests of the township have not suffered in any way, and that there is no reflection upon the Reeve, members of council or the township officials in connection with the transaction, beyond a suggestion that the details in connection with the final closing of the transaction should have been made a matter of record in the minutes of the proceedings of council.

Scope of Audit.

Having dealt with perhaps the most serious matter complained of, I come to a consideration of the affairs of the township in other particulars.

The inspection and examination of the accounts of the township covers the period from 1896 down to Dec. 31, 1903, during the whole of which time Geo. V. Wyant was Clerk and A. A. Dewar was Treasurer.

Besides the examination of the accounts in general the Drainage Accounts have been exhaustibly enquired into, and these have been examined from the date of initiation of the work in each instance.

Collectors' Rolls.

The Collector's rolls for the several years have been examined and have generally been found accurate.

Examination of the arrears of taxes in the County Treasurer's office shows that these have been properly accounted for .

There has been no proper return of the taxes by the several collectors to the Treasurer as prescribed in Section 147 and 148 of the Municipal Act. No sworn statement has been delivered to the Clerk to enable him to forward the notices required under the above section.

As stated previously, the collector's rolls are generally well and accurately prepared. The schedule or summary is, however, not in accordance with the statutory requirements, inasmuch as details are not furnished showing the several rates placed upon the roll for drainage and other special rates.

A pro-form exhibit is attached to this report which sets forth a form of schedule prepared in compliance with the statute, from which the necessary information can be obtained to enable the township treasurer to make the necessary entries upon his books.

Drainage Accounts.

A careful examination of the drainage accounts of the township has been made, and reference is found necessary to the undernamed.

The practice originally, where a surplus existed after the completion of the drain, was to make cash refunds of any existing surplus to the ratepayers interested. Later this method was changed and the return of a surplus was provided for by the making of a pro-rata reduction covering the balance of the existing assessments. In this connection it may be said that the latter is really the only equitable manner of dealing with refunds, the rebate thus being received by the person or persons properly entitled thereto. In connection with these cash refunds, and allowances under the engineer's report, certain properties appear not to have enjoyed the benefits of such. The by-laws and properties are as follows:

By-law 18 *of* 1895, *King Drain.*

N. 115 acres, lot 4, con. 5		$22 80
W ½ lot 4, con. 6		2 06
		$24 86

By-law 16, *of* 1899, *Fox Creek.*

W. ½ lot 20, con. 8	O. L. & Oil Co.	1 31
E. ½ lot 20, con. 8	O. L. & Oil Co.	1 31
E. ½ lot 23, con. 8	O. L. & Oil Co.	2 18
W. ½ lot 31, con. 8	J. Turray	1 09
E. ½ con. 8	J. Turray	1 45
		$ 7 34

By-law 2, *of* 1893, *McCrie Drain.*

N. ½ 4 con. 14		1 95

By-law 19 *of* 1893, *Centre Street Drain.*

Under this by-law only two refunds appear to have been made. Total amount under by-law $53.20, less

Refunded	$13 78
Balance to refund is	39 42

Details of the properties interested may be obtained by a reference to the by-law.

By-law 45 *of* 1894, *Kerr Drain.*

F. ½ W. ½ 2	Jno. Fitchborne	10 85

		$34 64

By-law 26, of 1897, Fox Creek Drain.

Bridge allowance unpaid on W. ½ 20, con. 8		
E ½	O. L. & Oil Co.	$24 00
W. ½ E. ½	W J. Ladelle	10 00
		$34 00

By-law 4, of 1898, Murray Drain.

C S. R.		$0 11
E ½ 6, con. 4	J. A. Anderson	11
		$ 0 22

By-law 5, of 1898, 6th Line Drain.

S 102, lot 31, con. 7	Blain Bridge Allowance	$12 00

By-law 8, of 1898, Hunter Drain.

Pt E. ½ [illegible], con. 8. Peter Stewart commuted his assessment paying $50.00 in full. Afterwards an amending by-law was passed reducing assessment to $41.44. The ratepayer does not appear to have received a refund to which he was entitled, being the difference between $41.44 and $50.00, or	$8 56

By-law 40, of 1898, Douglas Drain.

W. ½ 31, con. 8	Allen Clarke bridge allowance	$8 00
E. ½ W. ½ 31, con. 8	Henry Waltham bridge allowance	4 00
		$12 00

By-law 8, of 1901, McBride Drain.

W. ½ 11, con. 1	Jno. McAlpine bridge allowance	$15 00

By-law 37 of 1899, Cameron Drain.

S. S. No. 2	$1 65

The following drainage surplusses appear to be available for distribution, the necessary by-laws having first been passed:—

By-law 15 of 1893, 4th con. drain	$ 61 87
By-law 18 of 1893, Kilmer drain	59 23
By-law 19 of 1895, Black Creek drain	100 11

With reference to by-law 19 above, it would appear that settlement was had with Brooke Township (see Minutes, folio 208, Dec. 15, 1897) which report shows Ennis-

killen had paid $2,643.55. The treasurer's accounts shows but $2,543.44, a difference of $100.11.

By-law 22 of 1895, Noble-Wooley drain	$22 11
By-law 8 of 1901, McBride drain	5 64
By-law 16 of 1901, Centre Street drain	19 33

In the commissioner's report on this drain (by-law 16) appears a charge of $21.00 for a bridge not in the estimates. The treasurer does not appear to have paid out this sum on account of the drain in question, and the balance is therefore left as a liability of the township.

The following drain accounts are still open, the several balances being liabilities of the township.

By-law 8 of 1900, McFayden	$176 77
By-law 20 of 1901, Marshall-Woods drain	44 52
By-law 9 of 1902, 12th concession line drain	582 62
By-law 10 of 1902, McDougall drain	260 93
By-law 14 of 1902, Correy drain	45 28
By-law 15 of 1902, Miller drain	65 03
By-law 16 of 1902, Ferry drain	30 80
By-law 17 of 1902, Kilmer drain	330 62
By-law 18 of 1902, Rowse drain	15 66
By-law 24 of 1902, Groves drain	558 96
	$2,111 22

In treating drainage surplusses by a pro-rata reduction, covering the life of the several debentures issued, a liability is created on the part of the township, the municipality becoming as it were the trustee for this surplus, which sum is to be used annually (to which must be added interest at the same rate as the debentures are bearing) until the final debentures of each series have been paid. The several accounts which the township holds in trust as of Dec. 31, 1903, are as follows:

By-law 19 of 1895, Black Creek	$40 72
By-law 13 of 1897, Campbell-Watson	2 07
By-law 16 of 1897, Simpson drain	16 25
By-law 20 of 1897, Dewar drain	9 57
By-law 25 of 1897, new outlet 8th line (J. McElroyoed)	30 99
By-law 26 of 1897, Fox Creek drain	79 34
By-law 4 of 1898, Murray drain	21 07
By-law 5 of 1898, 6th line drain	4 09
By-law 8 of 1898, Hunter drain	20 81
By-law 18 of 1898, McIntosh drain	77 71
By-law 19 of 1898 Durham Creek drain	34 69
By-law 29 of 1898, Rainsberry drain	53 78
By-law 32 of 1898, Cook drain	21 57
By-law 40 of 1898, Douglas drain	6 22
By-law 41 of 1898, Osborne drain	62 37
By-law 42 of 1898, Shepherd drain	4 58
By-law 43 of 1898, Stinson drain	3 22
By-law 6 of 1899, Smith drain	25 09
By-law 7 of 1899, Wooley drain	11 33
By-law 36 of 1899, German drain	11 20
By-law 37 of 1899, Cameron drain	71 11
By-law 19 of 1901, Kelly drain	13 42
By-law 20 of 1901, Marshall-Woods drain	1 25
By-law 15 of 1902, Miler drain	48 92
By-law 16 of 1902, Perry drain	30 38
By-law 25 of 1902, Groves drain	57 64
	$760 39

The amounts above specified are greater in several instances than the sums which will be required to meet the trust assessments. Each of the

by-laws have been figured out to finality, and the following sums will be available for distribution at the expiration of the final debenture payment on account thereof:

By-law 19 of 1895, Black Creek drain	$ 5 46
By-law 20 of 1897, Dewar drain	2 85
By-law 25 of 1897, New outlet 8th line (J. McElroyoed)	16 40
By-law 26 of 1897, Fox Creek drain	20 24
By-law 4 of 1898, Murray drain	11 16
By-law 8 of 1898, Hunter drain	4 41
By-law 18 of 1898, McIntosh drain	20 79
By-law 19 of 1898, Durham Creek drain	27 80
By-law 29 of 1898, Rainsberry drain	2 22
By-law 32 of 1898, Cook drain	12 08
By-law 41 of 1898, Osborne drain	22 28
By-law 43 of 1898, Stinson drain	3 22
By-law 42 of 1898, Shepherd drain	1 52
By-law 7 of 1899, Wolley drain	4 11
By-law 37 of 1899, Cameron drain	17 40
	$171 94

Drainage Assets.

Up to the year 1900 the township was in the habit of issuing debentures on drainage account, making them repayable in equal annual sums of principal, instead of issuing them upon a sliding scale, making the total annual payment of principal and interest of an equal amount each year. As a consequence we find that the township has made temporary advances of a considerable sum in connection with the drains upon which debentures of the class mentioned were issued, as per the following schedule:

By-law 18 of 1895, King drain	$76 26
By-law 2 of 1894, Arn drain	30 49
By-law 12, 1893, Osborne drain	7 75
By-law 31 of 1894, Stinson drain	15 21
By-law 19 of 1895, Black Creek outlet	154 82
By-law 22 of 1895, Noble Wooley drain	76 02
By-law 14 of 1896, Fox Creek drain	131 79
By-law 15 of 1897, McCallum drain	28 35
By-law 11 of 1897, McMurray drain	6 25
By-law 16 of 1897, Simpson drain	12 57
By-law 22 of 1897, Moore drain	35 37
By-law 21 of 1897, Kells drain	5 59
By-law 23 of 1897, O'Dell drain	9 39
By-law 25 of 1897, New outlet 8th line	13 23
By-law 26 of 1898, Fox Creek drain	94 74
By-law 8 of 1898, Hunter drain	13 14
By-law 9 of 1898, McNabb drain	5 09
By-law 16 of 1898, Stonehouse drain	10 83
By-law 18 of 1898, McIntosh drain	32 96
By-law 19 of 1898, Durham drain	27 21
By-law 29 of 1898, Rainsberry drain	63 35
By-law 32 of 1898, Cook drain (if issued)	7 95
By-law 40 of 1898, Douglas drain (if issued)	11 79
By-law 41 of 1898, Osborne drain	38 63
By-law 42 of 1898, Shepherd drain	10 00
By-law 6 of 1899, Smith drain	27 25
By-law 7 of 1899, Wooley drain	8 29
By-law 19 of 1899, McKenzie drain	8 48
By-law 28 of 1899, Black Creek drain	86 16
By-law 32 of 1899, Bradley drain	4 80
By-law 35 of 1899, Stafford drain	14 24
By-law 37 of 1899, Cameron drain	30 38
By-law 36 of 1899, German drain	5 76
By-law 8 of 1900, McFayden drain	31 66
By-law 14 of 1900, Marthaville drain	15 36
	$1,151 07

Accounts should be opened for each of these items, and, annually, the difference between the amounts of the debenture payments and of the levy should be either debited or credited, as the case may be, so that each annual statement will show the total balances of advances of the character mentioned. These accounts thus treated will, with the final levy in each case, be closed. It is possible that there may be small balances either way, which should be closed into general fund.

Advances have been made by the township on account of the following drains which should be taken care of either by the issue of debentures in due season or by the special assessments:

By-law 2 of 1894, Arn drain		$21 87
By-law 12 of 1893, Osborne drain		245 92
By-law 14 of 1896, Fox Creek drain		94 50
By-law 14 of 1900, Marthaville drain		99 15
By-law 9 of 1901, Ormerod drain		106 00
By-law 25 of 1901, Perry drain		10 73
By-law 19 of 1902, McMurphy drain		60 78
By-law 24 of 1902, E. E. & D. town line	$333 50	
Less	64 00	
		269 50
By-law 27 of 1902, McListen drain		98 05
By-law 28 of 1902, Tait drain		24 10
By-law 5 of 1903, Noble Wooley drain		107 50
By-law 6 of 1903, Drader drain		24 50
By-law 7 of 1903, Hunter drain		207 45
By-law 8 of 1903, Park drain		120 90
By-law 12 of 1903, Ball drain		36 00
By-law 14 of 1903, Weidman drain		8 00
By-law 15 of 1903, Anderson drain		56 30
By-law 16 of 1903, Thornton Fisher drain		231 12
By-law 17 of 1903, Hodges drain		388 30
By-law 18 of 1903, Kesson drain		28 75
By-law 19 of 1903, Johnson drain		47 15
By-law 20 of 1903, Barwise drain		26 00
By-law 23 of 1903, Dennis-Hamilton drain		72 56
By-law 25 of 1903, Knittle-McMurphy drain		9 70
By-law 27 of 1903, Scott		91 40
By-law 21 of 1903, Wilcox		8 00
By-law 18 of 1899, Scott drain		55 03
		$2,548 31

In two or three instances the township appears to have refrained from selling debentures to recoup the treasury for expenditure on account of certain drains, levies being regularly made to meet the same. Following is a list of the drains and the amounts involved as at Dec. 31, 1903:

By-law 32 of 1898, Cook drain	$63 47
By-law 40 of 1898, Douglas drain	116 90
By-law 28 of 1902, Tait drain	81 57
	$261 94

The township liability, Dec. 31, 1903, on account of collections placed upon the collector's roll of 1903 to meet debentures, is as follows:

DRAINS.

By-law 2 of 1894, Arn drain, deb. 9	$112 56
By-law 12 of 1893, Osborne drain, 10	332 31
By-law 15 of 1893, 4th con. drain, 10	116 59
By-law 18 of 1893, Kilmer drain, 10	194 30
By-law 24 of 1893, 9 and 10 side line, con. 5, 4 and 6, 10	113 95
By-law 31 of 1894, Stinson drain, 9	59 36

DRAINS,—*Continued.*

By-law 18 of 1895, King drain, 8	$ 162 25

SCHOOLS.

S. S. No. 25, debentures 7 and 8	$100 00
S. S. No. 14, debentures 2 and 3	203 90
S. S. No. 9, debentures 8	105 00
	$408 90

The liability of the township on account of unprovided debentures as on Dec. 31, 1903, is $17,155.12.

The Township Auditors have been in the habit of taking interest to account in their statement of debenture indebtedness. This is not correct and should be discontinued. Interest is not chargeable as a liability for more than the current year.

TILE, STONE AND TIMBER DRAINAGE.

The Treasurer's books, and where these have not been available, the printed auditor's reports, show the sum of $4,100.00, entered as payments

to ratepayers for tile drainage purposes. The Township Clerk has entered annually upon the roll, collections covering loans amounting to $4,200.

I find that an item of $100.00 paid to W. Miller, W½ 22, con. 2, 100 acres, presumably in the year 1891, does not appear to be entered in the Treasurer's books—assuming the accuracy of the printed auditor's report, no books being forthcoming. This amount would seem to be due to the late Treasurer of the township. Under the circumstances, I have not included this as a liability, simply drawing the attention of the Council to the fact. The first levy on account of this property was entered upon the roll of 1892, and has continued regularly since that time.

The printed auditor's report for 1893 shows a payment of $200 to M. Merchant, Nov. 24, 1893 for tile drainage purposes. The Collector's roll shows a levy of $7.36 only, in the years 1894 and 1895, whereas $14.72 should have been collected. The final levy on the full amount will be entered in the roll of 1913. The amount of $7.36 should be charged against the property (W. ¼ lot 20, con. 3) in the years 1914 and 1915.

An examination of the tile, stone and timber drainage account shows that levies for the redemption of debentures on account of loans commenced in 1889, although the tile drain debentures were not sold until 1894, and a second lot in 1896. From 1889 to 1894 the township advanced the money out of the General Fund and afterwards recouped itself when the debentures were sold. The difficulty which presents itself here is, that the land owners who began paying taxes in 1889 will have paid the whole number of assessments within 20 years and that there will still be a number of coupons which will require to be redeemed by the township. The liability of the township on account of collections of this character, is about $200.00 and this I have added to the balance as shown by the last auditor's report, making the net liability of the township on Dec. 31, 1903, $507.84. This should be carried in the township ledger as a liability, and the levies made each year should be credited thereto, and the paid coupons debited.

Accounts of Treasurer.

The accounts of A. A. Dewar, Treasurer, have been carefully scrutinized both as to receipts and expenditures from the date of his appointment to office July 15, 1896, down to December 31, 1903. While the books of account are not kept after the most approved fashion, the revenues of the municipality have been satisfactorily accounted for.

The vouchers in many instances are not in proper form. Particularly is this the case with reference to school orders. The Statute requires that all orders on the Treasurer for school purposes should be signed by at least two of the Trustees and should bear the corporate seal.

The drainage accounts are not kept in such form as is recommended. The books are not kept by double entry. Each drain should be charged with the cost of construction, expenses, etc., and charged with the proceeds of the debentures. This account should be continued in the ledger as a running account, until the construction of the drain has been completed and the surplus, if any, refunded or applied, or if a debit balance, then until closed out by a supplementary levy.

If the accounts be kept in this way each financial statement issued will show for itself the exact standing of every drain.

Your treasurer has followed the custom in vogue at the date of his assumption of office of debiting the drain account each year with the debenture and interest paid. Entries of this character should not be included in drain accounts. In many instances levies are placed upon the roll a year in advance of the debenture payment and if these levies be credited up in the year

upon which they are placed on the roll, the drain account shows a credit balance continuously through the life of the debenture. This is misleading to the ratepayers who assume that there is a balance available for distribution whereas such is not the case.

The manner of dealing with levies for drainage and other purposes is dealt with later on.

In a case where the work of construction has not been completed before a first levy has been made, and where this levy takes the place of the first debenture, the balance only being sold, then, and in such cases, the portion of the levy representing the principal should be carried to the credit of the drain construction account, the balance of the levy being placed in the general fund to offset the interest to which the township is entitled by reason of its having carried the drain account during the year. The Clerk's salary being fixed to include services in connection with drainage by-laws the allowance which is provided for under each of these by-laws for Clerk's services should be disposed of by resolution of council authorizing the issuance of a cheque for the amount drawn in favor of the Treasurer. The Treasurer will then enter at the credit of the general fund the amount of the cheque received, and will charge the same to the drain. The same result can be effected by a journal entry, but as all municipal accounts are presumed to be carried along upon a receipts and expenditures basis, the passing of the account and issuing of the cheque is the better method.

Drains constructed under the D. & W. Act should be disposed of in the same manner. The township's proportion of cost should be dealt with by issuing a cheque and charging the general fund and crediting the drain; a cheque should be issued for the Clerk's fees which should be credited to general fund and charged to drain.

When warrants are issued under the D. & W. Act the resolution authorizing the payments should state clearly the land chargeable therewith, and the Engineer's certificate should be filed with the Clerk previous to such payment.

Instances have occurred where ratepayers have been permitted to commute their assessments after the sale of the debentures. This course should not be permitted. Clause 54 of the Municipal Drainage Act provides that these commutations must be made previous to the sale of the debentures.

If the Treasurer will enter the amount realized from sale of debentures in his cash book in detail, that is, the principal, premium andi accrued interest received on account of each issue of debentures, he will then be able to credit each drain with its proper proportion of the sale of debentures and can prepare a statement setting forth the exact standing of each. In his connection it should be said that only the principal and premium should be placed at the credit of the drain. Accrued interest should be entered in the general fund. This, by reason of the fact that the township has paid interest on borrowed funds during the construction of the drain, unless the debentures have been sold in advance. In any case the drain is not entitled to the accrued interest.

The local auditors have been including as assets certain amounts due from other municipalities for drainage purposes. This is misleading. Assets of this character are assets of the drainage works and not of the municipality. Similarly sums due other municipalities on account of drainage have been improperly entered as liabilities of the township. The sums due on drainage construction contracts have been included as a liability of the municipality which they are not. These have been altogether omitted from our report. As settlements of these claims are made the proper debits and credits will be entered directly in the drain accounts, and will not in any way affect the financial standing of the municipality as a whole.

A few small allowances covering Clerk's fees, etc., may be counted as assets. The amount is so small however that I have not thought it necessary to go into detail.

A pro-forma exhibit is presented which shows the form in which the journal entry should be prepared to place the Collector's roll properly upon the Treasurer's books. It will be observed upon examination of this form that all levies for debenture purposes are placed in an account called "Debenture Levies Account." As the debentures mature and are paid they are debited to these accounts, and the balance at credit thereof represents the amount, at all times, which the Township Treasurer has in his possession for the purpose of meeting debentures, and which sum is a liability of the township.

Financial Position.

The present financial standing of the corporation is shown in statement form. The available assets $41,486.51, exceed the current liabilities $11,444.99 by a larger amount $30,041.52. This sum is more than twice greater than the township, county and general drain rates combined, and is the result of excessive levies for general and other purposes over a series of years.

It appears to have been the practice of the township council to levy rates a year in advance of township necessities. The Clerk appears to have been of the opinion that the Municipal Act required this. Upon request being made for the authority, I am referred to sec. 404 of the Consolidated Municipal Act, 1903, which provides that the council, "shall make estimates for the year in which such sums are required to be levied." The Clerk then goes on to say, "We made the estimate and entered it into the book for the Collector in August, September and October, 1903, and collected in January, February and March, 1904, for current expenses of 1904."

This interpretation of the Statute is altogether wrong. The council of 1903 have neither power nor authority to levy township or county rates for 1904. Such procedure would place the council of any year entirely at the mercy of the council of the previous year. The expenditures of the current council could not at any time, unless illegally, exceed the amount levied for them by the previous council.

The suggestion is made that the township council should refer this matter to and act upon the advice of its solicitors.

General Remarks.

I have prepared a schedule showing the analysis of the Collector's roll which should be prepared by the township Clerk and forwarded to the township Treasurer immediately upon the completion of the roll and previous to its being delivered to the Collector. From this schedule, the Treasurer prepares the necessary journal entries to enable him to get the Collector's roll properly upon the ledger.

Certain of the petitioners requested an examination of drain accounts which had been initiated 20 and 25 years ago, claiming that a considerable surplus had never been refunded. In the absence of books and other information, it is impossible to make the examination desired.

Objection has also been taken to the failure of the council of the year 1903, to prepare, in accordance with the Municipal Act, a detailed financial statement of receipts and expenditures for that year, also a statement of assets and liabilites. I find that an abstract, only, of the receipts and disbursements was printed. The explanation given by the officials was, that the statement was not printed from motives of economy. The council should

comply with the statutory requirements in his respect regardless of the expenses attendant thereon.

The volume of arrears of taxes in the hands of the County Treasurer and township should be entered therein.

Recommendations.

As a result of the present examination, inspection and audit of the books, accounts and vouchers of the Municipal Corporation of the Township of Enniskillen, I make the following recommendations:

(1.) That an official form of receipt, with stub properly numbered, shall be adopted and that all moneys received by the Treasurer, from whatever source, shall be acknowledged thereon.

(2.) That expenditures on award drains shall be charged to their proper individual accounts in the Treasurer's ledger to be later balanced by cash received from the tax-payer direct, from the township for its share, or through the Collector's roll.

(3.) That the Treasurer shall keep a debenture register after the form now supplied and written up, and that immediately upon the preparation of debentures and previous to delivery, he shall enter therein full details both as to principal, interest and other required particulars.

(4.) That the Treasurer shall decline to honour school warrants, unless the orders are properly signed by at least two Trustees and sealed with the seal of the school section.

(5.) That the Treasurer shall decline to pay warrants when presented by other than the party to whom payable, unless (a) properly endorsed, or (b) upon written order authorizing payment to another; which order shall be attached to the warrant after being endorsed by the person presenting it.

(6.) That all accounts presented to the council shall be in writing, and shall be certified by a member of the council having knowledge of the work, before being presented; and that these be properly numbered and kept on file in the Clerk's office for reference.

(7.) That conveniences for properly filing all township documents be provided for both the Clerk and Treasurer.

(8.) That the Collector of taxes shall return his roll previous to the 8th day of April in each year and that he shall make his returns of uncollected taxes in the form required by statute, which includes a duplicate of the return, to be made to the township Clerk.

(9.) That previous to the settlement of the Collector's roll, the Collector shall present to the council a statement of all taxes which he has been unable to collect, other than those which may by by-law be returned to the county Treasurer; and that such statement shall be passed upon and confirmed by the council either by issuance of a warrant, or passing of a resolution before being accepted by the Treasurer in his settlement with the Collector.

(10.) That the Treasurer shall prepare and enter in the back of or attach to the Collector's roll a statement showing the settlement by the Collector, including the several dates of payment of collected taxes, the balance uncollected and included in the return to the Treasurer and the amount allowed by order of the council, and that the Treasurer shall certify in said roll that he has received the amount reported and has entered the same in his cash book.

(11.) That proper books of account should be opened in accordance with the findings of this report, and that these books should be written up from Dec. 31, 1903; the Treasurer being instructed in the keeping thereof during the progress of the work.

Conclusion.

I should be remiss in my duty if I did not, in a formal way, acknowledge the services rendered during the audit by the township clerk. The township should consider itself fortunate in the possession of so competent and painstaking an official. In my whole experience I have not found in any township better conditions in a Clerk's office than in the present case.

The township Treasurer cheerfully furnished such information as was required of him from time to time during the examination of the accounts.

The work of examination of the accounts in connection with this township have been very onerous owing to the very large number of drainage works (over 135 drainage accounts having been examined).

The attention of the council is called to Sec. 4, Chapter 228 R.S.O., 1897, which requires that the recommendations made in this report shall be carried into effect.

I shall be pleased to furnish further explanations and advise with the council with reference to any of the matters or any of the recommendations contained in this report. All of which is respectfully submitted.

F. H. Macpherson,
Chartered Accountant.

Windsor, Ont., Dec. 20, 1904.

TOWNSHIP OF ENNISKILLEN.

List of Schedules.

The following schedules are included in and form part of the report pertaining to the audit, examination and inspection of the accounts of the Township of Enniskillen, dated December 20th, 1904.

Schedule I. Statement showing the financial standing of the township as of Dec. 31, 1903.

Schedule II. Statement of general assets and liabilities as of Dec. 31, 1903.

Schedule III. Statement showing unprovided debenture liability as of Dec. 31, 1903.

Exhibits.

The following pro-forma exhibits accompany the report and are to be regarded as a part thereof:

Exhibit (A). Recapitulation of Collector's Roll.

Exhibit (B). Analysis of Collector's Roll to be furnished by Clerk to Treasurer.

Exhibit (C). Example of Journal Entry covering Collector's Roll.

STATEMENT I.

TOWNSHIP OF ENNISKILLEN.

NOTE:—(1) For convenience, the Special Rate Accounts are balanced with the debenture requirement, without taking into account the non-resident roll; the adjustments are made through the General Fund. The gross amount of the Non-resident Fund is credited to General Fund.

(2) In the above exhibit drainage award levies are not included in the general fund, as in the common practice. As pointed out in the report a

special account should be opened for each award and then receipts either of cash or assessments will be credited direct.

(3) Any surplus in special rates (general drain and general school rates) common to the whole township goes into general fund and similarly any deficiency is made good out of the same fund.

Journal entry for Non-resident Collector's Roll.

Arrears of taxes, Dr. $80 50
General fund, Cr. $80 50
For return of taxes on non-resident roll, sent to county treasurer, Oct. 31, 1903.

Cost of this audit, $555 67.

The following extract from F. H. Macpherson's report *re* audit County Kent, 1903, will be found most valuable:

ARREARS OF TAXES.

There has been absolutely no check as between the local municipalities and the County Treasurer's office in respect of the collection of arrears of taxes. It may not be amiss if I quote from a report sent to the county council by the defaulting Treasurer Shambleau, in June, 1891, to show that this official had knowledge at that early date of the looseness which prevailed, and that he then pointed out the opportunity which existed for practising irregularities. The paragraph reads:

"Your honourable body must bear in mind that no audit has been made of the wild land tax since the formation of the county in 1855, a portion of any auditor's work very much neglected, for it is in this account any treasurer can use moneys that would not be discovered in a general or such faulty auditing as has been the custom to be done in this office, and would recommend that most efficient auditors should be secured and kept permanently at the work from year to year."

I have provided for a system of reports between the officials of the minor municipalities and the county which, if carried into effect, will at least put the local municipalities in possession of information as to the amounts remaining uncollected in the hands of the County Treasurer from time to time, or if collected then not accounted for.

To properly carry into effect the scheme proposed, the co-operation of the municipalities is requisite and necessary. The system is as follows:

(1) Each township or municipality returning arrears of taxes to the county Treasurer for collection to obtain a land register, the counterpart of the one now in the county Treasurer's office.

(2) The land register to be written up showing the taxes and percentages uncollected as on Dec. 31, 1902.

(3) This book is to be kept by the local treasurer.

(4) Upon receipt by the local treasurer of the clerk's returns of non-resident taxes (a duplicate of one forwarded by the clerk to the county) the treasurer to enter in the land register the taxes against the several properties.

(5) Similarly, upon receipt by the local treasurer of the collector's return of uncollected taxes, he shall prepare his return of taxes to the county treas-

urer in duplicate. The original he shall forward to the county official. From the duplicate he shall enter in the land register the taxes so returned against the several properties.

(6.) Upon May 1st in each year, the county Treasurer shall prepare a statement, showing in detail the percentages added to the several properties, a copy of which he will forthwith mail to the local Treasurer.

(7) Upon receipt thereof, the local Treasurer will post to the debit of the several accounts in his land register, the percentages so added by the county Treasurer.

(8.) The county Treasurer will as early as possible after January 1st and July 1st, in each year, forward to the local Treasurer, a statement (upon the form supplied) showing in detail the amounts collected during the preceding half year, together with a cheque in settlement thereof.

(9) The local Treasurer will, immediately upon receipt of this statement, enter to the credit of the several lots upon which the taxes have been paid, the amount as stated by the county Treasurer in his report.

(10) When for any reason, taxes are written off by resolution of the council of the local municipality the Clerk is to furnish the township Treasurer with a duplicate of the resolution forwarded to the County Treasurer, when the local Treasurer will, in his land register, on the credit side, make the following entry: "Written off by resolution of council dated..... 1903".

(11.) Immediately at the conclusion of a sale of lands for arrears of taxes, the county Treasurer to forward to each local municipality, a statement, showing the properties disposed of and the sum realized, making specific mention of any properties that have not brought the full amount of taxes charged against them.

This statement to be accompanied by a cheque covering the proceeds of the sale. The local Treasurer will credit each property included in such return, making an entry under the proper date as follows: "By Tax Sale 1903, $....." In case the property be sold for less than the taxes against it, a further entry will be needed to balance the account, viz.:, "Loss on Realization at Tax Sale (1903), $.....".

(12.) The county Treasurer to forward to the local Treasurer a duplicate of his return to the Clerk, of occupied lands to be placed upon the Collector's roll; upon receipt of which the local Treasurer will make an entry upon the credit side of the land ledger, viz: "By returned to Clerk, Roll 1903, $ .....".

(13.) Immediately after the 1st of January in each year, the county Treasurer to forward a statement in detail, of all uncollected taxes appearing in his land register as at Dec. 31st, previous, to the Clerk of the local municipality, which statement the Clerk shall deliver to the auditors.

Forms for the several returns required to carry out the procedure here outlined have been furnished. The returns of the uncollected taxes come into the county Treasurer's office, in the majority of instances, in a crude form, and with insufficient particulars. Forms of returns giving the necessary information can be obtained from the publishers of municipal forms, and I would suggest that the county might supply these to the local municipalities in order to provide that uniformity which is desirable.

I have entered into considerable detail in the foregoing, so that the officials of the local municipalities may not experience difficulty in putting the new procedure into practice.

F. H. Macpherson, F. C. A.

I would direct special attention to pages 97-99 report Tilbury West, as containing a draft of a by-law which most municipalities will find very useful in the event of their having to place a by-law before the ratepayers.

I would also call attention to the extracts 128 from the report County of Kent, made last year by M. Macpherson. A careful study will repay any municipality. Had this plan been carried out the late defaulting Treasurer of the county of Kent could not have carried out his schemes of plundering the municipality to such a great extent.

J. B. LAING,
Provincial Municipal Auditor.

Parliament Buildings,
Toronto, January, 1905.

Majority for Preston				477														

Div. 1, Almonte—No ballot paper account in poll book. *Thrown out because no figures given for each candidate. Total should be 103 (not 104); 67 wrongly put down. Deduct 4 tendered ballots counted in No. 1, Lavant. Deduct 20 tendered ballots counted, No. 4 Lanark. †Evidently a blunder.

JAMES ARMOUR, Returning Officer.

THIRD ANNUAL REPORT

OF THE

Temiskaming and Northern Ontario Railway Commission

TO

December 31, 1904.

PRINTED BY ORDER OF
THE LEGISLATIVE ASSEMBLY OF ONTARIO

TORONTO:
Printed and Published by L. K. Cameron, Printer to the King's Most Excellent Majesty.
1904.

To His Honour WILLIAM MORTIMER CLARK, K. C.,
Lieutenant-Governor of Ontario.

MAY IT PLEASE YOUR HONOUR:

The undersigned has the honour to present to your Honour the Report of the Temiskaming and Northern Ontario Railway Commission of the Province of Ontario for the year ended 31st December, 1904.

Respectfully submitted,

J. O. REAUME,
Commissioner of Public Works.

Public Works Department,
Toronto, March 20th, 1905.

WARWICK BRO'S. & RUTTER,
Printers and Bookbinders,
King and Spadina,
Toronto.

TORONTO, MARCH 11TH, 1905.

HON. J. O. REAUME,
Commissioner of Public Works, Ontario,
Toronto.

SIR,—I have the honour by direction to submit to you for presentation to the Legislature the report of the Temiskaming and Northern Ontario Railway Commission of the work done and moneys expended during the year ended Dec. 31st, 1904, under the Act, 2 Edward VII., chapter 9, as amended by the Act, 3 Edward VII., chapter 4, and further amended by the Act, 4 Edward VII., chapter 7.

I have the honour to be, Sir,

Your obedient servant,

H. W. PEARSON,
Secretary.

The Temiskaming and Northern Ontario Railway Commission.

ROBERT JAFFRAY, Chairman ..... Toronto.

EDWARD GURNEY ..... Toronto.

M. J. O'BRIEN ..... Renfrew.

F. E. LEONARD ..... London.

B. W. FOLGER ..... Kingston.

TEMISKAMING AND NORTHERN ONTARIO RAILWAY COMMISSION.

THIRD ANNUAL REPORT.

Introductory.

In submitting the Third Annual Report of the Commission, covering the year 1904, it has been thought advisable in view of the amendment of the Act passed at the last session of the Legislature authorizing the extension of the road north from New Liskeard to divide the portion of the report relating to construction into two parts, the first dealing with the line from North Bay to New Liskeard, being the portion originally authorized by the Act, and the second dealing with the extension beyond New Liskeard authorized by the amendment at last session.

This is followed by two further divisions, the one relating to rolling stock and equipment, the other to the finances.

Early in the year Mr. A. E. Ames resigned from the Commission and Mr. Robert Jaffray was appointed in his stead. At a meeting of the Commission held on February 28th, 1904, Mr. Jaffray was duly elected Chairman.

In September, Mr. P. E. Ryan, who had been the Secretary-Treasurer of the Commission from the time of its organization resigned to accept the Secretaryship of the Transcontinental Railway Commission, and Mr. H. W. Pearson, formerly Accountant of this Commission, was appointed to succeed him.

A special report by Mr. A. W. Campbell, Deputy Commissioner of Public Works, on the proposed land grant, prepared at the request of the Commission is appended.

PART I.

CONSTRUCTION WORK—NORTH BAY TO NEW LISKEARD.

The progress made during the year by Mr. A. R. Macdonell under his contract for construction of the line appears in the Engineer's report appended hereto. As there appears the Contractor claimed that he should be granted under his contract an extension of three months seasonable weather to complete the trestle filling and ballasting. As this particular work could not be carried on during the winter season this meant leaving the road in the hands of the Contractor until, say, 15th August, 1905. Meantime there was an urgent demand by the public including not only settlers to the north but numerous parties interested in lumbering, or desirous of establishing businesses of different kinds on the line of railway for an efficient service. The contractor was without the equipment, organization or staff essential to give a satisfactory service, nor was it possible then to establish a tariff of rates or to make traffic arrangements with other roads on the permanence of which those desiring to establish industries on the line of railway could depend. Under these circumstances the Commisison considered the interestes of the public would best be served by granting the Contractor the extension of time asked, subject to the right of the Commission to operate the road meantime without thereby relieving the Contractor from the obligations of his contract. Negotiations were accordingly entered into with the Contractor which finally resulted in the following agreement:

THIS INDENTURE made the nineteenth day of November, one thousand nine hundred and four, between ALLAN RANALD MACDONELL of the City of Montreal hereinafter called the "Contractor", of the first part.

THE HONOURABLE WILLIAM HARTY of the City of Kingston, Manufacturer, and THOMAS LONG of the City of Toronto, Merchant, hereinafter called the "Surviving Sureties", of the second part.

The said THOMAS LONG and JOHN MENELAUS HOPKINS, of the Town of Collingwood, Bookkeeper, the Executors of the last Will and Testament of the late John J. Long, in his lifetime of the said town of Collingwood, hereinafter called the "Executors", of the third part, and THE TEMISKAMING AND NORTHERN ONTARIO RAILWAY COMMISSION, hereinafter called the "Commission", of the fourth part.

WHEREAS the Contractor has applied to the Commission for an extension of time to complete the work called for by a certain contract between him and the said Commission, dated the third day of October, 1902, for the construction of the Commission's line of railway from North Bay to New Liskeard.

AND WHEREAS the said surviving sureties and the said John J. Long, deceased, were the sureties for the said Contractor for the due completion of said contract on the terms of their bond to the said Commission attached to said contract and the said surviving sureties and the said executors have joined the said Contractor in such request for an extension of time.

AND WHEREAS the Commission has agreed to extend the time for the completion of said work subject to the terms hereof.

NOW THESE PRESENTS WITNESS that the agreement between the parties in the premises is as follows,—

The 15th day of August, 1905, is hereby substituted for the 31st day of December, 1904, as the time for the completion of the work called for by said contract of the said 3rd day of October, 1902.

2. The Commission shall be at liberty to take over and operate the said line of railway at any time after the first day of January, 1905, without prejudice to its rights under the said contract of the 3rd day of October, 1902, as hereby amended, and without such taking over and operating of the said road being deemed to be or constitute any acceptance of the same or any part thereof as being completed as required by said contract; and it is understood that the Commission shall take possession of and operate the said line of railway as soon after the said first day of January, 1905, as it shall be able to complete its arrangements for so doing, and not later than the first day of February, 1905, provided, that if from any unforeseen cause not the fault of the said contractor the Commission shall not be able to so take possession by the said first day of February, 1905, it will take possession as soon as possible after that date and will indemnify said Contractor from loss,if any shall be sustained by him, in the operation of said line of railway between said first day of February, 1905, and the time when possession shall be taken by the Commission without any liability on the part of the Contractor to account to the Commission for the profit if it shall turn out that such operation by him after said first day of February, 1905, shall result in profit, the loss of the Contractor on such operation, if any, to be ascertained and fixed by the Engineer, whose decision in the premises shall be final.

3. After the said Commission shall have so taken over the said road the Contractor shall be bound to carry on and complete his work without interfering with the operation of said line of railway, and he and his servants and employees and his trains, engines and other equipment, and also all sub-contractors, their servants and employees and their trains, engines and other equipment shall in all respects be subject to the orders and directions of the officers, agents and servants of the Commission engaged in or connected with the operation of the said road, and shall be bound to comply with and conform to all the orders, regulations and directions of the Commission and of its officers, agents and servants engaged in or connected with the operation of the said road, the true intent and meaning of these presents being, that in consideration of such extension of time and of the other terms hereof, the Contractor shall complete, finish and fuly do and execute the work called for by his said contract, subject to the operation of the said road by the Commission and without any interference with the operation thereof except such as shall be permitted or authorized by the Commission through its officers duly designated and accredited in that behalf.

4. The Contractor shall be charged with and shall pay such proportion of the cost of maintenance of the right of way, track and equipment of any portion of the said road over which the trains, engines and workmen of the Contractor or of any sub-contractors shall pass or be employed or engaged until the final completion of the said work as the Chief Engineer of the Commission shall determine to be fair and reasonable, having due regard to the use of said right of way and track equipment for operation and for purposes of construction respectively, and the decision of the Chief Engineer as to such proportion of the cost of maintenance payable by the Contractor as aforesaid shall be absolutely final, binding and conclusive upon the parties, and the amount so adjudged to be due by the Contractor may be deducted from time

to time by the Commission from any moneys payable by the Commission to the said Contractor.

5. While the said Contractor is engaged in completing his work under said contract of the 3rd day of October, 1902, within the time hereby limited in that behalf, and under the contract between him and the Commission of the seventh day of June, 1904, for construction of an extension of said line of railway north of New Liskeard within the time limited in that behalf in said last mentioned contract, the said Commission shall allow the said Contractor and all sub-contractors under him the following special rates for men, material and supplies for or connected with said work of construction required to be transported or conveyed over any portion of the said line of railway south of New Liskeard, that is to say, for men a rate of one cent per man per mile, and for materials and supplies a rate of one-half cent per ton per mile.

6. Should the Commission take possession of said line of railway hereunder before the 15th day of January, 1905, it will on said 15th day of January pay to the Contractor the sum of two hundred thousand dollars in cash on account of the rebate which the said Commission is entitled to hold back from the said Contractor under the terms of the said contract of the 3rd day of October, 1902, and should the Commission not take possession before said 15th day of January, 1905, it will make such payment of two hundred thousand dollars to the Contractor on the 15th day of February, 1905.

7. Subject to the amendments hereby made, the said contract of the 3rd day of October, 1902, and the bond of the said sureties for securing due performance thereof shall be and remain in full force, virtue and effect, and the surviving sureties and the estate of the said John J. Long shall be and continue liable on said bond for the due performance of the said contract as hereby amended, and all rights, remedies and powers of the said Commission and of the Chief Engineer thereof conferred, given or reserved in and by said contract and bond are subject to the amendments hereby made expressly reserved.

IN WITNESS WHEREOF this agreement has been duly executed by the Commission under its corporate seal and the hands of its Chairman and Secretary and duly signed, sealed and executed by the other parties thereto.

Later, the executors of the estate of J. J. Long declined to execute this agreement but the matter was closed without their signatures on the strength of the following letter from the other sureties:

THE TEMISKAMING & N. O. RAILWAY COMMISSION, TORONTO.

GENTLEMEN,—As two of the sureties for due execution by A. R. Macdonell of work under his contract with you of 3rd October, 1902, we consent to the completion and delivery of the agreement of the 19th November, 1904, without execution of same by the executors of the Estate of John J. Long, the other surety, and agree that, notwithstanding the failure of the executors to execute such agreement, our obligation under the original bond as modified by the said agreement of 19th November, 1904, shall continue binding upon us and each of us.

Yours truly,

"THOMAS LONG."
"WM. HARTY."

"JNO. H. BIRKETT,"
Witness to W. Harty's signature.

TORONTO, Jan. 4th, 1905.

In this connection it may be mentioned that in view of numerous enquiries to fix freight rates and make traffic arrangements, and in anticipation of taking over and operating the road from North Bay to New Liskeard, Mr. J. H. Black was, on 24th September, 1904, appointed General Freight and Passenger Agent, and was subsequently made General Superintendent.

STEEL BRIDGE MATERIAL.

Under the contract with Mr. Macdonell steel structures were to be supplied by the Commission. The principal of these, so far as the first section of the road is concerned, was a bridge over the Montreal River, tenders for which were opened March 19th, 1904, as follows:—

From the Hamilton Bridge Works Company, Hamilton, $27,500 "A." and $28,000 "B."

Price "A" would apply in the event of the Commission providing a place between the piers and abutments a trestle from which the steel can be erected. If trestle be not provided at the point named and the Bridge Company have to provide and erect the necessary false works, then their price "B" would apply. The false work which the Bridge Company would furnish would be for erection purposes only, and would not be intended to provide for traffic.

From the Canadian Bridge Company, Walkerville, $23,970. The Commission to furnish in place, maintain and afterwards remove the necessary false work for the erection of the bridge on the bridge site. The quotation does not contemplate the planing of the sheared edges and ends in accordance with paragraph 141 of the specifications. If this planing is required, $500 should be added to their quotation, making a price of $24,470.

From the Canada Foundry Company, Toronto, $25,200. False work to be supplied by the Commission on the bridge site; or $25,600 to supply and

erect from a temporary trestle built by the Commission directly to the north of the bridge site.

From the Dominion Bridge Company, Montreal, $19,815. The Commission to provide trestle for use of its trains above the location of the bridge, or $19,495 if trestle put in by the Commission is placed upon the bridge site, and so constructed as to be available for use in setting the metal work.

The tender of the Dominion Bridge Co. being the lowest was accepted and the following contract was entered into with that Company:—

ARTICLES OF AGREEMENT made in duplicate this thirtieth day of March in the year of our Lord, one thousand nine hundred and four, between

Dominion Bridge Company, Limited, hereafter called the Contractor, of the one part; and The Temiskaming and Northern Ontario Railway Commission, hereafter called the Commission, of the other part.

Witnesseth:—

1. In this contract the word "Inspector" shall mean the Inspector for the time being appointed by the Commission to represent and act for the Commission in the supervision of the construction and in the inspection and certification of the work herein contracted for, and the word "Engineer" shall mean the Chief Engineer for the time being appointed by the Commission and having control of the work of construction of the railway line of the said Commission between North Bay and New Liskeard.

2. The Contractor shall supply and provide all and every kind of work, labor, materials, articles and things whatsoever necessary for the due construction and erection, and will well and duly build, erect and complete in a perfect and workmanlike manner a steel bridge for the crossing of the Montreal River by the line of railway of the Commission to consist of three rivetted lattice spans as per attached plans with all necessary appliances ready to receive the rails, in strict compliance with the latest Dominion Government specifications as to material and workmanship, and on class one loading of same specifications as to strength and in strict compliance with the plans hereto annexed and to the complete satisfaction of the Inspector as to material and workmanship of the structure, and to the complete satisfaction of the Engineer as to erection and completion thereof, it being agreed that the said work shall include the placing of ties and guard rails and the painting of the structure after erection, and will deliver the same complete to the Commission on or before the 15th day of August, 1904, or on or before such later date as on the written application of the Contractor for an extension of time the Engineer may in writing substitute, time being deemed to be material and of the essence of this contract.

3. The Inspector shall be the sole judge of the material and workmanship used in the said structure and his decision on all questions in dispute with regard to such material and workmanship shall be final, and the same shall be executed to his satisfaction as evidenced by his certificate in writing, and the Engineer shall be the sole judge of the erection and completion of the said work and his decision on all questions in dispute with regard to same shall be final, and the same shall be executed to his satisfaction as evidenced by his certificate in writing which certificates by the Inspector and Engineer shall be conditions precedent to the right of the Contractor to be paid for said work.

4. The Inspector and all persons from time to time authorized by him in that behalf shall have free entry and access to the works of the Contractor at all times while this contract is being performed, and shall have all reasonable facilities afforded to him and his representatives as aforesaid to satisfy

them that the same is being carried out and performed in accordance with this contract.

5. All materials plant and tools required for or in connection with the said work shall be delivered by the contractor f.o.b. cars at North Bay but same and the engineers and other workmen of the Contractor necessary for the erection of said structure shall be transported and conveyed by the Commission from North Bay to the Bridge site free of charge to the Contractor and the Commission shall further transport and convey such engineers workmen and tools and other erection plant back from the Bridge site to North Bay free of charge to the Contractor.

6. The Commission shall set up a trestle for the use of its trains upon the location of the bridge at such time and so constructed as to be available for the use of the contractor in setting the metal work and the contractor shall carry on the work of erection and all matters connected therewith so that the same shall not at any time interfere with the necessary train traffic of the Commission and of the contractors for the construction of said line of railway.

7. The Commission in consideration of the premises covenants with the contractor that the contractor from time to time in all respects having fulfilled and performed the provisions of this contract on the contractors part intended to be fulfilled and performed will be paid for and in respect of the said work the sum of nineteen thousand four hundred and ninety-five ($19,495.00) dollars payable as follows: Sixty per cent. of the value of any shipment of materials upon delivery of same on board cars at the works of the contractor in Montreal; twenty per cent. additional upon delivery of same f.o.b. cars at North Bay and the balance on monthly progress estimates certified by the Engineer as the erection of the work proceeds.

IN WITNESS WHEREOF the said parties have caused these presents to be executed under their respective corporate seals and under the hands of the proper officers in that behalf.

The other orders under this heading placed during the year were for one pair 30 ft. steel deck girders, erected at the 32nd mile; one 35 ft. single track deck plate girder span, at the 59th mile and one 40 ft. single track deck plate girder span at the 65th mile, the order for the first named being given to the Dominion Bridge Co., at the price of $635.00; the others to the Canadian Bridge Co., of Walkerville, Ont., at $800 and $990 respectively.

Rail, Fastenings, etc.

The quantity of rails required to complete the balance of the line to New Liskeard having been contracted for in 1903 quotations were asked for the rail fastenings required in connection therewith in accordance with the Commission's drawings and specifications and to be delivered one-third each during the months of May, June and July. Tenders for these were opened on the 13th January as follows,—

For 15,500 pairs angle bars, B. J. Coghlin, Montreal, representing the Pennsylvania Steel Co. $1.90 per 100 lbs. f.o.b. North Bay, Ont.

B. J. Coghlin, Montreal, representing Belgium Manufacturers, $1.80 per 100 lbs. f.o.b. North Bay, Ont.

A. T. Drummond & Company, Toronto, representing English makers. $1.-90 per 100 lbs. f.o. b. North Bay, Ont.

Montreal Rolling Mills, Montreal, $1.61½ per 100 lbs. f. o. b. North Bay, Ont.

Nova Scotia Steel & Coal Company, New Glasgow, N. S. $1.60 per 100 lbs. f.o.b. North Bay, Ont.

Hamilton Steel & Iron Works, Hamilton, $1.60 per 100 lbs. f.o.b. North Bay, Ont.

The tender of the Hamilton Steel & Iron Works and that of the Nova Scotia Steel Company being equal, and the lowest tenders received, the Commission decided to accept the tender of the Ontario concern.

For 576,000 railway spikes, 6 x 9-16.

Toronto Bolt & Forging Company, Toronto.
$2.30 per 100 lbs. f. o. b. North Bay, Ont.

The Peck Rolling Mills, Montreal,
$2.50 per 100 lbs. f. o. b. North Bay, Ont.

Pillow & Hersey Manufacturing Company, Montreal,
$2.24 per 100 lbs. f. o. b. North Bay, Ont.

The tender of the Pillow & Hersey Manufacturing Company being the lowest received was accepted.

For 63,000 track bolts.—

Pillow & Hersey Manufacturing Company, Montreal,
$3.45 per 100 lbs. f. o. b. North Bay, Ont.

Toronto Bolt & Forging Company,
$3.45 per 100 lbs. f. o. b. North Bay, Ont.

The tenders being equal the Commission decided to accept that of the Ontario Company.

For 63,000 Nut-locks.—

A. Holden & Company, Montreal.
63,000 "Positive" Nut-locks.
$8.00 per 1,000 f. o. b. North Bay, Ont.
For "Bartley" Nut & Bolt Fastener,
$8.50 per 100 lbs. f. o. b. Montreal.

The National Lock-Washer Company, Newark, N. J.
For "National" with rib
$7.55 per 1,000.
On "National" plain, without rib,
$6.25 per 1,000 f. o. b. North Bay, duty paid.

The International Railway Appliance Company,
For 'Bartley" Nut and Bolt Fastener
$8.50 per 100 lbs. f. o. b. Montreal.

The last named tender was accepted, as the Engineer desired to have the "Bartley" Nut and Bolt Fastener supplied.

Water Tanks.

Tenders were called for in February for the erection of six water tanks at such points on the right of way as the Chief Engineer should direct including the furnishing of necessary material, etc. The tenders were as follows:

Messrs. O'Boyle Bros. Sault Ste. Marie, Ont.

Price of Tank	$1,925.00
Excavation for foundation, per cub. yd.	.70
Stone foundation, per cub. yd	7.25
Concrete foundation, per cub. yd	8.40

J. B. Brannen, North Bay, Ont.

Price of Tank	$1,997.00
Excavation for foundation, per cub. yd., earth per cub. yd.	1.00
Stone foundation " " "	9.00
Concrete foundation per cub. yd.	8.00

Messrs. O'Neil Bros. North Bay.

Price of Tank	$2,770.00
Excavation for foundations, per cub. yd	.14
Stone foundations, per cub. yd.	4.50
Concrete foundations, per cub. yd.	5.00

Thomas Tompkins, Brockville. Ont.

Price of Tank	$2,432.00
Excavations for foundations, per cub. yd.	.50
Stone foundation per cub. yd.	10.00
Concrete foundation per cub. yd.	9.50

The Renfrew Manufacturing Company, Ltd.

Price of Tank	$2,200.00
Excavation for foundation, per cub. yd.	1.25
Stone foundation per cub. yd.	20.00
Concrete foundation per cub. yd.	14.00

The Shearer, Brown Wills Company, Ltd., Montreal.

Price of Tank	$2,200.00
Excavation for foundation per cub. yd.	1.25
Stone foundations per cub. yd.	9.60
Concrete foundations per cub. yd.	8.50

The tender of Messrs. O'Boyle Bros., of Sault Ste. Marie, being the lowest was accepted, and the following contract was entered into with them:

Articles of Agreement made in triplicate this 28th day of March in the year of our Lord 1904, between John O'Boyle and D. O'Boyle of Sault Ste. Marie, Ontario, trading under the firm name of O'Boyle Bros, hereinafter called the contractors of the first part, and The Temiskaming and Northern Ontario Railway Commission, hereinafter called the Commission, of the second Part, *witnesseth*:

1. In this contract the word "work" or "works" shall unless the context requires a different meaning, mean the whole of the work and materials, matters and things required to be done furnished and performed under this contract. The word "Engineer" shall mean the Chief Engineer for the time being appointed by the Commission and having control over the work.

2. The contractors will at their own expense provide all and every kind of work, labor, materials, articles and things whatsoever for the due construction and completion and will well and duly build and complete in a perfect and workmanlike manner six water tanks more or less at such points on the right of way of the Temiskaming and Northern Ontario Railway between

North Bay and New Liskeard as the Chief Engineer may direct with all necessary appliances for use by the Commission in connection with said railway in strict compliance with the specifications hereto annexed and with the plans and drawings relating thereto, to the complete satisfaction of the engineer and will deliver three of said tanks complete to the Commission on or before the first day of September 1904, and the remainder of the said tanks on or before the first day of December 1904, time being agreed to be material and of the essence of this contract.

3. The contractors shall forthwith commence work and shall proceed diligently therewith at the rate required by the Engineer and shall complete the work including extras and alterations and notwithstanding any delay or hindrance by the Commission to the satisfaction of the Engineer by the said dates mentioned and set out in the last preceding paragraph or by such other dates as on the written application of the contractors for an extension of time the engineer may in writing substitute and in default shall pay to the Commission by way of liquidated damages the sum of two dollars for each tank for each day which may elapse after the said dates mentioned in the last preceding paragraph or the dates expressly substituted therefor in manner aforesaid by the Engineer until the whole work shall be so completed and delivered.

4. The Engineer shall be at liberty at any time either before the commencement or during the construction of the works or any portion thereof to order any extra work to be done and to make any changes which he may deem expedient in the dimensions, character, nature, location or position of the works or any part or parts thereof, or in any other things connected with the works whether or not such changes increase or diminish the work to be done or the cost of doing the same and the contractors shall immediately comply with all requisitions of the Engineer in that behalf and shall commence and complete the work so ordered to be done within the time specified by the Engineer but the Contractors shall not make any change in or addition to or omission or deviation from the work and shall not be entitled to any payment for any change, addition, deviation, or any extra work unless such change, addition, omission, deviation, or extra work shall have been first directed in writing by the Engineer and notified to the Contractors and the decision of the Engineer as to whether any such change or deviation increases or diminishes the work and as to the allowance to be made to the contractors or deducted from the contractors in respect of any such increase or diminution shall be final and all the provisions of this contract shall apply to any changes, additions, deviations or extra work in like manner and to the same extent as to the work tendered for and no changes, additions, deviations or extra work shall annul or invalidate this contract and no compensation shall be claimable by the contractors for any loss of anticipated profits in respect of or in consequence of any change or deviation in or omission from the works.

5. The Engineer shall be the sole judge of the work and material in respect of both quantity and quality and his decision on all questions in dispute, in regard to work and material shall be final and no works or extra or additional works or changes, shall be deemed to have been executed nor shall the contractors be entitled to payment for the same unless the same shall have been directed in writing as hereinbefore provided and executed to the satisfaction of the Engineer as evidenced by his certificate in writing which certificate shall be a condition precedent to the right of the contractors to be paid therefor.

6. The contractors shall be at the risk of and shall bear all loss or damage whatsoever which may occur to the works or any of them until the same be fully and finally completed and delivered up to and accepted by the Commis-

sion and if any such loss or damage occur before such final completion delivery and acceptance the contractors shall immediately at their own expense repair, restore and re-execute the work so damaged so that the whole works or the respective parts thereof may be completed within the time hereby limited.

7. Neither the acceptance nor the payment for any of the said tanks by the Commission shall be considered as any waiver of the obligations of the contractors with reference to the others.

8. The Commission in consideration of the premises covenants with the contractors that the contractors from time to time and in all respects having fulfilled and performed the provisions of this contract on the contractors' part, intended to be fulfilled and performed will be paid for in respect of each of the tanks so completed as aforesaid the sum of $1,925 together with 70 cents per cubic yard for excavation for foundations $7.25 per cubic yard for stone foundations and $8.40 per cubic yard for concrete foundations as certified by the Engineer subject to such deductions or additions as shall be certified by the Engineer, payments to be made from time to time on the progress certificates of the Engineer and the final payment to be made within 40 days after the date of the Engineer's final certificate of the completion of said work.

9. It is distinctly agreed that no implied contract of any kind whatsoever by or on behalf of the Commission shall arise, or be implied from anything contained in this contract including the said specifications and the plans and drawings or the tender of the said contractors for said work or from any position or situation of the parties at any time it being clearly understood and agreed that the express contracts, covenants, agreements and stipulations contained in these presents and in the said specifications, plans and drawings are and shall be the only contracts, covenants, agreements and stipulations upon which any right against the Commission is to be founded it being further expressly agreed that the said specifications and these presents are to be read together, and that in case of any discrepancy between these presents and anything contained in such specifications the provisions of these presents shall govern. In case of any discrepancy appearing at any time between the specifications, plans and drawings, or any of them the contractors shall follow such one of them as the Engineer shall in writing direct.

In witness whereof, this agreement has been duly signed sealed and executed by the said contractors, and duly executed by the said Commission under its corporate seal and the hands of its Chairman and Secretary.

SECTION HOUSES.

In the month of May tenders for the erection of eight section houses according to plans and specifications prepared by the Chief Engineer were called for and received as follows:

From O'Boyle Bros., Sault Ste. Marie,	
Price for Section House complete	$1,035 00
Excavation per cubic yd.	60
Stone foundation per cubic yd.....	7 50
From McPhail & McCarty, Sault Ste. Marie,	
Price for Section House complete.....	$1,350 00
Excavation per cubic yd.....	50
Stone work per cubic yd.	6 00
From J. B. Brannen, North Bay, Ont.,	
Price for Section House complete.....	$1,135 00
Excavation per cubic yd.	50
Rock	1 20
Stone foundation per cubic yd.	7 75

The tender of O'Boyle Bros., being the lowest, was accepted and the following contract was entered into with them:

ARTICLES OF AGREEMENT made in triplicate this Thirty-first day of May in the year of our Lord one thousand nine hundred and four, between JOHN O'BOYLE AND D. O'BOYLE of Sault Ste. Marie, Ontario, trading under the firm name of O'Boyle Bros., hereinafter called the Contractors, of the first part; and THE TEMISKAMING & NORTHERN ONTARIO RAILWAY COMMISSION, hereinafter called "The Commission," of the second part.

WITNESSETH:

1. In this contract the word "work" or "works" shall, unless the context requires a different meaning, mean the whole of the work and materials, matters and things required to be done, furnished and performed under this contract. The word "Engineer" shall mean the Chief Engineer for the time being appointed by the Commission and having control over the work.

2. The contractors will at their own expense provide all and every kind of work, labor, materials, articles and things whatsoever for the due construction and completion and will well and duly build and complete in a perfect and workmanlike manner eight Section Houses more or less at such points on the right of way of The Temiskaming & Northern Railway Commission between North Bay and New Liskeard, as the Engineer may direct, with all necessary appliances, for the use of the Commission in connection with such railway, in strict compliance with the specifications hereto annexed, and with the plans and drawings relating thereto to the complete satisfaction of the Engineer, and will deliver the said Section Houses complete to the Commission on or before the first day of December, one thousand nine hundred and four, time being agreed to be material and of the essence of this contract.

3. The Contractors shall forthwith commence work and shall proceed diligently therewith at the rate required by the Engineer and shall complete the work, including extras and alterations, and notwithstanding any delay or hindrance by the Commission, to the satisfaction of the Engineer by the date set out in the last preceding paragraph or by such other date as on the written application of the Contractors for an extension of time the

Engineer may in writing substitute, and in default shall pay to the Commission by way of liquidated damages the sum of one dollar for each section house for each day which shall or may elapse after the date mentioned in the last preceding paragraph or the date expressly substituted therefor in manner aforesaid by the Engineer until the whole work shall be so completed and delivered.

4. The Engineer shall be at liberty at any time either before the commencement or during construction of the works, or any portion thereof, to order any extra work to be done and to make any changes which he may deem expedient in the dimensions, character, nature, location or position of the works or any part or parts thereof, or in any other things connected with the works, whether or not such changes increase or diminish the work to be done or the cost of doing the same, and the Contractors shall immediately comply with all requisitions of the Engineer in that behalf and shall commence and complete the work so ordered to be done within the time specified by the Engineer, but the Contractors shall not make any change in or addition to, or omission or deviation from the work and shall not be entitled to any payment for any change, addition, deviation, or any extra work unless such change, addition, omission, deviation, or extra work shall have been first directed in writing by the Engineer and notified to the Contractors, and the decision of the Engineer as to whether any such change or deviation increases or diminishes the work and as to the allowance to be made to the Contractors or deducted from the Contractors in respect of any such increase or diminution shall be final, and all the provisions of this contract shall apply to any changes, additions, deviations or extra work in like manner and to the same extent as to the work tendered for and no changes, additions, deviations or extra work shall annul or invalidate this contract and no compensation shall be claimable by the Contractors for any loss of anticipated profits in respect of or in consequence of any change or deviation in or omission from the works.

5. The Engineer shall be the sole judge of the work and material in respect of both quantity and quality, and his decision on all matters in dispute in respect to work and material shall be final and no works or extra or additional works or changes shall be deemed to have been executed, nor shall the Contractors be entitled to payment for the same unless the same shall have been directed in writing as hereinbefore provided and executed to the satisfaction of the Engineer as evidenced by his certificate in writing which certificate shall be condition precedent to the right of the Contractors to be paid therefor.

6. The Contractors shall be at the risk of and shall bear all loss or damage whatsoever which may occur to the works or any of them until the same be fully and finally completed and delivered up to and accepted by the Commission, and if any such loss or damage occur before such time for completion, delivery and acceptance the Contractors shall immediately, at their own expense, repair, restore and re-execute the work so damaged so that the whole works or the respective parts thereof will be completed with in the time hereby limited.

7. Neither the acceptance nor the payment for any of the said Section Houses by the Commission shall be construed as any waiver of the obligations of the Contractors with reference to the others.

8. The Commission, in consideration of the premises, covenants with the Contractors that the Contractors from time to time and in all respects having fulfilled and performed the provisions of this contract on the Contractors' part intended to be fulfilled and performed will be paid for and in respect of each of the said Section Houses so completed as aforesaid the sum of Ten hundred and thirty-five dollars, together with sixty cents per cubic yard for excavation for foundations and seven dollars and fifty cents per cubic yard for stone foundations, as certified by the Engineer, subject to such deductions or additions as shall be certified by the Engineer, payments to be made from time to time on progress certificates of the Engineer, and the final payment to be made within forty days after the date of the Engineer's final certificate of the completion of said work.

9. It is distinctly agreed that no implied contract of any kind whatsoever by or on behalf of the Commission shall arise or be implied from anything contained in this contract, including the said specifications and the plans and drawings or the tender of the said Contractors for said work or from any position or situation of the parties at any time, it being clearly understood and agreed that the express contracts, covenants, agreements and stipulations contained in these presents and in the said specifications, plans and drawings are and shall be the only contracts, covenants, agreements and stipulations upon which any right of action against the Commission is to be founded, it being further expressly agreed that the said specifications and these presents are to be read together, and in case of any discrepancy between these presents and anything contained in such specifications the provisions of these presents shall govern, and in case of any discrepancy appearing at any time between the specifications, plans and drawings, or any of them, the Contractors shall follow such one of them as the Engineer shall in writing direct.

In Witness Whereof this agreement has been duly signed, sealed and executed by the said contractors and duly executed by the said commission under its corporate seal and the hands of its Chairman and Secretary.

"P. E. RYAN," Secretary.

STATIONS.

The question of the erection of stations having been under consideration and plans having been prepared of stations which it was proposed to erect at Temagami, Haileybury and New Liskeard, and the Committee to which these plans had been referred having approved of them. tenders for same were opened on September 10th, as follows:

From O'Boyle Bros., Sault Ste. Marie, Ont.:

For station at Temagami, Plan No. 7	$5,841 35
Plan No. 8	5,931 35
For station at Haileybury, Plan No. 7	5,841 35
Plan No. 8	5,931 35
For station at New Liskeard, Plan No. 7	5,841 35
Plan No. 8	5,931 35

Platform per sq. ft., thirteen cents.

This firm also put in a corrected tender in lieu of the one dated Sept. 1st., as follows:

For Station at Temagami, Plan No. 7	$5,501 35
Plan No. 8	5,591 35
For Station at Haileybury, Plan No. 7	5,501 35
Plan No. 8	5,591 35
For Station at New Liskeard, Plan No. 7	5,501 35
Plan No. 8	5,591 35

Platform, per square foot, thirteen cents.

Messrs, O'Boyle Bros. also submitted a tender which included a hot water system of heating, with plumbing according to plans and specifications, except at Haileybury, which station is not to have any plumbing.

For station at Temagami, Plan No. 7	$5,042 81
Plan No. 8	5,132 81
For station at Haileybury, Plan No. 7	4,767 81
Plan No. 8	4,857 81
For station at New Liskeard, Plan No. 7	5,132 81
Plan No. 8	5,132 81

Platform per sq. ft., thirteen cents.

The prices contained in this tender were for the Little Oxford Wood Furnace No. 305. If the Oxford Jumbo Wood Furnace No. 64 was decided on, the price would be $27.00 more.

From Jno. McLeod, North Bay, Ont.:

For station at Temagami, Plan No. 7	$5,800 00
Plan No. 8	6,500 00
For station at Haileybury, Plan No. 7	5,800 00
Plan No. 8	6,500 00
For station at New Liskeard, Plan No. 7	5,800 00
Plan No. 8	6,500 00

From J. B. Brannen, North Bay, Ont.:

For station at Temagami, Plan No. 7	$4,789 00
For Station at Haileybury, Plan No. 7	4,789 00
For station at New Liskeard, Plan No. 8	5,239 00

Platform at rate of eighteen cents per superficial foot.

Mr. Brannen sent a letter making the following changes in prices, viz.:

For leaving out lavatories in Haileybury station a reduction of $250.00 from original tender, and for a heating system for the several stations an addition of $500 to his original tender.

These tenders called for larger expenditure than was considered prudent, and the question of the erection of stations was, on consideration, deferred.

Later in the season tenders were again called for on amended drawings, and in this case to cover not only stations at Temagami, Haileybury and New Liskeard, as originally contemplated, but also at Whitefield and the Montreal River.

These tenders were opened on November 12th, as follows:

From O'Boyle Bros., Sault. Ste Marie:

Widdifield	$2,550 00
Temagami	2,600 00
Montreal R.	2.550 00
Haileybury	2,600 00
New Liskeard	4,900 00
Foundation, per cubic yard	7 25

From J. J. Brannen, North Bay:

Widdifield	$2,595 00
Temagami	3,197 00
Montreal R.	2,595 00
Haileybury	3,197 00
New Liskeard	4,519 00
Foundation, per cubic yard	7 00
Excavation of Earth	50

The tender of O'Boyle Bros., being the lowest, was accepted, and it was decided to add a sixth station at Cobalt, on the same plan and for the same price as those at Widdifield and Montreal River, and the following contract was entered into with the successful tenderers:

ARTICLES OF AGREEMENT made in duplicate this sixth day of December, in the year of our Lord 1904, between JOHN O'BOYLE AND D. O'BOYLE, of Sault Ste. Marie, Ontario, trading under the firm name of O'BOYLE BROS., hereinafter called the "Contractors," of the first part; and THE TEMISKAMING & NORTHERN ONTARIO RAILWAY COMMISSION, hereinafter called "The Commission," of the second part.

WITNESSETH:

1. In this contract the word "work" or "works" shall, unless the context requires a different meaning, mean the whole of the work and materials, matters, and things required to be done, furnished and performed under this contract. The word "Engineer" shall mean the Chief Engineer for the time being appointed by the Commission and having control over the work.

2. The Contractors will, at their own expense, provide all and every kind of work, labor, materials, articles, and thing whatsoever for the due construction and completion, and will well and duly build and complete in a perfect and workmanlike manner six station houses on the right of way of the Temiskaming & Northern Ontario Railway, on sites to be selected by the said Engineer at or near the following points, that is to say, at Widdifield, about the fourteenth mile; at Temagami, about the seventy-second mile; at Montreal River, about the ninety-fourth

mile; at Cobalt, about one hundred and first mile; at Haileybury, about one hundred and six mile; at New Liskeard, about one hundred and twelfth mile; with all necessary appliances for use by the Commission in connection with said railway, in strict compliance with the specifications hereto annexed, and with the plans and drawings relating thereto, to the complete satisfaction of the Engineer, and will deliver the said stations at New Liskeard and Haileybury complete to the Commission or before the first day of April 1905; the said stations at Temagami complete on or before the first day of May, 1905, and the said stations at Widdifield, Montreal River and Cobalt on or before the first day of July 1905, time being agreed to be material and of the essence of this contract. The said stations at Widdifield, Montreal River and Cobalt to be in accordance with the plan prepared by the Engineer known as Plan No. 5; the stations at Temagami and Haileybury to be in accordance with the plan known as Plan Number 3, and the station at New Liskeard to be in accordance with the Plan known as Plan Number 6.

3. The Contractors shall forthwith commence work and shall proceed diligently therewith at the rate required by the Engineer, and shall complete the work, including extras and alterations and notwithstanding any delay or hindrance by the Commission to the satisfaction of the Engineer by the said date mentioned in the last preceding paragraph or by such other date as on the written application of the Contractors for an extension of time the Engineer may in writing substitute, and in default shall pay to the Commission by way of liquidated damages the sum of four dollars for each station for each day which may elapse after the said date mentioned in the last preceding paragraph, or the date expressly substituted therefore in manner aforesaid by the Engineer, until the whole work shall be so completed and delivered.

4. The Engineer shall be at liberty at any time either before the commencement or during the construction of the works or any portion thereof to order any extra work to be done and to make any changes which he may deem expedient in the dimensions, character, nature, location or position of the works or any part or parts thereof, or in any other matter or thing connected with the works, whether or not such changes increase or diminish the work to be done or the cost of doing the same, and the Contractors shall immediately comply with all requisitions of the Engineer in that behalf, and shall commence and complete the work so ordered to be done within the time specified by the Engineer, and that the Contractors shall not make any change in or addition to or omission or deviation from the work, and shall not be entitled to any payment for any change, addition, deviation or extra work unless such change, addition, omission, deviation or extra work shall have been first directed in writing by the Engineer and notified to the Contractors, and the decision of the Engineer as to whether any such change or deviation increases or diminishes the work, and as to the allownace to be made to the Contractors or deducted from the Contractors in respect of any such increase or diminution shall be final, and all the provisions of this contract shall apply to any changes, additions, deviations or extra work in like manner, and to the same extent as to the work tendered for, and no changes, additions, deviations or extra work shall annul or invalidate this contract, and no compensation shall be claimable by the Contractors for any loss of anticipated profits in respect of or in consequence of any change or deviation in or omission from the works.

5. The Engineer shall be the sole judge of the work and material in respect of both quantity and quality, and his decision on all questions in dispute

in regard to work and material shall be final, and no works or extra additional works or changes shall be deemed to have been executed, nor shall the Contractors be entitled to payment for the same unless the same shall have been directed in writing as hereinbefore provided and executed to the satisfaction of the Engineer, as evidenced by his certificate in writing, which certificate shall be a condition precedent to the right of the Contractors to be paid therefor.

6. The Contractors shall be at the risk of and shall bear all loss or damage whatsoever which may occur to the works or any of them until the same be fully and finally completed and delivered up to and accepted by the Commission, and if any such loss or damage occur before such final completion, delivery and acceptance the Contractors shall immediately, at their own expense, repair, restore and re-execute the work so damaged that the whole works or the respective parts thereof may be complete within the time hereby limited.

7. Neither the acceptance nor the payment for any of the said Stations by the Commission shall be considered as any waiver of the obligations of the Contractors with reference to the others.

8. Plumbing shall be deemed to be included in the said works so far as the station at New Liskeard is concerned, but not in the case of any of the other Stations.

9. The Commission, in consideration of the premises, covenants with the Contractors that the Contractors from time to time and in all respects having fulfilled and performed the provisions of this contract, on the Contractors part intended to be fulfilled and performed, shall be paid for and in respect of each of the said Stations at Widdifield, Montreal River and Cobalt, the sum of two thousand five hundred and fifty dollars; in respect of each of the said Stations at Temagami and Haileybury the sum of two thousand six hundred dollars, and in respect of the said Station at New Liskeard the sum of four thousand nine hundred dollars, together with seven dollars and twenty-five cents per cubic yard for stone foundations, as certified by the Engineer, subject to such deductions or additions as shall be certified by the Engineer; payments to be made from time to time on progress certificates of the Engineer, and the final payment to be made within forty days after the date of the Engineer's final certificate of the completion of the said work.

10. It is distinctly agreed that no implied contract of any kind whatsoever by or on behalf of the Commission shall arise or be implied from anything contained in this contract, including the said specifications and the plans and drawings or the tender of the said Contractors for the said work or from any position or situation of the parties at any time, it being clearly understood and agreed that the express contracts, covenants, agreements and stipulations contained in these presents and in the said specifications, plans and drawings are and shall be the only contracts, covenants, agreements and stipulations upon which any right against the Commission is to be found; it being further expressly agreed that the said specifications and these presents are to be read together and that in the case of any discrepancy between these presents and anything contained in these specifications the provisions of these presents shall govern and in case of any discrepancy appearing at any time between the specifications, plans and drawings or any of them, the Contractors shall follow such one of them as the Engineer shall in writing direct.

In Witness Whereof this Agreement has been dnly signed and sealed and executed by the said Contractors and duly executed by the said Commission under its corporate seal and the hands of its Chairman and Secretary.

TELEGRAPH LINE.

The work of erecting the telegraph line had been commenced, in charge of the Chief Engineer, but it being found that satisfactory progress was not being made the Engineer called for tenders for the erection of this line at a rate per mile and the contract was on September 12th awarded to the lowest tenderers, Messrs. Cox & Gallagher, at the price of $65 per mile.

PART II.

CONSTRUCTION WORK.—NORTH OF NEW LISKEARD.

Last year's report indicated the result of the exploration and preliminary survey by the Commission's Chief Engineer for an extension of the line north of New Liskeard. After the necessary legislation had been passed the subject of awarding contract was immediately taken up. Before calling for tenders special attention was given by the Commission to the course necessary to be pursued to secure effective competition by placing all tenders, as nearly as possible, on an equal footing with Contractor Macdonell, who is constructing the first section of the road. To cover this point the Commission decided, after careful consideration, to undertake to deliver the rails, fastenings and ties required for the extension at New Liskeard, instead of at North Bay, and accordingly obtained a special freight rate from the Contractor for the transportation of this material. Tenders were then called for by advertisements in the following form :

TEMISKAMING AND NORTHERN ONTARIO RAILWAY COMMISSION.

Sealed Tenders, addressed to the undersigned, at Toronto, and endorsed "Tenders for Construction," will be received by the Secretary-Treasurer of the Commission up to five o'clock p. m. of Friday, May 27th, 1904, for the construction of an extension of the Temiskaming and Northern Ontario Railway (Ontario Government Railway), including clearing of right of way, bridging, grading, ballasting and track laying complete and ready for operation, in accordance with plans and specifications prepared by the Chief Engineer of the Commission, such extension being from the termination of the line of railway now being constructed (at or near the Town of New Liskeard, in the Temiskaming District) to a point on the River Abitibi, or to a point in one of the townships adjacent thereto, a distance of 80 to 100 miles, more or less.

Plans and specifications of the work may be seen at the office of the Chief Engineer of the Commission, at North Bay.

The rails, fastenings and ties will be delivered to the Contractor at New Liskeard.

Tenders will not be considered unless made on the form supplied by the Commission and signed with the actual signatures of the parties tendering. An accepted cheque on a chartered bank, for $25,000, payable to the order of the Chairman and Secretary-Treasurer of the Commission, must accompany each tender.

The cheque of the party whose tender is accepted will be forfeited if such party fails or declines to enter into a contract in form satisfactory to the Commission or fails or declines to furnish security to the satisfaction of the Commission for the due completion of the work at the rates and on the terms stated in the offer submitted.

The cheques of parties whose tenders are not accepted will be returned to them on the contract being awarded.

The Commission is not bound to accept the lowest or any tender.

Dated at Toronto, this 9th day of May, 1904.

P. E. RYAN,
Secretary-Treasurer.

The cheque which accompanied the tender of B. D. Steacy of Brockville was not marked accepted by the Bank as required by the advertisement, and therefore though his tender was extended and found to be too high it was not in reality entitled to consideration.

The prices for item No. 4 cross-logging in Battle, Conlon & Armstrong's tender was $2.75 per acre. This appeared to be an error. The prices for items Numbers 25, 27 and 28 were obviously per 1,000 feet B. M., instead of per foot B. M. called for on the form of tender and they were so understood and extended. The price for item No. 26, $23 per lineal foot also appeared to be an error. In Messrs. Larkin & Sangster's tender prices quoted for items 27 and 28, 25 cents and 26 cents respectively per ft. B. M. appeared to be errors.

Notwithstanding that the well-settled practice in considering public tenders is to allow no correction of errors the Commissioners concluded in view of the nature of these errors to allow Messrs. Battle, Conlon & Armstrong and Messrs. Larkin & Sangster to state whether or not mistakes had been made in their tenders and if so to indicate same.

On June 4th an adjourned meeting of the Commission was held and the letters of the tenderers named explaining and correcting alleged errors in original tenders were opened and read.

The following is a copy of Messrs Larkin & Sangster's letter:—

Toronto, June 3rd, 1904.

Robert Jaffray, Esq.,

Chairman, Temiskaming & Northern Ontario Railway Commission, Toronto.

Dear Sir,—Finding that there were a number of errors in the Tender which we made for the construction of the extension of this Railway, and which tenders are now being considered, we beg to advise you that three errors were made by us in our Tender, as follows:—

Item 25 should be 3 cents instead of $30.00.
Item 27 should be 2 1-12 cents instead of 25 cents, and
Item 28 should be 2 2-12 cents instead of 26 cents.

The figure of $30.00 put opposite item 25 was, of course intended as $30.00 per thousand, and we overlooked when filling out the Tender that it was required to be per foot board measure.

Items 27 and 28 were placed at 25 cents and 26 cents under the impression that the Tender was to be per lineal foot, and we overlooked the fact that this also was per foot board measure.

The figures which we now give are the equivalent per foot board measure for the figures given in our Tender.

In considering our Tender for this work, kindly consider it as corrected by this letter.

Yours truly,

"HUBERT E. LARKIN"
"ALEXANDER SANGSTER."

As to price in the original tender for item number 25 namely $30 same was understood to be for 1,000 ft. B. M., and was so extended. Their correction of this item to 3 cents per ft. B.M. made no difference in the total of their tender. The correction of the alleged errors for items numbers 27 and 28 was not allowed. Their explanation was that the prices of 25 cents and 26 cents per ft. B.M. which appeared in the original tender for said items were made under the impression that they were quoting per lineal foot and that therefore their prices for those items should in each case be reduced by dividing the figures by 12 to make the price per foot B.M., thus making their prices 2 1-12 cents and 2 2-12 cents per foot B.M. respectively. The view of the Commission in regard to this was that it was inconceivable that prices should be quoted per lineal foot for square timber and that therefore the corrections asked by Messrs. Larkin & Sangster were obviously alterations of their tender and could not be allowed. The total of their tender therefore remained higher than that of A. R. Macdonell. If these alterations had been allowed their tender would have been $2,917 lower than Mr. Macdonell's. The Commission concluded that even if these irregular alterations had been allowed such a comparatively small difference on a contract of this magnitude would not in view of the importance of speedy construction, have justified them in making a change from the present Contractor who had a large construction and ballasting plant available to commence operations with.

The following is a copy of Messrs. Battle, Conlon & Armstrong's letter and amended tender:—

THE SECRETARY, TORONTO, June 2nd, 1904.

Temiskaming & Northern Ont. Ry. Commission, Toronto.

SIR,—We find in making out copy of tender to submit through you to the Railway Commission for opening on the 27th May, 1904, a clerical error was made in placing some of the figures in the wrong column. This is so apparent that we understood it was noticed at once on reading the tenders. We therefore enclose corrected tender. You will observe that we have in no manner changed the figures as they were intended originally to be, and have only corrected the error by placing items 4, 25, 26, 27 and 28 in the right column. This makes our tender what we meant it to be, and what in fact, but for the mistake in the copy sent in, was our tender. We think an error may be found in No. 4, so we correct that as well as the others. As to the others, the figures remain the same, but should be in the cents instead of in the dollar column. The cross-logging No. 4, we think, is shown in the tender sent in at $2.75 per acre. This of course is clearly an error, and should be $275.00 per acre.

Yours truly,

"BATTLE, CONLON & ARMSTRONG."

Description.	Estimated Quantities.	Name. Battle, Conlon and Armstrong. Price.	Total.
		$ c.	$ c.
Clearing	1,200	23 00	27,600 00

Fencing	20,000	80	16,000 00
			2,443,855 00

It will be observed that their price for item number 3 close-cutting, was given as $24.90 whereas the price quoted in their original tender was $24.00. This was apparently another clerical error. Their prices for items numbers 25, 27 and 28, namely, 24 cents, 23 cents and 25 cents per foot B. M., appeared also to be errors, but the Commission having already gone as far as it felt it could consistently go in the direction of allowing corrections of mistakes, there was obviously no course open but to consider the tender as received. Their tender was accordingly extended and found to be considerably higher than that of either Larkin & Sangster or A. R. Macdonell. The Commission therefore decided to accept the tender of A. R. Macdonell subject to execution by him of satisfactory contract and furnishing of satisfactory security. Such contract was entered into in due course, the following being a copy:—

THIS INDENTURE, made the seventh day of June, one thousand nine hundred and four, between ALLAN RANALD MACDONELL, of the City of Montreal, hereinafter called the "Contractor," of the first part, and THE TEMISKAMING AND NORTHERN ONTARIO RAILWAY COMMISSION, hereinafter called the "Commission," of the second part.

Witnesseth:—

That in consideration of the covenants and agreements on the part of the Commission hereinafter contained, the Contractor covenants and agrees with the Commission as follows:—

1. In this contract the word "work" or "works" shall, unless the context require a different meaning, mean the whole of the work and materials, matters and things required to be done, furnished and performed by the Contractor under this contract. The word "Engineer" shall mean the Chief Engineer for the time being appointed by the Commission and having control over the work.

2. Wherever in this Indenture the Contractor or the Commission is mentioned or referred to, such mention or reference shall extend to and be binding upon the executors, administrators, successors and assigns of the said parties respectively.

3. The Contractor will at his own expense, provide all and every kind of labor, machinery and other plant, materials, articles and things whatsoever necessary for the due execution and completion of all and every the works set out or referred to in the accepted tender and in the specifications hereunto annexed and set out or referred to in the plans and drawings prepared and to be prepared for the purposes of the work and will execute fully and complete the respective portions of such works and deliver the same complete to the Commission on or before the thirty-first day of December, 1905, and will similarly execute and fully complete the grading for the first forty miles from New Liskeard and the laying of the steel rails for the first twenty-five miles from New Liskeard on or before the thirty-first day of December, 1904. The said works to be constructed of the best materials of their several kinds and finished in the best and most workmanlike manner in the manner required by and in strict conformity with the specifications and the drawings relating thereto and the working or detail drawings which may from time to time be furnished (which said specifications, tender, plans, and drawings are hereby declared to be part of this contract); and to the complete satisfaction of the Engineer.

4. Time shall be deemed to be material and of the essence of this contract. The Contractor shall forthwith commence work, and shall proceed

diligently therewith at the rate required by the Engineer and shall complete the work, including extras and alterations, and notwithstanding any delay or hindrance by the Commission, to the satisfaction of the Engineer, by the said days or dates as mentioned and set out in clause 3, or by such other days or dates as on the written application of the Contractor for an extension of time the Engineer may in writing substitute, and in default shall pay to the Commission by way of liquidated damages the sum of one hundred dollars for each day which may elapse after the said days or dates mentioned in clause 3, or the days or dates expressly substituted therefor in manner aforesaid by the Engineer before the whole work shall be so completed and delivered.

5. The Engineer shall be at liberty at any time, either before the commencement or during the construction of the works or any portion thereof, to order any extra work to be done, and to make any changes which he may deem expedient in the dimensions, character, nature, location, or position of the w rks or any part or parts thereof, or in any other things connected with the works, whether or not such changes increase or diminish the work to be done, or the cost of doing the same, and the Contractor shall immediately comply with all the requisitions of the Engineer in that behalf, and shall commence and complete the work so ordered to be done within the time specified by the Engineer, but the Contractor shall not make any change in or addition to, or omission or deviation from the work and shall not be entitled to any payment for any change, addition, deviation, or any extra work, unless such change, addition, omission, deviation, or extra work shall have been first directed in writing by the Engineer and notified to the Contractor, and the decision of the Engineer as to whether any such change or deviation increases or diminishes the work shall be final, and the Contractor shall only be allowed at the same rates as per his tender attached for such additional work, if any, and in case any work shall be required to be done by the Contractor which in the opinion of the Engineer shall not fall within any of the classes of work enumerated in the said tender, the Engineer may from time to time, if he sees fit, instead of requiring any such work to be done by day labor as mentioned in clause 82 of the specifications, fix the amount to be paid in respect thereof, and his decision in that behalf shall be final, and the obtaining of his decision in writing shall be a condition precedent to the right of the Contractor to be paid therefor. If any such change or alteration constitutes, in the opinion of the said Engineer, a deduction from the works, his decision as to the amount to be deducted on account thereof shall be final and binding.

6. All the clauses of this contract shall apply to any changes, additions, deviations, or extra work, in like manner, and to the same extent as to the works tendered for, and no changes, additions, deviations, or extra work shall annul or invalidate this contract.

7. If any change or deviation in, or omission from, the works be made by which the amount of work to be done shall be decreased, no compensation shall be claimable by the Contractors for any loss of anticipated profits in respect thereof.

8. The Engineer shall be the sole judge of work and material in respect of both quantity and quality and his decision on all questions in dispute with regard to work or material shall be final, and no works or extra or additional works or changes shall be deemed to have been executed, nor shall the Contractor be entitled to payment for the same, unless the same shall have been directed in writing as hereinbefore provided and executed to

the satisfaction of the Engineer, as evidenced by his certificate in writing, which certificate shall be a condition precedent to the right of the Contractor to be paid therefor.

9. It is hereby distinctly understood and agreed that the respective portions of the work set out or referred to in the Schedule of Prices or tender to be paid for the different kinds of works mentioned, include not only the particular kinds of work or material mentioned in the said list or schedule, but also all and every kind of work, labor, tools and plant, materials and things whatsoever necessary for the full execution and completing ready for use of the respective portions of the works mentioned in the list or schedule to the satisfaction of the Engineer, but if it be found that anything has been omitted or misstated in said list or specifications which is necessary for the proper performance and completion of any part of the works included in said list or schedule the Contractor will execute the same to the satisfaction of the Engineer as though it had been properly described, and the Contractor shall be paid therefor as for extra work, and in case of dispute as to what work, labor, material, tools and plant are or are not so included, omitted or misstated in said list or schedule, the decision of the Engineer shall be final and conclusive.

10. A competent foreman is to be kept on the ground by the Contractor during all the working hours to receive the orders of the Engineer, and should the person so appointed be deemed by the Engineer incompetent, or conduct himself improperly, he may be discharged by the Engineer, and another shall at once be appointed in his stead by the Contractor; such foreman shall be considered as the lawful representative of the Contractor, and shall have full power to carry out all requisitions and instructions of the said Engineer, but this clause shall not relieve the Contractor from the duty to personally superintend the work.

11. In case any material, or other things, in the opinion of the Engineer, not in accordance with the said several parts of this contract, or not sufficiently sound or otherwise unsuitable for the respective works, be used for or brought to the intended works or any part thereof, or in case any work be improperly executed, the Engineer may require the Contractor to remove the same and to provide proper material or other things or properly re-execute the work, as the case may be; and thereupon the Contractor shall and will immediately comply with the said requisition, and if three days shall elapse and such requisition shall not have been complied with, the Engineer may cause such material or other things, or such work to be removed, and in any such case the Contractor shall pay to the Commission all such damages and expense as shall be incurred in the removal of such material, materials, or other things, or of such work, or the Commission may retain and deduct the amount of such damages and expenses from any amounts payable to the Contractor.

12. All machinery and other plant, material and supplies whatsoever provided by the Contractor for the works hereby contracted for and not rejected under the provisions of the last preceding section shall from the time of their being so provided become, and until the final completion of the said work shall be the property of the Commission for the purposes of the said works and the same shall on no account be taken away or used or disposed of except for the purposes of the said works without the consent in writing of the Engineer, and the Commission shall not be answerable for any loss or damage whatsoever which may happen to such machinery or other plant, material or supplies, provided always that upon the completion

of the works and upon payment by the Contractor of all such moneys, if any, as shall be due from him to the Commission such of the said machinery and other plant, materials and supplies as shall not have been used and converted in the works, and shall remain undisposed of, shall, upon demand, be delivered up to the Contractor in the condition in which they then may be.

13. If the Engineer shall at any time consider the number of workmen, horses, or quantity or quality of machinery or other plant, or the quantity of proper materials, respectively employed or provided by the Contractor on or for the said works, to be insufficient or inadequate for the advancement thereof towards completion within the limited time, or that the works are, or some part thereof is, not being carried on with due diligence, then in every such case the said Engineer may, by written notice to the Contractor, require him to employ or provide such additional or other workmen, horses, machinery or other plant or materials, as the Engineer may think necessary, and in case the Contractor shall not thereupon within six days, or other such longer period as may be fixed by any such notice, in all respects comply therewith, then the Engineer may, either on behalf of the Commission, or if he sees fit, may as the agent of and on account of the Contractor, but in either case at the expense of the Contractor, provide and employ such additional or other workmen, horses, machinery and other plant, or any portion thereof or such additional or other materials respectively, as he may think proper, and may pay such additional workmen such wages, and for such additional horses, machinery or other plant and materials, respectively, such prices as he may think proper, and all such wages and prices, respectively, shall thereupon at once be repaid by the Contractor or the same may be retained and deducted out of any sum that may then or thereafter be or become due from the Commission to the Contractor, and the Commission may use in the execution or advancement of the said works, not only the horses, machinery and other plant and materials so in any case provided by any one on its behalf, but also all such as may have been or may be provided by or on behalf of the said Contractor.

14. In case the Contractor shall make default or delay in diligently continuing to execute or advance any of the works to be performed under this Contract to the satisfaction of the Engineer or shall make default in commencing any portion or portions of the work or completing the same within the periods specified by the Engineer, as provided for in section 3 of this Contract, and such default and delay shall continue for six days after notice in writing shall have been given by the Engineer to the Contractor requiring him to put an end to such default or delay, or in case the Contractor shall become insolvent, or shall without the written consent of the Commission, make an assignment of this Contract, or shall, without the consent of the Engineer, make any sub-contract or neglect personally to superintend the works, or if the Contractor does not give access to and allow inspection of and the making extracts from pay rolls, books and vouchers from time to time to the Engineer or the Commission or any person or persons from time to time instructed by the Engineer or by the Commission in that behalf, so that the said Engineer may satisfy himself of the due observance by the Contractor and by all sub-contractors of all the provisions of this contract and especially of the provisions of clause 20, and the Commission may satisfy itself from time to time of the due observance by the Contractor and by all sub-contractors of the provisions of clause 21, or if the said Contractor or any sub-contractor is, in the opinion of the Engineer who shall be the sole and final judge thereof, guilty of any violation of any of the provisions

of clause 20, or if the said Contractor or any sub-contractor is, in the opinion of the Commission who shall be the sole and final judge thereof, guilty of any violation of any of the provisions of clause 21 then and in any of such cases, the Commission may take all the work under this Contract out of the Contractor's hands and employ such means as it may see fit to complete the work embraced in the contract, and in such case the Contractor shall have no claim for any further payment in respect of the work performed, but all things done and means employed under this section by the Commission shall be as binding on the Contractor as if the things done and means employed had been done and employed by him under this Contract, but the Contractor shall nevertheless remain liable for all loss and damage which may be suffered by the Commission by reason of the non-completion by the Contractor of the works, and no question or claim shall be raised or made by the Contractor by reason or on account of the ultimate cost of the work so taken over, proving greater than in the opinion of the Contractor it should have been; and all materials and things whatsoever, and all horses, machinery and other plant provided by the Contractor for the purposes of the works shall remain and be considered as the property of the Commission for the purposes and according to the provisions and conditions contained in the twelfth section of this Contract. And the Commission may, at its option, sell or otherwise dispose of the whole or a portion of such materials and things whatsoever, horses, machinery and other plant, and may retain the proceeds of such sale or disposition on a sufficient part thereof on account of or in satisfaction of any loss which it may have sustained by reason aforesaid.

15. The Contractor shall be at the risk of and shall bear, all loss or damage, whatsoever, which may occur to the works, or any of them, until the same be fully and finally completed and delivered up to and accepted by the Commission; and if any such loss or damage occur before such final completion, delivery and acceptance, the Contractor shall immediately at his own expense repair, restore and re-execute the work so damaged, so that the whole works, or the respective parts therof, may be completed within the time hereby limited.

16. The Contractor shall not have nor make any claim or demand, or bring any action or suit against the Commission for any damage which he may sustain by reason of any delay in the progress of the work.

17. The Contractor shall not without the written consent of the Commission previously had and obtained make any assignment of this Contract and no consent or approval of the Engineer of a contract to sub-let any portion of this work as provided for in clause 84 of the specifications shall be valid or binding unless in writing signed by the said Engineer.

18. The Contractor shall provide medical aid, hospital accommodation and mail service as required by said specifications all to the satisfaction of the Engineer and shall from time to time make such changes in the medical staff, hospital accommodation and mail service as shall be required by the Engineer, and if at any time the Engineer shall report to the Commission that there has been any failure or default on the Contractor's part in supplying such medical aid, hospital accommodation and mail service or in making any such changes required by the Engineer the Commission may take such steps and do such acts and procure, engage or provide such assistance, accommodation or service as to the said Commission shall seem necessary in the premises and shall be entitled to charge all expenses thereof and incident thereto to the Contractor and to deduct same from time to time from

the payments falling due to the Contractor under the Engineer's certificates or otherwise.

19. The Contractor shall be responsible for all damages claimable by any person or corporation whatsoever in respect of any injury to persons or to lands, buildings or other property, or in respect of any infringement of any right whatsoever occasioned in their carrying on of the said works, or by any neglect or misfeasance or non-feasance on his part, and shall and will at his own expense make such temporary provisions as may be necessary for the protection of persons, or of lands, buildings or other property, or to prevent the interruption of the traffic on any public or private road, or for the uninterrupted enjoyment of all rights of persons or corporations, in and during the performance of the said works.

20. In case any sum due for the labor of any foreman, workman, or laborer or for the use of any horses or other animals or wagons or other plant employed upon or in respect of the said works or any of them or the price of any materials or supplies purchased for the said work, remains unpaid, the Engineer may notify the Contractor to pay such sum, and if two days elapse and the same be not paid, the Commission may pay such sum, and the Contractor covenants with the Commission to repay at once, any and every sum so paid and if the Contractor does not repay the same within two days, the Commission may deduct the amount or amounts so paid by it from any sum that may then or thereafter be or become due by the Commission to the Contractor.

21. The Contractor shall in connection with the whole of the said work as far as practicable use only material, machinery, plant, supplies and rolling stock manufactured or produced in Canada provided same can be obtained as cheaply and upon as good terms in Canada as elsewhere having regard to quality and price and shall not at any time in connection with the construction of the said railway or works or any other matter arising out of or connected with this Contract employ any person or persons in contravention of The Alien Labor Act or the provisions of The Railway Act of Ontario respecting the employment of alien labor and shall pay to all workmen, laborers and other servants employed in or about the construction of the said Railway and works, and every other matter arising out of or connected with this contract such rates of wages as may be currently payable to workmen, laborers and servants engaged in similar occupations in the district in which such railway and works are to be constructed and shall be responsible for the observance by all sub-contractors on their part of the provisions of this clause. And in the event of the Commission, who shall be sole, absolute and final judge of such matters, being satisfied at any time that the Contractor or any sub-contractor has been guilty of any violation of any of the proisions of this clause, the Commission shall have the right from time to time and as often as it shall be satisfied that any such violation has taken place to withhold all payments from the Contractor until any such violation of any of the provisions of this clause shall in the opinion of the Commission have ceased and until such amends as the Commission may require, shall have been made for all such violations, and on being notified by the Commission of any such violation it shall be the duty of the Engineer to withhold all certificates from the Contractor until the Commission shall be satisfied that such violation has ceased and until amends shall have been made to the satisfaction of the Commission as aforesaid.

22. The Commission shall be at liberty to send workmen on the premises to do work not comprised in Contractor shall afford the Contract, and the them all reasonable facilities to the satisfaction of the Engineer.

23. Any notice or other communication mentioned in this contract or in the specifications to be notified or given to the Contractor shall be deemed to be well and sufficiently notified or given if the same be left at the Contractor's office on the works or mailed in any post office to the Contractor or foreman, addressed to the address mentioned in this Contract or to the Contractor's last known place of business.

24. Cash payments equal to about ninety per cent. of the value of the work done approximately made up from returns of progress measurements and computed at the prices agreed upon or determined under the provisions of this Contract will be made to the Contractor monthly, on the written certificate of the Engineer that the work for or on account of which, the certificate is granted, has been done, and stating the value of such work computed as above mentioned, and the said certificate shall be a condition precedent to the right of the Contractor to be paid the said ninety per cent. or any part thereof, the remaining ten per cent. shall be retained until the final completion of the whole work to the satisfaction of the Engineer, and until the Engineer shall be satisfied that all wages of all workmen, laborers, and servants of the said Contractor and of all sub-contractors under him as well as the price of all material and supplies made, procured or provided for the said Contractor or for any of the sub-contractors have been duly paid, whereupon the Engineer shall give his final certificate accordingly and such remaining ten per cent. or the balance payable to the Contractor as found by the Engineer shall be paid to him by the Commission within forty days after the granting of such final certificate. And it is hereby declared that the written certificate of the said Engineer, certifying to the final completion of the said works to his satisfaction, shall be a condition precedent to the right of the Contractor to receive or to be paid the said remaining ten per cent. or any part thereof. The Commission shall be at liberty from time to time to take over as completed any portion of the work certified to by the Engineer as having been completed and the Contractor shall thereupon be entitled to payment in full for the work so completed in like manner and subject to the same conditions as if the said completed portion comprised the whole work to be done and it is further agreed that upon taking over any portion of the said works the Commission shall thereafter transport over the portion so completed and taken over all material to be used by the Contractor in the uncompleted portion of said works at the rate of one-half cent per ton per mile, it being agreed between the Commission and said Contractor that the computations and adjustments of the amount to be paid by the Contractor shall be left entirely to the Engineer whose decision as to all such matters shall be final and conclusive between the parties, but this provision as to transporting materials shall not apply to steel rails, fastenings and spikes which it is understood and agreed between the parties shall be laid down by the Commission for the Contractor at the end of the portion from time to time which may have been taken over and upon being so laid down shall be deemed to have been delivered to the Contractor, and subject to the above provision for transporting steel rails, fastenings and spikes over portions of said road from time to time taken over by the Commission all steel rails, fastenings and spikes shall be delivered to the Contractor, F.O.B. cars, North Bay, or if any portion of the railway line of the Commission between North Bay and New Liskeard has been completed and taken over by the Commission prior to the time of such respective deliveries, then, at the northern terminus of the said portion: provided, however, that the Commission shall pay and allow to the Contractor at the rate of three-fourths of a cent per ton per mile for the transportation of such steel rails, fastenings and spikes over the portion of said road south of New

Liskeard which shall not have been taken over by the Commission prior to the time of such respective deliveries; and the ties for said work shall be delivered to the Contractor either wholly at New Liskeard or partially at New Liskeard and partially at such other points on the works as shall be decided by the Engineer, and the Commission shall similarly allow and pay to the Contractor at the three-fourths of one cent per ton per mile for all ties for the said work transported by the Contractor over portions of the line of railway of the Commission south of New Liskeard which shall not have been taken over by the Commission prior to the shipment of such ties respectively and the Contractor on his part will promptly transport and convey from time to time ties delivered to him on the line of said railway south of New Liskeard to New Liskeard. The taking over by the Commission of any portion or portions of said works shall in no way affect the rights and liabilities of the parties with respect to the completion of the balance in accordance with the provisions of this contract.

25. It is intended that every allowance to which the Contractor is fairly entitled will be embraced in the Engineer's monthly certificates; but should the Contractor at any time have claims of any description which he considers are not included in the progress certificates, it will be necessary for him to make such claims in writing to the Engineer within thirty days after the date of the despatch to the Contractor of each certificate in which he alleges such claims to have been omitted.

26. The Contractor in presenting claims of the kind referred to in the last clause must accompany them with satisfactory evidence of their accuracy, and the reason why he thinks they should be allowed. Unless such claims are thus made during the progress of the work, within thirty days, as in the preceding clause, the Contractor shall be forever shut out, and shall have no claim on the Commission in respect thereof.

27. The progress measurements and progress certificates shall not in any respect be taken as binding upon the Engineer, or as final measurements or as fixing final amounts; they are to be subject to the revision of the Engineer in making up his final certificate, and they shall not in any respect be taken as an acceptance of the work or release of the Contractor from the responsibility in respect thereof, but he shall at the conclusion of the works deliver over the same in good order, according to the true intent and meaning of this contract.

28. The Contractor shall be entitled, subject to the Engineer's certificate, to payment as extra work either in accordance with clause 82 of the Specifications or under clause 5 of these Presents for the removal of vegetable matter, snow or ice, which he shall be required to remove under clause 6 of the Specifications and for the felling of any trees which may be required under paragraph 33 of the Specifications.

29. The Commission shall be entitled from time to time to use free of charge of any portion of the line of Railway not theretofore accepted as completed under the terms hereof for the transportation of all steel superstructures, and no such use of any part of the said Railway line shall be deemed to be an acceptance or taking possession thereof.

30. The Commission shall have the right to suspend operations from time to time at any particular point or points, or upon the whole of the works, and in the event of such right being exercised so as to cause any delay to the Con-

tractor, then an extension of time equal to such delay or detention, to be fixed by the Engineer, shall be allowed him to complete the contract, but no such delay shall vitiate or avoid this contract or any part thereof, or the obligation hereby imposed or any concurrent or other bond or security for the performance of this contract, nor shall the Contractor be entitled to any claim for damages by reason of any such suspension of operations. And at any time after operations have been suspended, either in whole or part—such operations may be again resumed and again suspended and resumed as the Commission may think proper. And upon the Contractor receiving written notice from the Engineer that the suspended operations are to be resumed, the Contractor shall at once resume the operations and diligently carry on the same.

31. The Contractor shall upon the execution of these Presents pay to the Commission the sum of twenty-five thousand dollars in cash as security for the due and faithful performance and observance by the Contractor, within the times hereby limited on that behalf, of this contract and of every matter and thing thereby required to be done, performed and observed by the Contractor in connection therewith, same to be retained by the Commission until the due completion of the whole of the said works and upon the completion of the whole of said works within the times hereby limited as aforesaid, the said sum of twenty-five thousand dollars, together with interest thereon at the rate of three per cent. per annum, shall be repaid to the Contractor along with the final payment which shall become due to the Contractor on the Engineer's final certificate of the due completion of the last of said works; provided, however, that in lieu of such cash security the Contractor may at any time within sixty days from the date hereof furnish and give security by way of bond, in form approved of by the Commision, with two personal sureties satisfactory to the Commission in the penal sum of Fifty thousand dollars, and upon the giving of such security within the time aforesaid to the satisfaction of the Commission the said sum of Twenty-five thousand dollars, without interest, shall forthwith be repaid to the said Contractor.

32. And the Commission, in consideration of the premises, hereby covenants with the Contractor, that the Contractor, from time to time and in all respects having fulfilled the covenants and agreements herein contained, and on the Contractor's part intended to be fulfilled, will be paid for and in respect of the works hereby contracted for, the various sums which shall become payable hereunder.

33. It is distinctly declared that no implied contract of any kind whatsoever, by or on behalf of the Commission shall arise or be implied from anything contained in this Contract, including the said specifications, tender, plans and drawings, or from any position or situation of the parties at any time, it being clearly understood and agreed that the express contracts, covenants, agreements and stipulations contained in these Presents and in said specifications, tender, plans and drawings are and shall be the only contracts, covenants, agreements and stipulations upon which any rights against the Commission are to be founded, and it being further expressly agreed that in case of any discrepancy between these Presents and anything contained in the said specifications the provisions of these Presents shall govern. In case of any discrepancy appearing at any time between the specifications, profiles, plans, drawings and detailed drawings, or any of them, the Contractor shall follow such one of them as the Engineer shall in writing direct.

IN WITNESS WHEREOF this Agreement has been duly signed, sealed and executed by the said Contractor, and duly executed by the said Commission under its Corporate Seal and the hands of its Chairman and Secretary.

WITNESS:

and hold myself ready to enter promptly into a contract in form satisfactory to the Commission for the due execution of the said work at the rates and on the terms herein stated and to furnish security for the due performance of the contract by either the payment of $25,000 cash to the Commission or by a bond for $50,000 with two approved sureties.

I herewith enclose an accepted bank cheque, payable to the order of the Chairman and Sec.-Treasurer of the Commission *for the sum of Twenty-five Thousand Dollars* ($25,000) as per terms of the advertisement and specifications for this work dated 1904.

I hereby certify that I have visited and examined the site of the proposed work, or have caused it to be visited and examined by a competent person on my behalf, and have made all necessary enquiries relative to the value of the materials required for this work.

Envelopes containing this Tender are to be endorsed "TENDER FOR GRADING, BALLASTING, ETC.," *and addressed to the Secretary of the Commission, Toronto.*

The Signatures of parties tendering must be in their respective handwriting.

SIGNATURES, OCCUPATION AND POST OFFICE ADDRESS OF PARTIES TENDERING.

A. R. MACDONELL,

TEMISKAMING AND NORTHERN ONTARIO RAILWAY

SPECIFICATIONS.

DATED AT NORTH BAY,.....1904.

WORK TO BE DONE.

1. The work to be done comprises the clearing, grubbing, close cutting, fencing, ballasting and track laying, the removal and placing of all material necessary for the formation of the road bed, the building of all structures, digging of all pits, ditches and drains, the necessary alterations and diversions of roads and streams, the formation of all embankments, excavations and ditches required for such diversions, and for cross roads, farm crossings, depot grounds, sidings, etc., the building of all wooden box culvert, rip-rap, etc., and in short all the work that may be required to complete the road bed of a single track railway to grade from New Liskeard northwesterly to a point on the Abitibi River or to a point in one of the townships adjacent thereto a distance of 80 to 100 miles on the Temiskaming and Northern Ontario Railway.

CLEARING, CLOSE CUTTING AND GRUBBING.

Clearing.

2. The right of way will be in general 99 feet wide, 49½ feet on each side of the centre line; and where the line passes through wooded land the right of way must be cleaned of all timber, brush, etc.; it must either be burned or removed from the right of way. The timber, brush, stumps or roots, shall not in any case be piled upon adjacent lands. They must invariably be made into piles near the centre of the space to be cleared, and there entirely consumed as the work progresses. Wherever directed by the Engineer, for a width of 10 feet on each side of the centre, all stumps shall be cut to within 12 inches of the ground. Places at which additional right of way has been acquired, may or may not be cleared as the Engineer may direct. All timber found on the right of way and suitable for trestles, culvert timber, fence posts, telegraph poles and ties, shall be manufactured by the contractor according to sizes and dimensions as furnished by the Engineer, and paid for according to his schedule of prices, and piles on the right of way as directed by the Engineer. Payments for same shall be by the acre.

Special precautions must be used by the contractor against the spread of fire off the right of way into adjacent lands, and he shall have fires started only at such places and at such a time as the Engineer may direct.

Grubbing.

3. In excavations less than three feet in depth, including ground from which material is to be borrowed, as well as from ditches, new channels for waterways and other places where required, and embankments less than two feet in height, all trees and stumps must be grubbed out within the limits of such cuttings or embankments, and if possible burned.

The berm in all cases must be grubbed. Payments for same shall be by the acre.

Close Cutting.

4. All stumps must be close cut where embankments are less than 4 feet in height and more than 2 feet in height.

Cross-logging or Corduroy.

5. Cross logging or corduroy will be placed under embankments where deemed necessary by the Engineer, and will consist of such timber as will be suitable, of not less than 6 inches in diameter nor more than 15 inches in diameter, stripped of all branches and laid close together and in regular manner at right angles to the centre line and to about 5 feet beyond the side slopes, with a layer of brush laid on top in a regular manner and of such thickness as the Engineer may direct. It will be estimated and paid for by the acre, on a basis of one foot in depth of timber.

GRADING.

Embanking.

6. The embankment must be formed of suitable material to be judged by the Engineer, and made in accordance with his instructions, either by material from excavations, borrowing or casting up from the sides.

No large stones or stumps will be allowed in the bank within a depth of two feet below the sub-grade.

In places where the material surface of the ground upon which the embankment is to rest is covered with vegetable matter which cannot be burned off in clearing, and which would, in the opinion of the Engineer, impair the work, the same must be removed to his satisfaction, all snow or ice as may be on spaces to be covered by enbankments must be removed, and the spaces on which embankment is being built kept clear of snow and ice in such a manner as to allow the bank building material to pass freely to the bottom of the lakes, ponds, rivers, swamps or marshes, as the case may be where it is dumped. The contractor will be required to carry the embankment to such a height above the sub-grade as the Engineer may deem necessary to provide for shrinkage, compression, washing and settlement, and they must be maintained to their proper height, width and slope, until accepted by the Engineer as finished embankments. A crown of four inches will be required on all embankments to provide for surface drainage.

A berm of at least 3 feet must be left at the foot of the slope on all embankments where material is taken from the sides. Care must be taken to exclude all perishable material from the embankments.

All materials found in excavations, whether in road-bed cuttings, ditches, water channels, road crossings or elsewhere, must be deposited in such places as the Engineer may direct.

Width of Cuttings and Embankments.

7. The general width of cuttings shall be 20 feet at sub-grade on excavations, but when material is required to make fills, the cuttings must be widened for this purpose as required by the Engineer, before borrowing from any other source. In all excavations the sub-grade may be widened, when in the judgment of the Engineer it is necessary to do so to provide drainage.

All embankments must be at least 16 feet wide at the sub-grade.

Classification.

8. Excavations will be classed under the following heads, viz.: solid rock, loose rock and all other materials.

Solid Rock.

9. Will include all stone and boulders measuring more than one cubic yard, and all rock found in ledges requiring blasting to remove it.

Loose Rock.

10. All boulders and detached masses containing not more than one cubic yard nor less than one cubic foot, also all slate or other rock which may be removed by hand pick or bar without the necessity of blasting.

All Other Material.

11. All other materials shall comprise all materials, of whatever nature, that do not come under the classification of solid rock or loose rock.

12. Rock excavations must in all cases be taken out 9 inches below sub-grade, and refilled to sub-grade with approved material.

Over Haul.

13. The price for said excavation in all the several classes thereof, will be understood to cover and pay for the entire expense of removal of material excavated by any method whatever, including loading, unloading, the furnishing of all labor, the cost of finishing up cuttings and embankments, the dressing of slopes to the required angle, and the completing of everything connected with the grading of the road bed in a creditable and workmanlike manner in accordance with the directions and to the satisfaction of the Engineer, the furnishing of material, power and plant, transportation and deposition, in the manner prescribed in these specifications, and in the location designated by the Engineer, provided the average haul of the material so transported does not exceed 500 feet, and beyond that distance one cent per cubic yard per hundred feet will be allowed, and such overhaul as ordered by the Engineer.

Ditching.

14. In all excavations, other than solid rock, a ditch 2½ feet wide on top and one foot deep, must be formed on each side of the road bed. Ditches of greater capacity must be provided when in the judgment of the Engineer they are required.

Whenever embankments are made from side ditches, such ditches must be made continuous, and to a true line and grade as the Engineer may direct. Whenever new water courses or channels for rivers or streams are required to be formed, they shall be placed at such a distance from the foot of the slope or embankment as the Engineer may direct.

Borrow-pits.

15. In all cases where the excavation of the regular slopes and widths are insufficient to make the embankments, deficiency will be supplied by widening the excavation or from borrow-pits, as directed by the Engineer. Additional lands required for borrow-pits will be provided for by the Engineer, also the borrow-pits must be formed and drained as the engineer may direct.

Rip-Rap.

16. When the Engineer so directs, rip-rap will be used to protect the slope of an embankment from the action of the water and for other purposes. It will consist of loose stones of different sizes, which shall be placed carefully upon the slope in a firm and substantial manner, without being laid up in a wall.

Rip-rap shall be estimated and paid for by the cubic yard, the measurement being made in place.

Wasting.

17. Where there is any excess of excavation, the surplus must be used for widening the embankments, or for such other purposes as the Engineer may direct. No wasting from excavation will be allowed unless by written order of the Engineer.

Road Crossings.

18. Wherever the line is intersected by public or private roads, the contractor must keep open, at his own cost, convenient passing places, and he shall be held responsible for keeping all crossings, during the progress of the work, in such condition as will enable the public to use them with perfect safety, and such as will give rise to no just grounds of complaint.

Contractors will be held liable for any damages resulting from negligence on their part or that of their men.

Road crossings must be constructed so as to not to impair the usefulness of the road, and the general flow and drainage of the water must be restored to its original condition either through culverts or otherwise; the embankment approaches shall be made of a width of 24 feet for public roads and of 16 feet for private roads and generally on a grade of 1 in 20.

Slips.

19. When slips, slides or breaks, outside of the slopes given, occur in cuttings after they are properly formed the material must be immediately removed by the contractor, the slopes reformed and such precautions adopted as the Engineer may deem necessary.

The contractor will be paid for the removal of the material according to the class to which it may belong at his schedule price, only when, in the opinion of the Engineer, the slip, slide or break is due to causes which are not under the control of the contractor or his agents.

Finishing and Dressing the Grades.

20. The road bed must be finished in all cuts, banks, and along the berm in a workmanlike manner, perfectly even, and regular according to grade stakes as set from time to time by the Engineer in charge and to be exactly of the width directed.

All slopes to be formed even and straight, according to slope stakes, and to such incline as specified, or as the Engineer may direct. The slopes of earthwork in general will be 1½ horizontal to 1 perpendicular; in rock cuttings the slopes will be as a rule 1 horizontal to 4 perpendicular. In cuttings partly earth and partly rock, a berm of 6 feet will be left on the surface of the rock.

Damages.

21. In woodland the grading will commence after the clearing, close cutting and grubbing required is complete to the satisfaction of the Engineer. In the case of the land required for the railway being under crop, it will not be disturbed until arrangements have been made by the Engineer to enter upon the same.

The contractor will be held responsible for all damages done outside the railway limit.

Method of Measurement.

22. The measurement of quantities shall invariably be made in excavations and paid for by the cubic yard wherever the excavations are taken out in good shape to stakes given by the Engineer and the depth and form of the prisms are such as to arrive at an exact measurement. When this method is not practicable owing to irregularity in the depth, area and shape of the

prisms on short sections of work, such sections or parcel quantities will be measured in embankments after the banks are completed, settled and trimmed to the grade line and an allowance made for shrinkage on these short sections.

The allowance is not to be less than 4 per cent. or greater than 10 per cent. depending on the nature of the ground upon which the embankment is built, the character of the material of which it is composed and the time for settlement after completion before the measurement is made.

The allowance for shrinkage is to be determined by the Engineer, whose judgment shall be final and conclusive between the two parties.

Snow, Ice and Frozen Earth.

23. In event of excavation and embankment being proceeded with in winter, no snow or ice must be placed in the embankments or allowed to be covered up in them, and all frozen earth must as far as possible be excluded from the hearts of the embankments. The contractor must remove all snow and ice at his own expense.

Rock Cuttings.

24. To preserve material in rock cuttings and to prevent the waste of such material, the drilling and blasting of rock cuttings must be done as directed by the Engineer. In any event only so much explosives will be allowed to be used as will loosen the rock.

Should any material be wasted in consequence of disregarding the Engineer's instructions or by using heavy charges of explosives, such material so wasted will be deducted from the current estimates and at the rate which would be paid had the material wasted been put in the embankment. In places where the material to be excavated from the rock or other cuttings is not sufficient to complete a full embankment, the bank will be made of such reduced dimensions as the Engineer may direct.

In rock cuttings it will be sufficient to form a water channel 2 feet wide and 8 inches deep along each side.

Side Ditches.

25. For the proper draining of the line and work it may be necessary to excavate off-take ditches to the right or left of the line. These ditches as well as all other ditches are to be graded so that no water will stand in them, they are to be executed in strict accordance with the lines and grades to be given, they are to be properly sloped and left clean and free from all obstructions. The tops of these ditches are in no case to be nearer the foot of the slopes of the embankment than 4 feet. The material from ditches within the railway limit shall, if directed, be placed in embankments. The material will be paid for according to its class.

Catch Water Ditches.

26. Catch water ditches shall be formed where directed at some distance back from the top of the slope to exclude from the excavation any water flowing from the adjoining land. The contractor shall also construct all other drains and ditches which the Engineer may deem necessary for the perfect drainage of the railway and works.

The material removed will be paid for according to its class.

Finally.

27. If the contractor shall make excavations and embankments in excess of the directed width, such excess shall not be paid for.

Over culverts and behind bridge abutments shall be formed carefully, so as to avoid damage to timber and masonry. The contractor will be held responsible for any damage done in this measure.

All stone suitable for rip-raping and all good building stone found in excavations may, when directed by the Engineer, be removed and deposited in some convenient place until required, but any material so found and used will not be paid for twice. The quantity will form a deduction from the quantity of excavation as measured in the cutting.

Culvert Excavation.

28. No extra charge will be allowed for excavating dry foundation of culverts, except such cases as the Engineer may deem necessary, but it will be paid for at the price of excavation named in the contract.

Culvert and drain pipes must be put in place and finished ahead of the grading so as not to interfere with the work in any way.

Supervision.

29. Each structure must be under the supervision of a first-class practical bridge foreman; and any foreman or workman, who in the opinion of the Engineer is not competent, must at once be discharged.

Timber Culverts and Cattle Passes.

30. Timber culverts will be of two kinds; box or under grade and open culverts.

Timber Box culverts will be built of cedar not less than 10 inches square, sawn or neatly hewn on three sides with the bark stripped off the other side; built according to plans and dimensions furnished by the Engineer, and to a true line as he may direct. Timber for all culverts must be furnished by the contractors and all iron for the construction of such culverts will be supplied by the contractors and included in their schedule of prices for timber in culvert.

Iron.

31. All wrought iron used in the construction of culverts or trestles to be of the very best quality, to stand a tensile strain of 55,000 lbs. per square inch, and to stand bending over around its own diameter without showing showing signs of any flaws or crack.

Price to Cover All.

32. The price per thousand feet board measure is understood to cover all expenses incurred in teaming and completing the structure to the satisfaction of the Engineer.

TIMBER WORK.

Preparing the Ground for Starting the Work.

33. Before beginning the work of any trestle, all rubbish, logs, trees and brush must be cleared away, and all combustible material must be burned or removed for the entire width of the right of way. Dangerous trees liable to fall on or across the grade when outside of the right of way must be felled by the contractor, it being understood that the Engineer is to obtain permission from the land owner.

Drawings.

34. The drawings will be made to the scale indicated, but in all cases the figures are to be followed in preference to the scale, where there is any discrepancy between the two. The drawings are to be followed exactly excepting in cases of error or omissions, which must be referred to the Engineer for correction or for additional information.

Quality of Timber and Dimensions.

35. The timber used in all the truss or trestle bridges, culverts or cattle guards, must be of the exact dimensions given and figured on the drawings made in the Engineer's office, and are to scale indicated and measured, must be of the very best description of the kind required, free from all loose, black large or unsound knots, sawn or hewn square and free from wind shakes, wanes, sapwood holes and all description of decay and when delivered must in every way conform to the specification. Under no circumstances will any timber cut from dead logs be allowed to be placed in any portion of the structure, but all timber must be cut from living trees.

Inspection.

36. Inspection will be made when delivered on the works, or any other place pointed out by the Engineer.

Alterations in Bills of Timber, Etc.

37. The Engineer retains the right at any time to change the bills of timber, vary the dimensions, substitute one kind of structure for another, or decrease the number of the same without the contract price being thereby effected, or in any way rendering void the contract for the original figures.

Mode of Delivery.

38. In delivering timber it must be piled or placed in such a manner that no trouble will be experienced when inspecting or measuring it.

All iron for the construction of such trestles will be supplied by the contractor and included in the schedule of prices for timber in trestles.

Timber in Trestles.

39. The posts, braces, stringers, ties, guard rails, sills and caps for trestles must be of good sound white pine; sawn ties for the tops of trestles will be required. All timber must come fully up to the dimensions called for in the bills and drawings.

The line of cut-off of the piles will be given by the Engineer. The surface of the ties must be brought to a true plane under the rail, so that the rail will get a full bearing on every tie.

All the track stringers shall be brought to a true plane so that the ties will get an even bearing on all the stringers.

Where any timber, or pile trestle bridge is built on a curve the elevation of the outer rail shall be as per drawings for same, a copy of which will be furnished the contractor.

All caps are to be thoroughly driftbolted to the top of piles. All bracing timbers are to be bolted to piles, caps or other timbers wherever they cross them. The ends of all stringers shall be firmly attached to caps by means of drift bolts, timber cleats or some other method, which in the opinion of the Engineer is equally good.

Framing.

40. All framing must be made to fit closely and must be done in a thorough and workmanlike manner. No open joints, blocking or shimming in making joints will be allowed.

The holes for the bolts shall be bored with an auger of the exact size indicated on the plans. The nuts on all bolts shall be screwed on, so that the washers shall pinch hard upon the wood, and bring all parts of the structure close together.

On completion, tops of piles and all rubbish must be cleaned up and removed from the premises.

No extra charge will be allowed for excavating foundation of trestles or bridges, except in such cases as the Engineer may deem necessary, but it will be paid for at the price of excavation named in the contract.

Supervision.

41. Each structure must be under the supervision of a first-class practical bridge foreman; and any foreman or workman who, in the opinion of the Engineer, is not competent, must be at once discharged.

Price to Cover all Costs.

42. The price per lineal foot, or per thousand feet board measure, is understood to cover all expense incurred in teaming and completing the structure to the satisfaction of the Engineer.

Piles.

43. All piles will consist of tamarac, cedar or other approved timber: must be straight, sound, live timber, free from cracks, shakes and rotten knots, worm holes and all description of decay, all bark above ground taken off, branches and knots trimmed off smooth, finishing the pile in a workmanlike manner. All piles over 30 feet in length to be not less than 8 inches in diameter at the small end and 14 inches at the butt or large end where sawn off. Piles less than 30 feet in length must not be less than 10 inches at the small end and 12 inches at the butt or large end. The piles shall be so nearly straight that a right line taken in any radial direction and running parallel to a right line joining the centres of end of pile shall show that the pile is at no point over one-third of its diameter at such point out of a straight line.

All piles must show an even gradual taper from end to end. All piles must be cut off at tops to an exact line so that the caps will bear evenly on all the piles of the groups.

When required a detail plan will be furnished by the Engineer, showing the position and method of tennoning, bolting, etc., and they shall be driven until they will not move one inch under the blow of a hammer weighing 2,200 lbs. and falling 25 feet at the last blow. The contractor must properly point each pile for driving and supply and fix all rings for heads, also supply shoes of wrought iron when necessary. All piles must be accurately shaped and driven vertically.

Broken Piles.

44. Should any pile be broken in driving, another sound pile must be driven in its place at the expense of the contractor. During the progress of the driving wrought iron bands must be supplied by the contractor. The line of cut-off of the piles will be given by the Engineer.

Piles, How Measured.

45. Piles will be estimated and paid for by the lineal foot, delivered at the site of the structure according to bills furnished by the Engineer, and for driving, straightening, and cutting off ready for the cap and "only in lengths actually billed from time to time by the Engineer" will be paid for.

FENCING.

General.

46. There shall be erected an approved woven wire fence where considered necessary by the Engineer, which is to be left by the contractor on completion of the line in a state of thorough repair. All wood, brush, etc., must be cut and removed from the site of the fence and burned. No rubbish of any kind must be left strewn about the ground.

Posts.

47. The posts will be of round cedar, not less than five inches at the small end, 8 feet long and peeled "excepting brace posts, which must be 9 feet in length," to be three feet six inches in the ground with the large end down and pointed, and to have the tops cut off square with the top of the fence, to be placed 16½ feet apart from centre to centre.

Brace Posts.

48. Brace posts must be placed at a distance not exceeding two hundred feet apart, and the fence drawn up tightly. The brace posts will be sunk in the ground at least four feet; they will be braced both ways from top of post to foot of adjoining post with five inch round cedar braces, and fastened with two six inch spikes at each end. A suitable wire must also be stretched doubled, acting as a tie between the foot of the brace post and the top of the adjoining post and fastened to the five inch brace in the centre.

On Rock Ground.

49. Where bed rock is encountered, the post will rest on sills and braced. Braces to be let into the post and sills one inch and fastened with two six inch spikes on each end.

Sills.

50. Sills will be 8 feet in length, of cedar at least five inches in diameter and dapped into each other and fastened with a six inch spike, according to detailed plans to be furnished by the Engineer.

Gates.

51. Farm gates to be constructed as per detailed drawing and to be furnished with hinges, fastening, etc. The gate posts are to be well set and braced and to be of the dimensions shown on the drawing.

Stretching the Wire.

52. The fence must be thoroughly stretched with stretchers and to the satisfaction of the Engineer.

MASONRY.

53. The stone used in all masonry along the line of railway must be of a durable character, large, well proportioned and well adapted for the construction of substantial and permanent structures.

The contractor must satisfy himself as to where fitting material for the masonry can be most conveniently procured.

First-class Masonry.

54. First class masonry shall be regular courses of large, well-shaped stones, laid in Portland Cement mortar, on their natural beds. The beds and verticle joints will be hammer dressed, so as to form 3-8 inch joints. The verticle joints will be dressed back square 9 inches. The beds will be perfectly parallel throughout, the work will be left with the quarry face, except the arises, cut-waters, bridge seats and chiping, which wil be chisel dressed and bush hammered.

The courses of first class masonry will not be less than 12 inches, and they will be arranged in preparing plans to suit nature of the quarries. Courses may range to twenty-four inches where the thickness of the wall will admit, and the thinnest courses must invariably be placed towards the top of the work.

55. Headers will be built in every course not farther than six feet apart; they will have a length on line of wall of not less than twenty-four inches, and they must run back at least two-and-a-half times their height, unless where the wall will not admit this proportion, in which case they will pass through from front to back.

56. Stretchers will have a minimum length in line of wall of thirty inches, and their breadth of bed will be at least one-and-a-half times their height. The vertical joints in each course will be so arranged as to overlap those in the course below at least one foot. The quoins of abutments, piers, etc., shall be of the best and largest stone, and have chisel drafts properly tooled on the upright arises from two to six inches wide according to size and character of the structure.

57. The coping stones of piers and all abutments shall be through stone, extending the whole width of the wall. The bed stones for receiving the superstructure shall be of the best description of sound stone, free from drys or flaws of any kind; they must not be less than fifteen inches in depth for the small bridges, and eight feet superficial area on the bed. The larger bridges will require bed stones of proportionately greater weight. These stones must be carefully and solidly placed in position, so that the bridge will set fairly on the middle of the stones.

58. The backing will consist of flat bedded stones, well shaped, and have an area of bed equal to six superficial feet or more. In walls over three feet in thickness, headers must be built in back and front alternately, and care must be taken in arrangements of joints, so as to give perfect bond.

59. All masonry shall be laid in fresh ground Portland Cement of approved brands. The cement shall be tested by the Engineer on delivery and shall be kept by the contractor in a dry place in as good order as when delivered, until used.

60. The cement must be thoroughly mixed with good, clean, sharp, coarse river sand, generally in the proportion of one part cement to two parts of sand by measure. The cut-water stones and coping shall be laid in mortar in the proportion of one part cement to one part of sand.

The cement shall only be mixed as required. Any cement mortar left over at noon or at night shall not be used, and it must be prepared by the contractor's men under the supervision, and to the satisfaction of the Inspector; failing which, the Inspector, with the sanction of the Engineer, may employ men to prepare the mortar, and the expense incurred shall be charged to the contractor and deducted from the estimate.

61. Every stone must be laid with a full bed of mortar and beaten solid. Spaces in the vertical joints large enough to be built, must be built up, and all other vertical joints must be thoroughly grouted and each course finished off perfectly solid.

All the work must be carefully pointed with neat cement, and at completion of the contract the work must be left in a neat and clean workmanlike condition to the satisfaction of the Engineer.

Second-class Masonry.

62. Second-class masonry shall be of good, sound, large, flat bedded stone, laid in horizontal beds, and no courses less than twelve inches will be allowed, and not less in area than three superficial feet, and not more than two stones on height of course; they must be hammer-dressed to give good beds of half-inch joints.

Headers must be built in walls at least one in every five feet in line of wall and in every course.

63. Every attention must be paid to produce a perfect bond, and give the whole a strong, neat and workmanlike finish.

64. Bridge seats must not be less than two feet in thickness, and both bridge seats and copings must be bush-hammered. The mortar used must be of the same description as for First Class masonry.

Dry Masonry.

65. When suitable stone may be found for the construction of box culverts at a reasonable distance to the structure, said distance to be judged by the Engineer, it may be decided by the Engineer to utilize this stone for this purpose, the stone to be laid in broken, rough courses, but no round stone or boulder will be allowed in the structure.

Covering stone will be not less than fifteen inches in thickness, and must rest not less than twelve inches on walls.

Paving.

66. The bottom of stone culverts shall be paved with stone set on edge, twelve inches deep, packed solid, of an even face and inclined in the direction of the stream.

Concrete.

67. Concrete shall consist of Portland Cement of approved brand, and good, clean, sharp river sand, and broken stone that will pass through a two-inch ring in proportion of one part cement to two parts sand, and as much stone (about 7 parts) as above mortar will take, so as to completely fill voids in stone. This concrete must be thoroughly mixed until each stone is thoroughly coated with mortar before being placed in structure.

68. The facing of fine concrete is to be one foot in thickness, and is to be carried around the face and side of the work and the top surface of same to the depth of one foot.

The work is to be carefully done to the Batter shown on the drawings, and all corners rounded to a radius of not less than 12 inches.

The work to present smooth exterior surfaces when finished. Any holes or cavities on the exterior surfaces must be filled up with Portland cement grout, consisting of one part sand and one part of cement.

Rubble Concrete.

69. The Rubble Concrete is to be composed of one part of gravel or small stones not exceeding one inch in diameter, five parts of large stones weighing 40 lbs. or upwards, two parts of sand and one part of Portland cement. The Portland cement fine concrete facing is to be composed of one part of gravel or small stones not exceeding one inch in diameter, two parts of sand and one part of Portland cement. In mixing concrete, the gravel, sand and cement are to be turned at least three times whilst dry, water is then to be added, the material again turned over at least three times and thoroughly mixed be-being placed in the work.

Mixing.

70. The gravel, sand and Portland cement for the rubble concrete are first to be thoroughly and properly mixed to form a matrix or body of concrete, into which the large stones of the rubble concrete are to be placed. In construction the matrix is first to be placed in the work; and a layer of the same formed, into which the large stones are to be placed by hand. These stones must be placed at least three inches apart, and the spaces between them are to be thoroughly grouted or run up solid with the matrix so as to form a compact mass, and any holes or cavities in the work are to be run up full and flush with Portland cement grout, consisting of two parts of sand and one of cement. The fine concrete facing must be kept at least six inches higher than the rubble concrete, and thoroughly united with it, so as to form one homogeneous mass, all concrete to be placed in the work the same time as made, and any concrete not so placed will be rejected. The sides of the excavation are to be carefully protected, so as to prevent loose earth or other material from falling into and damaging the works or foundations, and the foundations are to be kept perfectly clear of water. Notice of readiness to mix concrete is to be given to the Engineer at least three days before the material from falling into and damaging the works or foundations, and the In default thereof the Engineer will reject such concrete so mixed and the Contractor will be required to remove the same forthwith off the works.

The concrete deposited in water will be composed of Portland cement and sand in the proportions of one of cement to one of sand, to which will be added five parts of broken stones such as is used in fine concrete.

Rock Foundation.

71. When the foundations of any structure are on rock the Contractor will be allowed to adopt any plan for his cofferdams that he may desire, provided he is able to lay the foundations dry so as to properly level off the rock to receive masonry or concrete. When the surface of the rock is smooth and inclined so that the piers would, in the opinion of the Engineer, have a tendency to slide upon it the Contractor will be required to level, step, or roughen, as the Engineer may consider necessary, the surface of the rock, so as to make it a secure and safe foundation on which to deposit the concrete or build the masonry.

Cribs.

72. When considered desirable by the Engineer, the piers and abutments of bridges may be constructed of timber cribs filled with stone or concrete to such a height as the Engineer may direct, the remainder to be constructed of masonry or concrete. The cribs will be built of hemlock, tamarack, cedar or pine, as the Engineer may consider best, the timber to be 12x 12, bolted together with 7-8 square bolts, sufficiently long to pass through two timbers and a half into the third, angles of cribs and ends of ties to be dovetailed—the whole to be according to drawings furnished.

73. The price of timber to include all irons. The stone filling to be not larger than one cubic foot.

74. The masonry shall not be commenced before the Engineer shall have examined and approved of the foundations nor until the Contractor shall have provided appliances and material of such a kind and in such quantities as shall be approved of by the Engineer.

Coffer-Dams.

75. All coffer-dams, outer caissons, and other materials (of such a nature as to obstruct the flow of water) that have been put in the river by the Contractor shall be removed at his expense as soon as the structure for which it was used has been completed.

No earth work shall be filled around the abutments till at least two weeks after the masonry has been laid and the earth must be carefully punned in horizontal layers around the walls.

76. It is understood that the price for masonry or concrete put in the schedule is to cover the cost of all materials, plant and workmanship necessary for the construction of the moulds and coffer-dams or caissons, and all pumping or baling, and any other work required to found the piers, abutments, etc., in a sound and substantial manner, and that no extra price will be paid for any work that may be required to secure this object. As to the character of all foundations, the Contractor must satisfy himself, and it is to be fully understood that no claims for extras will be permitted on account of any deficiency or inaccuracy in the plans and that the Contractor shall have no claim for extras on account of any increased or diminished quantities of masonry in any pier or abutment, or on account of any increased or diminished depth of water on the sight of any of the piers or abutments; he shall only be paid for the actual quantities at the schedule rate.

All steel superstruction will be supplied and put in place by the Commission.

GENERAL.

Beginning of Work.

77. The works are to be commenced and proceeded with as soon as practicable, after the person or persons whose tender may be accepted shall have entered into the contract; and the Contractor shall carry on the works in such places and in such manner as he shall be directed from time to time by the Engineer, and so as to secure its completion for acceptance by December 31st, 1905, the first 40 miles of grading to be completed and 25 miles of steel rails to be laid by December 31st, 1904. Rails, ties, fastenings, spikes, angle bars, bolts, and tie plates the Commission shall, at the Contractor's option, deliver F.O.B. cars or piled and stacked at New Liskeard, or such other points as the Engineer shall decide to be the beginning of said extension.

Time being the essence of this contract.

Extra Work.

78. No allowance will be made for extra work except upon written agreement signed by the Contractor and the Engineer, or under the written order of the Engineer. All claims for extra work so ordered must be made to the Engineer in writing before the payment of the next succeeding estimate, after the work was performed; and failing to make such claim, the same will be considered as abandoned by the Contractor.

Right of Way.

79. Due diligence will be used in securing the right of way, but the Commission will not be responsible for delays in this connection. All such delays shall only have the effect of entitling the Contractor to additional time for the completion of his work, the Engineer to be the judge as to the loss of time and the additional time to be allowed the Contractor for the completion of his contract.

Alterations.

80. The Engineer shall at any time, either before the commencement or during the construction of any portion of the work, be at liberty to make any alterations or change that he may deem advisable, either in the grades or alignment, or any other things connected with the works, whether the same increases or diminishes the quantities, and the Contractor shall only be allowed at the same rate as in his schedule of prices attached, and no extras of any descripton will be allowed.

The rates and prices in the schedule must be understood to include not only the particular work or material mentioned, but all and every kind of work, labor, tools, plant and materials of whatsoever kind necessary for the full execution and completion, ready for use of the respective portions of the works, to the satisfaction of the Engineer.

Payments.

81. A monthly estimate will be made by the Engineer for all work done and material delivered, ten per cent. of which will be retained as a reserve fund, reserving to the Contractor the right to enquire into the correctness of the estimates.

Day Labor.

82. If any work or service require to be done which in the opinion of the Engineer, does not come within the class of work to be measured under the contract, he shall be at liberty to direct the Contractor to perform the same by day labor, and the Contractor, when required by him, shall supply such force, perform such work and be paid the reasonable and actual wages of such force, as ascertained by time keeper and pay sheet, together with 10 per cent. for the use of the tools and profit. The Engineer shall be at liberty to discharge any bad or unsuitable workman who may be placed at day labor work, and the work so performed shall be subject to his approval before payment thereof.

Damages.

83. The Contractor will be held responsible for any injuries or damages to person or property received or sustained in the execution of the work, and shall indemnify and save harmless the province from all such damage or loss from fire or otherwise.

Sub-contractors.

84. The Contractors will not be permitted to sub-let any portion of this work without the consent of the Engineer, and his approval of the sub-con-

tractor, which consent or approval, however, shall by no means be considered a recognition of such sub-contractor.

The Contractor will not be released from the faithful performance of the work by reason of having let portions of the same to sub-contractors.

Contractor to Examine Works to be Bid For.

85. Contractors must satisfy themselves of the nature and location of the work they bid for, of the general form of the surface of the ground, of the quality of material required for forming the road bed or other work, and all other matter which can in any way influence their contract, and no information on any such matters derived from the maps, profiles, drawings, or specifications or from the Engineer in any way will relieve the Contractor from all risks or from fulfilling all the terms of his contract.

Contractor's Representative.

86. In the absence of the Contractor a competent agent or foreman shall represent him on the works, who shall be considered the lawful representative of the Contractor, and any orders given to such agent or foreman shall be deemed as given to the Contractor.

Profile Quantities.

87. The classification and quantities marked on profile are only approximate and will have no bearing on either monthly or final statements.

Stakes and Bench Marks.

88. Contractor must carefully preserve bench marks and stakes, and in case of wilful or careless neglect will be charged accordingly.

Insufficient Workmen or Material.

89. If at any time the number of workmen or horses or the amount of other material or other plant shall, in the opinion of the Engineer, be insufficient for the completon of the works in time specified, or that the works are, or some part thereof is, not being carried on with due diligence, then in every such case, the said Engineer shall have power to notify the Contractor in writing to employ or provide such additional workmen, horses, material, or plant as the said Engineer may think necessary; and in case the said Contractor shall not thereupon within 6 days, or such longer time as may be fixed by any such notice, in all respects comply therewith, he, the said Engineer, shall have power to provide any workmen, horses and material or other plant he may think proper; and all money so expended by the Engineer shall thereupon be paid by the Contractor, or may be deducted or retained out of any moneys due or to become due to the Contractor. And should these moneys be insufficient the balance shall be recoverable in the usual way as a debt due by the Contractor to the Commission.

Removal of Condemned Material.

90. In case any material is in the opinion of the Engineer not in accordance wth the terms of the contract and is condemned as unsuitable or inferior, it shall be at once removed by the Contractor from the works, or should this

not be done, the Engineer may, on giving three days' notice, cause the same to be removed, and the cost of such removal shall be deducted from any moneys due to the Contractor.

Headquarters of Contractor.

91. The Contractor shall be bound at all times to have an office on the works, where, by himself or some authorized agent, all notices or requsitions from the Engineer may be received and acknowledged.

Safety and Comfort of Employees.

92. As it is desirable to secure the safety and comfort of employees engaged on the work of constructon and to secure skilful medical aid for such employees as may get hurt or become sick on the works of construction, and also to have the mail carried and distributed along the line of construction; the Contractor for the purpose above mentioned agrees to furnish such medical attendance and hospital accommodation as is necessary and also to have the mail carried and distributed along the line of construction, the Engineer to be the judge as to whether this is properly carried out.

Should a hospital be provided the Contractor will, if the doctor considers it necessary, convey such men or employees as may get injured or become sick on the work embraced in this contract, to such hospital free of charge and to pay his or their expenses.

Exorbitant Charges.

93. The workmen, laborers or servants employed, shall be charged fair and reasonable prices for any provisions, clothing and other necessaries of life, and reasonable comfort supplied by the Contractor, his agents, or any person or persons authorized by him to supply such goods or accommodation. Upon the breach of any of the provisions of this section, or in the event of exorbitant charges being made by the Contractor, his agents, or any person or or persons authorized by him there may be deducted and retained from moneys payable in respect of this contract, such amount as the Commission may deem proper.

Alien Labor.

94. The Contractor shall not engage or employ on the said work any citizen or subject of any country having an Alien Labor Law, which practically excludes Canadians from employment on the public works of such country or on other works therein. Any Contractor employing alien labor as aforesaid shall be liable to a penalty of $20 a day for each and every person so employed.

Forest Fires.

95. Special precautions must be taken by the Contractor to prevent the spread of fire, and the laborers in his employ shall be subject to the direction of the Engineer in event of their aid being required by the Engineer to extinguish forest fires accruing in proximity to the Right of Way; the time of the men so engaged by the Engineer to be paid for at the rate of wages paid by the Contractor.

Sanitary Regulations.

96. The walls of shanties, lodging or boarding houses, intended for, or occupied by men, and which have a floor area exceeding 150 superficial feet, shall have side and end walls not less than 9 feet in height, clear above the floor and must have two ventilators in the roof, as well as closets built and situated at such distance from the nearest place of abode as may be directed "not in any event in a less distance than 200 feet." which are to be kept clean and subject to such sanitary regulations as the Engineer may from time to time direct.

Wages and Protection to Labor.

97. It is agreed and understood that in case the Contractor fail or refuse to pay the wages of laborers who may be employed on the work embraced in this contract, the Engineer is hereby authorized to hold such estimate as may be rendered or due the Contractor, until the matter is adjusted. All the provisions of the Acts to secure payment of wages for labor performed in the construction of Public Works shall apply to this contract.

Power to Enter Upon the Works.

98. The Commission shall have power to enter upon the works at any time and to carry on any work that may be considered necessary by the Engineer.

Wages.

99. It is hereby understood and agreed that during the construction of the work embraced in this contract, that the Contractors shall pay his or their laborers not less than wages current on like works in this part of the Province, and the wages of all persons of any class, employed upon or in the respect of any of the said works, shall be paid at least once a month; if possible said payment shall be made upon the works or some point convenient to the same, but in no case at a tavern or other place where liquors are sold.

Order on the Works.

100. The Contractor agrees to observe and abide by such rules and regulations as may from time to time be established by the Engineer, to promote good order and efficiency on the entire work, and will assist other contractors, employees and agents to do the same. The Contractor agrees not to entice or employ men from other contractor's work.

Service Roads.

101. Contractors having work awarded them shall immedately after signing the contract proceed to open and maintain such good and safe roads and paths along the whole line of their sections as may be directed by the Engineer, for foot or horse travel wherever practicable and on such portions of the line where there are no highways convenient for waggoning supplies they must open and maintain such roads without charge therefor and in their proposals must take this into consideration. Any persons having permission from the Engineer shall be allowed to pass along or haul any materials required for the road over any section, such persons not interfering or impeding

the work of the Contractor, providing in the case of a separate Contractor, he shall pay his proportion of the cost of said road, as the Engineer may deem right. No allowance or compensation, whatever, will be due or paid to the Contractor for any temporary roads or bridges he may make to facilitate the work.

Engineer to be Sole Judge of the Work.

102. All works are to be done to the entire satisfaction of the Engineer. He is to be the sole judge of work or material in respect both of quality and quantity, and his decisions on all questions of dispute with regard to the work or material or as to the meaning or interpretation of the plans or specifications is to be considered final and binding on all parties.

103. Whenever the word Commission is used in these specifications it designates the T. & N. O. Ry. Commission. Wherever the word Engineer is used in these specifications it shall be mutually understood to refer to the Engineer in charge of the works, and his properly authorized agents, limited by the particular duties entrusted to them. Wherever the word Contractor is used in these specifications it shall be mutually understood to refer to the party or parties contracting to perform the work or the legal representative of the said party. The specifications and general condition together with the drawings referred to are distinctly understood as being embodied with the contract, the whole forming the entire agreement between the Commission and the Contractor.

TRACK LAYING AND BALLASTING.

Work.

104. The work of track laying and ballasting will embrace all engines, cars and plant and all labor and tools required for loading, unloading and distributing rails, joint fastenings, spikes, points and crossings and sleepers or cross ties, laying, lifting, centering, lining and surfacing the track; also for making roads to ballast pits and laying all surface tracks for getting, loading and unloading the ballast, placing the same in the road and trimming it up.

Guage.

105. The rails shall be laid broken joints to a gauge of 4 feet 8½ inches clear between the rails, and they shall be well and carefully fastened at the joints. Special care must be taken at points and crossings to have the rails laid to a tight gauge. The rails must be full spiked, and on curves the outer rail shall be elevated according to the degree of curvature as directed by the Engineer.

Laying of Rails.

106. The rails should be handled with great care, and before being run over by either engine or cars, they shall be fully sleepered and surfaced. Every precaution should be taken to prevent them getting bent during progress of ballasting.

Ballast Pits.

107. In selecting ballast pits, a preference will always be given to those points where the best material can be procured, having due regard to the convenience of the Contractors. During the working of any pit, should the materials be found unfit for ballasting, the Engineer shall have power to compel the Contractors to close such pits and open others.

108. The surface of ballast pits shall be stripped of soil, where such exists, and no material whatever shall be placed on the road bed but good, clear gravel, free from earth, clay, loam or loamy sand, as the country will afford along the line, or within practical working distance from it by branch lines or sidings.

Ballast.

109. The maximum size of gravel must not be greater than three inches diameter. In unloading the ballast the train must be kept in constant motion, working to and fro so as to thoroughly mix the different qualites of ballast until a sufficient quantity is deposited for the first lift. The track must then be raised so that the sleepers and the ballast must be well beaten and packed under and around them. As the raising proceeds the end of the "lift" shall extend over not less than three rail lengths, and before trains are allowed to pass over the inclined portion of track it must be made sufficiently solid to prevent bending the rails or twisting the rail joints. After the lift the track shall be centered, lined, topped, surfaced and trimmed off to a proper form and width—about 2,600 cubic yards of ballast, pit measurement, will be required for each mile of single track. A second lift must be made in the same manner and with the same precautions as required for the first lift, in order to secure a uniform thickness of 10 inches under the sleepers.

110. In wet cuttings the Engineer shall have power to direct a greater thickness of ballast should it be deemed necessary.

Track.

111. The track shall be left by the Contractor with everything complete and surfaced. The ballast shall be dressed off to the form required, and the whole shall be executed according to the direction and to the approval of the Engineer.

Ties and Rails.

112. The ties will be of sound hemlock, cedar, tamarac or Jack pine, 8 ft. 0 in. long, not less than 7 inches face and 6½ inches thick and not less than 2,800 to the mile of track and will be furnished by the Commission.

The rail to be laid will be 80 lbs. per yard with split switches and spring rail frogs at turnouts off the main line.

Trestle Filling.

113. Where temporary trestles have been erected these may be replaced by a dump, the filling made with cars from the ballast pit or other places on the line of railway, a price for this class of work to be included in the schedule of prices.

(Sgd.) W. B. Russel,
Chief Engineer.

The Commission was anxous to obtain the opinion of some prominent outside Engineer on the location of the line and were fortunate in securing the services of Mr. Joseph Hobson, Chief Engineer of the Grand Trunk Railway. Mr. Hobson's reports are as follows:—

Montreal, July 5th, 1904.

To the Secretary,

Temiskaming & Northern Ontario Railway Commissioners,

Toronto, Ont.

Dear Sir,—I beg to report that I have, as per request, carefully gone over the plan and profile (forwarded to me by your Chief Engineer Mr. W. B. Russel) of the proposed extension of the Temiskaming and Northern Ontario Railway, from New Liskeard to a point 11 2-5 miles north. This section, according to the information I have, is the only part of the proposed extension which has been finally located.

As I have never been in the district or territory through which it is proposed to extend the Railway, I do not know whether the best location has been obtained or not; but I can without any hesitation say that, if constructed on the alignment and with the gradients shewn on the plan and profile, the Railway will, so far as they are concerned, be an exceptionally good one.

I can, of course, express no opinion upon the surveys now in progress.

Yours very truly,

"JOSEPH HOBSON."

Montreal, December 14th, 1904.

Robert Jaffray, Esq.,

President, Temiskaming & Northern Ontario Ry.,

Toronto.

Dear Sir,—I have examined very carefully the profile of that portion of The Temiskaming & Northern Ontario Railway north of New Liskeard.

Upon this profile were shewn, in addition to the elevations of the ground, the lengths, angles of deflection and radii of curves; the information upon it was, therefore, sufficient to shew clearly the alignment adopted, as well as the gradients.

With regard to the alignment; I assume that the country through which the proposed railway will pass has been carefully explored and surveyed, and that the route selected is the best that can be obtained; but whether the best or not, I consider it a very good one, particularly when the character of the country is taken into account.

Designating the curves in the usual way, they are from one to four degrees. I may be permitted to say that a one degree curve is described with a radius of 5,730 feet, and that a four degree curve (which is the sharpest it is proposed to use on that part of the Temiskaming Railway under consideration) has a radius of 1,432.7 feet. Upon a number of railways which rank among the best on this Continent there are more objectionable curves than any which it is proposed to use on this line. I assume, of course, that transition or easement curves will be used at each end of those shewn on the profile, so as to reduce the somewhat unpleasant jar which is usually felt when the train leaves a tangent or straight part of the line.

On the part of Railway under consideration there are in all forty-four curves, with an aggregate length of 57,717 feet, or say 10.93 miles, out of a total length of, say, 47 miles. I should consider this very satisfactory.

The gradients are favorable. The maximum is a half of one per cent. and the aggregate length of those parts of the line having this maximum gradient is only five miles. Taking the line as a whole, the gradients are remarkably good. The elevation of sub-grade at Station O, at the north end, is approximately 648.5 feet above datum; at Mile Post 46, at the north end, it is 1,024 feet. The gradients are therefore favorable to southbound traffic.

So far as gradients and curvature are concerned, I have no hesitation in saying that this line is an exceptionally good one.

Yours truly,

"JOSEPH HOBSON,"
Chief Engineer G. T. Ry.

Steel Rails.

The construction contract for this section requiring 25 miles of track to be laid during the season of 1904, which it fell to the Commission to supply, tenders were called for, for 4,000 gross tons 80 lb. steel rails in accordance with the Commission's specifications to be delivered f.o.b. cars at North Bay not later than 1st September. These tenders were opened on June 25th and were as follows:—

From the United States Steel Products Export Company: For 1st quality rails $23.50 per gross ton; for 5 per cent. 2nd quality rails, $22.50 per gross ton.

From Gerald Lomer, Montreal, representing the Lackawanna Steel Co.,— for 1st quality rails $23.50 per gross ton; for 2nd quality rails $22.50 per gross ton.

From B. J. Coghlin & Co., Montreal, representing the Pennsylvania Steel Co., 1st quality rails $23.50 per gross ton; 2nd quality rails $22.50 per gross ton.

From Watson, Jack & Co., Montreal, representing Rheinische Stahlwerk inRuhrort, 99-6 c.i.f., North Bay, terms Bankers letter of credit on London accompanying order available for cash against presentation of documents in London.

From A. T. Drummond & Co., Montreal, 5-7 per gross ton, exclusive of duty, cash against documents, which price would be equal to $26.10 at $4.88 to-day's exchange.

From Chas. Cassils, Montreal, representing Bolckow, Vaughan & Co., Limited, 4-11 per gross ton net cash against shipping documents c.i.f. Montreal in bond. Rate of transit named by C. P. R. from ship at Montreal to North Bay, $2.75 per gross ton, making price $25.90 per gross ton f.o.b. cars North Bay.

From Drummond, McCall & Co., Montreal, $24.97 per gross ton f.o.b. cars North Bay in bond.

From F. H. Hopkins & Co., Montreal, representing Cammell, Laird & Company, $25.00 per gross ton f. o. b. cars North Bay in bond.

The tender of Cammell, Laird & Co., was accepted, being the lowest except tenders for American rails, the Engineer and Commissioners considering English rails preferable and former contracts with this firm having been satisfactorily carried out by them. The following contract was in due time entered into:—

MEMORANDUM OF AGREEMENT made this twenty-eighth day of June in the year of Our Lord one thousand nine hundred and four, between CHARLES CAMMELL AND COMPANY (LIMITED), of Sheffield, England, acting herein by its agents Messrs. F. H. Hopkins and Company of Montreal, hereinafter called the Contractor, on the one part; and THE TEMISKAMING AND NORTHERN ONTARIO RAILWAY COMMISSION hereinafter called the Commission, of the other part;

Witnesseth, that the said parties agree as follows:

1. The Contractor agrees to furnish to the Commission free of all charges except Customs Duties, if any, on cars at North Bay, Ontario, as hereinafter specified four thousand tons of steel rails in strict compliance with the specifications hereto attached for the price of twenty-five dollars per gross ton of two thousand two hundred and forty pounds f.o.b. cars at North Bay.

2. Said rails shall be so delivered between the fifteenth day of August, 1904, and the fifteenth day of September 1904, time being agreed to be strictly of the essence of this contract.

3. In the event of stoppage or partial stoppage of the works of the Contractor or shipments being delayed through strikes, accidents, breakage of machinery or other cause beyond the Contractor's control, of which the Commission shall be promptly notified, or in case any shipment or any part thereof shall be lost in transit the Contractor shall be entitled to such additional time in respect of the whole or part of such deliveries or any of them as the Chief Engineer of the Commission for the time being shall decide and certify in writing to be fair and reasonable having reference to the character and duration of such stoppage delay or loss and such Engineer shall be the sole and final judge as to the additional time to be allowed and as to what part of such deliveries or any of them shall extend to and his decision in every such case shall be absolutely final and binding upon both parties. The last preceding clause of these presents shall be construed so far as relates to any portion of such deliveries or any of them affected by such extension of time as if the time fixed by the Engineer were the time fixed in said clause.

4. Within ten days from the date hereof the Commission shall communicate to the said agent of the Contractor an address in England where notice of the commencing of rolling and of the resuming of rolling from time to time may be given and the Contractor shall give written notice at such address of the commencement of rolling at least fifteen days in advance of such commencement and due notice of the resuming of rolling from time to time after the same shall have ceased.

5. The written certificate of the Inspector of the Commission provided for by said specifications certifying that the rails have been manufactured to his satisfaction in accordance with this contract, and the said specifications shall be a condition precedent to the right of the Contractor to receive and be paid the price herein agreed to be paid for the same.

6. In case default shall be made by the Contractor in the delivery of any of the said rails in accordance with the terms of this contract and the continuance of such default for thirty days the said Commission may cancel this contract, but the Contractor shall nevertheless remain liable for all loss which may be suffered by the Commission by reason of the non-completion by the Contractor of this contract; provided, however, that credit shall be given to the Contractor notwithstanding such cancellation for the price of all rails which shall have been delivered by the Contractor in accordance with this contract and the said specifications.

7. The cost of inspection provided for by the specifications shall be borne by the Commission.

8. The Commission, in consideration of the premises, agrees to pay in Montreal, funds for each shipment of said rails upon the arrival thereof in Montreal on presentation of invoices, English bills of lading and the certificate of the Inspector of the Commission attached to each draft, but such payment shall not relieve the Contractor from the obligation to make delivery at North Bay as aforesaid, nor from otherwise carrying out the terms of this contract.

In Witness Whereof the Contractor has caused these presents to be executed on its behalf by its Agent, and the said Commission has caused these presents to be executed under its Corporate Seal and the hands of its Chairman and Secretary.

"P. E. Ryan,"
Secretary.

In July the Algoma Steel Company, through their Sales Agents. Messrs. Drummond, McCall & Co., of Montreal, offered to deliver steel rails for $30 per gross ton at North Bay, but the offer was not at that time entertained. Later, the law imposing a duty on steel rails having in the meantime come into effect, it was decided at a meeting of the Commission held on 12th November to order 7,000 tons of rails which will be required for the season of 1905, for the extension at the price quoted, the rails to be in accordance with the Commission's specifications and inspection tests, delivery to begin May 1st, 1905, and in due course the following contract was entered into:—

MEMORANDUM OF AGREEMENT made this 12th day of December, in the year of our Lord one thousand nine hundred and four between The Algoma Steel Company, Limited, hereinafter called the "Contractor," of the one part; and The Temiskaming and Northern Ontario Railway Commission, hereinafter called the "Commission," of the other part.

1. The Contractor agrees to furnish to the Commission free of all charges on cars at North Bay, Ontario, as hereinafter specified, seven thous-

and tons of steel rails in strict compliance with the specifications hereto attached for the price of thirty dollars per gross ton of 2,240 pounds, f.o.b., cars at North Bay.

2. Said rails shall be so delivered at such times during the season of 1905 and in such quantities, beginning 1st May, 1905, as shall be required by the Chief Engineer of the Commission who shall give notice to the Contractor by letter, addressed to the Contractor at Sault Ste. Marie, Ontario, at least two months before each delivery indicating the date and amount of such respective deliveries, and when the dates are so fixed this contract shall be read and construed accordingly, time being agreed to be strictly of the essence of the contract.

3. In the event of stoppage or partial stoppage of the works of the Contractor, or shipments being delayed through strikes, accidents, breakage of machinery or other cause beyond the Contractor's control (of which the Commission shall be promptly notified), or in case any shipment or any part thereof shall be lost in transit, the Contractor shall be entitled to such additional time in respect of the whole or any part of such deliveries, or any of them, as the Chief Engineer of the Commission shall decide and certify in writing to be fair and reasonable, having references to the character and duration of such stoppage, delay or loss, and such Engineer shall be the sole and final judge as to the additional time to be allowed and as to what part of such deliveries or any of the same shall extend to and his decision in every such case shall be absolutely final and binding upon both parties. The last preceding clause of these presents shall be construed so far as relates to any portion of such deliveries or any of them affected by such extension of time as if the time fixed by the Engineer were the time fixed in said clause.

4. The Contractor shall give written notice to the Commission, by letter addressed to the Commission at its office in Toronto, of the commencement of rolling at least fifteen days in advance of such commencement, and due notice of the resuming of rolling from time to time after the same shall have ceased.

5. The written certificate of the Inspector of the Commission provided for by said specifications certifying that the rails have been manufactured to his satisfaction in accordance with this contract, and the said specifications shall be a condition precedent to the right of the Contractor to receive and be paid the price herein agreed to be paid for the same.

6. In case default shall be made by the Contractor in the delivery of any of the said rails in accordance with the terms of this contract, and the continuance of such default for thirty days, the Commission may cancel this contract, but the Contractor shall, nevertheless, remain liable for all loss which may be suffered by the Commission by reason of the non-completion by the Contractor of this contract; provided, however, that credit shall be given to the Contractor notwithstanding such cancellation for the price of all rails which shall have been delivered by the Contractor in accordance with this contract and the said specifications.

7. The cost of inspection provided for by the specifications shall be borne by the Commission.

8. The Commission, in consideration of the premises, agrees to pay in Toronto funds for each shipment of said rails upon the arrival thereof in North Bay on presentation of invoices and the certificate of the Inspector of

the Commission attached to each draft, provided this shall not require the Commission to pay for any rails at any earlier date than the date of delivery thereof required by the Chief Engineer as aforesaid.

In Witness Whereof the said parties have caused these presents to be executed under their respective Corporate Seals and the hands of the proper officers in that behalf.

RAIL FASTENINGS.

In connection with placing of order for rails with Cammell, Laird & Co., quotations were asked for fastenings, etc., and the following tenders were received:—

For 350 *tons Angle Bars*:—

From The Hamilton Steel & Iron Co., Ltd., $1.65 per 100 lbs., being equivalent to $36.96 per gross ton.

From The Nova Scotia Steel & Coal Co., Ltd., New Glasgow, N.S., $1.67½ per 100 lbs., delivered f.o.b. cars North Bay, this price being equivalent to $37.52 per gross ton.

From The Montreal Rolling Mills, Montreal, $1.70 per 100 lbs., delivered f.o.b. cars North Bay, this price being equivalent to $38.08 per gross ton.

From A. T. Drummond & Co., Toronto, representing Guest, Keen & Nettlefolds, Limited, of Birmingham, £6 17s. c.i.f. North Bay, which at $4.88 to-day's exchange would be equal to $33.42 in bond, and $39.40 duty paid per gross ton.

From Chas. Cassils, Montreal, representing Bolckow, Vaughan & Co., £6 1s. per gross ton c.i.f. Montreal, in bond, which at to-day's rate of exchange would make the price $37.62 per gross ton, delivered f.o.b. cars North Bay, duty paid.

From United States Steel Products Export Co., represented by Charles Cassils, Montreal, $1.40 per 100 lbs. f.o.b. cars North Bay in bond, which price is equivalent to $39.36 f.o.b. cars North Bay, duty paid.

The order was awarded to The Hamilton Steel & Iron Company, the lowest tenderer.

For 40 *tons track bolts*, 4½ x 7/8 :—

From The Toronto Bolt & Forging Co., Toronto, $3.35 per 100 lbs.
From Pillow & Hersey Manf'g Company, Montreal, $3.44 per 100 lbs.
From The Montreal Rolling Mills Co., Montreal, $3.40 per 100 lbs.

The order was awarded to The Toronto Bolt & Forging Co., the lowest tenderers.

160 *Tons Track Spikes*, 6 x 9/16 :—

From Toronto Bolt & Forging Company, Toronto, $2.30 per 100 lbs.
From Pillow & Hersey Manf'g Co., Montreal, $2.33 per 100 lbs.
From The Montreal Rolling Mills, Montreal, $2.34 per 100 lbs.

The order was awarded to The Toronto Bolt & Forging Co., the lowest tenderers.

65,000 *Nut Locks* :—

From A. Holden & Co., Montreal, "Positive" nut lock washers made of 5/8 x ¼ in. steel, $7.90 per thousand; made of 5/16 in. steel, $7.70 per thousand; plain, $7.45 per thousand.

From I. A. Young, Montreal, Bartley Nut and Bolt Fastener, $8.89 per 100 lbs., delivered f.o.b. cars North Bay.

The Chief Engineer indicating a desire to investigate the merits of another nut lock the placing of the order for this item was deferred, but subsequently the tender of Mr. Young was accepted.

Ties :—

The contract for the construction of the extension requiring rails to be laid during 1904 to a point about 25 miles north of New Liskeard, tenders were advertised for in May for the delivery of 75,000 ties along the right of way north of New Liskeard. The only tender received was from Thomas Wallace, and was for cedar, hemlock and jack pine ties, 21 cents each, for tamarac 24 cents each. The Commissioners decided to accept Mr. Wallace's tender, provided the quantity of jack pine ties should be limited to 10 per cent of the entire quantity, and the following contract was entered into :—

MEMORANDUM OF AGREEMENT made in duplicate this fifth day of July in the year of our Lord, one thousand nine hundred and four between

Thomas Wallace of the Town of North Bay, in the District of Nipissing, Merchant, hereinafter called the Contractor, of the one part; and The Temiskaming and Northern Ontario Railway Commission, of the other part.

Witnesseth, that in consideration of the Mutual Covenants and Agreements hereinafter contained the parties hereby agree as follows :—

1. The Contractor will deliver to the Commission on the right of way of the Commission at the ninety-fourth mile from North Bay fifty thousand railway ties, and at such points on the right of way of the Commission north of New Liskeard as may from time to time be directed and approved by the Engineer or his Agent duly authorized in that behalf twenty-five thousand additional railway ties, all of said seventy-five thousand railway ties to be made from sound timber of good merchantable quality and in strict compliance in all respects with the specifications hereto annexed, which specifications are hereby made a part of this contract; it being however agreed, that should there in any respect be any discrepancy between the said specifications and these presents, then the terms of these presents shall govern, and it being further expressly agreed that the Contractor shall not be entitled to supply, nor shall the Engineer or Commission be bound to accept more than ten per

cent. of the whole quantity of said ties made from jack pine, said ties to be delivered and piled completely ready for inspection as follows:—At least fifty thousand on or before the fifteenth day of August, 1904, and the balance of twenty-five thousand on or before the fifteenth day of September, 1904, or on or before such other dates as on the written application of the Contractor for an extension of time the Engineer may in writing substitute for said dates or either of them, time being agreed to be material and of the essence of this contract.

2. The Contractor will pay in cash for all ties purchased by him from other parties and shall not directly or indirectly contract for ties for said work the price of which shall be payable either wholly or partly in goods or otherwise than in actual cash.

3. The Contractor will furnish satisfactory evidence to the Engineer from time to time as requested by the Engineer of his having complied with the provisions of the last preceding clause hereof and as to the land upon which all ties delivered from time to time have been cut, and that the Contractor or other party cutting same had the legal right to cut such ties and dispose of them and that the same are free from all liens and attachments, and until such evidence to the satisfaction of the Engineer is furnished and until ties from time to time are actually accepted and marked by the Engineer or by his Agent in that behalf as aforesaid the same shall be at the risk of the Contractor.

4. The decision of the Engineer or his Agent in that behalf as to whether the ties conform to and are delivered in accordance with the terms of this contract shall be final and conclusive. Culled ties must be promptly removed from the railway right of way unless same shall be accepted by the Engineer under Clause Five of said Specifications, in which case they shall be paid for at half price.

5. Government dues (if any) shall be paid by the Commission.

6. If the Contractor shall become bankrupt or insolvent, or shall make an assignment for the benefit of his creditors, or shall compound with his creditors or propose any composition to his creditors for the settlement of his debts, or shall attempt to transfer, sublet or assign this contract or any part thereof without the consent in writing of the Engineer, or if by the report of the Engineer it shall appear that the rate of progress of the said work in the opinion of the Engineer is not such as to ensure the completion of same within the time prescribed or within such additional time as may have been granted by the Engineer as aforesaid, or in case no additional time has been granted and the said work has not been completed within the time limited, or in case of additional time being granted as aforesaid, then if the same has not been completed within such additional time, or if the Contractor shall in the opinion of the Engineer (who shall be the sole and absolute judge in that behalf) persist in any course violating the provisions of this contract the Commission shall have the power and right at its discretion, without previous notice and without process of law, to take the work or any part thereof out of the hands of the Contractor and either relet the same to any other person or persons with or without previous advertisement, or to employ workmen and provide materials, tools and other necessary things at the expense of the Contractor, or to take such other steps as the said Commission may consider necessary in order to secure the completion of the said work, and in any such case the Contractor shall have no claim to any payment in respect of work performed, but all things done and means employed under this clause by the

Commission shall be as binding on the Contractor as if the things done and means employed had been done and employed by him under this contract; but the Contractor shall nevertheless remain liable for all loss and damages which may be suffered by the Commission by reason of the non-completion by the Contractor of the work or by reason of any of the matters aforesaid which damages shall be deemed to include all salaries or wages which shall be payable to the person or persons superintending the work on behalf of the Commission, and no action or claim shall be raised or made by the Contractor by reason, or on account of the ultimate cost of the work so taken over proving greater than in the opinion of the Contractor it should be and the amount of all such loss and damages shall be computed and ascertained by the Engineer whose certificate certifying to the amount thereof shall be final and binding upon all parties but notwithstanding any of the matters aforesaid the Contractor shall receive credit for all amounts owing to him for the part of the work which he shall have performed subject however to the right of the Commission to deduct therefrom all such loss and damages as aforesaid so certified by the Engineer.

7. Cash payments equal to about ninety per cent. of the value of the ties so delivered and accepted shall be made to the Contractor monthly on the written certificate of the Engineer that such ties have been so delivered and accepted and such evidence furnished as aforesaid and the said certificate shall be a condition precedent to the right of the Contractor to be paid the said ninety per cent. or any part thereof. The remaining ten per cent. shall be retained until the final completion of the whole work to the satisfaction of the Engineer and until the Engineer shall be satisfied that all wages of all workmen, laborers, and servants of the said Contractor and of all sub-contractors under him as well as the price of all ties purchased by the Contractor from other parties have been duly paid, whereupon the Engineer shall give his final certificate accordingly, and such remaining ten per cent. or the balance payable to the Contractor as found by the Engineer, shall be paid to him by the Commission within forty days after the granting of such final certificate; and it is hereby declared that the written certificate of the Engineer certifying to the final completion of this contract as aforesaid shall be a condition precedent to the right of the Contractor to receive or to be paid the said remaining ten per cent. or any part thereof.

8. Should the Contractor not complete the work notwithstanding any delay or hindrance by the Commission to the satisfaction of the Engineer on or before the dates aforesaid or any substituted dates as above provided he shall at the option of the Commission in lieu of liability to pay damages and expenses as provided in the last preceding clause pay to the Commission by way of liquidated damages the sum of twenty dollars for each day which may elapse after the respective dates or substituted dates as aforesaid before the whole work shall be completely executed to the satisfaction of the Engineer.

9. The Contractor shall not in any way without the consent in writing of the Engineer first having been obtained dispose of, assign, sublet, or relet the work embraced in this contract or any portion thereof.

10. The Commission in consideration of the premises hereby covenants with the Contractor that the Contractor from time to time and in all respects having fulfilled the covenants and agreements herein contained and on the Contractor's part intended to be fulfilled will be paid on the terms aforesaid for each and every tie delivered and accepted as above as follows: For cedar ties, twenty-one cents; for tamarac ties twenty-four cents; for hemlock ties, twenty-one cents and for jack pine ties, twenty-one cents.

11. The word "Contractor" wherever it appears in this contract shall be held to mean and include the Contractor, his heirs, executors and administrators and the word "Engineer" shall mean the Chief Engineer for the time being appointed by the Commission and having control of the work of construction of the said line of railway.

In Witness Whereof, this agreement has been duly signed, sealed and executed by the said Contractor and duly executed by the said Commission under its corporate seal and the hands of its Chairman and Secretary.

Signed, sealed and delivered in the presence of

"P. E. Ryan"
Secretary.

It was considered advisable later in the year to advertise for the quantity of ties which would be required for the extension in 1905, to be taken out and delivered during the winter, and on the 12th November tenders were opened for the delivery of 225,000 ties of required quality as follows:—

	Cedar.	Tamarac.	Hemlock.	Jack Pine.
Thomas Wallace	.27	.29	.25	.29
Hughes Bros	.32	.32	.32	.32
E. Benoit	.34	.34	.30	.33

The tender of Mr. Wallace being the lowest was accepted, and the following contract was entered into with him:—

Memorandum of Agreement, made in duplicate this 19th day of November in the year of our Lord one thousand nine hundred and four, between Thomas Wallace of the Town of North Bay in the District of Nipissing, Merchant, hereinafter called the Contractor, of the one part; and The Temiskaming and Northern Ontario Railway Commission, hereinafter called the Commission, of the other part.

Witnesseth, that in consideration of the mutual covenants and agreements hereinafter contained the parties hereby agree as follows:

1. The Contractor will deliver to the Commission at such points on the right of way of the Commission north of New Liskeard as may from time to time be directed or approved by the Engineer, or his agent duly authorized in that behalf, two hundred and twenty-five thousand railway ties to be made from sound timber of good merchantable quality and in strict compliance in all respects with the specifications hereto annexed which specifications are hereby made part of this contract, it being, however, agreed that should there in any respect be any discrepancy between the said specifications and these presents, then the terms of these presents shall govern; said ties to be delivered and

piled completely ready for inspection as follows: At least one hundred thousand on or before the first day of March 1905, seventy-five thousand on or before the first day of July 1905, and the balance fifty thousand on or before the first day of October 1905, or on or before such other dates as on the written application of the Contractor for an extension of time, the Engineer may in writing substitute for the said dates or any of them, time being agreed to be material and of the essence of this contract.

2. The Contractor shall pay in cash for all ties purchased by him from other parties and shall not directly or indirectly contract for ties for said work, the price of which shall be payable either wholly or partly in goods or otherwise than in actual cash.

3. The Contractor will furnish satisfactory evidence to the Engineer from time to time as requested by the Engineer of his having complied with the provisions of the last preceding clause hereof, and as to the land upon which all ties delivered from time to time have been cut and that the Contractor or other party cutting same had the legal right to cut such ties and dispose of them and that the same are free from all liens and attachments, and until such evidence to the satisfaction of the Engineer is furnished, and until ties from time to time are actually accepted and marked by the Engineer or by his agent in that behalf as aforesaid, the same shall be at the risk of the Contractor.

4. The decision of the Engineer or of his agent in that behalf, as to whether the ties conformed to and are delivered in accordance with the terms of this contract shall be final and conclusive. Culled ties must be promptly removed from the railway right of way unless same shall be accepted by the Engineer under clause five of the specifications in which case they shall be paid for at half price.

5. Government dues if any shall be paid by the Commission.

6. If the Contractor shall become bankrupt or insolvent, or shall make an assignment for the benefit of his creditors, or shall compound with his creditors, or propose any composition to his creditors for the settlement of his debts, or shall attempt to transfer, sublet, or assign this contract, or any part thereof, without the consent in writing of the Engineer, or if by the report of the Engineer it shall appear that the rate of progress of the said work in the opinion of the Engineer is not such as to insure the completion of same within the time prescribed or within such additional time as may have been granted by the Engineer as aforesaid, or in case no additional time has been granted, and the said work has not been completed within the time limited, or in case of additional time being granted as aforesaid, then if the same has not been completed within such additional time, or if the Contractor shall in the opinion of the Engineer (who shall be the sole and absolute judge in that behalf) persist in any course violating the provisions of this contract, the Commission shall have the power and right at its discretion without previous notice, and without process of law, to take the work, or any part thereof, out of the hands of the Contractor and either re-let the same to any other person or persons with or without previous advertisement, or to employ workmen, and provide materials, tools, and other necessary things, at the expense of the Contractor, or to take such other steps as the said Commission may consider necessary in order to secure the completion of the said work, and in any such case the Contractor shall have no claim to any payment in respect of work performed but all things done and means employed under this clause by the Commission, shall be as binding on the Contractor as if the things done and means employed had been done and employed by him under this contract; but the

Contractor shall, nevertheless, remain liable for all loss and damages which may be suffered by the Commission by reason of the non-completion by the Contractor of the work, or by reason of any of the matters aforesaid, which damages shall be deemed to include all salaries or wages which shall be payable to the person or persons superintending the work on behalf of the Commission and no action or claim shall be raised, or made by the Contractor by reason or on account of the ultimate cost of the work so taken over proving greater than in the opinion of the Contractor, it should be, and the amount of all such loss and damages shall be computed and ascertained by the Engineer whose certificate certifying the amount thereof shall be final and binding upon all parties, but notwithstanding any of the matters aforesaid, the Contractor shall receive credit for all amounts owing to him for the part of the work which he shall have performed, subject however to the right of the Commission to deduct therefrom all such loss and damages as aforesaid so certified by the Engineer.

7. Cash payments equal to about ninety per cent. of the value of the ties so delivered and accepted shall be made to the Contractor monthly on the written certificate of the Engineer that such ties have been so delivered and accepted and such evidence furnished as aforesaid and the said certificate shall be a condition precedent to the right of the Contractor, to be paid the said ninety per cent. or any part thereof. The remaining ten per cent. shall be retained until the final completion of the whole work to the satisfaction of the Engineer and until the Engineer shall be satisfied that all wages of all workmen, laborers and servants of the said Contractor and of all sub-contractors under him, as well as the price of all ties purchased by the Contractor from other parties, have been duly paid, whereupon the Engineer shall give his final certificate accordingly and such remaining ten per cent., or the balance payable by the Contractor as found by the Engineer shall be paid to him by the Commission within forty days after the granting of such final certificate; and it is hereby declared that the written certificate of the Engineer certifying to the final completion of this contract as aforesaid shall be a condition precedent to the right of the Contractor to receive or to be paid the said remaining ten per cent. or any part thereof.

8. Should the Contractor not complete the work notwithstanding any delay or hindrance by the Commission to the satisfaction of the Engineer on or before the dates aforesaid, or any substituted dates as above provided he shall at the option of the Commission in lieu of liability to pay damages and expenses as provided in the last preceding clause, pay to the Commission by way of liquidated damages the sum of Twenty Dollars for each day that may elapse after the respective dates or substituted dates aforesaid, before the whole work shall be completely executed to the satisfaction of the Engineer.

9. The Contractor shall not in any way without the consent in writing of the Engineer first having been obtained dispose of, assign, sublet, or re-let the work embraced in this contract, or any portion thereof.

10. The Commission in consideration of the premises hereby covenants with the Contractor, that the Contractor from to time, and in all respects having fulfilled the covenants and agreements herein contained, and on the Contractor's part intended to be fulfilled, will be paid on the terms aforesaid, for each and every tie delivered and accepted as above as follows: For cedar ties twenty-seven cents, for tamarac ties twenty-nine cents, for hemlock ties twenty-five cents, for jack pine ties twenty-nine cents; provided, however, that should the Contractor deliver such proportions as shall be required by the Engineer of the whole number of said ties of satisfactory cedar ties, he

shall be allowed for the same twenty-nine cents per tie, instead of twenty-seven cents per tie, as aforesaid, and it is further agreed that notwithstanding the above provision with reference to the points of delivery that the Commission shall accept from the Contractor delivery in the Temagami Reserve of such proportion of said two hundred and twenty-five thousand ties, not exceeding seventy-five thousand ties in all, as the Contractor shall deliver of satisfactory and approved ties within the time of delivery as aforesaid, such delivery to be made at such points within such Reserve as shall be approved by the Engineer.

11. The word "Contractor" wherever it appears in this contract shall be held to mean and include the Contractor, his heirs, executors and administrators, and the word "Engineer" shall mean the Chief Engineer for the time being, appointed by the Commission, and having control of the work of construction of the said line or railway.

In Witness Whereof, this agreement has been duly signed, sealed and executed by the said Contractor, and duly executed by the said Commission, under its corporate seal and the hands of its Chairman and Secretary.

Telegraph Line.

Messrs. Cox & Gallagher, the contractors for the building of the telegraph line of the first division, were given contract for the erection of the line on the extension, at price of $85 per mile. Quotations were also received on December 12th, for the following material required in the above connection next season, as follows:

From J. J. Gartshore, Toronto,—for 36 tons telegraph wire as per our specifications, $2.80 per 100 lbs. f.o.b. North Bay.

For 6,000 heavy glass insulators, C. P. R. pattern, $30.75 per thousand.

From W. H. C. Mussen & Co., Montreal,—for 36 tons No. 8 wire, $2.76, per 100 lbs. delivered f.o.b. North Bay.

For 6,000 insulators, double petticoat, $3.75 per hundred.

Double petticoat drip, $3.75 per hundred.

Standard $3.25 per hundred.

Pony $1.75 per hundred.

These prices f.o.b. Montreal.

From F. H. Hopkins & Co., Montreal,—for 36 tons No. 8 wire, as per our specifications, $2.75 per 100 lbs. delivered f.o.b. North Bay. If shipment from Montreal would be acceptable after the opening of navigation in the spring, the above price would be reduced by $1.00 per ton.

For 6,000 insulators, $3.85 per hundred, delivered f.o.b. North Bay.

The order for wire was subsequently reduced to 20 tons, and placed with Messrs. F. H. Hopkins & Co., theirs' being the lowest tender, subject to the reduced price for spring delivery.

The number of insulators was also reduced to 3,000, and the order placed with J. J. Gartshore at the price quoted.

PART III.

Rolling Stock and Equipment.

Rental of Rolling Stock.

In the month of February the Grand Trunk Railway Company made application to the Commission to rent two locomotives which were then completed and stored at Kingston, and later extended the request to cover the four locomotives of the Commission. With the consent of the Government, the four locomotives were accordingly rented at $10 per day each, the Grand Trunk Railway guaranteeing that they would be used only on such portions of their system as had the best roadbed and undertaking to return them in ample time for the requirements of the Commission, and subject to proper inspection of their condition on return. Under this arrangement engines Number 1 and 2 were under rental to the Grand Trunk Railway from February 12th to April 24th, and engines Number 3 and 4 from February 12th to April 8th.

The Contractor had before that time applied for the use of these engines and a number of flat cars, when the season for ballasting should open, and after the return of the engines from the Grand Trunk they, and flat cars, were handed over to the Contractor under the following agreement:

Memorandum of Agreement made this fifth day of March, 1904, between Allan Ranald Macdonell hereinafter called the Contractor, of the first part; The Temiskaming and Northern Ontario Railway Commission, hereinafter called the Commission, of the second part; and Thomas Long of Toronto, John J. Long, of Collingwood and the Honourable William Harty of Kingston, hereinafter called the sureties, of the third part.

Whereas, By Indenture dated the 3rd day of October, 1902, the Contractor agreed with the Commission to furnish all necessary materials, labor, tools, machinery and plant, and to execute and complete all the works required in connection with the building of the Temiskaming and Northern Ontario Railway according to certain plans profiles and specifications as in said Indenture is more fully set forth.

And Whereas, the Contractor is required by the Commission's Engineer in pursuance of the terms of the said contract, to provide for the said work on said railway, on or before the first day of May, 1904, one additional steam shovel, with the necessary additional plant and appliances which the Contractor represents to the Commission would involve large expense to him in the purchasing or otherwise procuring of additional engines and flat cars in consequence of which the Contractor has requested the Commission to rent to him for use on the said work, certain engines and flat cars now being built for the said Commission.

And Whereas, the Commission has agreed subject to the terms hereof, to rent to the Contractor such engines and flat cars.

1. Now These Presents Witness, that on the request of the Contractor after same, respectively, shall have been completed and delivered to the Commission the Commission agrees to let on hire to the Contractor such of their engines and flat cars as he may desire, and as the Commission's Engineer may approve of, for use on said work for which the Contractor shall pay the clear rental of $10 per day for each engine and 25 cents per day for each flat car, the time to be reckoned from the day each engine or flat car leaves the Commission's yard at North Bay, to the time it is returned to the said yard, or to such other point on the line of railway as may be required by the Commission's Engineer and to include each day of twenty-four hours between the date of delivery and return of said engines and flat cars respectively as aforesaid, such rental to be payable in cash monthly on the 15th day of each month, with full right and authority to the Commission to deduct same from any sums payable to the Contractor from time to time under progress certificates or otherwise.

2. The Contractor covenants and agrees with the Commission that said flat cars will be used only in connection with the ballasting of said line of railway and that said engines shall be used only in connection with putting on the second lift of ballast on the said railway and train filling, and will not at any time be taken over any part of the said road except portions thereof, upon which the first lift of ballast shall theretofore have been completed and that he will return the said engines and flat cars in the same plight and condition in which same shall be when received by him (ordinary wear and tear only excepted) to the Commission immediately on his ceasing to use the same, or at such earlier time as the said Engineer may with respect to said engines and flat cars, respectively, demand or require, the same to be returned and will deliver the same at the Commission's yard at North Bay or at such other point or points on said railway as may from time to time be indicated by the said Engineer for that purpose, and it is expressly agreed that the decision of the said Engineer as to the condition of the said engines and flat cars upon their return, respectively, and as to the amount of damage, if any, in excess of ordinary wear and tear which same shall have suffered, shall be absolutely final binding and conclusive upon the parties, and that any amount found due from the Contractor to the Commission in respect of any such damage by the Engineer's certificate shall be forthwith payable in cash, by the Contractor to the Commission, and that the Commission shall further have the right to deduct same from any moneys payable to the Contractor under said contract, whether under progress certificates or otherwise.

3. Nothing herein contained shall be deemed to affect in any way the rights, powers, duties and liabilities of any of the parties to the said agreement of the 3rd day of October, 1902, except so far as same are hereby expressly altered, nor shall anything in said contract, or in these presents, affect the right of the Commission to retain any moneys which it shall, or may be advised, that it is required or entitled to retain by reason of the provisions of the Mechanics Lien Law or any other law in force in this Province affecting the premises.

4. The sureties hereby consent to these presents and agree, that the same shall not in any way affect their obligation as sureties under the said contract of the 3rd day of October, 1902, the intention being that they shall be and continue liable as such sureties, in respect of said contract as hereby amended.

WITNESS the hands and seals of the Contractor and the Sureties and the corporate seal of the Commission under the hands of its proper officers.

Secretary.

The total revenue from rental of rolling stock for the year 1904 was $18,891.83. Of this amount $2,627.18, was received in cash from the Grand Trunk Railway Company and the balance $16,264.65 deducted monthly from the progress payments due the Contractor.

Passenger Coaches.

It was considered advisable to call for tenders for passenger equipment for the road at an early date so as to have same in readiness on completion of the line to New Liskeard. Accordingly in March tenders were called for three first-class coaches, two second-class coaches and two combination baggage, mail and express cars and on 26th March the following tenders were received:

From the Barney & Smith Car Company, Dayton, Ohio: First class coaches, in accordance with the Commission's specifications, $8,250 per car, f.o.b. tracks, Dayton, Ohio.

Second class coaches, in accordance with Commission's specifications, $6,900 f.o.b. tracks, Dayton, Ohio.

Combination baggage, mail and express cars, in accordance with Commission's specifications, $4,700 per car, f.o.b. Dayton, Ohio.

From Rhodes, Curry & Company, Amherst, N. S. First class coaches in accordance with Commission's specifications, $9,800 per car, f.o.b. tracks North Bay, Ont.

Second class coaches in accordance with Commission's specifications, $7,900 per car f.o.b. tracks, North Bay, Ont.

Combination baggage, mail and express cars, in accordance with Commission's specifications, $5,100 per car f.o.b. tracks, North Bay, Ont.

From The Crossen Car Manufacturing Company, Cobourg, Ont. First class coaches, in accordance with specifications submitted by the Crossen Car Mfg. Co., $8,400, per car, f.o.b. tracks, North Bay, Ont.

Second class coaches in accordance with Commission's specifications, $6,725 f.o.b. tracks, North Bay, Ont.

Combination baggage, mail and express cars, in accordance with Commission's specifications, except that they propose furnishing Standard Steel Platforms, $4,785 per car, f.o.b. tracks, North Bay, Ont.

The tender of the Crossen Car Manufacturing Company, being the lowest was accepted, and it was on further consideration decided to increase the number of second class coaches from two to four and the following contract was entered into:

Articles of Agreement made in duplicate this 13th day of April, 1904, between The Crossen Car Manufacturing Company of Cobourg, Limited, hereinafter called the Contractor, and The Temiskaming and Northern Ontario Railway Commission, hereinafter called the Commission.

Witnesseth:

1. In this contract the word "Inspector" shall mean the Inspector for the time being, appointed by the Commission to represent and act for the Commission in the supervision of the construction and in the inspection and certification of the coaches and cars hereinafter referred to.

2. The contractor will supply and provide all and every kind of work, labor, materials, articles and things whatsoever, for the due construction and completion and will well and duly build and complete in a perfect and workmanlike manner three first class coaches, four second class coaches and two combination baggage, mail and express cars with all necessary appliances for use on the line of railway of the Commission in strict compliance with the specifications hereto annexed relating to such first and second class coaches and combination cars, respectively, and with the plans and drawings relating thereto (save and except that the Westinghouse automatic quick action air brake apparatus in said specifications mentioned shall be furnished by the Commission subject to the said coaches and cars being properly equipped therewith by the contractor) to the complete satisfaction of the Inspector and the said contractor will deliver the said cars duly completed to the Commission free on the railway tracks of the Commission at the Town of North Bay, the said second class coaches and the said combination baggage, mail and express cars to be so delivered during the month of September, 1904, and said first class coaches during the month of October, 1904, time being agreed to be material, and of the essence of this contract.

3. The Inspector shall be the sole judge of all work and material done and supplied under this contract, and his decision in all matters in dispute, with regard to such work or material shall be final and the whole work shall be executed to his satisfaction as evidenced by his certificate in writing, which certificate shall be a condition precedent to the right of the contractor to be paid therefor.

4. The Inspector, and all persons from time to time authorized by him in that behalf, shall have free entry and access to the works of the contractor, at all times while this contract is being performed and shall have all reason-

able facilities afforded to him and his representatives as aforesaid to satisfy them that the same is being carried out and performed in accordance with this contract.

5. The acceptance and payment for any of the said coaches or cars by the Commission shall not be considered as any waiver of the obligations of the contractor with reference to the others.

6. This contract shall not be considered as fully completed until all guarantee clauses in the attached specifications have been fully complied with.

7. The Commission in consideration of the premises, covenants with the contractor, that the contractor from time to time, and in all respects having fulfilled and performed the provisions of this contract (except the fulfilment of the said guarantees which are to continue as set out in said specifications) on the contractor's part intended to be fulfilled and performed, will be paid for in respect of each of the said first class coaches, the sum of $8,400 and in respect of each of the said second class coaches, the sum of $6,725 and in respect of each of the said combination baggage, mail and express cars, the sum of $4,785, payments to be made within thirty days after the delivery of each coach or car as herein provided.

In Witness Whereof, the said parties have caused these presents to be executed under their respective corporate seals and under the hands of the proper officers in that behalf.

Flat Cars.

Later, tenders were asked for the furnishing of 50 additional flat cars in accordance with the Commission's plans and specifications. These tenders were opened on May 28th as follows:—

From Rhodes, Curry & Co., Amherst, N. S., $652.00 each, free on tracks, at North Bay, the Commission to furnish the air brakes. Completion of cars in three weeks, if order placed at once.

From The Rathbun Company, Deseronto, $650.00 each, on tracks at North Bay, the Commission to furnish air brakes, delivery in the month of July.

From the Crossen Car. Mfg. Co., Cobourg, $650.00 each, delivered at North Bay, July 1st, the Commission to furnish air brakes.

The tender of the Crossen Car Manufacturing Company was accepted and the following contract was entered into:—

ARTICLES OF AGREEMENT made in duplicate this fourth day of June, 1904, between THE CROSSEN CAR MANUFACTURING COMPANY of Cobourg, Limited, hereinafter called the "Contractor", and THE TEMISKAMING AND NORTHERN ONTARIO RAILWAY COMMISSION, hereinafter called the "Commission".

WITNESSETH:

1. In this contract the word "Inspector" shall mean the Inspector for the time being appointed by the Commission to represent and act for the Commission in the supervision of the construction, and in the inspection and certification of the platform cars hereinafter referred to.

2. The Contractor will supply and provide all and every kind of work, labor, materials, articles and things whatsoever, for the due construction and completion and will well and duly build and complete in a perfect and workmanlike manner fifty platform cars with all necessary appliances for use on the line of railway of the Commission in strict compliance with the specifications hereto annexed, and with the plans and drawings relating thereto (save and except that the Westinghouse automatic quick action air brake apparatus, in said specifications mentioned, shall be furnished by the Commission subject to the said cars being properly equipped therewith by the Contractor) to the complete satisfaction of the Inspector and the said Contractor will deliver the said cars duly completed to the Commission free on the railway tracks of the Commission at the Town of North Bay on or before the first day of July 1904, time being agreed to be material and of the essence of this contract.

3. The Inspector shall be the sole judge of all work and material done and supplied under this contract, and his decision in all matters in dispute with regard to such work or material shall be final and the whole work shall be so executed to his satisfaction as evidenced by his certificate in writing, which certificate shall be a condition precedent to the right of the Contractor to be paid therefor.

4. The Inspector and all persons from time to time authorized by him in that behalf shall have free entry and access to the works of the Contractor at all times while this contract is being performed, and shall have all reasonable facilities afforded to him and his representatives as aforesaid to satisfy them that the same is being carired out and performed in accordance with this contract.

5. Neither the acceptance of, nor the payment for any of the said cars by the Commission shall be considered as any waiver of the obligation of the Contractor with reference to the others.

6. This contract shall not be considered as fully completed until the guarantee clause in the attached specifications respecting wheels, springs, axles, etc., has been fully complied with. The books kept in the office of the Mechanical Superintendent of the Commission shall be taken as final and conclusive evidence of the time the said wheels, springs, axles, etc., have lasted in service.

7. The Commission in consideration of the premises covenants with the Contractor that the Contractor from time to time and in all respects having fulfilled and performed the provisions of this contract, except the fulfilment of the guarantee which is to continue for three years, on the Contractor's part intended to be fulfilled and performed, will be paid for and in respect of each of the said cars so delivered as aforesaid, the sum of six hundred and fifty dollars

cash, payments to be made within thirty days after delivery of each car as herein provided.

In Witness Whereof, the said parties have caused these presents to be executed under their respective corporate seals, and under the hands of the proper officers in that behalf.

Miscellaneous Rolling Stock.

Two Flanger cars being required in connection with the operation of the road, prices were solicited for delivery of same at North Bay, and the order was in due course placed with The Rathbun Company of Deseronto, at the price of $1,000 each.

An order was also placed with Messrs. F. H. Hopkins & Co. of Montreal, for 16 hand cars at $39.15 each delivered at North Bay.

Tenders were also asked for one snow-plough. The only tender received was from Rhodes, Curry & Co. of Amherst, N. S., and the order was accordingly placed with that firm at the price of $2,750 f.o.b. tracks at Amherst.

Additional Rolling Stock.

To meet the requirements due to the building of the extension of approximately 100 miles, the question of the placing of orders for additional rolling stock was taken up and after consideration by a committee of the Commission appointed to consider the matter, tenders were called for 50 flat cars, two conductors vans, one combination baggage and mail car and ten stock cars. The following tenders were opened on December 10th.

From Rhodes, Curry & Co., Amherst, N.S:—

25 Flat cars at $635.00 each.
2 Conductors' vans at $1,325.00 each.
1 Baggage and mail car at $5,100.
10 Stock cars at $854.00 each.

The above prices delivered f.o.b. tracks at North Bay.

If the Commission supplied air brakes and dummy couplings for flat and stock cars, $30.00 to be deducted from the above prices, and if delivery at Amherst was preferred $40.00 each to be deducted from the flat cars, $44.00 from the stock cars, $60.00 from the vans, and $125.00 from the baggage and mail car prices.

From the Crossen Car Manufacturing Co., of Cobourg:—

50 Flat cars at $730.00 each.
2 Conductors vans at $1,675.00 each.
1 Baggage and mail car at $4,985.00.
10 Stock cars at $897.00 each.

These prices f.o.b. North Bay. If the Commission decided to furnish air brake equipment for the stock cars, prices to be $30.00 per car less.

From the Rathbun Company, Deseronto:—

50 Flat cars at $725.00 each.
2 Conductors vans at $1,700.00 each.
1 Baggage and mail car at $5,150.00.
10 Stock cars at $921.00 each.

Delivery f.o.b. tracks at North Bay. The Commission to supply air brake equipment.

The tender of Rhodes, Curry & Co., for 25 flat cars and 2 conductors vans was accepted, the contract for the remaining 25 flat cars being awarded to the Rathbun Company, and the contract for baggage and mail car and for 10 stock cars to the Crossen Car Mnfg. Co., and in due course the following contracts were entered into:—

ARTICLES OF AGREEMENT made in duplicate this 24th day of December, 1904, between THE RATHBUN COMPANY, hereinafter called the "Contractor" and THE TEMISKAMING AND NORTHERN ONTARIO RAILWAY COMMISSION, hereinafter called the "Commission."

Witnesseth:—

1. In this contract the word "Inspector" shall mean the Inspector for the time being appointed by the Commission to represent and act for the Commission in the supervision of the construction and in the inspection and certification of the platform cars hereinafter referred to.

2. The Contractor will supply and provide all and every kind of work, labor, materials, articles and things whatsoever for the due construction and completion, and will well and duly build and complete in a perfect and workmanlike manner twenty-five platform cars with all necessary appliances for use on the line of railway of the Commission in strict compliance with the specifications hereto annexed and with the plans and drawings relating thereto (save and except that the Westinghouse automatic quick action air brake apparatus in said specifications mentioned shall be furnished by the Commission subject to the said cars being properly equipped therewith by the Contractor) to the complete satisfaction of the Inspector, and the said Contractor will deliver the said cars duly completed to the Commission free on the railway tracks of the Commission, at the Town of North Bay, on or before the last day of the month of February, 1905, time being agreed to be material and of the essence of this contract.

3. Subject only to the right of appeal provided for by the said specifications, the Inspector shall be the sole judge of all work and material done and supplied under this contract and his decision on all questions in dispute with regard to any such work or material shall be final and the whole work shall be executed to his satisfaction as evidenced by his certificate in writing, which certificate shall be a condition precedent to the right of the Contractor to be paid therefor.

4. The Inspector and all persons from time to time authorized by him in that behalf shall have free entry and access to the works of the Contractor at all times while this contract is being performed, and shall have all reasonable facilities afforded to him and his representatives as aforesaid to satisfy them that the same is being carried out and performed in accordance with this contract.

5. The acceptance and payment for any of the said cars by the Commission shall not be considered as any waiver of the obligations of the Contractor with reference to the others.

6. This contract shall not be considered as fully completed until the guarantee clause in the attached specifications respecting wheels, springs, axles, etc., has been fully complied with, etc. The books kept in the office of the Mechanical Superintendent of the Commission shall be taken as final and conclusive evidence of the time the said wheels, springs, axles, etc., have lasted in service.

7. The Commission, in consideration of the premises, covenants with the Contractor that the Contractor from time to time and in all respects having fulfilled and performed the provisions of this contract (except the fulfilment of the guarantee which is to continue for three years) on the Contractor's part intended to be fulfilled and performed will be paid for, and in respect of each of the said cars so delivered as aforesaid the sum of $725 cash, payments to be made within thirty days after delivery.

In Witness Whereof the said parties have caused these presents to be executed under their respective Corporate Seals and under the hands of the proper Officers in that behalf.

ARTICLES OF AGREEMENT made in duplicate this thirty-first day of December, 1904, between RHODES CURRY & COMPANY, LIMITED, hereinafter called the "Contractor," and THE TEMISKAMING & NORTHERN ONTARIO RAILWAY COMMISSION, hereinafter called the "Commission." *Witnesseth:*

1. In this contract the word "Inspector" shall mean the Inspector for the time being appointed by the Commission to represent and act for the Commission in the supervision of the construction and in the inspection and certification of the platform cars and conductors' vans hereinafter referred to.

2. The Contractor will supply and provide all and every kind of work, labor, materials, articles and things whatsoever for the due construction and completion, and will well and duly build and complete in a perfect and workmanlike manner twenty-five platform cars and two conductors' vans, with all necessary appliances for use on the line of railway of the Commission, in strict compliance with the specifications hereto annexed relating respectively to such platform cars and conductors' vans, and with the plans and drawings relating thereto (save and except that the Westinghouse automatic quick action air brake apparatus mentioned in said specifications for platform cars shall be furnished by the Commission, subject to the said cars being properly equipped therewith by the Contractor), to the complete satisfaction of the Inspector, and the said Contractor will deliver the said conductors' vans duly completed to the Commission free on the railway track of the Commission at the Town of North Bay before the last day of February, 1905, and will deliver the said platform cars duly completed to the Commission free on the railway tracks of the Commission at North Bay on or before the 1st day of April, 1905, time being agreed to be material and of the essence of this contract.

3. Subject only to any right of appeal provided for by the said specifications the Inspector shall be the sole judge of all work and material done

and supplied under this contract, and his decision on all questions in dispute with regard to any such work or material shall be final, and the whole work shall be executed to his satisfaction as evidenced by his certificate in writing, which certificate shall be a condition precedent to the right of the Contractor to be paid therefor.

4. The Inspector and all persons from time to time authorized by him in that behalf shall have free entry and access to the works of the Contractor at all times while this contract is being performed, and shall have all reasonable facilities afforded to him and his representatives as aforesaid to satisfy them that the same is being carried out and performed in accordance with this contract.

5. The acceptance and payment for any of the said cars or vans by the Commission shall not be considered as any waiver of the obligations of the Contractor with reference to the others.

6. This contract shall not be considered as fully completed until the guarantee clauses, in the attached specifications respecting wheels springs, axles, etc., have been fully complied with. The books kept in the office of the Mechanical Superintendent of the Commission shall be taken as final and conclusive evidence of the time the said wheels, springs, axles, etc., have lasted in service.

7. The Commission in consideration of the premises covenants with the Contractor that the Contractor from time to time and in all respects having fulfilled and performed the provisions of this contract (except the fulfilment of the guarantee, which is to continue as shown in the said specifications), on the Contractor's part intended to be fulfilled and performed, will be paid for and in respect of each of the said conductors' vans so delivered as aforesaid the sum of $1,325 cash, and in respect of each of the said platform cars the sum of $605 cash, payments to be made within thirty days after delivery of each van and car, PROVIDED, AND IT IS HEREBY UNDERSTOOD AND AGREED, that the said sum of $605 each for platform cars shall include the item of $40 for the transportation of each car to the railway tracks of the Commission at North Bay, and in the event of the Contractor being able to make arrangements by which any car may be loaded and transported to North Bay as aforesaid free of cost, or for any less cost than $40, then the Commission shall receive the benefit of any such arrangement, and the price to be paid the Contractor for every such car so transported free of cost or at a less cost than $40 shall be reduced accordingly.

8. It is further agreed between the parties hereto that as extras in addition to the said conductors' vans the Contractor shall supply and provide each of the said vans with the following articles and appliances over and above those mentioned in the said specifications, namely, one stove with coal box complete, fitted up ready for use; one bunk with mattrass; one desk; one wash stand; two signal lamps and four interior bracket lamps; all of which work shall be completed within the time aforesaid and delivered with the said cars for which the Commission shall in addition to the price above set out pay to the contractor the sum of $71 for each of the said vans.

In Witness Whereof the said parties have caused these presents to be executed under their respective corporate seals and under the hands of the proper officer in that behalf.

PART IV.

FINANCES.

The Commission had the honor to report under this heading in its Second Annual Report the completion of arrangements with certain Canadian Banks for advances to the Commission aggregating $2,300,000 on the security of temporary bonds, which arrangements covered the existing indebtedness and the financial requirements for a considerable portion of last year.

Under the amendment of last Session the Lieutenant-Governor-in-Council was authorized to loan out of the Consolidated Revenue Fund sums not exceeding two million dollars in all, and to accept the bonds of the Commission as security for the repayment of such loans with interest at 3½ per cent. per annum.

This Legislation was taken advantage of in May, and arrangements were made for advances to the Commission aggregating $1,500,000 at 3½ per cent. per annum, secured by a further issue of temporary bonds as required by the Act.

Subsequently the Government negotiated for the Commission a temporary loan from Messrs. Coates & Co., and Glyn, Mills, Currie & Co., two prominent banking houses in London, England, under the terms of which £1,200,000 sterling were loaned for a period of six months from November, to bear interest at the rate of four per cent. per annum. This loan netted, after deducting exchange and commission, $5,706,487.49. Out of this loan the advances made by the banks and the Government were paid off and the temporary bonds issued to secure same were called in and cancelled and a new temporary bond of the Commission for $6,000,000 executed and delivered to the lenders as security for the new loan.

After repayment of the advance of the Government and the Canadian Banks this loan left available for further requirements the sum of $1,677,-183.37, which by the end of the year now being reported upon had been reduced to the balance shown in the appended statement of receipts and expenditure.

MEDICAL REPORTS.

North Bay, February, 14th, 1905.

H. W. Pearson, Esq.,
Secretary, T. & N. O. Railway Commission,
Toronto.

Dear Sir,—In making medical report for 1904, I have appended lists of patients treated in Haileybury and North Bay Hospitals, with nature of disease or injury, and number of days residence in Hospital. I regret to say that the records of Snake Lake Hospital were lost when my supplies were being shipped to North Bay after Hospital was closed. This Hospital was open from April 11th to August 1st, and there were not more than twenty patients treated in it, two of whom died of Pneumonia, and all the others recovered.

In addition to attendance on patients in Hospitals I had assistants patrolling the works weekly, visiting all the camps and attending to all

patients requiring medical or surgical aid. Besides, each camp was kept well supplied with medicines put up in bottles or packages ready for use, and were given out by the book-keeper in charge of camp as required. Surgical dressings for first aids to the injured and for minor injuries were also kept in store in each camp, ready for immediate use.

Besides the regular Hospitals there was an Isolation camp at Redwater Lake, where small-pox patients were treated. Nine patients were admitted, and all recovered.

Three assistants were employed from January to July, two from July to August, and one since August.

If any further information is required I shall be pleased to give it.

Yours sincerely,

"A. McMURCHY."

North Bay, Victoria Memorial Hospital in charge of Victorian Order of Nurses, was made the principal hospital.

Number of patients admitted	80	
" surgical cases	36	3 died
" medical cases	44	1 "

Total number of days in Hospital, 1,570.

Average each patient, 19 5/8 days.

The following cases were admitted:—

	Cases.	No. deaths.
Scurvy	1	...
Influenza	7	...
Alcoholism	3	...
Sciatica	1	...
Typhoid fever	14	1
Rheumatism	4	...
Diphtheria	1	...
Paralysis	1	...
Pneumonia	3	...
Pernicious anæmia	1	...
Gastritis	1	...
Constipation	2	...
Carbuncle	1	...
Dysentery	1	...
Ulcer on leg	1	...
Abscess in Axilla	1	...
Debility	2	...
Fly bites	1	...
Malingering	1	...

INJURED.

8 Frost bites	Recovered
6 had eyes more or less seriously injured by dynamite explosions, except that one remains totally blind	"
	"
1 Hands injured by explosion	"
1 Eyes and hands injured	"
1 Knee injured—penetrating wound	"
1 Slight injury of hands by explosion	
1 Both legs and one arm crushed and internally injured by being run over by ballast train	Died
1 Head and arms, and internally injured	"

1 Fracture of arm	Recovered
1 Fracture of leg	"
2 Slight injuries of hands	"
1 Toe crushed	"
1 Sprained ankle	"
1 Foot slightly injured	"
1 Foot scalded	"
1 Head injured—fracture of skull, fell off train	"
1 Scalp wound, car derailed in which he was riding	"
1 Arm dislocated and lacerated shoulder, leg broken, jaw fractured, internally injured, collision between motor car which he was pushing and ballast train	Died

The following patients were admitted to Haileybury Hospital from November, 1903, when Hospital was opened, to July, 1904, when it was closed:—

Total number admitted	24
Average duration of residence in Hospital	19 days

	Cases.	No. deaths.
Pneumonia	3	...
Chronic gastritis	1	...
Acute rheumatism	3	...
Otitis media	1	...
Pleuro pneumonia	1	...
Debility	1	...
Tuberculosis	1	1
Lymphangitis	1	...

INJURED.

1 Foot cut	Recovered
1 Eyebrow cut	"
1 Tongue lacerated	"
1 Frost bite—amputated thumb	"
1 Eyes and left hand severally injured by dynamite explosion, sent to North Bay, whence he went to Montreal and had hand amputated	"
1 Fraction of left Tibia	"
1 Dislocation of left shoulder	"
1 Fracture of left Tibia and Fibula. Died of cerebral embolism	Died
1 Injured in thighs and scrotum	Recovered
1 Face and eyes injured	"
1 Crushed index finger—amputated	"

New Liskeard, Ont., February 13th, '05.

H. W. PEARSON, Esq.,
Secty.-Treas. T. & N. O. R. R., Toronto, Ont.

Dear Sir,—I beg to submit my report on Medical attendance to the employees of the T. & N. O. Railway, from August 1st to January 1st, 1905.

The most serious illness we had to deal with was typhoid and dysentery, which is no doubt due to the difficulty in obtaining pure water in this country.

There was also the usual simple ailments: Colds, tonsilitis, indigestion and diarrhoea, which were of short duration and did not come into our hospital.

The cases treated in our hospital are as follows:—

Typhoid fever	5
Dysentery	3
Rheumatism	1
Tuberculosis	1
Inguinal Abscess	1
Cut foot	1

All made good recovery excepting one case typhoid, who was rather late in coming in, having remained on the way a couple of weeks before realizing the serious nature of his illness, died shortly after his arrival here.

Everything considered, I think I may say that during this period the general health was fairly good.

Yours truly,

BYRON FIELD.

CHIEF ENGINEER'S REPORT.

North Bay, Ont., March 11th, 1905.

H. W. Pearson, Esq.,
Secy.-Treasurer, Toronto.

Dear Sir,—I beg to present herewith my annual report for the year ending December 31st, 1904, as follows:—

CONSTRUCTION.

The grading to Liskeard, 112.95 miles from North Bay, was all completed by the Fall of 1904. Track-laying was commenced at the 57th mile on the 2nd of June and reached Liskeard the end of September, the Montreal River being crossed on a temporary trestle.

Ballasting was commenced on the 15th of May and by the close of the season the whole track had received a lift of ballast, as well as all sidings, these sidings being at the 9th, 14th, 28th, 38th, 47th, 56th, 66th, 72nd, 82nd, 94th, 102nd, 107th and 113th miles respectively.

Contracts for stations at New Liskeard, Haileybury, Cobalt, (102nd mile), Montreal River crossing, (94th mile), Temagami, (72nd mile), and at the 14th mile were let on the 3rd of December. The New Liskeard and Haileybury stations are now partly constructed. All are to be completed by July.

Forty thousand gallon water tanks have been erected at the 14th, 28th, 56th, 72nd, 94th and 113th miles and the necessary boilers and pumps installed.

The telegraph line is completed throughout and a telegraph system is in operation.

The fencing has been completed for the first 18 miles out from our southern terminus, or to about the north boundary of the Township of Widdifield, the only township open for settlement at the southern end. At the north end a fence has been erected from the 104th to 113th miles, through the boundary of the Township of Bucke, which is partly settled.

This contract was to be completed by the end of 1904, but although all the grading was finished, the track-laying completed throughout, steel bridges erected at the 8th, 12th, 31st, 60th, 68th, and 94th miles, the last mentioned being the Montreal River Bridge, consisting of three through truss spans of 125 feet each, and the track in very good shape for operating, yet there still remained at the end of 1904 a small percentage of trestles to be filled and the ballasting not fully up to the ballast plugs.

The Contractor claimed that he should be granted an extension of time for the completion of his contract, of three months of seasonable weather, on account of the unexpected development of certain sink holes between the 50th and 60th miles, which held back the work of ballasting and train filling three months; certainly these sink holes were not anticipated and it was decided by the Commission to grant the three months extension asked for, with the understanding that the Commission would put on its own trains and operating staff and operate the road, without this being interpreted by the Contractor as an acceptance of the work as a finished contract. As ballasting cannot be carried on after about the middle of November and cannot be started earlier than about the middle of May, this three months seasonable weather would mean somewhere about the middle of August, so that the time for the completion of this contract was made the 15th of August, 1905.

Survey and Construction of Extension.

At the end of the year 1903 the work of exploration and preliminary survey on that part of the road north of New Liskeard had been carried well over the height of land and down into the valley of the Black River, a tributary of the Abitibi River, which flows north to James Bay, a distance from New Liskeard of 75 miles.

The location of this line has been completed to the height of land, a distance of 67 miles. Our first preliminary line from Liskeard ran up the valley of the Wabis, crossed over a local summit into the valley of the Blanche and up the valley of the Blanche via Round Lake on to Kenogani Lake, and from there up to the main height of land. It was necessary to do a great deal of exploration work and run many trial lines from the valley of the Wabis to the valley of the Blanche, on account of the choice of many routes from one valley to the other, in order to get the best and cheapest. The route up the valley of the Blanche via Round Lake had to be abandoned entirely on account of the extremely heavy curvature and impossibility of adhering to our maximum 4 degree curve. Another route was found and adopted, by crossing the Blanche River at the 33rd mile and following up the valley of Boston Creek and passing about three miles east of Round Lake, entering the valley of the Blanche again at the 52nd mile, following it to the 56th mile and leaving it again at this point and going across country to the east side of Lake Sassaganika and on to the height of land. A peculiar feature of this country is that the best line was found by keeping away from the main valley of the principal stream, the Blanche. I might add that another line was tried towards Amikougami Lake to the east, crossing the height of land near the headwaters of the Black, but it was found impossible to get our maximum 0.5 per cent. grade on this route.

The work on the first 32 miles, with the exception of one or two cuts, turned out comparatively light. From the 32nd to the 56th mile the work of grading turned out heavy and from the 56th to the 65th light again, with prospects of light work north of that, there being no surface appear-

ance of bed rock on the first 36 miles, with more or less showing of rock north of that point. The maximum and ruling grade which we endeavored to hold to and succeeded in getting, is a .5 per cent rising north, and a .4 per cent. rising south, or 26 feet to the mile and 21 feet to the mile respectively, with compensation for all curves of .04 per cent. per degree and advantage being taken in places of velocity or momentum grades as high as .75 per cent. to reduce the work. The maximum curve held throughout is a 4 degree with a radius of 1,432 feet.

There are two heavy stream crossings at the 25th and 33rd miles respectively, the south branch and main crossings of the Blanche River. One is 100 feet deep at the centre and 700 feet long at the top, the other 110 feet deep and 550 feet long at the top. Each will be crossed with steel trestles with a 200 foot and 150 foot span respectively at the centres.

On account of the low ruling grade, where the country becomes broken, it is necessary to take some heavy cutting and deep fills, one near the 36th mile containing 70,000 cubic yards, which is apparently all clay, or classified as "all other material." Just before construction was commenced on the 24 miles of heavy work another first-class locating engineer was sent over it to see if the work could be lightened any, either by finding another easier route or by revision of the present location. He reported that, adhering to our maximum grades of .5 per cent. and .4 per cent. rising north and south and our four degree curve, it was impossible to do anything with it and that we had the best route that could be found under the circumstances. I also made an examination of it myself before construction commenced and am satisfied we have the best.

In my report of 1903 the agricultural lands, timber and minerals of the district passed through were fully dealt with.

On the 9th of May it was decided to call for tenders for the construction, ready for rolling stock, of an extension of about one hundred miles north of Liskeard. A specification similar to the one on the first division was prepared, except that a change was made in the classification, instead of solid rock, loose rock, hard pan and earth, the hard pan was taken out and the classification was made, "solid rock, loose rock, and all other material." The dividing line between solid rock and loose rock is quite distinct and between loose rock and all other material, but the dividing line between hard pan and earth has always been a bone of contention between engineers and contractors, and quite recently railway companies have changed this to "all other material," including earth and hard pan and leaving this part of the classification to the bidder. I might also add that hard pan is defined as material that takes two teams of horses on a plow, and in the clay country north of Liskeard in wet weather two would be necessary, and in dry weather one, so that, these points all being taken into consideration, the Commission decided to act on the recommendation of the engineer and cut out the hard pan. The contract was let on the 14th of June to A. R. Macdonell. Grading was commenced immediately and at the end of the year the grading was completed continuously for twenty-five miles, to where the first crossing of the Blanche River is encountered and grading has been carried on in places up to the 40th mile. The rails have been laid to the 25th mile, and a tote road cut out to the 70th mile, three miles north of the Hudson Bay watershed, and supplies are being put forward to this point for this winter's and next season's operations.

Yours truly,

"W. B. RUSSEL."
Chief Engineer.

Special Report of Assistant Commissioner of Public Works.

DEPARTMENT OF PUBLIC WORKS, ONTARIO.

Toronto, January 13th, 1905.

Gentlemen,—In compliance with your request, I have made close investigation and inquiry with a view to the selection of lands to be set apart for the Temiskaming and Northern Ontario Railway, in accordance with Section One of 3 Edward VII., Chapter 4, the principal provisions of which are the following:—

(1) The amount of land to which the Railway is entitled is 20,000 acres per mile. For the distance from North Bay to a proposed terminus near Lake Abitibi, about 200 miles, this amounts to 4,000,000 acres or about 6,250 square miles; or is equal to about 174 townships of the size now being surveyed, (six miles square and containing 36 square miles each). If selected in a single block, it would be equal to an area about 79 miles square.

(2) The land so set apart is not to include timber or mineral. This, I am of the opinion, should be amended, in order that the Commission may be able to give proper deeds to intending settlers; but in any event it is important to choose only good agricultural land.

(3) The Act would appear to restrict the location of the land grant to the District of Nipissing and proposes a tier of townships adjacent to the line of railway.

Between North Bay and New Liskeard, the Railway passes through a territory which, so far as explored, is chiefly valuable for mineral and timber, a portion of the line lying within the Temagami Forest Reserve, and it is apparent that, except for town sites, there is no suitable land along this section of the line.

From New Liskeard northerly through the valley of the Blanche River to the Height of Land, there is excellent farm land, but this has nearly all been located by intending settlers, through the Crown Lands Department. It is apparent, therefore, that the land grant must necessarily be selected north of the Height of Land.

In 1900 a number of exploring parties were sent into the district north of the Height of Land. From these, very favorable reports were received of a large clay belt, comprising about 16,000,000 acres, extending across the Province from east to west. North of this belt, and reaching to James Bay, there is a large area not fully explored, and the character of which has not been properly determined.

As with all large areas of land, this clay belt has portions of a sandy and rocky nature, but on the whole, I feel convinced that it will compare favorably with any other equal area in Canada, in respect to fertility and suitability for agriculture. Mr. Niven, who surveyed the boundary line between Algoma and Nipissing, in reporting on the section between the 109th and 230th miles, described it as, "A splendid tract of farming land, clay soil often covered with black muck. Parts of it might be called swampy, and parts of it muskeg, but taken altogether I do not know many places in Ontario where a line can be run through such an even, uniform, good tract of land."

The timber on this land is principally spruce suitable for pulp-wood. Birch and poplar, the latter of exceedingly large size, are plentiful. The 49th Parallel, which forms the southern boundary of Manitoba, passes backs to cultivation than that of Manitoba. To bring this territory to a about centrally through the Belt, and the climate offers no greater draw-good state of cultivation the land must be cleared and drained, both of which will operate favorably on the climate.

In the District of Nipissing just north of the Height of Land and southwesterly from Lake Abitibi, about thirty townships have been laid out and sub-divided by the Crown Lands Department during the past two seasons. With the exception of the more easterly and southerly of these, which adjoin the Height of Land, the reports of surveyors are exceedingly favorable as to their agricultural possibilities. As it is in this section only that the terms of the Act can now be complied with, in selecting a tier of townships along the railway, I would favor the selection of a number of townships in this section. These townships having been thrown open to location under the Military Land Grant Act, some thirty-six lots of 160 acres have been taken in each township, but as yet this appears to be the chief complication affecting the selection of this land, which will probably be in the vicinity of the junction with the Grand Trunk Pacific Railway.

For the remainder of the grant, I am not so favorably impressed with the District of Nipissing as with land in the adjoining District of Algoma, and I would recommend that the Act be so amended as to permit the selection of land in Northern Algoma.

In accordance with the foregoing considerations, I have indicated, in red, on the accompanying plan, blocks of land comprising approximately the required area, and which, from information available, I consider desirable for the purposes of the Railway Commission.

My recommendations would therefore be as follows:

(1) That the Act be so amended as to enable the Commission, in the sale of the land, to convey to settlers and purchasers, the timber and mineral.

(2) That the Act be further amended to permit the selection of land in the District of Algoma; that, pending such amendment, the block of land in the said District of Algoma indicated in red on the accompanying plan, be reserved for the purposes of the Commission, of which block the following is a description:

"All and singular, that certain parcel or tract of land, lying, being and situate in the District of Algoma and Province of Ontario, and containing by admeasurement 4,464 square miles, be the same more or less, and more particularly described as follows, that is to say: Commencing at a point in the boundary line between the District of Nipissing and Algoma, which point is marked by the 138th mile post placed by O. L. S. Niven in the Survey of the said boundary line; thence due west along the southern boundaries of the townships of Tully and Fraser twelve miles more or less to the southwest angle of the said township of Prosser; thence due west, astronomically, fifty miles; thence due north, astronomically, seventy-two miles; thence due east astronomically sixty-two miles more or less to the 210th mile post placed by O. L. S. Niven in the boundary between Nipissing and Algoma; thence due south astronomically along the said boundary line between Nipissing and Algoma, seventy-two miles more or less to the point of commencement."

(3) That there be at once set apart under the Act as it now stands, certain lands in the District of Nipissing, of which the following is a description:—

"All and singular that certain parcel or tract of land situate in the District of Nipissing, containing 1,620 square miles more or less, and more particularly described as follows: Commencing at a point in the boundary line between Nipissing and Algoma, which point is marked by the 126th mile post placed by O. L. S. Niven in the survey of the said boundary line; thence due east eighteen miles more or less along the southerly boundaries of the townships of Matheson, German, and Stock to the southeast angle of the township of Stock; thence due north six miles more or less along the westerly boundary of the township of Taylor, to the southwest angle of the township of Walker; thence due east twenty-four miles more or less along the southerly boundaries of the townships of Walker, Wilkie, Coulson, and Warden, to the southeast angle of the township of Warden; thence due north astronomically thirty-six miles; thence due west astronomically forty-two miles more or less to the 168th mile post (placed by O. L. S. Niven), in the said boundary line between the districts of Nipissing and Algoma; thence due south along the said said boundary line between the districts of Nipissing and Algoma forty-two miles more or less to the point of commencement."

"Also all and singular that certain parcel or tract of land lying, being and situate in the district of Nipissing, and containing by admeasurement 252 square miles, more particularly described as follows:

"Commencing at the said 168th mile post placed by O. L. S. Niven in the meridian line forming the boundary between Nipissing and Algoma; thence due east astronomically along the northern limit of the block hereinbefore described, six miles; thence due north astronomically forty-two miles; thence due west astronomically six miles more or less to the 210th mile post placed by O. L. S. Niven in the boundary line between Nipissing and Algoma; thence due south astronomically along the said Nipissing-Algoma boundary line to the point of commencement."

The above descriptions include 6,336 square miles of territory, (without allowance for water area and convergence of meridians). From this there should be deducted a certain amount, approximately 144 square miles, for land already granted under the Military Land Grant Act, leaving 6,192 square miles for the purpose of the Commission.

Accompanying this report is a plan of part of Northern Ontario, on which is shown the areas herein described; also a number of extracts from reports of surveyors with respect to the soil, timber, etc., within this territory.

I have the honor to be, Gentlemen,

Your obedient servant,

"A. W. Campbell,"
Assistant Commissioner of Public Works.

TEMISKAMING AND NORTHERN ONTARIO RAILWAY COMMISSION.
